

Cyberdimension Neptunia: 4 Goddesses Online

By saiman010

Introduction:

Welcome, player! Woohoo! 🎉 You've been chosen to be one of the super-special, extra-awesome beta players of the hit game series 4 Goddesses Online! You must feel pretty rad right now, huh? And if you don't, well... you should! 🎮 ✨

Get ready to dive headfirst into the gorgeous, sparkly, and totally epic MMO world of Algard! This place has it all: lush forests, breathtaking oceans, and probably a few overenthusiastic slimes that want to hug your face. (Don't let them. Trust me on this one.) It's all based on the legendary protectors of our world—Lady Purple Heart of Planeptune (that's me!), Lady Black Heart of Lastation (grumpy but cool), Lady White Heart of Lowee (tiny but terrifying), and Lady Green Heart of Leanbox (um, super sparkly?).

When you log in, you'll meet Bouquet, your Guardian Spirit slash walking-talking hint machine. She's cute, she's helpful, and she's like a search engine with a dress! She'll guide you through this crazy world, so treat her nicely, okay? Maybe toss her a flower emoji or something. 🌸

Before you start smashing baddies, it's character creation time! You've got a whopping 1000CP (Character Points) to build the avatar of your dreams—or nightmares, if that's your thing. Wanna be a towering warrior? A sneaky rogue? A... bunny mage? The power is yours! So go wild—just don't forget to leave some points for pants. Pants are important.

Once you're geared up and looking fabulous, grab your virtual gear and prepare for adventure! Algard is counting on you to save the day, defeat the baddies, and maybe score some epic loot along the way. Oh, and don't worry about the "forces of evil" part—that's just standard MMO jargon for "big flashy bosses with questionable life choices."

Starting Location:

Welcome to Character Creation Central! This is where the magic happens, and by "magic," I mean turning yourself into the ultimate avatar of awesomeness. You've got the power to design your virtual self any way you want—want to be a beefcake barbarian? Go for it! A bunny-eared mage? Heck yeah! A rock with googly eyes? Wait... actually, maybe don't do that.

Once you're all spruced up, you'll pick your starting nation from the Four Great Nations of Gamindustri:

- Planeptune: The land of advanced tech, cool vibes, and a certain someone's amazing charm. 😊
- Lastation: Think industrial revolution but make it sleek and edgy.
- Lowee: Snow, books, and a definite vibe of "Don't mess with me unless you're ready to lose."
- Leanbox: Green, gorgeous, and gamer-friendly—plus, it's got sparkles!

Don't stress about your starting spot, though—it's more like picking where you're dropping in a battle royale. The real fun is in the game world of 4 Goddesses Online!

Now, here's where things get super awesome. IRL? You've got a studio apartment locked and loaded for the next 10 years. That's right—no rent, no bills, just sweet, sweet gaming HQ vibes. It's fully stocked with snacks to fuel your endless grind sessions (and by endless, I mean until you unlock everything).

Not a fan of cleaning? No prob! You've got a weekly maid service to keep your pad spick-and-span. And food? Say hello to the food girl, your daily hero who'll deliver delicious meals straight to your door. She's basically a real-world NPC with an S-rank in Cooking.

So, you can chill, game, and live your best life without worrying about boring things like laundry or figuring out how microwaves work.

Ready to jump in? Then log in, take a deep breath, and prepare to make Gameindustri your digital playground. Whether you're battling monsters, questing for rare loot, or just showing off your avatar's snazzy outfit, this world is yours to conquer. Go forth and be fabulous, adventurer!

Races:

"Alrighty, it's decision time, Player 2! This is where you pick your in-game race. Oh, and since it's apparently all the rage in this world to create an avatar that's like a super-cool version of yourself, you'll totally fit right in. Now, listen up—these races below are still in the 'beta test' phase, so don't blame me if they go poof in the final version. (I mean, who knows what the devs are thinking, right?) Anyway, here's the lineup!"

Human [Free]

"The classics! Humans are the bread-and-butter, peanut-butter-jelly kind of race. They don't cost any CP, which means you can save those sweet points for skills and fashion! Humans are versatile, balanced, and great at almost anything—kinda like me, except without the goddess-y part. Oh, and you'll have no weird gimmicks or transformations to deal with, so that's a plus if you're lazy. Wink wink!"

Beastman [100CP]

"Who wants to unleash their inner furry? Beastmen are basically humans, but with epic animal traits. Think wolf ears, tiger claws, or maybe a bunny tail. (Cuteness overload!) Beastmen have sharp senses, enhanced strength, and agility that'd make a ninja jealous. Plus, they're great at sniffing out treasure or sneaking around. Just don't get distracted chasing your own tail, okay?"

