Age and Sex options

Pick whatever you want. Any gender you can imagine.

First purchase of chosen race is free, each additional one is **100** and an alt-form blender of your flavor is **200**. Things inherent to the race you will gain as you grow in power.

Cannot use token in race section

Power level of race (Variable)

While you can choose a race and not a power level it will take years even with perks to get to the next level. These are not the limits that you can reach, that limit is what your race would be. Use [Tiering System](#)

Tier 2-C free increases by 100 each minor increase up 6-C after that 600cp per minor increase limit 7-A.

As there are so many races to list here are a few ideas Human+, Halfling, Dwarf, Elf, Undead, Angel, Demon, Monster, Dragon. You may buy as many races as you wish should you buy the alt form combiner.

If you want the knowledge, skills and powers that go with a race, pay an additional **200 to 600** depending on the power. While no matter the race you would start at 2C free

Perks

-These cost 100 points unless otherwise stated. You get 5 Template Tokens. These can be redeemed to get anything you want here for free.

-Anything you buy here can be **purchased multiple times**. Doing so provides an additive bonus.

-Upgraded purchases cost the same 1 token unless otherwise stated.

Adulthood (Free and Mandatory)

You know how to function as an adult. Balance a budget, cook, barbecue, talk to people and in public, work with people you don't like, basic car and home maintenance and repair, and deal with bureaucracy. This updates both in future jumps and whenever you get a new alt-form race.

Disease Free (Free/300)

There can be some pretty funky diseases you encounter here not just the usual std's but all sorts of things especially if you go to the more crazy worlds now you don't have to worry about catching them or being a carrier. No matter what kind. 300 to keep this immunity.

Porn Physics (Free)

Insertions far larger than the human body was meant to handle, things that would cause pain, and other such things can now happen. This comes with a mental dial to control this. This makes it so std's and inbreeding are not really a thing.

The Insert (Free/600)

You may insert into any character in the place you are going whether that is a person in a story or taking the place of a POV in a porn vid. This comes with their memories, skills, knowledge and the ability to play their part. If you want to keep the powers and such from who you insert here pay 600.

The Body and Mind (Free)

A complete under the hood tune up psychically and optimally you may choose your outer looks. This also takes care of any mental issues or addictions you might have. This also gives the physical and mental stamina to have sex non stop for weeks on end, preventing problems with chafing, friction burn, lock jaw and while you won't need to eat or drink sexual fluids will give a minor boost.

Fetish Physics

Like Porn Physics but for the more out there things. That could bring heavy damage or even death. Gaining the abilities needed. This covers not just you but the ones that are involved in such activities. One purchase covers everything.

Career Options

Choose a career. You get 100 years of highly successful experience with that career and updating credentials that'll allow you to practice it elsewhere in the future. This can also convert to say a singer with Elvis's style and skill or others though only one per purchase.

ID

This is a collection of self updating government ID's. Complete with fiat backing on however it makes sense whether that be a born citizen, immigrant complete with paperwork and memories and everything else no problems will ever occur with identification ever again. Even traveling to a new reality under your own power this will update. This also makes it so that you won't be recognized in public for things you don't wish such as being a porn actor.

Fixed Trauma

All mental hang ups, not just those that are related to sex, religion and relationships. You will get the option to go through them one by one with a detached mind, see how they affect you and keep any that you wish.

In the future you may also do this for others and undergo the mental part at any time though this will not trump drawbacks. If desired this can take place over a period of time rather than just handwave.

Free Mind

A lot of these places not just the situation you might insert into will fuck with your mind but the very metaphysical rule of the reality itself. *As I heard a porn universe once described sex could happen so it would happen.* Now you don't have to worry about your mind, soul and body being fucked with or controlled unwillingly even willingly you can snap out in a moment and or set conditions. Though some hardwired ones are end of jump, soul danger or selling, and lethal danger to you or yours. Those living in such universes will not see anything strange in your actions unless you wish.

The Flip

This lets you gender flip someone to pretty much any other gender you have encountered including race specific one. May alter setting or their memories so the target(s) were always that gender/species

Came for the Porn, Stayed for the Adventure

Sex is great, one of the greatest things in life, but sometimes you want...more. With this perk, your life becomes a series of adventures like you would see in fiction. You will be able to select a genre tag (comedy, adventure, mystery, horror, etc) once a day and then soon after life will act like a story of that type of genre in fiction, with you being the main character. You can buy this perk multiple times to increase the number of tags you can get to use at once. You do of course get an erotic tag free and you can use two tags with the first purchase.

