Tomoki Tomonori's Alice in Wonderland Doujins

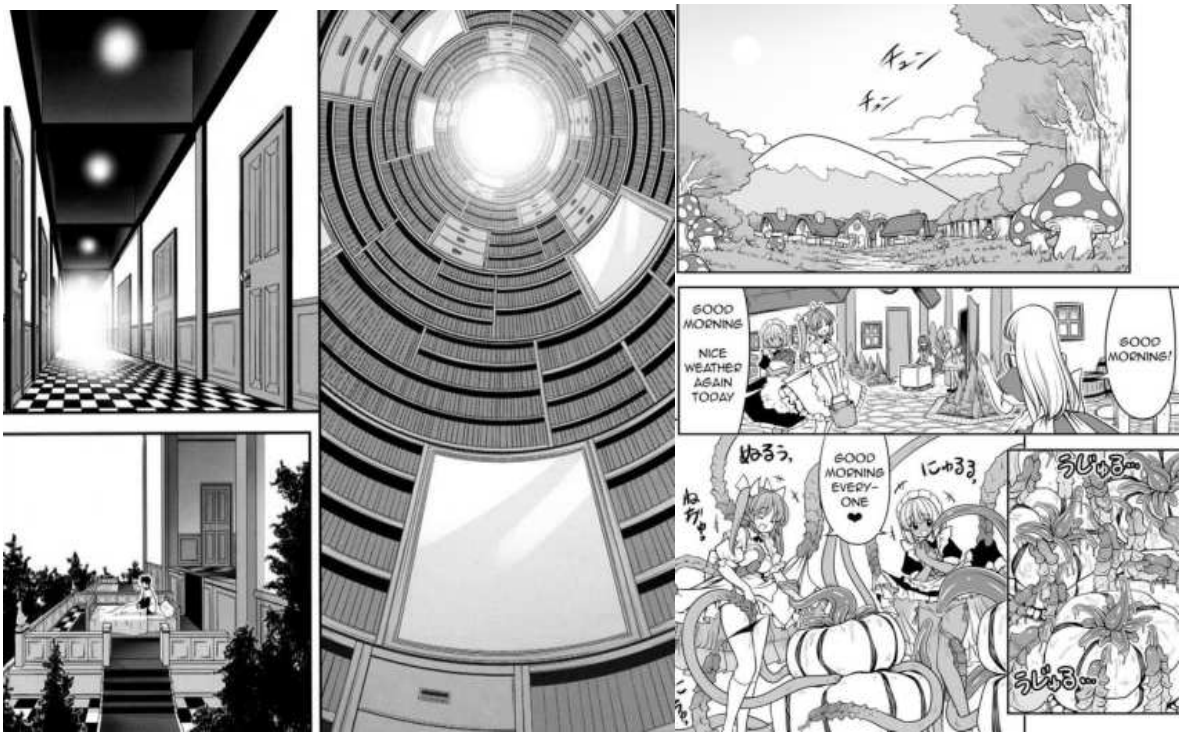

Version 1.4

By Cataquack Warrior

Welcome to the many strange Wonderlands of Tomoki Tomonori, a Japanese doujin artist in the circle Yosutebito na Mangakaki. Though the stories vary widely – some are part of a longer series, others are standalones, and some even take place on "normal" Earth (sometimes even with aliens involved) – their primary components remain constant.

There is a cute, innocent, yet sexy little girl named Alice, often found in a fantastical Wonderland as either a visitor or resident. Dear Alice has so many sexy adventures, sometimes with the local beings and beasts of Wonderland, but also with her precious "Onii-chan", a generic adult who is the perfect match for her.

Now you, the Jumper, are going down such a rabbit hole yourself. You have +1000 Alice Points (AP) to start out, and 10 years to explore and get into lewd encounters.

Background

It's time for you to join the story, Jumper, but what will your role be? Will you be a sweet Alice, or a caring Onii-chan? Or perhaps one of the other bizarre and lewd natives to Wonderland? Please keep in mind that both Alice and Onii-chan can count as a Drop-In background.

