

Vampire The Masquerade A XXX Parody Jump

V1.0 By u/Only-Cellist2989

Welcome to the World of Darkness you poor soul. Wait, something is wrong. This is way hornier than last time I was here right?

...There is no other way to say this, you're in a porn parody of the "normal" world of supernatural monsters. You are now a sexy vampire; I guess not really sure how to go from here are you? Either way, Kindred, you are going to need to hide what you are from the very people you are going to seduce. The STD rate is shockingly low considering the amount of people who are having weekly orgies. So I guess go have fun and avoid the sun. This is just so wrong. (But it feels so right.)

You receive **1000 cp** to help you ~~survive~~ fuck this world of darkness.

Origin:

The origin affects Clan, age, and part in the world. Gender can be chosen freely.

The Eternal Survivor: Holy crap that's a lot of ass you have had in your time in this world. I guess being a pretty Toreador can really pay off or just keep your bed warm. You still have high humanity for a 12th generation Kindred with some still-living connections to the mortal world. If you choose to start in Boston then you are replacing Emem Louis for his role in the story.

The Jaded King: Be prepared for 300 years of unlife memories. You are a 10th generation Ventrue who is going to start feeling the Beckoning shortly. If you choose to start in Boston then you are replacing Galeb Bazory for his role in the story.

Doomsaying Prodigy: Oh boy, this is going to be a freaky little ride isn't it? You are a 12th generation Malkavian with a little over one hundred years of very spotty memories. Yes, just like Leysha you have a daughter that may or may not be just in your head. If you choose to start in Boston then you are replacing Leysha for her role in the story and get Halsey as your "kid".

Suckhead (Drop-In): Oh don't start with me, that is the email login used by the protagonist of Bloodlines. Either way you are now replacing them so I hope you enjoy waking up in the Nocturne Theatre right before your sire loses their head. As the backstory of the protagonist is mostly up in the air, you can take this as a drop-in and it would change nothing (except for Samantha's quest). You're 8th generation and can pick one of the 7 available in Bloodlines.

Locations:

Just pick one.

1) Boston: The year is 2019, if you're any of the first 3 origins then your start is preset by the story. For the last origin feel free to wake up anywhere in the only interesting part of Massachusetts, just maybe avoid The Loft. I have a bad feeling about it for some reason.

OR

2) Los Angeles: The year is 2004, if you're a suckhead your start is set. If you're any other origin you may pick anywhere in the greater Los Angeles area city limits. Want to start in Beverly Hills, Santa Monica, Downtown, Chinatown, or even deep in the Valley? The world city is your oyster.

General Perks:

Kindred [Free & Mandatory]: Now a descendant of Cain, cursed with a thirst for blood, vulnerability to sunlight, unending lust and immortality. ...something there wasn't like the others. This will count as alt-form after this jump so it's not like it matters right? Get one dot in each of your clan Disciplines.

Sex Vamp [Free or 100]: This is a porn, so we have to make some changes to the Kindred of this world. First, if it's for having sex the *Blush of Life* becomes free. Second, not all the bodily fluids turn into blood anymore. Penises still shoot cum loads, pussies still squirting & gushing, and if you're into golden showers Kindred can still urinate. Your vampire alt-form will lose this post jump unless you pay to keep it. You naughty Kindred, you.

Prey Detector [200]: You have the sharpened senses of a true predator and a massive pervert. Maybe you prefer genuine blondes, MILF's, virgins, drunks, gingers, twins, twinkies, BBC's, etc. You'll be able to catch their scent from a great distance and find your preferred prey. You wouldn't necessarily be able to find a specific person if there are others nearby who fit the same build. In other words, if John Cho is in a room full of asian men you wouldn't be able to find his scent. But if we're looking for Ryan Gosling in the same room, he would stand out like a sore thumb both to your eyes and your nose. You can choose to change your preferred prey you are tracking once every hour. Just have the category in mind when activating this power. Enjoy finding the big tiddy goth of your dreams & eating her.

Blood & Sema [400]: As this is as much a porn setting as it's a VTM setting, let's start making things a lot more salacious. From now on it's not just your blood that carries the power to blood bond and sire. Your male ejaculatory or vaginal lubrication when ingested or injected into the future thrall will have the same effect as consuming Vitae straight from your arm. Yes you could fuck someone 3 times and find them cum-bonded to you. Other than the source all the other blood bonding rules apply.

Futanari [600]: Do you want any woman you Sire to grow an oversized cock to go with big tits? Or maybe you want any man you Sire to have a tight little pussy to go with those pectoral muscles? Well whatever your fetish is, this can reshape your new Childe to fit your odd tastes. This is a free one-time body reshaping per victim's death. As I am a nice(?) guy, I am throwing in *Malleable Visage*, the **Vicissitude** Discipline, just in case you want to make some minor adjustments after they turn. You kinky horndog.