Cyborg [200CP]

"Beep boop, Player! Wanna be part human, part robot, and 100% awesome? Cyborgs are for the tech-savvy players who dream of laser arms, rocket feet, and cool HUD displays. They've got advanced defense systems, cybernetic enhancements, and—if you're really lucky—a killer techno-dance mode. Think Annoydeath but, you know, less annoying. Maybe."

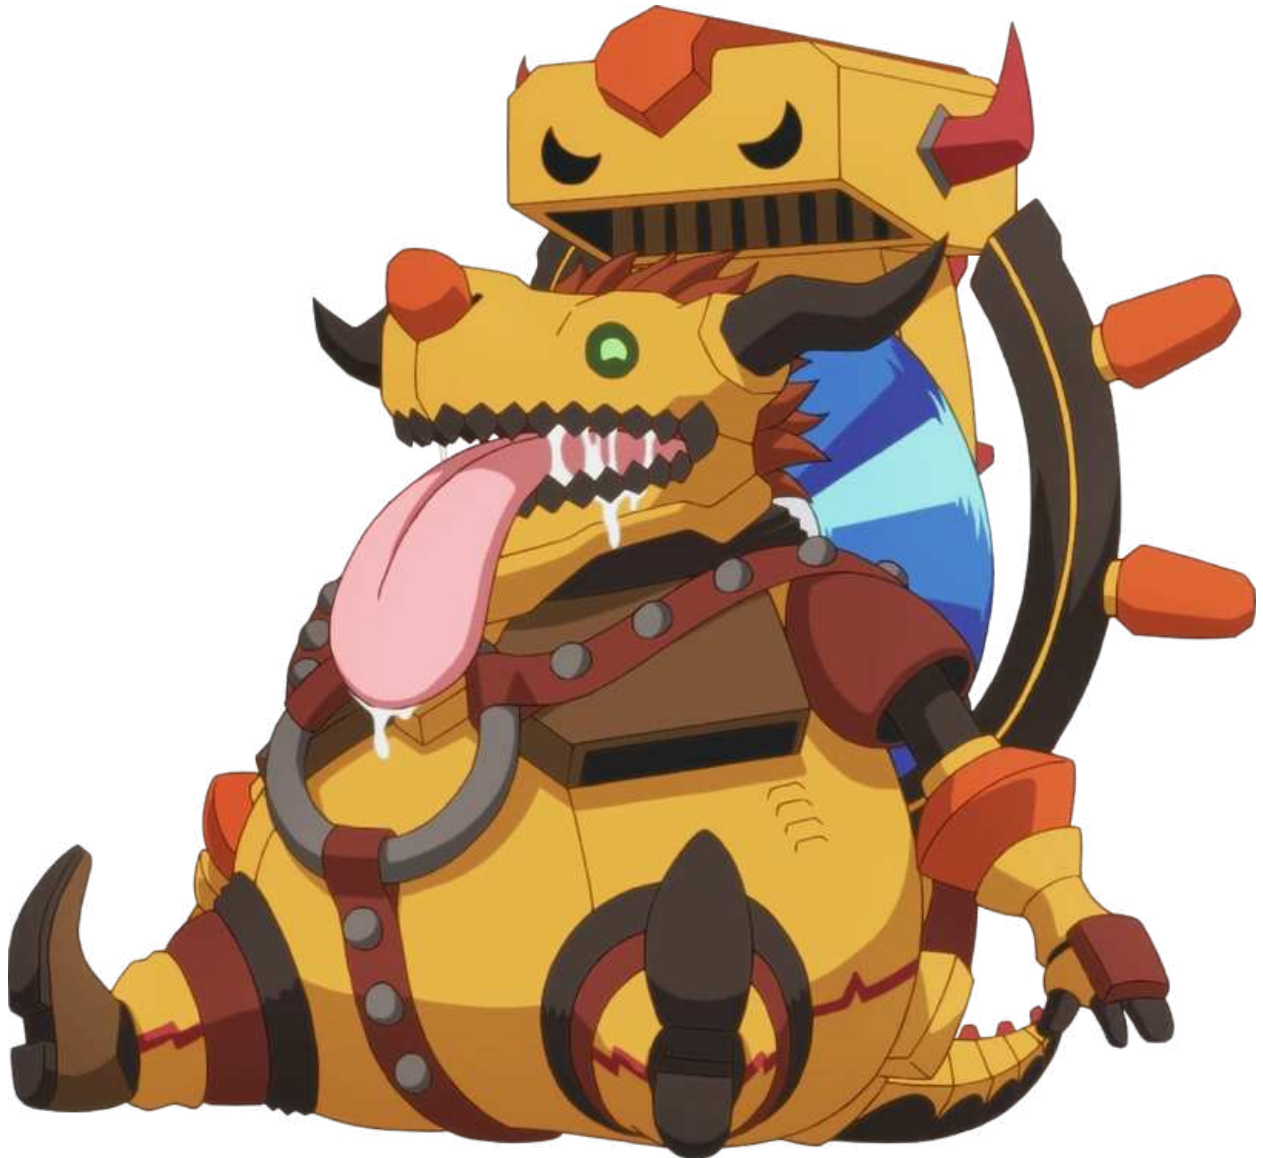

Fairy [200CP]

"Tiny, sparkly, and full of sass—just like Histy! Fairies might be small, but they pack a punch with their magical powers. They can zip around at lightning speed, use super-powerful spells, and even heal their teammates in a pinch. Plus, their wings make for a pretty stylish accessory. Just don't let anyone step on you, okay? That'd be awkward."

Dragonkin [400CP]

"ROAR! Okay, I can't actually roar, but you get the idea. Dragonkin are like part-dragon, part-human, and 100% epic. You get scales that double as armor, fire-breathing powers, and the ability to glide through the air like the ultimate boss. Oh, and did I mention their strength? They can smash through walls like they're made of tofu. It's a pricey pick, but hey—when you look that cool, it's worth it!"

CPU [600CP]

"Holy HDD Mode, Batman! If you choose this, you're playing as a CPU from the PC Continent! Yep, that's right—in real life and in the game, you'll be a literal goddess. We're talking super strength, crazy transformations, and powers that scream 'I'm the star of this show!' Only beta players get this mega-rare opportunity, so if you pick it, I'm officially dubbing you the Ultimate Lucky Dog!

Now, being a CPU isn't all glitz and glamour—it's a responsibility. Your worshipers? They need you, and you need them. Even though you're just one person and can't be everywhere at once (not without a clone button, anyway), your mere presence in a land passively brings peace. Monsters chill out, natural disasters take a rain check, and life gets generally less apocalyptic. This doesn't stop deliberate baddies or the occasional civil spat, but hey, no random famines while you're in charge—nice, huh? Oh, and by the way, this passive effect isn't just for in-game; it works IRL too. That's what we call goddess privileges!

Hard Drive Divinity (HDD)