Appendages and Modifications

Well this is a fun one besides having an unnaturally long and extremely dexterous tongue a cock that when desired and under your control can shift size and shape to bring the maximum amount of pleasure. You can also grow and shift sex organs around. Want a pussy or asshole in the palm of your hand or tentacles for days, go for it. This also covers Exotic Looks such as glowing tattoos, color shifting hair and a bit of cosmetic shapeshifting. One purchase covers everything.

Blood Adoption

Sometimes for that extra taste of that forbidden fruit you would want to be actually blood related to someone. Or for some other reason though not many come to mind. Merely by sharing your blood with something you can both become related to it or they to you in what relation is up to you. This also works with perks and such that let you pass things down to your descendants. Prevents any problems from inbreeding.

Into the Bloodline

Different but working well with **Always My Child** and **Blood Adoption** this is more incorporating various things into your own bloodline. An example say you used blood adoption to become Agatha Heterodyne's nephew you would be able to gain a Spark just as strong as hers and be recognized as a Heterodyne. This can work for any magic, powers systems and such

Ascension Survival

This is a survival perk in that when you attempt to grow in power, ascend to a higher state or similar such thing you will survive. You may not succeed in doing so but you will survive. Might be very injured but you will survive and heal from it though it doesn't do anything for the pain but you will have no downsides from the attempt and you will know what went wrong.

Your Word is Your Bond

And All those you give your word to will know it. You are actually bound to the oaths you swear of your own free will. Breaking them will leave you weakened for a time and feeling like crap.

Family First

Family can be rough sometimes especially to each other. This makes it so family is at least tolerable to each other in all ways, physical, mental, emotional. Not mind control more physical prevention and let your family get along or at least not harm each other.

Parenting

Is hard to do right and while there are perks to help family get along or at least not betray the family that does nothing to help you be a parent. This perk will teach you all you need for you to be able to raise your kids in a way you can truthfully say that you are proud of them and that you love them and they will know that you do.

Matchmaking

You are a great matchmaker knowing just what someone needs in a relationship. Even able to pinpoint an exact name for a person to pair with. Or knowing how to set up a situation so people pair up together.

Thank Yous

When you help or rescue someone they are quite willing to thank you with sex. The more dire the situation you rescue them from the kinkier and more times they are willing to do so.

Shameless

While you might not have hang ups or shame others still will. This will have others coming up with their own explanations when you do such things.

Small Changes

This lets you make small changes that affect the entire setting. These won't impact the story or how dangerous it might be. Think people talking like porn stars while fucking generally shaving or not shaving the privates or how fast the hair grows. How long females might be fertile, how much their periods hurt or even if they have them, how certain kinks are regarded. This would also work for more rainbow colors for natural hair. Beside that the limit would be multiple spouses being legal and acceptable. One purchase covers everything.

Handholding

Is lewd and with your skills it sure is. Not only can you project your feelings and your acceptance of someone through the way you hold their hand. You can bring immense pleasure in the way you hold hands.

Personal Copy (100/600)

You now have the ability to copy anyone complete with their memories and powers should you be able to touch them. At default they are completely loyal to you; they will spawn right next to you though this can easily be changed by selecting a spawn point for them or just saving the template and spawning them later. Gender is up to you at time of copy. 100 gives you copies up to tier 3 anything above that is limited to that level.

600 Uncaps the tier limit.

Always My Child

All your forms now carry deep within a history of all your genetics. From your pre jumpchain and bodymod body to any exotic forms you may have picked up along the way. This is so you may pass along all your family lines along to all your progeny or other relatives with the help of other perks. Genetic knowledge/memories, skills, powers, perks and whatever you wish can be passed down ad infinitum, with any unlocking requirement that you desire. Including this one if desired.

Dirty Talk

Is a skill not everyone has, some can be stilted and corny. Now with your skills you can talk dirtier than anyone else and very creatively. You know just what to say to get someone off. This also works for cursing. Grant knowledge of any language heard and the ability to speak and otherwise use it like a native complete with accent if desired.