The Eternal Survivor Perks:

Legs for days [100 Free The Eternal Survivor]: You're a knockout; at least an 8 out of 10. With the right makeup, outfit, and the *blush of life* you could maybe even be a full 10. For an extra **100 [undiscounted]** can be a straight up 10/10. For another **100 [undiscounted]** on top of that you can be supernaturally attractive 12/10. Expect to turn heads and draw attention. Don't mind the wolf whistles, that's normal.

Emissary [200 Discount The Eternal Survivor]: People both figuratively and literally just open doors for your sexy little ass. Need to get into a club, party, meeting, orgy, or conference and don't have an invite? No problem. The door guards will just let you in like you were invited with full diplomatic immunity. Once you're inside don't expect the effect to persist, as it is just meant to get you in the door, not keep you inside. Before you ask, no, it can't get you into military bases or any top secret place, just bougie or corporate.

Bite Me, Drink Me, Spank Me! [400 Discount The Eternal Survivor]: Every Kindred except the Giovanni clan has a Kiss that has the mortal prey feeling ecstasy. You, on the other hand, are on a whole 'nother level entirely. Your Kiss brings your prey to a point of pure orgasmic pleasure that takes at least an hour to fully come down from this climax. The normal Kiss always has a chance of making a Blood Doll, but you should probably expect to have a much higher addiction rate unless you start wiping memories. And probably the area around your prey's crotch, too. Clean up on aisle 69!

Twilight Twink [600 Discount The Eternal Survivor]: Just like in those shit movies you are only good at moving fast and looking good. So that shows in your Disciplines. *Cat's Grace, Fleetness, Traversal, Blink, Awe, Lingering Kiss, Entrancement,* and

Melpominee are all unlocked from the moment you start. As a purely optional side effect, you can choose to have glitter fall off your body every time you use **Celerity**. Because you have the body of a killer, dammit.

The Jaded King Perks:

Badass in a Nice Suit [100 Free The Jaded King]: You look both sexy and imposing in any business suit. Giving off an aura of sophisticated charm opens doors in the business world and spreads people's legs. Any suit you wear never gets any stains or rips in the fabric. It doesn't make it indestructible, just something that would make the Kingsman Tailor Shop of London proud.

Fear Boner [200 Discount The Jaded King]: This is going to sound crazy, but you're both beautiful and terrifying to your prey. Any time you're hunting a poor mortal through the forest, a dark alley, or any place really, if they are afraid they are now equal parts horny. So the more frightening you are, the more scare-roused they will become. Expect a lot of prey to have trouble running with confusing sexual fantasies, rock hard cocks, or wet panties.

I Believe in Sexy [400 Discount The Jaded King]: You're immune to the power of True Faith unless the person using it is completely naked. Post jump it doesn't matter if they are naked, you're fully immune.

Kings of Old [600 Discount The Jaded King]: Being an old school vampire comes with a lot of extra knowledge and powers. So let's give you a better shot than Swansong would normally give and fuck that limit to only 5 abilities per Disciples. You have far more access to **Dominare**, unlocking *Cloud Memory*, *Compel*, *Slavish Devotion*, *Mesmerize*, *Domitor's Favor*, *Forgetful Mind*, *Submerged Directive*, *Implant Suggestion*, *Rationalize*, *Tabula Rasa*, *Mass Manipulation*, and *Terminal Decree*.

Doomsaying Prodigy Perks:

Sugar-Fangs [100 Free Doomsaying Prodigy]: Any time you give someone an affectionate nickname it will both stick and they will not be opposed to it, no matter how dumb (or even sexual) it is. Isn't that right, Pillowpants?

Hide-and-seek [200 Discount Doomsaying Prodigy]: You're an adept user of **Obfuscate** aren't you. Starting with *Cloak of Shadows*, *Unseen Passage*, and *Mask of a Thousand Faces* all unlocked. Unlike normal, your *Mask of a Thousand Faces* automatically adapts itself to fit your needs even if that would conflict with multiple targets. One guard would see you as another guard, the other would see you as a member of the FBI, and the nurse would see you as a doctor. Whatever is in their mind has both the right to be in that area and order them around.

The Future [400 Discount Doomsaying Prodigy]: You can see cryptic fragment visions of the future whenever you have an orgasm. The visions are very hard to understand as they are made of a boat load of symbolism. The time frames of the visions vary from a week from now to a year from now. Seeing pieces of the meta plot of the jump you're in can be very helpful or just a big distraction. Post jump you can just activate the power whenever you like, not just when you feel the little death.