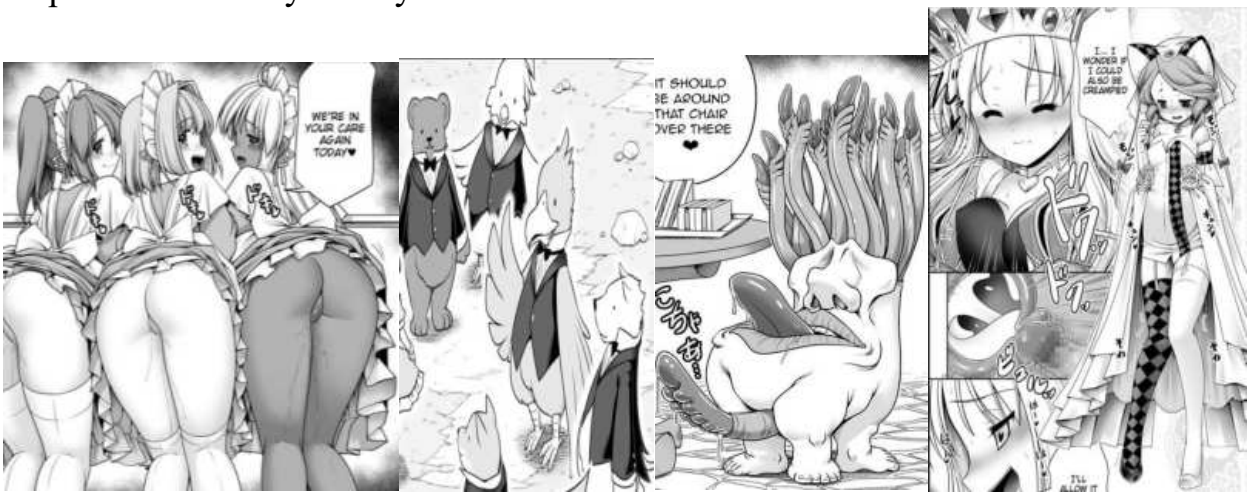

Alice- A sweet little girl who embodies the charm of Wonderland, embracing sex with childish delight. Just what adventures will you have, and who will you meet, Alice? Please note that choosing the Alice background will automatically make you female for this jump.

Onii-chan- The "big brother" figure central to many Alice stories – typically a kindhearted if lolicon person who adores their Alice very very much. Please take good care of your Alice, Onii-chan! While these onii-chans are typically male, the role is also open to females.

Denizen- One of the various people and…things that inhabit Wonderland. This can be anything from looking practically human to being a giant bug, or maybe some sort of truly bizarre monstrosity. But whatever the case, Wonderland's lechery runs strongly through you, and any Onii-chans and Alices who visit are sure to have a big surprise should they meet you.

Perks

Background discounts are 50% off, with the 100 AP perks being free for their respective backgrounds. Everything else costs as listed.

Really Feeling It (100 AP)- No matter how young or old you are, your body is prepared for the full wonder of sex, such that you'll experience it fully. It'll be a delight for you, as well as whoever you're having sex with.

Another Ordinary Day [Of Sex] (100 AP)- Sex is just another common thing in Wonderland – it's something to enjoy, certainly, but it doesn't distract from other responsibilities. So the Queen of Hearts may make regal decrees while sitting atop a "cock throne", or gentlemen may have engaging conversations with each other while still straddling their partners. Essentially, this perk ensures that you can multitask while having sex, while also not getting distracted or letting your emotions run wild, even during climax. You could studiously read a book while also having sex with someone, and you could act the same as you would without the sex added in (at most maybe showing a slight flush).

Keeping Your Neck [But Not Your Chastity] (200 AP)- Though Wonderland's Queen may be all "Off with her head!", no one really dies in the doujins, as there are much more fun means of punishment… If you are sentenced to death or given a sentence that would involve physical harm, you can convince people to change the ruling into a sexual punishment, like being raped by giant bugs. Moreover, those in charge will remain satisfied that they are punishing you sufficiently, and won't double check to see if you actually enjoy the "punishment". The effect applies to individual authority figures (aka judge, police chief, presidents, queen, etc.) and groups of people who could be considered to have an authority role in a sense (e.g., the general public of a democratic government, townsfolk who typically take charge in the local community, etc.). It does not affect individuals who aren't linked to or loyal to the governing authority; the perk would probably help satisfy a mob of townsfolk, for instance, or citizens who obey the laws of the king who decrees the

"sentence", but wouldn't work on an individual person who doesn't go along with the general consensus/authority.

