Generic Gentle Giantess

By xYellowbirdx

You know what you need jumper? A good jump for the best fetish, and before you ask. No. I'm not biased. Now, I know a giant woman with boobs the size of houses might feel a little overwhelming at first, and maybe a little scary but I can assure you this world you're about to jump into is very safe. Very steamy too if you want. Yes jumper, you'll be going to the world where the sun doth shine and the moon doth glow. A world where the gentle giantesses go.. Take these:

+1000 cp

The world

But first, what will the world be like? Roll 1d10

1. World of tinies, one giant
2. 50% giants, 50% tinies
3. World of giants, one tiny
4. 34% tinies, 33% mini giants, 33% giants
5. World of giants, one tiny
6. 50% tinies, 50% giants
7. World of tinies, small group of giants
8. World of giants, small group of tinies
9. Custom, pick whatever ratio you want!
10. World of normals, but people can change their sizes!

World Modifiers

You can skip this, it's just for flavor.

Giants disposition (pick 1)

-Neutral
The average giant doesn't feel any particular thing toward their smaller counterparts.

-Fetishized
The average giant feels lust toward their tinier counterparts.

-Sadistic
:(

-Loving (Romantic)
The average giant feels a desire to make a deep loving connection with their smaller counterparts.

-Loving (Motherly)
The average giant wants to pamper and spoil their tinier counterparts like they were babies.

-Loving (Deity)
The average giant loves tinies like they love pets, or worshipers. They expect worship as well.

-Hatred
The average giant is absolutely livid toward tinies. Believing them to be fit for nothing but extermination.

Tiny disposition (pick 1)

-Neutral
The average tiny has no opinion of their larger counterparts

- Fear
The normal tiny is terrified of the giants. Hopefully the giants can prove them wrong.

-Servitude
The average tiny is fanatically devoted to any giant they see.
-Fetishized
Macrophilia is the most common fetish amongst the tiny population.

-Hatred
The average tiny sees red at the thought of a giant.

-Loving (Romantic)
The average tiny has a deep longing to create a romantic bond with one of their larger counterparts.

-Wonder
The average tiny is bewildered and curious of their giant counterparts.

Giants size
How big are the big people? (Pick 1)

-Normal
They are the average human height!

-Amazon
They are usually in the 6-7 foot range by adulthood

-Mini-giantess
They are 20 to 25 feet tall, some even reach the 30ft threshold

-Prime Giantess
They are 200 feet tall. Or roughly a space shuttle. The average tiny will only see their feet! No pun intended.

Tiny Size
How tiny are the tinies? (Pick 1)

-Munchkin
They are the size of normal people who are a little on the short side!

-Dwarf
They are 4 feet tall by the time they grow up

-Doll
They are about 15 inches, like a Ken doll.

-Prime Tiny Size
They are 5 inches tall. About the size of a large paperclip.

Time!
What point are you in Humanities timeline?

-Feral
The world is at the point after the neanderthals have died, but before Jericho has been established. I hope you like caves!

-Neolithic
The giants, and tinies, have spread to the Americas after the ice age! Farming has begun to form! The best part…lingual communication!

-Ancient
Places like Athens and Sparta have sprung up. Egypt has just had its first queen. Or some other time in that range.

-Imperial
Rome has become an empire under Caesar! The world knows the greatest empire of all time.

-Praise Jesus!
The common era has begun. In a couple hundred years Rome will enter the golden age, and Christianity's own Jesus Christ has been (allegedly) born!

-Deus Vult
The crusades begin. Depending on other world modifiers, this could get really ugly or not be a problem at all!

-Middle Aged Ages
Have you ever read the handmaid's tale? This is where that takes place. Very dirty, with dreadful plagues.

-That Was The Renaissance!
The cultural revolutions in Italy have begun. Christ was being painted, but Christianity was being defanged!

-Now Comes The Enlightenment!
All the Greek philosophers were studied with excitement! Europe writes books about the right of man being free. These ideas would create America in a couple decades.

-Regency + Victorian Era
The 1800s! A really romanticized era, but in reality it was a drab and dirty time. Although…some modifiers may negate this.

-The Wild West
The old world is dying in America. Outlaws and Highwaymen are being washed over by the rapid industrialization. But giantess cowboys!