"As a CPU, your power comes from your people's faith. The more they believe in you, the stronger you get. And let's not forget the pièce de résistance: HDD Form! This is your ultimate transformation, where your stats get a 50% boost, and you channel pure goddess energy. Activating it costs a teensy bit of your collected faith, but oh boy, is it worth it! Your HDD Form transforms you into a dazzling young adult version of yourself, complete with metallic wings, a fierce new personality focus, and customizable armor. (Pro tip: add sparkles to the transformation sequence—it's all about style!)

In-Game Appearance

"In the game, you're permanently in HDD Mode (lucky you!). Your look? Think white angel wings, glorious medieval armor, and the noble aesthetics of your predecessors. You're the shining beacon of hope that makes even monsters say, 'Nope, not today!' With this race, you'll be walking around as a total powerhouse—literally and figuratively."

"So, ready to claim your throne as a CPU? Whether you're bringing peace IRL or smiting baddies in-game, this is your ticket to living the goddess life! Just don't forget to say 'thanks' to your worshipers once in a while, okay? Faith isn't free, after all!"

Free

Man you're Hot

Alright, listen up, folks! Are you ready for this? Well, brace yourselves, because you're about to become super ridiculously attractive. That's right! This perk automatically makes you a minimum 9/10 in the looks department. I mean, come on—who doesn't love being a sight to behold?

But wait, it gets even better. This isn't just about looking cute in the game, oh no. Nope! Your real-world self also gets blessed with this same incredible standard of beauty. Yep, you'll be turning heads and making hearts skip a beat IRL and in the game. So whether you're slaying monsters in dungeons or waiting in line for snacks, you'll always be super photogenic. Ready to live life as a 24/7 stunner? Well, this perk is for you, darling.

Your class is ...

Hey there, player! Soooo, let's talk about classes. Oh yes, we've got tons of options for you to choose from in Cyberdimension Neptunia: 4 Goddesses Online. Think knights, samurai warriors, sneaky ninjas, mysterious thieves... all that good stuff. The devs went absolutely wild with this system, and now you get to pick one to make your very own!

