

AMAZING GACHA SUPPLEMENT V.1

So, Jumper-San is here for Gacha? Or are you just
Feeling lucky today?

Maybe it's a special occasion or you want to...simply
gamble ...or have fun or simply lay back and let your
new waifu or husbando do all the work?

Or maybe get some cool item to show off in your next
jump?

Regardless of what it is.... we have got you covered!.
The brand new gacha supplement is here!

But first we need to clarify some rules for the
Amazing Gacha Supplement:

- a) Each spin will cost you 50 CP.... or you can go
premium for 100. But more on that later...

- b) No perk, item, power or anything can interfere with the gacha ...nothing at all. No discounts tokens or probability manipulation to be used here. (Note: You can use extra CP if you have it from some other supplement. But not something broken like infinite CP. The Cap for using extra CP, which is not from the jumpdoc itself is 800)
- c) There are no limits to how many spins you can do. Go nuts or go broke...we don't care.
- d) All things brought from here are fiat backed. Plus, you don't need to pay to bring any companion you gain from here to any jump. We have the interdimensional jumps pass! (* You still need to import them to a companion slot and pay points if you want them to take perks or anything. Any character not in a companion slot is counted as a follower, they will automatically appear every jump.)
- e) Finally, you must take the Gacha before the Jump. Also, known as pay beforehand! (Note: You can technically go negative CP, but this means you will need to take drawbacks to repay the gacha. In case the jump doesn't have enough. You can consider it a loan. And repay on the jump after your next one!)

Time to Spin:

Now let's determine first how many spins you want to do first, frontload the points, from (50 points for 1 spin to 400 for 8 or 800 for 16 spins). Every Spin will give you a Gacha Ticket, you can accumulate and use them in our special gacha shop after this.

Roll 1d 20 + 1d6 per spin for your results. (Or just search for a 26-sided dice, you can find it online).

(1-9) 1-Star Character or Item: A...regular...basic completely powerless person. Hey, at least they can help you do errands and stuff. Or maybe they are pretty maid or cute butler! We all can use some help, right?

Regardless they are equivalent to a background NPC character, that appears in one episode with other stock characters. Or conversely maybe you would like an item? Get a basic item for the setting you are about to enter. A regular Pokeball, a kunai (Naruto) or basic Student Uniform (Jujutsu Kaisen or any other Anime). You get the idea.

(9-16) 2-Star Character or Item: Not so basic anymore. Congrats Jumper, they are the basic characters for their appropriate settings. Which basically means, if it was Naruto they would be one of the Ninjas who got beat up by Madra during his assault on the Shinobi Alliance(a weak Chunin with no special background), or one of the Trainers or a Grunt you beat in the starting of any Pokémon Game. In Jujutsu Kaisen Terms, a weak grade 3 Sorcerer with no special relation to the main cast or even supporting cast. Feel free to design the exacts of your companion (gender, personality, looks). Or get them from a Canon or Fanfic if you want.

For items. We are now talking rarer items than regular ones, unique but still accessible to those who can get them. A great ball from Pokémon or something like Slaughter Demon from Jujutsu Kaisen or the Katanas from Demon Slayer. You can even opt to get a one bedroom apartment instead! It will be clean and plush.

(17-21) 3- Star Character or Item: Congrats Jumper, you made it. We are now in Canon territory!

Pick any Character that isn't Main Cast or among the main villains or the important supporting cast. (Like apart from the Team 7, Or part of Nazarick, or JJK Gojo Squad etc.)

To give you a fair bit of idea let's take example from Naruto first. You can pick Kushina from her relatively younger years. When she had not married Minato and but was an adult still, around entry level Jonin?. Or someone like adult Hinata, after the War ended, post a year or two of 'The Last' movie timeline. But no picking broken characters like Madara, Sasuke or Naruto, no matter the timeline.

In Pokémon Terms, we are talking about named characters' during the starting or mid journey point, basically any trainer that doesn't actively hold power equal enough to have all 8 badges and challenge the Elite 4. (You could potentially get someone like Sonia, who has retired somewhat after becoming an adult. Or Professor Juniper).

In Jujutsu Kaisen terms we are talking a bonafide semi- Grade 1 sorcerer. Even canon characters are included. I am sure Utahime would appreciate Jumper healing her scar. As always feel free to design new characters if you want to.