As Time Passes

Time can grind down even worlds to dust. To say nothing of a mortal or immortal mind. Not so for you anymore. Life will always be fun and enjoyable, losing nothing to time a trillion years could pass and you could still remember the taste of the last sunday dinner you had with your family and the names of all your friends and extended family that you left in your original world. You will always be able to keep up with the changing times should you so wish. You will find the same enjoyment and pleasure as the first time you experienced it. As a side benefit your skills and memories will never degrade though for fun you may choose to seal them away for a time though if ever needed to save you or yours they will unseal themselves in plenty of time. As well as no matter what kind of knowledge or information you learn it will never cause you harm to know or use, infinite mind storage and indexing is yours. This also wonderfully works to keep the wonder of the first time you tried something sexual. Free agelessness.

Love Among the Group

You are likely to gather a rather large group of partners and while you can pick up any harem perk this is a bit different and while all lovers will not cause problems for you or the group that is the limit of any kind of imposed control. What this will do is bring to the attention of other members of the group the qualities that they would appreciate in the others though what they do with that is up to them. This is not any sort of mind control.

Sex Bent

Give anything a sexual bent whether it being a certain act or such. Use your imagination.

Sex Creation

Whether it is crafting, research, cooking you can make either or both the process or the result require some form of sex act or have the acts greatly speed up the processes. Write a thousand page novel in an hour or a AAA game in about a week this takes in the effect of all your other perks as well. When combined with sex time perk the longer the sex session lasts the faster stuff gets done and the better the quality.

Scarerousal

You are greatly skilled bringing fear and terror to anyone you wish. This also greatly arouses them even against their will. This power comes with mental controls to dial your desired outcome.

You Will Enjoy This

When someone might not be fully into carnal acts with you you can still make it so they may not like it but their body will enjoy it greatly. This won't make them feel any different about you rather it is just their body betraying them.

Beyond Ability to Handle

Pleasure beyond pleasure, sensation beyond sensation. While you can also use this to mind break someone you can also just force them to stay conscious and sane and endure whatever you are doing.

Kink Sense

You know the kinks, fetishes, desires and fantasies of those you see through any method. This can be turned off and on at will.

Reversed Sexual Morality

What it says on the tin makes the females the more sexually aggressive and the men a bit more on the timid side.

Sex Payment

You can use and accept sex as forms of payment. Others will also know that this is possible and not think it strange. Now go pay for your groceries by fingerbanging that cashier into an ahgao face.

Sex Share

The ways of sharing your anything and or everything are somewhat light on the ground despite what the amount of them would make you think, there are the mainstays such as touch, skill books and in one case an item such as keys. This perk is for those who want to share in a different way such as sex acts. Another such nifty way is different types of crafting such as cooking or really any other ways you choose. This lets you summon more conceptual or rarer ingredients such as the smell of the first stellar ignition or the taste of the primordial darkness. These can pass along anything of yours or those involved including but not limited to perks, powers, race, knowledge and memories. In what amount and the way it is presented is up to you. These things can only be used during the creation of whatever you are making to share the perk and only for that.

Defeat Equals Power

Sometimes you just have to have some kind of fight. In this case when you defeat someone you gain the right to either themselves or their stuff including their spouses or family, who while they might be reluctant and even struggle they will go along with it. Now depending on what kind of fight or battle will result in this a brawl political loss

might result in a few bouts of sex while a life death fight would result in something more permanent.

Wealth Attraction

Wealth is a power all its own just ask Bruce Wayne. It attracts those who want a nice life and can silence those who would cause you problems or make people do things they might otherwise do. Besides this it also gives you a collection of dossiers from each type covering photos, family, reason, what they are willing to do and what you could get away with doing to them.

Dirty Fun

While dirt and filth can sometimes be fun it can also cause problems though not with this. No matter what kind of dirt and filth you and those you are having intimate relations with won't catch diseases or be harmed, this includes stuff generated by sex. You could be banging Isha in Nurgle's cauldron and would walk out without harm. This also has a side effect of your sexual fluids curing diseases.

Father of Nations

Zeus looks like a celibate eunuch next to you jumper. Merely by looking at something can get it pregnant if you desire, especially if it otherwise wouldn't be possible. If desired the resultant child would have at least a selection of basic knowledge as well as growing to at least teens in a fraction of the time if desired. This also lets you pass pretty much anything you have to your kids under any conditions that you might set for them to fulfill, this part can continue as long as they have a percent of your blood that you choose.

Prime Breeder

Besides just being very virile your kids will both be in the top percent physically, it will be a guaranteed complication free pregnancy, and your genes are so prized that the female or family will be given a government stipend during the pregnancy and to raise the child. Is it any wonder that women who desire kids or a bit better welfare seek you out. Or that men won't mind when you cuckold them.