So, let's say you're feeling noble and valiant? Go for a Paladin with a hammer as big as your dreams. Or if you're feeling a bit... unique... you could try one of the most boring classes of all time—yep, the Farmer class! Seriously, though, who would pick that? Farming? Sounds pretty dull, huh? But here's the kicker... rumor has it that one brave soul picked Farmer, and somehow, they literally became a deity-level powerhouse. Don't ask me how.

But hey, whatever floats your boat! No judgment here. At the end of the day, your class choice starts you off at level 1, no matter what you pick. As you level up, you'll gain skills and abilities tied to your class. Level 99 is the cap, but hey, that's still way better than being stuck in real life with boring day-to-day stuff, amirite?

So sharpen your sword, prep your spells, and embrace the chaos of your chosen class. The journey awaits, adventurer.

Transformation Wait ... this is a spin-off

Oh, ho ho! . You know transformations are a classic staple in the Neptunia series. They're flashy, they're iconic, they make everything look 10x cooler—AND NOW YOU CAN DO IT TOO!

So here's the deal. With this perk, you'll gain the ability to transform into some of the most unexpected, bizarre, and hilarious forms ever imagined. I'm talking duck-sized rubber ducks, walking talking slices of pizza, or, oh I dunno... maybe a confetti-launching ice cream cone. Whatever your wildest transformation dreams are, this perk makes it possible!

Enemies cornered? BAM! You transform into a walking hotdog. Friends being annoying? POW! You turn into a living vending machine. The possibilities are endless. And here's the kicker—you won't just be pulling off these transformations in the game world. Oh no, you can do them outside the game too. Just imagine your unsuspecting neighbors seeing you chilling in the park as a giant inflatable taco.

Now, before you get too excited, let me clarify—these transformations aren't combat-boosts. Nope. They're purely for fun, for shock value, and for ultimate meme potential. Whether it's shooting lasers out of your pizza slice form, dropping confetti bombs in battle, or freaking out random pedestrians by turning into a dance-worthy hotdog in the real world... well, hey, it's all part of the ride.

So, unleash your wacky side. Transform, create chaos, and let your inner goofball shine through. The world (virtual and real) will never see it coming.

Avatar Infinite Stamina

Hey there, adventurer! Imagine this: you're running through endless fields, slaying monsters, diving into dungeons, and exploring every corner of 4 Goddesses Online without even breaking a sweat. Sounds amazing, right? Well, guess what? With this perk, your avatar will have infinite stamina, letting you stay active in the virtual world as long as you want—no rest needed!

And it doesn't stop there. This perk extends to real life! You'll have the endurance to keep going for a full 24 hours straight. But there's a little catch—you'll need a solid 4-hour power nap after hitting your limit to recharge. This doesn't give you superhuman strength or speed, but it does eliminate pesky fatigue, so you'll never feel drained. Whether you're marathoning quests or running errands IRL, this perk keeps you on your feet and ready to tackle anything. Just remember to enjoy your well-earned nap before jumping back into action.

No MP? No Problem! Just Hit Your Enemies and Gain More!

Hey, spell-slinging prodigies! Running out of MP is the worst, right? Say goodbye to those days of chugging potions like they're energy drinks because now, every time you land a physical attack, you'll regenerate MP! That's right—smacking your foes with a sword or throwing a punch is all you need to keep your magical reserves topped up.

Even better, this perk works even if you're not the strongest fighter around. No matter how weak your attacks are, you'll always deal at least 1 point of damage. And here's the kicker—this perk isn't limited to the game. Yep, your real-life self will also gain a little boost to your energy whenever you give someone (or something) a playful bop. Now you can keep the magic flowing both in-game and IRL—no potions required!

MMO Interface? That Would Be Convenient.

Alright, gamers! you'll gain a mental MMO interface that displays everything you need to know. HP and MP bars? Check. Chat box to keep up with friends? Double-check. Enemy stats and HP? Oh yeah. This perk isn't just for show—it keeps you informed, so you'll always know exactly where you stand in the heat of battle.

But wait—there's more! This interface also tracks all the goodies you earn from fights, like XP, credits, and loot. It's like having a built-in treasure tracker in your brain! Just one little disclaimer: if you're in a world where enemies don't drop anything useful, the interface won't display much in those cases. But hey, who cares? The UI itself is awesome, and you'll look super pro while using it!

MMO Inventory

Ever wish you could carry all your stuff without worrying about weight or space? Well, guess what? Now you can! With this perk, you'll have infinite storage space for all your treasures, gear, and knickknacks. Whether it's potions, weapons, or random collectibles, your inventory can hold it all, and you'll never have to worry about being overburdened.