For items. You can get something truly rare and fine here now. Like the Dragon Bone from Jujutsu Kaisen, a truly fine blade, or something like a Legendary Item from Overlord Anime. You can also opt out of an item and get a Penthouse instead. Or something like a set of any three cars that cost 3 million dollars or less.

(22-25) 4- Star Character or Item: Clap! Clap! Clap!

Oblations for the jumper. Because we have finally ascended to get some truly powerful companions. They may not be the strongest of their settings or the main character or the big bad villain. But they sure pack a heavy punch. Pick any character that hasn't completed their full potential arc, isn't the MC, or one of the Final Boss type villains.

For settings like Naruto we are now talking Kakashi (without Obito's Mangekyo) level characters. Or Might Guy (only till 7 gates) type of dudes. Heck, you could even pick Itachi Uchiha, just...be sure he doesn't die of his sickness. Even Adult Sakura (from Boruto) comes here!.

In Pokémon terms, pick any Elite Four Member, Gym leader etc. Anyone that doesn't classify as a Champion currently.

In Jujutsu Kaisen Terms we are now talking bonafide first grade sorcerers or even Semi Special grade ones. Have fun taking Nanami across Japan.

In Item terms, we are talking about Special Grade Cursed Tools. Or a single Divine Item/Weapon from Overlord. We can potentially go broken here. Or opt out for a Grand Castle that makes 6 Star Hotels look boring.

(26) Five Star Character or Item: How much did you spend to get here? Or...were you truly lucky?

Regardless, you have now beaten the odds. You can pick any character now. Kaguya herself. Or Gojo Satoru or Sukuna. Champion Level trainers or All Might at his peak.

Like always you can also make OC's or import them. If made this way their beauty will be at divine levels if you so wish, like Aphrodite herself.

As an added benefit. We will grant you 600 free Cp for this character in all future jumps. They can also pick an origin for free, gain all discounts or any other stipend etc.

If you opted for an item instead. You now have something like an Masterball but better. Or any World Item from Overlord. Hell, you could possibly have something like a complete inverted spear of heaven (Not the broken looking one Toji used). Basically, the best item from the setting but better. Or a complete set of items if appropriate.

Amazing Gacha Shop:

Use your accumulated Gacha Tickets to Purchase items here, as you may remember you got one ticket per spin, so have fun:

Cosmetics/Skins:

Any Costume or Skin bought will have a special benefit. No one will notice or say anything beyond a wow or appreciation, no matter what costume or skin it is.

Both the above perk and the Cosmetics you buy, can be Toggled on or off at will. Buy as many as you like.

1. Lewd, Beautiful or Cool Costume (as per your choice): This is no ordinary costume. This is the dream costume for any jumper to have for their companion. Designed perfectly for your companion, it will cling to their every curve or...make them look simply fabulous. Colours can be changed, and the outfit self-cleans every day. From the most Exotic Dress to pretty Beachwear to the most.... Erotic stuff?

Take your poison, if god can make it, you can have it.

Note*: It doesn't mean if you design an outfit having a Legendary sword you will get it, simply you get a replica looking the same but at the level of a normal sword. **(Costs 3 Tickets per outfit)**

2. Lewd, Erotic, Cool, or completely weird Skin (your choice): This is no mere costume Jumper. It's an enhancement of your companions looks. A mere 1 star with the correct skin will become a princess capable of wowing 100s of people. A four-star companion would bump up to five star in looks with the correct skin. A

five star would embody the term goddess, nations would go to war over her. Conversely you can make them super scary or like a war god ready for conquest. The skin can make them look like any species or any form factor you like with the right skin. It can change their skin texture to divine levels or hair to be like the kind you expect from unrealistic or supernatural standards. Go Bonkers. **(Costs 8 Tickets per Skin).**

3. Weapon or Item Skin: Same as above but applied to a weapon or item. It's cheaper. **(Costs 3 Tickets per Weapon Skin)**

Other Items:

Maybe you do not like the Cosmetics at all? Or maybe you blew all your **CP** and still didn't get a good character?

Don't worry. We have some pretty...interesting buys for you here.