Bad Boy

Quite a few people are attracted to dangerous people. This makes it so that while you might look like a harmless timid child those who would be turned on by it will know your turn danger level. The more dangerous you are the hornier they get. This can be dialed up or down and targeted.

Kink Skills

It takes a lot of different skills to do certain kinks right BDSM, medical, and well too many to list. This gives you all the skills needed to be masterful at whichever one. Though you don't get them until you actually need them the first time.

Chivalry

Like some others this is an attraction perk however it attracts those who are looking for something a bit more old fashioned such as opening doors and pulling out chairs treating them like ladies. But they don't mind other women after all. It wasn't that long ago historically that powerful men had more than one woman. You know what they say: ladies in the street freak in the sheets.

Better Taste

Let's be honest, some people have totally shit tastes in others. When someone of your preferred gender or is willing to gender switch they will be drawn to you. Knowing that despite the fact that you might already be in a relationship even if you don't accept them into yours you would help them find someone better.

Body Breeder

There is so much to experience and fuck here, there is certainly not enough time to do so. This perk lets you breed a woman the child will be you and it's a more bodies one mind situation. The pregnancy and the growing up period are as long as you want. As you get a new body, your mind easily divides and multitasks that scales to incorporate as many bodies as you need. You will easily control each body without being distracted or influencing what happens to your other bodies. You could be having sex with a dozen different people, working multiple jobs, been in a car accident, watching a movie, cooking dinner and having conversations with countless different people all at the same time with ease. As a bonus, your memory and thinking improves with each body, so you will never get confused or forget things with all the information coming in. As long as one body or have a female pregnant with one you are not permanently killed. Nor can the rest of you be targeted through one of your bodies. You start with one extra body with no upper limit. You can still have normal kids without using this, think of it as a switch..

Authority

When you are in positions of power over someone whether that be real or perceived you can either convince them into sex or keep them quiet.

Without Scandal and Consequences

Let's face it, while there might not be those who object here depending on the setting you choose in the future you will have enemies who might use your lifestyle against you. Now anytime those try and use this against you it will backfire in a way you

choose. Such as public and trollish or humiliating, private and giving you power over them. This only in regard to PR and the law and regarding things related to sex.

Dollification

Power that lets you convert others to dolls, sexually functional dolls. Any kind whether that be full sized silicone sex dolls, life sized victorian era dolls, child sized dolls anything. You may give and take away the doll's ability to move. You could even make it so they can breed and what forms the result takes. Or even return them to normal.

Ara Ara? Ora Ora!!!

Sometimes you want smut and... sometimes you don't. At all. In most circumstances you may be able to fight it off, but mitigation factors can make that a bad anchor to reach for. This perk gives you the strength needed to break away from smut situations you don't want to be part of. The less you want to be part of the situation the greater your abilities to escape and fight back. Limited only to escape and a quick punishment.

Sex Parts

This power lets you give things that wouldn't otherwise have them. Yes this includes reproductive organs and even a basic personality, which unless otherwise modified would be inline with the form.

Good Bad End

Rather than being killed by an enemy they will rather, if possible capture you and sexually use you in a way you would enjoy. Keep in mind that they won't put their own lives in danger to do so, and you will not be in charge of the sex.

Sex Time

While you might be wanting wild monkey sex all the time, usually you need to take time away from the fun stuff to do other things. Not with this, all that stuff is taken care of with the maximum power of effectivity with all your perks, skills and powers applying. You will also know what was done as if you had done it yourself. This also gives a 3 fold boost in speed. This applies to pretty much everything, paperwork, crafting, research, design and anything you could do besides personal battle and such.

Paradox Protection

Want to go back in time and bang your mom? Sure, go ahead! This protects from all forms of paradox and will make sure reality keeps on going. If a new timeline was created this grants you a body in that one as well with a one mind two bodies situation so you can experience both. This protects from all types of being blinked or reality warped out of existence. Does not give a method of time travel on its own.

The Beard (Free/100)

This facial hair is beyond perfection, it's the sort of thing that Dwarven pantheons would weep with joy and envy at the sight of. And no that is not a magical effect, the facial hair is just that good looking even on a woman. You can style this at will and always know how to style it to fit any situation best. You gain a grandmaster's skill in crafting beard accessories and adornments for which you have an endless pocket dimension that holds such adornments.