-The World Wars
The worst time to be a fighting age male. Again, some modifiers make this not a problem at all.

-The Roaring 50's!
A time of great music, cool cars, and beautiful women. Unfortunately this is also a time of unkind people.

-Retro
This encompasses the 70's, 80's, and 90's. What a time to be alive. Such cultural and technological advancement. The best music of all time!

-Turn of the Century
Includes everything from Y2K to 2010. The rise of peoples lifespans and quality of life goes exponential. They won't know it until they grow up, but kids live in bliss.

-Modern Day
Right now. Not exactly Earth Prime. But close enough. Unfortunately, cultural division and the market dominance of China means some unfortunate truths.

-Tomorrowland
Any future possibilities. Anything from FTL to Post Scarcity is possible in this one. Hell, you can even include alien species if you want.

Misc. Modifiers

-Idealized
The world, no matter what time it's in. Is more romanticized. The world is cleaner, people are healthier and life is just better in general. You won't have to worry about uncomfy things like genocide and war. Or people smelling bad. This doesn't mean utopia but it makes life better.

-All giants are women
This makes the giant population all female. I hope this means they can continue population with the tinies.

-All tinies are men
This makes the tiny population all male. I hope they can continue their population with the giants.

-Giants are extra sensitive
The giant's naughty bits are extra sensitive. Meaning even someone who's 5 inches a rocket ship sized person orgasm with relative ease.

-Tinies and giants can reproduce
They could before, but it would be really hard. Now they can make either tiny or giant babies.

-Beautification
It simply won't do to be someone ugly and be so intimate with someone so large. So this makes all the people in the world, at the very least, above average looking. With many people being gorgeous! This enhances scenery as well.

Origin:

Everyone must come from somewhere

1. Tiny, you are a part of the tiny population. Depending on your world, this could mean everything from slavery to being royalty. You can change your age and gender to whatever you want. But if you picked a modifier where your gender doesn't exist, things may be chaotic for you.

2. Giant, you are a part of the giant population. Depending on your world you could be a ruler, a warrior, a farmer, an office worker, or a goddess. You can change your age and gender to whatever you want. But if you picked a modifier where your gender doesn't exist, things may be crazy for you.

Tiny Perks

If you're tiny, you get half off for all purchases. Except for 100cp's, those are free!

Cuteness Overload! (100cp):

You're just adorable! Cuteness incarnate. The very pinnacle of what endearing is. You can use your size to your advantage to make bigger people just want to glomp you. This makes people more at ease, more willing, less likely to hurt even a hair on your head. They can't even get angry at you. Cute sneezes and endearing laughs come togglable.

No Signal (100cp):

For some odd reason, you are a little beacon. Giantesses will be able to locate you with ease. This effect increases when you're in imminent danger, like you're about

to suffocate in between someone's boobs or you're about to be stepped on. This becomes togglable as well so can still have unaware giantesses.

Up To The Heavens (200cp):
Those big people sure know how to knock height-challenged individuals. But not you! Your ability to climb nearly impossible heights with zero to little places to grip while they are walking AND somehow stay on is truly a blessing. You can ride on your waifu's shoulder without a problem!

You Weren't Built For Eating! (200cp):
No matter what, even if you've been living in your own filth for weeks without a shower. Or you just got back from rolling around in the mud. You taste and smell delectable! Utterly delicious! Perfect if you want to be kissed often. Or if you want less than wholesome things :(

The Drums They Swing Low (400cp):
Aww, the little doki doki of your heart is something truly precious. At least that's what other people seem to think. Even the most sadistic, violent and evil of giantesses would think twice before hurting you. Which is a lot of time to escape and hide. This effect extends to creatures without rational thought as well.

AAAAAAHHH- (400cp):
You might not get stepped on during your stay here but, maybe if someone accidently hugs you a little too hard and shatters every bone in your body. Well, that would suck. Worry no longer! Now you're super durable. You won't ever be crushed in between your waifu's colossal boobs when she puts you in there to cuddle. You also become immune to asphyxiation, just in case you run out of breath.