Lucky Landing (400 AP)- Wonderlands, no matter which direction you fall into them, seem to plop you conveniently by locales (and people) you'll come to greatly appreciate. When you activate this perk, any portals you travel through or other means of teleportation or "jumps" will discretely alter your landing location to fit with your personality. For instance, if you have loli desires, you'll appear somewhere fitting for children. Want peace and tranquility? You'll end up at a serene shrine or temple, maybe. Those who want to be around people may end up in a village or town. If you're interested in mischief, you'll end up around plenty of playful characters. And if you're really perverted, you might end up in a dark forest full of vicious and untamed beauties seeking to rape you. As the perk draws on your inner personality and desires, you do not have direct control over your destination.

Cute is Sexy (100 AP, Free Alice)- If there is one thing that defines Alice in these doujins, it's that she's always adorably cute and sweet (even in the midst of hot sex). At the very least, the perk helps you naturally act cute no matter the circumstances, with your cuteness increasing if you have a cute body to match. But more than that, the more childish and cute you are, the more charming and sexy you'll become to anyone. After all, the whole world loves Alice, so if you're cute and sweet like her, you'll have lots of affectionate onii-chans eager to please and spoil you to your heart's content.

Friend to All Things [Sexually] (200 AP, Discount Alice)- In Wonderland, there are tons of oversized, hungry creatures roaming about, from slugs to wasps to gross looking, organic chairs. Fortunately, when they see you, it's a different sort of hunger they feel… This perk makes all kinds of wild beasts and creepy crawlies friendly and helpful towards you, regardless of their size or ferocity. They'll even happily ferry you as you wish if it's within their capabilities.

However, using the perk also causes these beasts to desire you sexually, and may even cause them to grow sexual appendages should they lack any. Therefore, their cooperation hinges on you accepting and welcoming their advances, possibly even as you are riding them. Fortunately, the perk also protects you from any physical damage, illnesses, or other negative effects from having sex with these friendly critters.

Sea of Alice (400 AP, Discount Alice)- Any fluids that your body/soul contains or produces now has an infinite supply. After all, Alice cried up a whole sea of tears once – and a sea of breast milk, in a doujin! You can also excrete as much liquid as you wish without ever running dry.

Form of Desire (600 AP, Discount Alice)- The wonderful thing about Alice is that she's always perfect for her papa or onii-chan. In cases of mass numbers of Alices, the doujins make clear that she will adapt the ideal form imagined by her lover, even growing new body parts if needed. Yet she always remains the ideal image of Alice.

With this perk, you can alter your body to suit the desires of someone you have close feelings for. Yet even as you transform to match their ideal love, you'll never lose the overall semblance of being you at heart, such that people will still recognize you as you rather than be unsettled by you becoming something else.

Kami-sama of the Heterogenous Sex Kingdom (800 AP, Discount Alice)- It turns out that this lewd Wonderland is your own creation. It's a miraculous world where there's no such thing as obesity or old age or sorrow, so people can sleep, eat, and do lewd things as much as they please.

The only catch is that your personal kingdom starts out with no sapient inhabitants, only some local, lewd flora and fauna. To have intelligent company here, you can invite people to your world, as long as they promise to embrace the lewdness that your domain embodies.

If you travel to the very edge of your Wonderland, you can sense people in the outside world (it can be the setting of the current jump, or your original world) who are especially suicidal and/or lewd, and you can temporarily manifest yourself before them to invite them to a new home with you; when appearing before such people, your invitations will become especially charismatic. To exit your world and return outside, they must travel with you to the edge of the world alongside you.

The Face Doesn't Matter (100 AP, Free Onii-chan)- The "onii-chan" characters in these stories tend to be rather generic in both personality and body – to the point that their faces are never really shown. Yet the Alices – and plenty of others – still love them nonetheless. At the very least, the perk lets you selectively gain a generic

appearance that limits your distinguishing features. But in addition, the perk ensures that your attractiveness will not be affected negatively by anything that obscures/conceals your appearance.

Onii-chan's So Knowledgeable! (200 AP, Discount Onii-chan)- Did you fluster your dear Alice by licking her ear? Just tell her that playing "lickety-lick" is how couples usually show affection – she'll believe you without question! You are incredibly persuasive at telling lies to youth (and those who behave like children), especially when you're inventing excuses to justify sexual things.