The magical effects that it does come with the ability to stay clean and styled no matter what even should you be erased from existence the beard will remain. Will give those that would be attracted to beards the courage to approach you should you be looking. And finally you have the ability to allow those who gaze into the beard the knowledge and visions of the deeds you have done in the past while allowing this perfection to grace your form. Those who do so will know and accept your nature as a traveler from beyond, this does not mean they would accept you.

You may apply this perk to any altform.

You may take this free but should you ever shave it in a jump with dwarves they will know of it and lose all respect for you no matter what other perks you have the offense to beards will be that great. In other jumps your once brothers of the beard will know you could not handle it and think less of you. Switching to an altform or shape shifting does not count as shaving and is locality specific.

Summoned (100/+200 CP)

This puts your name out there to get summoned to either have sex with, sex up a sex act or breed those you are summoned by. You will receive a contract with terms and what you will get out of it, this will insure you cannot be harmed and get something besides sex out of it.

Taking this as a drawback means that those who you are summoned by will not always be in your strike zone though they will be your preferred gender. While there will still be a contract that ensures that you cannot be harmed.

Free From Karma

Quite a few religions look down on the more carnal aspect of the mortal condition. Not any more for you and yours. To be clear this is just free from karma and sin for things relating to various carnal acts.

Subconscious Truth

The subconscious is more honest with itself. This lets you question the subconscious of others to see what they truly desire.

The Slider Collection (1 Free/Variable)

Each Purchase gives you one of these sliders upon entering a world that allows you to modify the world. If it works better for you, think of multiple sliders, dials and check boxes and whether that be they have always been there or they start appearing and being accepted and not rounded up and or experimented on.

Furry: Lets you adjust the furry ratio this can give both an upper and lower limit on the scale or just these are what is here.

The Fuckable: How fuckable and breedable the flora, fauna and monsters and everything else is. This starts at no changes, physically possible but inadvisable and everything you can imagine.

The Tech: Hard-soft physics what can be possible.

The Mystic: Supernatural elements, mystic elements.

The Heavens: Cultivation. You can decide the limits.

The Anime: Add living toons à la Roger Rabbit.

The Eldritch: Lovecraftian things.

The Gods: Deities invited from other places. They will know they owe you this favor and everything from individual gods to pantheons minus an asshole or two can be chosen.

The Light: Setting brightener.

The Looks: choose the attractiveness of the population of the setting.

The Population: Decide what the percentage of men, women, other genders if any is of the world you are going to.

Known Teleportation (100/200)

You may teleport to anywhere you know of and to any family or friends and you will know when they are in danger to do so. Family includes any who share blood with you. 200 Lets you freely teleport. Range starts with about north america and will grow with practice.

Possession (100/300)

Sometimes being yourself isn't enough jumpers, maybe it's the grass is always greener is true. But anyway this lets you hop into someone's body and experience what they are feeling. Now just because you can body hop doesn't mean you can control them.

Without either their willing agreement or paying the higher price the most you can do is feel what they feel. Two modes: mental and physical.

The worst backlash you will get is a headache or it just doesn't happen. Though be careful just because you would get backlash or trapped by trying to possess someone powerful enough doesn't mean they cannot hurt you once you are solid again.

Dreaming (100/600)

Dreams are quite the thing, jumper fantasies, nightmares and more are possible. You gain the ability to lucid dream, and can share that ability to any person(s) or group. In

addition you gain the ability to mentally enter other dreams and manipulate the dream to your will. What they remember and whether they do or not is up to you. You may also pull others into yours. This includes daydreams.

For 600 you are able to make a dream world much like Tel'aran'rhiad and add it to a setting, though death inside and traveling through it would be an optional add

Live and Let Live (200)

Over your travels you might have relationships with some, how shall we say non local folks. Or at least non local to where you are at least. This perk allows you to get away with quite a lot with your non local friends. Say you want to continue your married relationship with one of your companions. All that would be commented on would be how lucky you are to find each other. This covers unconventional relationships as well, harems, group marriages and more. Though if you marry an animal expect people to wonder about your perversions. In addition this somewhat works as a Normality filter for your acts in the world.

The most any government or organization would do unless they find you actively plotting or deliberately working to bring it down will be to ask you to do an occasional quickly and easily done job for them. Such as putting a satellite in orbit or even kick starting their space program. Said governments or organizations will always offer you fair value for your time or work. Should you ask them to leave you alone they will. This also works as general inserting when traveling to new places if not jumping or after chain.