1. Legendary Maid (Equal to a Four-Star Character):
Behold. The best maid ever, not only she is beautiful and has insane looks but she is also hypercompetent in cooking and all other tasks expected of her!
She gains 200 free CP each jump, can take benefits of an Origin and 100 Item Stipend too! **(Costs 8 Gacha Tickets)**
2. No fighting here! Hey watch out-: Seems we had some mix up Jumper, my associates have...botched the second slot for our shop. But well anyways. Pick any anime or movie or novel character that is within

human limits. Mostly anime or manga characters that don't have a focus on shonen type battles or fights. They still may have special skills, like being a genius pharmacist or very intelligent. Or maybe you just like how they look.

Pick any Character satisfying this condition. Get them. **(Costs 5 Gacha Tickets. Limited Stock of 20, refreshes every 10 jumps.)**

3. Cultivator from far lands (Equal to a Five-Star Character): Maybe a Jade Beauty has been attracted from the lands of Wuxia or Xian Xia to come to you. Or maybe you woke up in the wrong direction and the Emperor of Man Kind took a liking to you. Regardless, you finally have...a coveted 5 Star Character Jumper. **(Costs 32 Gacha Tickets. Can only be bought once.)**
4. Godly Item (A Five Star item): I don't see the allure of having broken items. But here ...since you paid a premium price you can buy something truly amazing. The Philosophers Stone, a never-ending vial of Ever youth potion to grant you agelessness, or a sword which can split apart mountains. Have fun regardless. **(Costs 24 Gacha Tickets. Only one purchase.)**

Finally. Have you made all your purchases? How much CP did you spend? Did you get what you wanted?

Regardless. Time for your next Jump. The Characters you got will be waiting for you once you are dropped into the next world. Right beside your spawn point. And the items will be in your warehouse. Have fun.

And until...next time...we are sure...if you keep rolling you will eventually get everything you want.

Note*: All companions you get from this Gacha are dead loyal to you. Even omnipotent beings cannot get them to betray you.

Some additional, optional rules you can activate:

1. Alters : Just like how in Fate Grand Order we have alt forms of servants. You can also opt to get alt form of any character you want.

Like Makima but in a different flavour, like she is actually nice and kind or something. Or female Naruto. Anything really. This also helps if you don't want to mess with a setting but really want to have a certain character.

You can use this to get the same character multiple times. But in different aesthetics (hair color or looks or anything) or personality types or mix of both. Its gacha after all!

2. Premium Summons: Each Summon now costs 100. Add +1 to any of your rolls. But this caps you at a summon limit of 10. We also like to call it pity party.
3. Jumper is a Wallflower: This is more of a drawback. It essentially makes it so you cannot take any perks or items from a jump doc but only rely on your companions or partners. Of course, you can still get things like becoming ageless alongside your companions or cosmetic perks or anything that doesn't have anything to do with combat at all. (Weapon crafting counts as combat related, but

making healing potions or cooking doesn't, minor regeneration perks aren't combat related and so on.)

But as a upside. You now have infinite companion slots if you already didn't have them. And now all your rolls have +1. Have fun!.

4. Family is Everything: So, this essentially allows you to design your exact relationship with each summon. You can make them be in obsessive undying love with you or anything else.

You can even design their interpersonal relationships. Like maybe one of them is your first wife. Then you might have an older sister or something. Usually its self-explanatory but I thought I should add it anyways.

5. I will pay extra: Pay a premium of 20 points for any character you got here. We will create a brand-new companion slot for them and import them to that slot already. Can be bought multiple times.

Ending Notes:

Apply this supplement to any jump you like. You can only do gacha before entering any jump though. Also, if you already have a perk which affects companion slots in anyway or extra companion slots because of any other supplement, then feel free to use those slots or perk to add companions from this supplement to those slots (like for the perk from the Harem Supplement). The Gacha is

compatible with perks affecting companions in all ways and manners.

You can also use this with Gauntlets.

The images in this doc are from the Manga, Learning With Manga FGO. So all credits to them.

It was inspired from the Universal Gacha Supplement. But I wanted to add my own flavour and spice to it. Feedbacks are always welcome, since it's my first supplement or jump doc really.

Feel free to repost this Jump anywhere you wish, reddit or otherwise, but please do not edit without my permission.