A More Important Job Than You'd Think (400 AP, Discount Onii-chan)- Yes, you have a very important responsibility in Wonderland: to have sex with its residents! But the sex always fulfills some essential need for the land – keeping the Queen content, increasing milking output (which comes only from breasts in Wonderland, don't you know?), etc. So with this perk, there will always be something that makes sexual activity valuable and welcome to the people and setting around you.

Typhoid Alice (600 AP, Discount Onii-chan)- When this perk is active (you can activate and deactivate it at will), you carry "Alice disease", though you can shut off whether or not you "suffer" the symptoms. Whenever you go over a certain weight and have enough fat (enough that the excess can be shaved away without endangering the health), your excess fat will shed and turn into a loli Alice who loves her "Papa" so very much. If this happens multiple times, you may very well end up with a harem.

And don't worry if you have perks, abilities, or other things that would normally prevent obesity; as long as you remain infected with Alice disease, non-Alice anti-obesity restrictions won't work on you.

The virus molds itself to fit the needs of the birth parent, even gaining boy parts or girl parts (or both, or anything else) if you wish it ; she could even mature and no longer be a loli, if that's what you really want. Likewise, she was born from inside you, so naturally she knows all about you (even your birthday), ensuring that she'll be your ideal partner. When the fat leaves your body, the virus also removes any cells that it considers unnecessary or dangerous (don't worry, the Alice isn't

harmed), so this can be a handy way to save your life from cancer, poison, wrinkles, etc.

By default, the disease won't spread when you use the perk on yourself, but you can selectively make the virus contagious at will, so you could very well become carrier zero for a worldwide epidemic if you want. Similarly, you can toggle the disease to simply exist retroactively in the world, rather than need to spread it directly from you.

Picture Book Peep (800 AP, Discount Onii-chan)- How virtuous of you to have stayed a virgin for 30 years to attain wizardhood! Now you can use a spell that lets you enter a picture book's story – something I'm sure you won't use for anything perverted…right?

There are upsides and downsides to your travels into a book. Everything is driven by the original script, so the characters with the story can't make any significant changes to their actions or dialogue, even if the spell doesn't prevent them from noticing your presence. For example, conversations are one-sided; even if they recognize or understand you, they can't reply, only follow the dialogue they have in the story, as if you are not there.

But on the other hand, since the characters can only follow the direction of the plot, they can't do anything to resist whatever you do to them – even if they're scared or disgusted, they'll still do their best to ignore your presence and follow the script.

In addition, you can go anywhere in the story, including things outside the scope of the book – like, say, the voice actor studio where the narrator is reading out the narration.

Jabbering Jiggling Body (100 AP, Free Denizen)- The various flora and fauna of Wonderland often look utterly freaky, with all sorts of appendages (the kind that go into you quite nicely), but that only adds to their charm – Alice certainly likes them! With this perk, you can add various appendages and features to your body, like a retractable dick(s) or tentacles – heck, you could have a whole line of cocks on your back as "seats". Whatever the case, these extensions are first and foremost lewd, and they are able to perfectly work for sexual activity with any being regardless of age or form, making them enjoyable for anyone who experiences them.

A Queen's [Loli] Dignity (200 AP, Discount Denizen)- Yes, the Queen of Hearts is a loli, and certainly acts childish, but she remains a symbol of regal authority in Wonderland regardless. Similarly, you can now embody charismatic, royal dignity even if you exhibit childish or lewd behavior. Somehow, even if you throw a childish tantrum or look like a little kid regardless, you ooze charisma, and people will recognize you as a respectable authority figure. This effect remains strong even when the social norms and laws around you would make your behavior seem reprehensible; you could even be the prosecutor of someone guilty of rape, and nobody would see anything wrong with you having him or a witness raped as part of the sentence.

One Thing Led to Another (400 AP, Discount Denizen)- You can rope nearly anyone into assisting you with a task as long as they view you as sad or pitiful. Moreover, as long as someone gets hooked into helping you with your first task, you can get them to help with any additional task that are at least tangentially related to the first task, and then anything related to the latest task, and so on.

