

Your Benefactor Is A Streamer!?!

By: PriorPossible834

Hey Dude... you seem cool enough, want supernatural powers?

...

Hmm? Oh don't look at me like that you know what Jumpchain is- or did you not expect me to be streaming this to my countless trillions of Omnipotent Followers?

*Look a Girl's gotta earn spending **CP** somehow and I didn't want to start a OnlyROBs so this was the best option, you'll still get the chain of your dreams- and I'll make it more interesting to get some sweet donations, if there's not a ton of engagement I'll just send you home no harm, no foul.*

Sounds Good?

If you accept the deal you may continue... if not... go do something else with the rest of your day and know she decided to stream a Griffith Chain instead.

*You start with **0 SP (Stream Points)** to customize your experience, you must end with **0 or more***

Basic Jumping (Free)

You know what this is, every 10 years you'll travel to a new world yada yada yada, and if you die I'll send you home instead of just... letting you die I guess... man, Death is a weird concept I don't know how you mortals do it.

Perks (200)

*H-hey! Don't look at me like that! Some of those more established Nepo-Baby Jump-Chans can afford to just offer **1000 CP** willy nilly for their Jumpers to spend on Perks but I'm not made of money, you'll have to let me make your chain a little more interesting to make it worth it for me.*

Items (200)

*Second verse same as the first honey, besides are you even going to miss the Item Section? I used to splurge but then you guys wouldn't even touch it... if you want me to renew my subscription you'll pay up on the **SP***

Companions (200)

*Do you have any idea how expensive it is to pay for **8** Mini-Jumpers? There's not some kind of bundle discount you know! If you take this multiple times you can raise your companion limit I guess...*

Drawbacks (200)

All that CP that Drawbacks produce? It doesn't grow on trees! The last thing I want is some boring Turtle Jumper farming extended stay Drawbacks forever.

Supplement (100)

*For **100 SP** a Pop I can crack open one of those Supplements that get all the views these days, naturally I'm not going to give you anything that would let you kill or replace me though.*

Out Of Context Supplements (100)

I don't really like them... crossovers are already their own separate genre of stream and I don't want to step in Zeltrech's Turf, but each time you take this option you'll be able to take a Out Of Context Supplement every 5 Jumps.

No Gauntlets (200)

None! *If you choose to take a Gauntlet Jump you'll get your full budget and all your purchases.*

Romance (200)

*Ew... fine if you really want I can **slightly** edit the strike zone for any of your favorite Waifus/Husbandos so they'll at least give you the time of day. If you play your cards right this could let you get the fleshy mass of your dreams... you frickin weirdo.*

Donor Goals (300)

*Some of my audience has unknown and ineffable agendas that they want to spread across the Omniverse, it's kinda lame but if you take this option and they Donate enough I'll pass their requests off to you as special Scenarios. If you manage to complete one I'll give you **300 Points** to spend however you want (even if you didn't buy Items, Perks, or Companions)*

Conventional Badass (300)

*I'd actually appreciate it if you bought this one... it'd really save my wallet from you grabbing Perks- and it'd save **you** the trouble of Budgeting and junk. This basically gives you the potential to learn any power system you come across. And if it's something like My Hero Academia where power is dependent on Genetic RNG... I'll give you something pretty cool, not enough to be **Superman** but enough that you could pull off a Spider-Man impression you get me? This also gives you the ability to train **anything: your** luck, your hair color... mewing would actually work for you, the whole shebang!*

Ad Read (+100)

Nothing too major... but in between Jumps I'll just ask you to read a few ads for my sponsors, maybe even encourage the audience to subscribe.

Merch (+100)

I want the rights to your likeness, I'll make T-Shirts, Plushies, Body Pillows Huh?

What was the last thing I said?

Plushies of course, you must be hearing things.

Chatbot (+100)

I'm going to scan your brain and post it to that absolutely perfect AI Chatting Site we ROB's have. It'll be just like talking to you... and you'll probably have some weird fans doing impure stuff but that's kind of what fame is.

Collab (+100)

*I've been wanting to Collab with some friends for **ages**. **If you** take this I'll put you in the same Jumps as a few of their Jumpers every now and again so we can see what you guys get up to. And... These are my friends so please don't be mean to their toys.*

Chat Access (+100)

I'll grant you access to my Chat for 1 hour every day and you'll have to spend that time answering any of their questions and otherwise engaging with them- don't worry, this will never be when you're in any danger or when there's a pressing need for you elsewhere.

Catalog (+200)

*This one's just free... I mean you won't even notice. Basically what I'll do is I'll make a clone of your soul, make it a **really** pretty girl and sell it off to the Waifu Catalog, she'll have all your memories of course and the base clone will keep getting updated as you complete Jumps. Sure it sucks to be her but... what do you care?*

Sounding Board (+200)

I well... I want you to come to my house sometimes and talk about content ideas sometimes! It doesn't have to be weird or anything, and it can happen between Jumps... but I think talking to someone else might help my channel's engagement.

Dinner Buddy (+200)

Look... there's no way to say this and NOT sound weird... but my last partner was kind of an asshole and I think I'd like to spend some time hanging out with someone who's less of a dick. AND I don't want you thinking that I want to date a Mortal... or that I specifically chose you hoping you'd pick this option... but it could be kind of fun right?

Terms of Service (+200)

*Child Endangerment is a **big** no-no... so you'll never be allowed to directly harm anyone under the Age of 18 (with reasonable exceptions for sparring, or non-lethal force in life or death situations) and you'll be obligated to help any suffering minors you encounter as well... sorry if you wanted to be a villain ToS can be a bitch.*

'Fun' Companions (+300)

My audience really loves villains... like... it's kinda weird how much they've been asking me to do a Griffith Chain. I'd really appreciate it if you could help get them off my back by taking some kind of pure evil villain with you as a Companion.

Please?

I'll even edit their brains a little so they genuinely like and are loyal to you...

You can't stop them from being evil though.

Misogynist-Kun (+300)

Oh... this Guy, basically he's another Benefactor Streamer and he's always trying to show me up, he'll be sending his latest 'Alpha Male Chad' to all the same worlds as you to try to snipe my audience and force me back into being his co host... I'll genuinely be so happy with you if you make that Jerk look like an idiot.

Daddy Issues (+300)

*The Goddess of Daddy Issues herself... She's a Benefactor who is **constantly** breaking ToS with her 'League of Bad Dads' Project. I have **no idea** how her channel is still up... but she's dating Misogynist-Kun and I'd really like to see you kick over her sandcastle a bit. And I mean... Her whole premise is that she creates Jumpers to raise children so badly they can spread her domain. If that's not an acceptable pranking target I don't know what is!*

*What's her name? I... honestly don't know I've just been calling her a lot of not nice things in my head. Wait no do **NOT** try to talk things out just because she's Hot!*

Notes:

Hi there! PriorPossible834 here- this Supplement can also be considered a window into my troubled mind because *all* of these Benefactors existed in my Jumpchain Fiction prior to this Supplement.

This is one of those fun, junk food ‘done in a day’ projects I sometimes do... so... expect me to update as more things pop into my head

Also sorry to flashbang you with Ashley, she was literally the only mental image I had for the Goddess
XD