Age Control (200)

Age is a funny thing. Mortals wish to escape its flow yet chase it in all the little things life offers. Antique furniture, aged wine. It's a long list and one that you really should get familiar with, considering your new power.

You now control the very concept of aging in all things apart from yourself. You may age other people or animals upwards or downwards, making them older or younger as you desire. While leaving memories intact if desired and can also be used to heal by de aging them to a healed state or accelerating their healing.

Even without controlling your aging you now age much slower around 1 day for every 3 years lived, you may toggle when this effect is on but either way that would be your lifespan now.

Likewise, you can do the same to inanimate objects even, affecting possessions, food, and even alcohol if you so wish.

About the only thing you can't do is make yourself older to gain power, although growing younger is no problem for one such as you.

Start The Scenario (200)

There are quite a few scenarios involving sex here in these smut worlds. What this does is if a sex scenario is remotely possible in the situation you are in you can ask/set them up through a mental interface. You may also queue them up for the future.

Body Freeze (200/600)

Stopping time would be a bit too much power for mere sexy shenanigans. This lets you freeze people in the room though with practice that range can grow. When frozen their bodies will still be pliable and when they unfreeze you may choose if they feel all the sensations of what happened all at once or not, as well as if they know what happened or were aware during the freeze.

600 Upgrades it into an actual time stop but the same range.

Big Changes (300)

Like **Small Changes** but bigger, it's not altering the setting but finding one that would fit. Some would be religion based, countries, aliens or magics, and reversing sexual moralities, or gender roles, governmental changes, and more. This would also include adding more genders whether that be they have always been there or they start appearing and being accepted and not rounded up and or experimented on. About the peak would be extending human lifespan by about 3x and aging quality of life by about 3x or adding Santa to that universe. If wanted the world would mostly look the same. One purchase covers everything though you may purchase more to increase the max amount of lifespan.

Uncle's Inheritance 300

This is both a perk and an item, whichever works best for you. What this does is at least once a jump you will receive an inheritance either from a distant relative or a close one who died before the jump started. What it will do will either send you on or open a path for you to start an adventure with magic, compatible women who don't mind sharing and wealth. Now the default is 1 charge per jump but you can recharge it faster the method will be told to you at purchase, all the charges stack. And you have the option to leave a copy when you leave the setting.

Smutomancy (300)

Like mediamancy but exclusively for smut related this lets you enter smut and act within it or pull things or beings out of such things. The more powerful things cost more energy to pull out.

Lewd System (600)

Pick a rpg/gamer system that focuses on the Lewd stuff when purchasing this you get to design it from the ground up. Though you only level up through lewd things. 2 tokens for free

With Sex comes power (600 no Tokens)

Like a dragon or vampire aging the more sex you have the more powerful you get. However this is quite minor increase though that increase is more when you are fucking something that truly challenges you in either the convincing or the actual fucking with the increase more when it's both.

Lewd Mad Science (1000 no Tokens)

You now have the ability to eventually make any smut artifact in fiction, regardless if its scientific, magical, psionic, alien, etc. Mind control devices? Cloning labs to make sex breeding partners? sex ai/androids? Aphrodisiac? Chemicals to change someone's sex? bioengineered sex monsters, magical rings that use tantric energy to recharge, etc. If you know it exists somewhere you will eventually figure out a way to make it. Also gives worm tinker like ability to use everyday item to invent.

Items

- All items will be returned when lost, all items may be imported into similar items, weapons to weapons, vehicles to vehicles, etc.
- Item alterations, modification and upgrades will be maintained between jumps and are also fait-backed.
- Buildings, land, vehicles and other property, unless stated to have a particular location will be placed near your starting location in-jump and will be attached to or moved into your warehouse after the jump is complete. After the jump they can be imported into future jumps as desired.

- Purchases after the first are discounted.
- All properties and vehicles come with renewing fuel, electricity, food, water, air and other things required to keep them running including titles, deeds, certifications, registrations and licenses. Staff, crew and employees follow you through your chain.
- None of the items can bring harm to you and yours.

Arranged Marriage

You are now in an Arranged Marriage and well lets just say your spouse is while they are of your preferred gender is pretty disgusting. While you may have other relations at least once a week on your personal timeline you are going to have to have sex with them and once a month you will have to indulge in one of their kinks that is a big turn off for you. Your winning condition is to have at least 7 kids with them. These kids won't share your spouses traits if you help raise them.