There's just one limit—the size of each item can't exceed that of a car. So no hoarding houses or dragons, okay? This perk works in both 4 Goddesses Online and real life, letting you be the ultimate packrat wherever you go. Say goodbye to leaving items behind and hello to carrying everything you could ever need!

MMO Armor

Okay, listen up, fashion warriors! You know how MMO armor tends to follow the rule of "the higher the level, the less it covers"? Well, with this perk, you can wear armor that looks flimsy but still provides top-tier protection. That's right—you'll always be safe and stylish, even if your armor is nothing but a shiny bikini or a bare-chested suit of "heroic" gear.

This perk applies to both virtual and real worlds, ensuring you'll look like an absolute boss while being just as durable as full plate armor. Who says you can't slay enemies and look fabulous at the same time? Fashion and function, all rolled into one!

Wow, a Panty Shot? Must Screen Save!

Hey there, you cheeky rascal! Neptune here with a perk for all you true connoisseurs of culture. Ever spot something you just have to capture? With this perk, you can snap a screenshot mentally. No fumbling with buttons—just think it, and bam! The image is saved in the gallery of your mind.

From gorgeous landscapes to hilariously awkward moments—or, let's be honest, those spicy waifu poses—you can save it all. Relive your favorite moments whenever you want! But, uh, keep it tasteful, alright? Your mental gallery is your personal treasure trove, so fill it with memories that make you smile (or blush).

Press Triangle to Skip

Hate sitting through endless cutscenes? Fear not! With this perk, you can press the mental Triangle button to skip straight to the juicy summary screen. No more slogging through every tiny detail—just get the TL;DR of the important events and keep the action moving.

This perk is perfect for replaying games or if you're more into gameplay than storytelling. But don't worry, you won't miss out on key plot points. The summary gives you all the context you need to stay in the loop. It's the ultimate time-saver for busy adventurers!

AFK Nap Time

Hey there, sleepyheads! Neptune's got your back with this fantastic perk. You'll get an AFK Shop Booth that lets you run your virtual store even when you're away from the keyboard. Go ahead—take a nap, grab a snack, or even gasp get a real job, and your shop will keep raking in the credits without you lifting a finger.

Your booth is fully automated, so customers can browse and buy your wares while you're off doing your thing. Turn your downtime into profit and live the dream of passive income. Who says you can't be a business tycoon while catching some Z's?

Parts Breaker

Smash and dash, hunters! With the Parts Breaker perk, you'll gain a visual cue on your UI whenever you've dealt enough damage to a monster's specific part to break it. Breaking parts not only weakens the beast but also increases your damage against that area, making it easier to topple even the toughest foes.

This perk doesn't just boost your efficiency—it rewards strategic combat. Whether it's slicing off a tail or cracking open armored scales, you'll get bonus materials from your victories, ensuring every hunt feels like a jackpot. Gear up and start targeting those weak spots for maximum rewards!

Positioning is Everything

Attention all tacticians! This perk gives you an uncanny ability to understand the optimal positioning for every situation. Whether you're mining ores or engaging in battle, you'll instinctively know the most efficient angle to swing your pickaxe or the exact spot to strike for maximum damage against monsters.

In combat, this means you'll always exploit weaknesses for critical hits. In resource gathering, you'll work faster and smarter, reducing wear on your tools while maximizing gains. With this perk, efficiency is your middle name, and wasted effort becomes a thing of the past!

Optimal Gathering Schedule

Tired of wasting time wandering aimlessly for resources? With the Optimal Gathering Schedule perk, you'll have an innate understanding of spawn timers and resource cycles in the game world. This allows you to plan the perfect route to gather materials and hunt monsters with precision.

Imagine knowing exactly when and where that rare herb or elusive ore will reappear. You'll map out efficient gathering loops, minimizing downtime and maximizing productivity. Whether you're stockpiling resources or farming for rare drops, this perk turns you into the ultimate resource management pro!

Skill EXP Boost

Ready to level up your skills faster? With this perk, you can select one skill every 8 hours to receive a 15% boost to its experience gain. This bonus applies to any skill you possess, making it perfect for mastering tricky abilities or quickly improving your favorite techniques.

The perk ensures steady, consistent growth for your chosen skill. Whether it's combat prowess, crafting expertise, or even a quirky life skill, you'll gain proficiency faster, letting you reach new heights in record time. Time to grind smarter, not harder!

World Lore

Prepare to become a walking encyclopedia of your game's universe! With the World Lore perk, you'll instantly gain a complete understanding of the game's history, factions, and major events. You'll also learn the locations of dungeons, legendary artifacts, and hidden treasures.