Without Any Fear (600cp):
Doesn't it suck when someone puts their feet on the bench while you're sitting on it, and the feet are bigger than your entire body? Some people are so inconsiderate! Ever wanted to give them a piece of your mind even though they could kill you with their pinkie? Now you can! You can curse and yell at people without any fear of

them doing anything to you. They'll consider your harsh words and do better, unless you threaten them. I can't really help you there.

I had a dream it would end this way (600cp):

Some things are impossible to avoid. Like that girl who is trying to step on you. How did you even get in this situation! Well, now you can avoid them. You have precognition! A short flash may be a second or two before that event transpires. Like a spidey sense. It is infallible and only you can change the future.

True Love(800cp):

The sub/dom dichotomy is fulfilling for the penis, but not the soul. But what if they're bigger or stronger than you? This no longer matters. No matter who they are, what they are, or how they act can sway someone from seeing you as an equal. Believe me, equal relationships are the shit. Not convinced? Okay, how about I give you a 500% increase to all feelings related to fulfillment, joy, bliss, and love. Still not convinced? Fine, it's toggleable.

Giant Perks

Those who took the giant origin get half off free for all perks, except for those that cost 100 cp. Those are free!

Gentle Touch (100cp):

Despite being building sized, you are incredibly gentle. You can keep someone under one foot without crushing them by putting all your weight in the other foot. You can brush a tinies hair without ripping their head off. The best part? You can hug a tiny without killing them. Or step on a same sized person's neck and not suffocate them.

Loving Touch(100cp):
So now you can hold someone without damaging them. But can you hold them, without abusing them. What an awful question, and not one you have to worry about. Whenever you touch someone, they can feel your intention with every embrace. When you want to comfort someone, they will feel comfort like no other. When you want someone to feel loved, they feel it emanating from you.

Perfect Processing (200cp):
Chances are you're a big girl with big girl needs. No, not *those* needs. As a big girl you need your sustenance and to that end you can eat pretty much anything and have it be nutritious! From eating trash to cleaning the streets, to inhaling large amounts Co2 in the air to stop global warming! You'll get a lot more bang for your buck. This doesn't do any to the taste.

Everyone Will Lose (200cp):
Oh no! Those tinies you've been tormenting have had enough of your trash tier interpretation of the fetish. They are rising up against you! Well as a giantess, you don't go down without a fight. Even if they kill you, you can still cause enough damage in their world that they could never recover. Even if they start a revolt, you can destroy their society and they'll gladly accept you as their goddess. But better yet, if someone else is trying to hurt your precious tinies, you can defend them in a way that makes no one want to test you again!

Plush Overstuffed Chairs (400cp):
It really sucks when you're visiting your tiny friends and accidentally ruin the entire city block because you slipped. Well now you don't have to worry. Your body is as soft as a pillow! You can't even destroy a building even by sitting on it! This also grants a passive luck to make sure you don't even trip up and accidentally give anyone a bad time.

I Smell Sex and Candy Here(400cp):
The most heartbreaking feeling in the world is when you feel something fold under your feet and you check only to find a red smear! You didn't even notice that they were there! Well now you don't have to worry. Because now you can accurately pinpoint every creature in a 5 meter radius around you. Everyone from the smallest tiny to the biggest giant. You'll never have to worry about hurting anyone *accidently* again.

I'm Gonna Get Free(600cp):
You see the giantess mass murderers on the news gleefuly killing tinies and it makes you sick. If only you could sway public opinion with a heartfelt song or well-written book like they do in the movies. Well now you can! With a combination of luck, weaponized memetic effects, facts and logic you can get people to change their minds on pretty much anything!

My Dream Ended Here(600cp):
The world is not a kind place. But that doesn't mean you should be, or not. Really I can't stop you from doing anything you want to do. The only consequence that holds you in place comes from other people, but in this case, those people can't do anything to you. So why spare the rabble at all? Because with this perk, no matter their size or strength. Your: army, followers, citizens etc. Will be just as strong as you. The moment they become one of 'yours' they gain any powers and strengths that you want to grant them. Imagine an army of tinies killing giants for a change. Comes with eternal loyalty for free.