Reward

The ability to make binding magical contracts that can buy, sell, trade anything as long as one side involves sex of some kind. And your spouse to do with what you will.

Kidnaped by Alien Race to Repopulate

This race has either been dangerously depopulated or found out somehow about either some sort of you being especially compatible with their genetics or things you can pass down to your kids. While they do need your willing cooperation and you might connect emotionally with a few, most of your time is going to be non-stop clinical baby making sex with females that you are unlikely to see more time than it takes to breed them.

Reward

You own a self-sufficient and self repairing large space station with infinite supplies that comes with an AI to operate the whole thing for you. Come with the ability to build space ships, alien brothels, shops, shields and weapons to hold off a fleet, the ability to

harvest and refine materials from worlds, stars and or black holes as well as extra galactic FTL. Think Nutrek Starbase Yorktown but better run by a Culture lite AI.

Magical Evolution (Can only be taken if you have some sort of magic you can spread.)

A Coven of under 100 have summoned you jumper, they know your nature and have bound you. They are able to do this because of an agreement with your benefactor since you took this. Granted they cannot bring permanent harm to you and if they are smart they won't abuse you lest you hunt them down after the fact.

Winning conditions breed at least 300 magic kids and teach magic to at least 1000 people bound to the coven.

Reward

7 fold increase in magical power, learning speed, teaching spread and a magic school that can teach any magic you know to even the magicless who will gain magic in the process of being taught. Can make binding magical contracts and pacts.

Spread the Power

Government knows of your jumper status as while they won't harm you or confine you are both going to be breeding the families of lots of government officials. Though you can choose the country and administration and choose some reasonable compensation for doing so.

Reward

Forever free of government complications, at least they won't hassle you for your power, force you to do things for them. You may at will let specific governments know of your powers and that you are open to working with not for them. Or at least doing favors for them.

Post Apocalypse RePopulation

On your own and the old fashioned way you need to repopulate the world Post Apocalypse. While the genders will be your preferred on looks might not be you still have to do your duty. No tech or magic no you have to breed the fleshy way. You may extend your jump as long as needed. Win condition starting min population 50,000 and at least finish is at least 15 thousand need to be descended from you.

Reward

Invasion

Whether it be demons or aliens or something else there at least one going to happen while you are here they are coming to rape and enslave this world. You cannot stop the

initial invasion and the size and danger will be equal to the power level of the setting. If you choose locations 3-6 you will not know what world will be getting the invasion but it will happen while you are there.

Reward

Portal Hubb or 600 cp to be spent or banked after jump ends. As well as a large collection of choice slaves of the invaders of your preferred gender. Per invasion

Toggles

Access to  General DLC

Access to  Living Grimoire Supplement

Access to  World Conversion to RPG System Jump(SFW) Especially if chosen option 1

Supplement & Crossover

Turn this into one or both of the above. Points are separate. In the case of lockout drawbacks you would only get the things bought in the jumps used.

Drawbacks:

Leave When The Story Finishes: Free!

You can leave when you've brought the story to a conclusion. When the "canon plot" ends or is made completely impossible, you can go. Unless another drawback conflicts with this, in which case you'll stay until the drawback is settled.

Continuity Toggle:

Be The Main Character:

Longer Stay: 100 each

You'll spend 5 more years here. Can be taken as many times as you want.

Blistering Pacing:

Any major plot events will rapidly accelerate themselves so that they'll all happen within a year at most. If the plot took less time than that, time will bend so that it finishes within months or potentially weeks.

Embarrassing +100

You are quite easily embarrassed. Granted this will not lower your libido but that doesn't stop you from the feeling.

Phobia +100

Pick a phobia you will be encountering it at least once a month. You may choose up to 28 and none of them will happen on the same day.

Truly Horny (100 per level)

Now while you came here for the sex you might also be wanting to do other stuff. Well if you take this you are going to be needing to have sex with something besides your hand at least every 24 hours or you're going to start having some pretty bad problems. What kind of problems they are while not harmful to your survival they will be those that your benefactor would laugh at and record for prosperity. You may take this more than once but each time you do you halve your time limit.