This knowledge updates dynamically, so you're always in the know about new lore and changes. And here's the kicker—it works in future worlds too! Whether you're navigating a brand-new game or exploring the real-world lore of a Jumpchain adventure, you'll be a master strategist armed with unparalleled insight.

Skill Triggers (Isn't This from .Ha—)

Hey, gamers! Say hello to Skill Triggers, the perk that simplifies unleashing your best moves. In-game, you'll activate powerful skills effortlessly by pressing L1 + your preferred button (Circle, Triangle, Cross, or Square). It's a seamless, intuitive system that lets you chain combos with style.

In real life, this perk goes a step further. Your skills—whether learned in a game or in real-world training—will trigger automatically when needed, like muscle memory on steroids. No need to overthink it; just let your body do the work while you focus on winning the day. Easy mode, activated!

OK Let's Min-Max Reset Button

Calling all build enthusiasts! The Min-Max Reset Button perk lets you customize your character's stats and skills endlessly during the 4 Goddesses Online beta. Experiment with different playstyles—become a glass-cannon mage, an indestructible tank, or anything in between. The possibilities are endless!

And when you're ready to step into the real world or a new Jumpchain adventure, the perk activates again every 10 years or at the start of a new jump. This lets you redefine your build, adapting to your environment and challenges. It's the ultimate tool for perfectionists and experimenters alike.

Yuri Affinity

Step into the ultimate relationship manager! With Yuri Affinity, you gain the ability to check the exact affinity levels between yourself and your allies. This makes it easy to track your relationships and ensure smooth team dynamics.

In addition, you gain access to a visual, dating-sim-style interface. Choose from dialogue and action options to boost your allies' affinity effortlessly. And for those curious about what happens when bonds deepen—let's just say some yuri moments might unfold when the threshold is reached. Whether you're building friendships or igniting sparks, this perk is your guide to stronger connections.

Quest Crafter

Calling all aspiring quest designers! The Quest Crafter perk allows you to create engaging and rewarding quests that other players will clamor to complete. As you level up this skill, your quest-crafting capabilities expand, enabling you to craft diverse and creative challenges.

Want players to collect 100 screenshots of panty shots? Sure, why not? Or perhaps they need to create the ultimate pudding for Lady Purple Heart herself? Done! The possibilities are endless, and with your knack for designing irresistible rewards, you'll have players eagerly accepting your tasks.

Wait, What Is the Level Cap Now?

Level caps? Pfft, who needs them? With this perk, the concept of a maximum level is obliterated. In 4 Goddesses Online, you can level up indefinitely, continuously growing stronger and unlocking new abilities. There's no limit to how high you can climb!

But this isn't confined to just the virtual world. In real life, this limitless leveling applies to your personal growth too. Whether it's mastering a new skill, expanding your knowledge, or improving your physical prowess, your potential knows no bounds. Keep grinding and watch your progress soar!

Low HP? Why Would That Hinder My Battle Performance?

Turn despair into dominance with this unique perk! When your HP drops to critical levels, your combat performance skyrockets. You'll attack faster, hit harder, and execute skills with unparalleled precision. Adrenaline kicks in, making you a force to be reckoned with even on the brink of defeat.

This power doesn't stop in the virtual realm—it extends to real life too. When the going gets tough, you'll find a hidden reserve of strength, focus, and determination to overcome challenges. Low HP? More like maximum power!

Let's Test Awakening

Unleash your full potential with Awakening! This perk lets you customize your own unique Awakening abilities, tailored perfectly to your playstyle. From summoning devastating lightning storms to smashing enemies with brute force, the choice is yours.

Switch between different Awakenings on the fly to adapt to any situation, ensuring you're always prepared for battle. And this power doesn't stop at the game—you'll also unlock real-world talents and skills you never knew you had. Personal growth has never been so electrifying!

Environmental Hazards? Oh, Don't Worry, We Removed Those

Bid farewell to lava pits, poison swamps, and spike traps! With this perk, environmental hazards simply cease to exist for you. No more unnecessary damage or sudden deaths from sneaky traps—your path is always safe.

The benefits extend to real life as well, granting immunity to inconvenient hazards like icy sidewalks or sudden downpours. It's not invincibility, but it's a massive quality-of-life upgrade that lets you focus on the adventure without worrying about nature's nastier surprises.

PK

So, you think you're ready to dive into the chaotic, adrenaline-pumping world of player-killing, huh? Well, with this perk, you'll become an expert at taking down other players in PvP situations. You'll have this super instinctual grasp of tactics, dodging their attacks like a ninja and striking where it hurts the most. It's like being a pro gamer but with extra sparkle!