Broken Mirror [600 Discount Doomsaying Prodigy]: The whole amalgam of two Disciplines to make **Dementation** is fucking stupid. That whole part of V5 isn't my favorite so let's change that, but with a porn theme. You are now starting with *Incubus Passion*, *Passion*, *The Haunting*, *Silence the Sane Mind*, and *Lust*. If you don't recognize that last one it's the porn themed one. Those who are near you (about 30 feet) are filled with maddening amounts of lust. Turning them temporarily into insane sex addicts falling into spontaneous orgy. Like the old saying goes, crazy girls are the best in bed so why not make everyone crazy good in bed?

This doesn't guarantee they would have sex with you in particular, just saying.

Suckhead Perks:

Best Blowjob [100 Free Suckhead]: Like the name says. You have the skills, no gag reflex, and no need to breathe, making you capable of giving the best blowjobs possible. As the old saying goes, you haven't lived until you got head from a vampire. What, you don't like big dicks in your mouth? You know you could also use this to perform oral on a lady without having to take a breath or slow down.

Core Body [200 Discount Suckhead]: Do you know that *blood buff* isn't meant to increase the size of your sexual organs like your dick, boobs, or pussy? For whatever reason you somehow can and it will last the same amount of time as *blood buff*. I am throwing in two levels of **Potence**, **Fortitude**, and **Celerity**. Now go inflate yourself like a balloon!

Call the Furies [400 Discount Suckhead]: Ok again not going to judge...much. You have access to very odd and incredibly dangerous abilities for you and/or the target. But first let's start with the normal abilities *Nightwisp Ravens*, *Burrowing Beetle*, and *Spectral Wolf* of the Discipline. The last of **Animalism's** abilities unlocked here is *Call the Furies*, the power to summon one random Garou that is now going into heat. You have zero control over this murderous rape monster, but it will go after the first thing it sees after summoning. It disappears after about 30 minutes unless you somehow get it to have sex with you then it will disappear right after you cum. Live the werewolf fucker fantasy you've always wanted, you sick fuck!

Embodiment of Lust [600 Discount Suckhead]: Let's start with unlocking the Protean abilities *Gleam of Red Eyes*, *Feral Claws*, *Earth Meld*, and *Shape of the Beast*. The last ability is something not in the vanilla setting: *Lust Form*. It's a lot like Ming Xiao true form, but less built for combat and more full on tentacle hentai monster with multiple dicks, mouths and pussies. If you also have **Blood & Semen** and **Bite Me, Drink Me, Spank Me!** expect to turn a lot of "normal" people into monster fuckers. Just like that movie *Shape of Water* did to a whole lot of people. Mostly fangirls on Tumblr.

Items:

The Eternal Survivor Perks:

The Scion, the Bitch, and the Wardrobe [100 Free The Eternal Survivor]: What the hell is even the point of living forever if you're not going to dress to the nines? You have a closet that quite literally has an outfit for any occasion. It looks like an old fashioned wardrobe but the inside is a hammerspace that you can reach into to find your perfect outfit. A word of warning: don't stare too long into its abyss as you never know what may stare back. Probably a Christian allegory fantasy land.

Jazz Club [200 Discount The Eternal Survivor]: This is unofficial Elysium so don't expect Kindred to behave in this club if you let them in. The club has a full staff of mortal NPC's running it and earning you a small profit.

Primogen Contacts [400 Discount The Eternal Survivor]: From art dealers, art galleries, auction houses, appraisers, fashion designers, music studios to adult entertainment stores you have contacts to them all. The contacts vary to people that are in debt to you, businesses you're part owner of, and all the way to actual friends. Your control of the artist community in the city is shocking. So not that different from rich people in our universe's art world, really.

The Jaded King Perks:

Tailored Suit [100 Free The Jaded King]: A perfectly made tailored suit made by the Kingsman Tailor Shop of London. Wait isn't that from....never mind it doesn't matter just enjoy your well made suit.

Domain [200 Discount The Jaded King]: A small piece of the city under your full control and rights to the mortals in the area. This can be used for hunting or just so you know the places you own aren't being fucked with by the other Kindred.

Diamond Merchant [400 Discount The Jaded King]: Control of large expanses of the diamond trade in the city. You may not have the power and money of the likes of De Beers, but you still have millions of dollars in the bank and control of the city's shiny rock trade.

Doomsaying Prodigy Perks:

Teddy Bear [100 Free Doomsaying Prodigy]: This Teddy Bear when handed to any small child will instantaneously make them calm and sleepy. Great for shutting a bratty vamp kid up. Or a bratty bottom.

Padded Room [200 Discount Doomsaying Prodigy]: Not just a simple haven, but a place that suppresses the Malkavian clan weakness and that of any other kind of mental illness anyone who enters the room may have. The effect ends the second you or they leave the room.