True Existence(800cp):
Ever wanted to help someone desperately, but had no means of doing so? Never fear. Because now you can. You have the power to edit people, you can do pretty much anything with this. You simply have to know of them, and think in your mind what you want to be different about them. Edit their properties, edit away their injuries, change their appearance, give skills, give them a cool eye, change likes/dislikes or turn offs/turn ons. The only drawback is that they can't have metaphysical abilities like true immortality and they only respond to your touch. Oh, and the crippling knowledge that that's not who they really are, even though changes will be seen as completely normal. You could always forget this ability ever existed, but since when have existential problems ever stopped you?

Items

Items pertaining to your origin are half off, except for those that are 100 and below, those are free!

Tiny Items

Tiny Clothes (100cp):

Clothes that fit you no matter what size you are! They come in casual, pajamas, business, business casual, and casual business!

Small Apartment (100cp):

Affectionately named ‘the shoebox’. This one bedroom apartment comes with all the things one could reasonably assume a small apartment could have: running water, electricity, heat, one bathroom, a small living room with a surprisingly comfortable cough, and a kitchen!

Scholarly Source (200cp):

A thick book containing a brief history of humanity. Written by me, so you know its objective. You can use this to learn and study to become super wise like the philosophers of old! Unless they’re the philosophers of youth in case you’re in their time.

Parchment and Quill (200cp):

Or a notebook and pencil. Or a page and a pen. Or a typewriter. Or paint and a stone tablet. It really depends on your world. But basically you have writing material! No matter what you write it's guaranteed to become famous in some capacity.

Stick (400cp):
Ah yes, the big stick. Made perfect for bonking. It isn't actually a stick, that's just a placeholder for any weapon appropriate for your time period. If it's a club, it'll be indestructible. A sword? Never rusts or needs maintenance. Gun? Never runs out of ammunition.

Giant Killer (400cp):
The most potent poison ever conceived by a human mind. Made long ago by a mad scientist whose bitch wife wouldn't die to any poisonous meant for tinies. It could kill a person more than 200 times the weight of the average person, someone like…a giant.

Giant Items

Jumpers with the giant origin get all purchases half off. Unless it's 100cp or below, then it's free!

Big Girl Clothes (100cp):
What these clothes entail are dependent on your world. If you're the only giant, then it's probably just a big towel. But if there are more giants, then it'll probably be more aligned with what you'd imagine for that time period. Comes in any style.

Giant Housing (100cp):
Once again, depending on your world. If you're the only giant, and you're not too big. It might just be an emptied barn. But if the world is more diverse, then the housing would be more akin to something you'd see in your time period. There are dedicated tiny utilities in case you decide to live with tinies.

Collar and Leash (200cp):

A collar coming in any style with a leash coming in any style. Perfectly fitted for fitting around the neck of a tiny and one of your toes. It's long enough to have some slack. If you get really creative you could use the tiny like a nunchuk.

Small Chair (200cp):

A small chair that can be placed on your shoulder to let a tiny ride on. It's comfy and comes in the style of your choosing, it could be anything from a folding chair to a throne.

Blimp Sizes Condoms (200cp):

These condoms, more akin to WW1 war blimps, are made for giant pussy. That's right, women can wear condoms too. Since I doubt you'd be a giant dude because that cringe. These condoms can handle 325,000 gallons of liquid if you're 200 feet tall. It scales proportionally.

Size Ray (400cp):

A staple of the genre. With this bad boy you can shrink or grow anyone into any size stated in the intro. It comes in ray gun, laser, and gun varieties!

Tiny Killer (400cp):

It's literally just mustard gas that is too small to reach a giant's soft to kill a giant. Invented by a big meanie who thought she could play god. Often used by the wrong side of history to genocide the tiny population in other worlds. They usually succeed.

Companions

Don't go alone! Take this.

Import (300cp):

Import up to 8 companions to have them experience the world you built alongside them. They each get 400cp to work with. Go through the doc again but ignore the world building sections.

Another (100cp):
Has someone from the world caught your eye? Do you wish to have them come along as a companion? Did you convince them? They have 500cp to work with. In future jumps they can toggle into their true size as an alt form.

Drawbacks
Take as many as you like.

Big Shpoon (+100):
Oh no! All the giantesses are stubborn and insist that you be the little spoon during cuddling. Even if you're bigger than them! If you're too small to be embraced, they'll put you in their bosom. You might be wondering, how is this a drawback? Well you see, the big ladies always want to cuddle. All the time. If you're single then a random woman will come to your house (even if they're not allowed too) and kidnap you so they can cuddle you. Every night!