And it gets even better! Your skills don't stop at the keyboard or controller. Nope, this bad boy works IRL too. Think of it as mastering the art of reading people and outmaneuvering them in competitive scenarios. Whether it's chess, dodgeball, or an intense battle of rock-paper-scissors, you'll come out on top. Just remember, though: don't go turning into a bad guy! Use your PK prowess for good—or at least for fun.

Cracker

Alright, listen up, my code-savvy compadres! This perk, Cracker, turns you into a digital mastermind. Imagine looking at the game's code like a book and going, 'Heh, I can tweak this!' You can whip up sneaky mods and hacks without anyone batting an eye. That's right—total stealth mode! Your in-game tweaks will be so smooth, even the game devs won't know what hit them. Just promise me you won't turn Lowee's servers into pudding, okay?

But wait—this isn't just a game thing! Out here in the real world, you're a hacking genius. Whether it's breaking into top-secret files (not that I'm condoning anything shady) or just fixing your annoying printer that never listens, you've got it covered. The digital realm bows to your will, oh great and mighty Cracker!

Anti-Cheating System Activate

Cheaters? Pfft, not on your watch! With this perk, you're like the anti-cheat enforcer of both game worlds and the real one. You'll sniff out aimbots, speed hacks, and all that sneaky stuff faster than Blanc finishes her novels. And the best part? You're not just catching them—you're shutting them down. That's right, cheaters, prepare to face the wrath of Justice Neptune!

And get this: even IRL, you'll know when someone's trying to pull a fast one, whether it's in a card game or a pizza-eating contest. Plus, the system's got your back, ensuring none of your wacky gameplay tactics trip the anti-cheat alarms. So go out there and keep the game fair, one ban at a time!

Once a Loner, Always a Loner

Hey, introverts, this one's for you! With this perk, you'll become the ultimate lone wolf. Group quests? Socializing? Pfft, who needs 'em when you can solo your way to glory? Your power spikes when you're on your own, making you an unstoppable force in dungeons and boss fights. It's like the game itself respects your 'me time.'

And IRL? You'll rock that lone wolf lifestyle like a pro. Whether it's pursuing your hobbies or just enjoying your own company, this perk lets you thrive solo while the world cheers you on from afar. Who says you need a party when you're this awesome on your own?

Not Played in a While? Don't Worry, You'll Remember!

Okay, so life happens, and you take a break from gaming. But with this perk, coming back is as easy as pudding pie! All those controls, combos, and quest details? Boom, back in your noggin the second you log in. It's like you never left! You'll be swinging your sword and dodging attacks like the pro gamer you always were.

Oh, and IRL? The magic doesn't stop there! Whether it's playing an instrument, baking a cake, or, I don't know, tap-dancing, you'll pick up right where you left off with zero stress. So go ahead, take a break—you've got this comeback thing handled like a champ!

Items:

Listen up, folks, because Neppy's about to drop some knowledge bombs! In this adventure, you'll be collecting two shiny types of treasures: IRL Items and Game Items. But here's the twist—Game Items are strictly in-game only, so no dragging those epic swords or healing potions into the real world... yet. At the end of the jump, though? Oh boy, it's a free-for-all!

Also, you lucky duck, you get discounts per tier—one for IRL items and one for Game Items, except for the super-fancy 600 CP IRL tier. That one's full price, pal. Ready to dive into the goodies? Let's-a-go!

Teleportation Crystal [100CP]

Poof, and you're there! This sparkly gem is a game-changer, letting you teleport anywhere you've been before. No more boring travel time—just instant adventure mode! Plus, think of how cool you'll look vanishing in style. Who needs walking when you can warp?

Enchanted Blade [200CP]

Companions:

My Old Team 50

You may import companions you have brought with you, 50 CP each, or 8 for 300CP. Each one gains a free background. and 600 CP to spend. They may not take drawbacks, but you may give them CP, spending 100 each time to give them each an additional 200.

My New Team 100

Sometimes having friends would be nice. Buying this once will allow you to add any allies you've made here as companions. You may buy this multiple times.

Drawbacks:

You are limited to +800 Cp from drawbacks.

18+ [+0]:

Uwah, you naughty pervs! Alright, fine, I guess the world's already lewd, so what's the harm in making it... even lewder? The shiny bands of light that used to cover up the "private zones" have poofed into oblivion! Now, you've got a front-row seat to everything! Yep, even the stuff that was off-limits before is now fair game. So, uh... have fun, you cheeky degenerates!