Blooper Reel (+100)

This overwrites the world a bit at least in regards to you. While otherwise this could be like a porno this makes it so sexy time regarding you are more real life. Fumbling a bit, bit dirty and possible rug burn. Expect your partners to notice this.

Item Lockout: +300

You can't bring items from outside the jump into this jump.

Power Lockout: +300

You can't use abilities from outside this jump here.

Warehouse Lockout: +300

You can't access your warehouse.

Companion Lockout: +100

Your companions can be imported and buy things, but they can't enter the jump with you. Excludes companions bought here.

Be The Main Badguy: +100/+300

You're the bad guy and have to deal with that. Upgrade make it so the good guys know it.

Rhymes, Puns, And Dad Jokes: +100

You now can only speak and communicate exclusively in rhymes. The one exception is when an opportunity to tell a dad joke or a pun comes up. You can speak normally to do that.

Dossiers: +200

If someone becomes your enemy, they'll soon after receive a detailed dossier on you with information about your general tactics, personality, and capabilities.

Scaling Rival: +300

You have a custom enemy who gets a build here that lets them purchase things from this document using as many template points as you spent. They don't like you and want to defeat you.

The Boss Dislikes You: +200

You've drawn the attention of a major antagonist and now must handle that.

Insomnia +300

You have pretty bad insomnia both falling asleep and staying asleep as well as sleep apnea. While no perks, powers/abilities or skills can mitigate this it can be managed with in jump medications and therapy just not cured.

Break Your Chains (+5000CP)

Well jumper I guess this is it after this jump and using the any of the connected cyoas and docs your chain is over. As a gift take this chunk of cp, a safe way to travel the Omniverse, and this guide on fiat backing it should only take a few thousand years to get the hang of it. And the option to be a living vampire with all their perks and items and the anti-vampire medkit.

You Can Always Go Home (+300 CP Requires Break Your Chains)

Well now since your chain ends with this jump you are also having a core placed in your birth world. I will at least make it so the dungeon isn't connected to you or your family by any perception.

Awakening (+700/+1000 CP Requires You Can Always Go Home)

Well now I guess you really wanted to upgrade your home if you went to this length I will be giving a magic awakening to your birth reality with all the birthing pain though those are in the 1000 option. Same as above i will hide your involvement, though if you

want the higher cp the world will know it was because of you. For free you may now supplement World Conversion to RPG to this doc in addition to the General DLC if you had chosen that toggle.

Ending Options:

What will you do now?

- Stay here?
- Go home?
- Move on to the next jump?

Notes

This also goes for any harem fiction or really anyplace.

For access to the cyoa consult your benefactor for approval.

I reserve the right to alter things at will.

For your own chains you may pretend somethings in here don't exist as options to buy.

Fanwank

The Lewd Dungeon may run the  Generic Dungeon Core Jump 2.0 as a dungeon spouse if you wish they get stipend and can take drawbacks that fit this jump. This does not make them a jumper. Though if you take the extended time drawback here she would get to take that one there for point equal to the time you stay here. If you take **Break Your Chains** here she would get to take that one there.

Taking Break Your Chains or the follow ups let you put those points towards the below

For The Secretary you can run [slutty secretary](#) cyoa Though That is mainly for looks as neither of you are beholden to that company.

The Ship companion may run the [Built in the Heavens](#) cyoa though it is beyond it but if you want.

The Eldritch if you take The Eldritch feel free to fill out the [Love Azathoth](#) cyoa.

Scenarios take place outside the main world timeline where time is stopped

For the reward space station feel free to fill out the [Space dungeon](#) CYOA that part would be in a separate section of the station.

Hive item partially inspired by the [Xenomorphilia](#) fanfic on ao3

Personal desire world is meant to be say real life but with certain changes. Use small and big changes as a guide. With or without copies of your family.

Meredith the tree with a hole is an OC used with permission by ChromosomeFarm

Yes with option 1 you can choose a real world with a rpg system, it's really free form and you keep what you get,

Slave collar inspired by rules free vrmmo

Disease Free also work when using portal hub

The Plot Device media/cultural databases would count as a minor one, tech or magic would either count as a medium or large depending on power level. One example of major would be the rotwood manor and the hearthomancy class from that series I wouldn't say using this to join the WC company as a contractor is a good idea, but it would be a large purchase. So would being on the side of being a client they don't fuck with.

Time stop is only in your range not the world or universe that discrepancy would be ignored by everybody.

The Other Grimoire can be cultivation or some other type of power system if you wish.