Hair Removal Spray [400 Discount Doomsaying Prodigy]: A can of what is a special kind of pepper spray laced with silver and werewolf poison. This will drop a furry in about 30 seconds if you get it in their mouth, eyes, or nose. Same goes for werewolves. Hell, if you just spray this around you any wolf with a sense of smell will avoid you like the plague as they can sense the toxicity in the air.

Suckhead Perks:

Shit Place [100 Free Suckhead]: An apartment above Trip's Pawnshop on Main Street in Santa Monica. Yeah depressingly rundown state, but at least it's safe from the sun and the eyes of the curious. The rent is fully paid up for the next 10 years. It really needs to be cleaned, so get to it. I mean, unless you're into that. It will follow you into the future setting and will always start out crappy and dirty.

Sheriff Sword [200 Discount Suckhead]: It is massive, several meters long and very wide sword like something out of Final Fantasy 7. The blade deals aggravated damage, is unbreakable, and weighs a lot.

Box of Lucky Charms [400 Discount Suckhead]: A box full of seemingly random stuff like a Rune of the Third Eye, Daimonori, Fae Charm, Braid Talisman, Zharalketh, a glass dildo, Mummywrap Fetish, Tarulfang, Heart of Eliza, Key of Alamut and The Odious Chalice.

Companions:

Normal rules apply to max 8 companions.

Canon Asshole [100 each]: You want to recruit some? Pay the CP and you will meet them at the best possible time and they will see you in the best possible light. It's not a guarantee, but it's the best you're going to get. If you picked Boston then it can be any Kindred from Swansong on the flipside Los Angeles lets you pick any Ghoul or Kindred from Bloodlines.

Old Friend(s) [50/100/200]: Import a friend into the lusty nightmare. They get 600 CP to spend how they like and can pick any clan from the core book (V20 or V5 you choose). Just in case it wasn't clear, one costs 50 CP, up to four costs 100 CP, and up to eight costs 200 CP.

Blood Doll [50/100/200]: A mortal that REALLY enjoys having you feed on them. The only reason to pay CP for them is so you can pick their appearance, personality, and maybe make them a Touchstone if you don't already have one in this world. If you want to make them into a ghoul you can and they wouldn't be opposed to it, just not all that useful. Just in case it wasn't clear, one costs 50 CP, up to four costs 100 CP, and up to eight costs 200 CP.

Drawbacks:

you may take up to 600 CP worth of drawbacks for extra points.

Supplement Mode [+0]: Have you ever wanted to add lascivious monsters to any other Jump? This modifies the original world, adding the horny World of Darkness monsters, making it a fair bit more interesting to say the least. Fanwank responsibly or don't, just wanking really.

Himbo/Bimbo/Thembo [+100]: Just google it if you need a picture, just not at work. You have been transformed into an almost plastic-looking sex doll to the point that you have hit the uncanny valley. But the looks come at the price of your intelligence. You're a bit simple. Honestly in this world it may not even be a big deal, but it will still be degrading right?

Predator type [+200]: You can only feed from some mortal having sex so no animals or supernaturals. If you try to feed someone that doesn't match this blood will burn in your

mouth like acid. It should be that hard to find people having sex in this world just be careful as when you frenzing your beast will not keep that in mind.

Monster Fucker [+400]:

Any time you encounter a non-humanoid looking monster you are overwhelmed with a strong urge to fuck even if it puts your life in danger. First time seeing a Tzimisce, Hengeyōkai, Garou, Kuei-jin (henta form), and or Gargoyle you will find yourself randy as hell. This only happens the first time for each creature. Unless that's your kink.

7th Tradition [+600]:

For the remainder of the jump the Camarilla are adding a new rule: Chastity. If any one catches you having sex you will have a blood hunt called on you. Do you remember that part

about the “unending lust” from the Kindred perk? Yeah crank that up to 11.

Ending:

Good job not meeting the final death now pick a thing.....and please put your pants back on for the love of god.

Stay: Staying in this trash fire of a world?

Go Home: Probably a good idea after all this.

Continue: Sounds like fun.

Notes:

- Special thank you to my wife for the spell checking. (*I wouldn't mind so much if half of this jump didn't kinkshame me!*)
- At the end of the jump all clan weakness parts of the mandatory perks, Drawbacks, and light sensitivities are removed from you and any Companions you may have. This doesn't apply to anyone you sire later.
- Disciplines learned outside of perks gain fiat backing at the end of the jump
- The origins The Eternal Survivor, Jaded King, and Doomsaying Prodigy Disciplines all work on the modified V5 rules used by Swansong. This includes the hunger rules, clan weakness, and blood potency V5 added.
- The Suckhead origin is going by modified 3rd edition rules used by Bloodlines for Disciplines, clan weakness, and blood pool.