Time Extender [+100]:

Oh, you wanna stick around longer? Maybe for more adventures or more sexy warriors? No judgment here! Each time you pick this, you get to hang out in this wild world for an extra ten years. Wanna stay forever? Sure thing! Just keep in mind, you can only nab up to 800 CP no matter how long you chill here. Go on, make the most of it, you eternal wanderer!

Eighth Grade Syndrome [+100CP]:

Ohoho! Calling all Dark Flame Masters and edgy dreamers! With this, you're gonna get a serious case of chuunibyou. That means exaggerated poses, dramatic speeches, and a whole lotta cringe energy that'll make everyone roll their eyes. But hey, on the bright side, you're gonna look really cool... at least in your own mind!

Ticklish Body [+100CP]:

Kyaaa! Looks like someone just discovered their secret weakness! You're so ticklish that even the slightest poke in the right spot will send you into a giggle frenzy. Fighting back? Nope, you're too busy laughing your head off. Perfect excuse for some, uh... "playful" interactions. You know what I mean.

M Problem [+200CP]:

Oh-ho-ho, someone's into the pain train! You're a total masochist now—like, hardcore. Whether it's getting stepped on, whipped, or tossed around by monsters, you're all in. The worse it gets, the more you love it. Just don't blame me when your teammates start facepalming every time you run toward danger instead of away from it!

Naive Mindset [+200CP]:

Oh, sweet, trusting little you! Now you believe everything anyone tells you, even if it's totally sketchy. "Sure, this path through the tentacle monster forest is perfectly safe!" or "Just work off your debt as a dungeon maid, no strings attached!" Yeah... this is gonna get you into trouble. Good luck, my gullible friend!

Humiliation Magnet [+200CP]:

Eww, grossos! Why do those kinds of people always get so lucky when they're around you? They trip, and—whoops!—your skirt flies up. They sneeze, and bam, your chest gets groped. And to top it off, when you try to fight back, you're somehow the bad guy! Gah, why can't the world just chill already?

Weakling [+300CP]:

Ugh, so unfair! No matter who you fight—big bad boss, tiny slime, or even a flipping chicken—it's gonna take you at least four tries to beat them. Everyone's gonna laugh and call you a joke, but hey, just think of it as a long grind for glory. You'll get there... eventually. Probably.

I Am Afraid Of The [+300CP]:

Pick your poison, pal! From now on, there's one type of monster that makes you go full-on jelly legs. Spiders? Dragons? Zombies? Whatever you choose, you're gonna see them every single day, and every single time, you're gonna freeze up like a scared little pudding. Don't worry, though—you'll get over it... after, like, nine years.

I Hate Being Poor [+400CP]:

Bleh! Money? What's that? Every time you manage to scrape some cash together, it slips through your fingers like sand. Scams, bad luck, or just plain dumb spending—it's always something. At least you'll have enough for a crummy apartment and a single meat bun a day. Gourmet living, amirite?

I Don't Need My Brains [+400CP]:

Oh no, you went full Nep! You're now officially as dumb as a rock. Complex math? Forget it. Using your class's fancy skills? Nope, just swing your sword and hope for the best. It's head-empty, no-thoughts time, but hey, at least you can smash stuff real good! ...Hopefully.

Ten Years Later

Go Home:

What? You're done? Already? Here? Well, no judgment from me! Whatever treasures, friends, or pudding recipes you snagged during your adventures, they're all coming home with you. Time picks up right where you left off in all those worlds, so don't worry about missing any juicy drama. Go enjoy your well-earned break—and maybe binge some pudding while you're at it.

Stay Here:

Ooooh, I see. This world's charms got you hooked, huh? Can't blame you—it's got the whole sparkly, epic adventure vibe going on. Don't worry, I won't tell anyone. Plus, as a bonus, you get 1000CP! That's, like, a lifetime supply of pudding in adventurer currency! Settle in, enjoy the view, and keep being awesome.

Move On:

Ahhh, the wanderlust strikes again! Of course, the journey never really ends for a true adventurer, does it? Off you go, onto bigger, shinier, and probably more chaotic things. New worlds, new pals, and new chances to be the star of your own adventure show. Keep that pudding-fueled spirit alive, and have the bestest time ever!

Ten Years Later:

Go Home: What, you finished? Here? Well, we won't ask. Whatever it is you gained here, we hope you enjoy it. You return home with all that you have accrued over your chain, and time resumes in all the worlds you visited.

Stay Here: This world does have a certain... allure, hmm? Don't worry, we won't judge. Add 1000CP as a bonus.

Move On: Ah, but of course. The journey never ends, does it? Go forth and have fun. Make some new friends.