Segregation (+100):
No matter their disposition, all the big people except you are super ultra size-ist. They believe in giant supremacy above all. They even segregate schools, workplaces, and living areas. Life will suck if you're tiny. But at least they aren't killing/enslaving you.

Growing Pains (+100):
Imagine life being the size of a skyscraper. The square cube law would bite you in the ass. Now it'll be even worse. Everytime you take a step or move your arms too fast, you feel a gnawing pain. Like your tendons and ligaments are going to snap like rubber bands.

Destructible Environment (+200)
The giants seem to have a sort of gag reflex whenever they're next to a tiny

building. The reflex being…destroying it. Whether it being clumsiness, or just an instinct they just seem to raze whole cities in their wake. Including you.

Crush (+200)

No matter what perks you have, even the ones you have in this jump, giants crush people like we do ants. They might not do it intentionally but tinies are 10x more fragile than they would normally be. Depending on your world, this would be a major problem.

In New York You Can Be A New Man! (+200)

Did you wonder why there was no drop in option? Because in this jump you'll be a drop in no matter what. But with this perk you become someone. Someone with pre input memories. You'll be living in the world after just being born by your mother. You'll forget your entire jumpchain and out of jump powers. You'll remember everything after you have lived your entire in-jump life.

Attack on Titties (+400)

All the giants (except you and your companions) have become mindless drones whose sole (no pun intended) purpose is to eat and kill the tinies. The tinies don't even know this yet. Many will die without your intervention.

You'll die, I know(+400)

What it really is, is dependent on your world. It might be a revolution, an insurrection, an uprising, a separation from the tribe. Nevertheless it's all the same, the tinies are revolting. No matter their disposition, the tinies have militarized and are going to either enslave or kill them all.

The friction between the platform and the train spins him around like a beyblade (+400)

…until his insides are torn out. Yes we all know the old song and dance. Everyone except the tinies that is. It's a shame, the world just isn't built for our smaller halves. So much so that they're dying because of the infrastructure problems. If only some

of the leaders would get off their lazy fat asses (which definitely has some poor tiny stuck under it) and do something! It's a conspiracy I tell you.

Mega MEGA Fauna(+600)

So we know the tinies are tiny, but what about the wildlife. Normally they would be tiny as well but now they're giant as well and they have quite an appetite for tinies. Even domesticated animals routinely hunt and eat tinies. The tinies have no defense against this, even if they're relatively big. It's even worse if they're megafauna, they are practically put on the endangered species list.

Breast Assured (+600):

EVERYONE'S FLAT CHESTED! Run! Run for your lives! This means no breast carrying! No boobie cuddling! No tit milk! It's like a washboard! The worst part? If you even mention anything even closely related to boob size, anyone who hears you is sent into a bloodlusted rage and will try to kill you as painfully as possible.

Kiss! Suddenly Alive (+600)

Happiness arrives! But not for you, or any tiny. In fact, ALL giants now can not be turned on or attracted to a tiny. No matter what world you're in, tinies will never be anything more than a nuisance. A fly to be swatted down. Cold apathey lines their eyes. They just don't care for the little guy. Some will even go out of their way to kill tinies, and call themselves exterminators.

The End of Love (+800)

It is not hate, or even apathey. It's not even a feeling, but a lack of one. Romance has well and truly died. Not a single person, none of them, can feel love toward another person. No matter their size or disposition. The world is gray and without emotion. People feel loneliness but do not know what it is, for they feel it all the time. Even you. It'll be worse for you. Because you remember the feeling but can no longer experience it.

What now?

After your ten years are up, well you can't stand around twiddling your thumbs can you? Choose only one.

Go Home:

You return to earth prime with all your powers to live the rest of your days in the original universe. Taking any companions with you, if they want to follow you.

Stay Here:

Why would you want to leave this world with big beautiful women? You stay in this universe with all your powers and the companions you imported to live out the rest of your days in this world. After your ten years are up, your drawbacks no longer take effect.

Move On:

The quest for power is eternal, you've certainly proved that. Even now you run forth through the multiverse. After your ten years are, you choose your next jump and like that *snap* you're off to find new power.