You can chain a ton of these tasks together, such that someone who just offers to help you with your heavy load of pepper can get roped into making out with you at a sex hotel. In the spur of the moment, your helper may even be willing to do things they'd otherwise avoid, like cheat on their true love, though they are still capable of feeling remorse after they've finished helping you; however, they are more likely to blame themselves than blame you – after all, they were only trying to help.

It's Not My Fault I Was Late – I Was Raped! (600 AP, Discount Denizen)- The White Rabbit is always slow to wake up, making her constantly late for critical appointments. But she's found the perfect excuse: she was raped! As long as you actually did have sex with someone (whether it's truly "rape" doesn't matter), people will consider it a valid excuse for your misbehavior, whether it's being tardy or for messing up something on the job. Even if it happens again and again, the excuse can remain valid. You also have increased luck in finding people you can persuade to rape you when you're in a pinch and need to draw on the excuse.

Narrator (800 AP, Discount Denizen)- It's always wonderful for someone to read a story like Alice in Wonderland aloud to you, and the narrator is here to do just that – and make sure that the events follow the original script. At will, you can assume the role of a world's "narrator", as long as the world has a preexisting story you can narrate.

While acting as the narrator, you teleport into an isolated location that is technically a part of this world but normally impossible to locate or access; it will resemble a voice actor's studio room, where you can narrate along with the story. Only the person(s) directly involved in the current narrative you're reading can hear your words, and only if you allow them to hear you; outsiders who are not part of this world's existence (e.g., other Jumpers) may also be able to hear you.

As a condition for being the narrator, your narrative must mesh with the preexisting flow of the storyline. However, if the world starts to deviate from the story's normal plot, being the narrator lets you subtly influence and bend reality in ways that can potentially guide the narrative back onto the original track. The way it works is that you can assert in the narrative that something different from the normal script is still "close enough" to result in the same events as the original story.

For instance, if you were narrating Alice's Adventures in Wonderland, and some pervert replaced the "Drink Me" bottle with their cum, you wouldn't be able to stop Alice from drinking the bottle, but you could assert that it still counts as causing Alice to shrink; what matters is the story, not what's actually in the bottle. In this way, you can help guide the story back onto its proper route, but be careful, as the narrator is neither omniscient nor invincible.

Items

Any items that are expended, destroyed, or lost will be replaced, replenished, and returned to your Warehouse or similar storage unit in 48 hours. Several items below are free if you have purchased certain perks or taken a certain drawback.

Doujin Hoard (Free)- A collection of all the doujins written and published by Tomoki Tomonori and the Yosutebito na Mangakaki group, translated into any language(s) you like. This set includes all their Alice doujins, as well as plenty for Touhou Project, and even some original works.

Alice Outfits (100 AP)- A collection of dresses and other clothes to be worn by Alice, capturing her cute loli innocence. Not only is there the traditional dress you'd expect from her, but also other clothes and accessories, like a schoolgirl outfit complete with a backpack. They all fit perfectly on little girls…and on you, if you want.

Obesity Supplement (100 AP, Free with Typhoid Alice)- This medicine, intended for those with Alice Disease, causes you to grow obese in just 30 days. 100% effectiveness guaranteed, even capable of overcoming fitness perks. The purchase gives you a half-dozen bottles.

Castle of Hearts (100 AP, Free with A Queen's [Loli] Dignity)- Your basic generic fancy castle, perfect for a loli ruler like the Queen of Hearts.

Milking Station (100 AP, Free with Sea of Alice)- A set of milking equipment designed to safely extract breast milk from people, ensuring that any milk processed from it is fully safe and healthy for whoever consumes it. The harvesting process is most effective if the subjects are having sex while being milked.

Incense Burner for Putting Women to Sleep (200 AP)- An incense burner made with "Oriental mystery" that releases a strange smell that only puts women to sleep. As long as the incense burns, they will not wake up, not even if someone should have sex with them. Once they do wake up, they will remain blissfully unaware that anything strange happened while they slept, aside from perhaps some confusing dreams.

EX "Vitamin" (200 AP)- A suspicious vitamin bottle that promises infinite erection, a vitality boost, and a libido multiplier to the imbiber. And though the bottle itself

looks dubious, you can easily apply the vitamin into any food or drink without the consumer noticing anything different (at least until the effects set in…).

Eat Me, Drink Me (200 AP)- A dozen various cakes and bottled drinks that say to eat or drink them. As you'd expect from an Alice in Wonderland story, consuming them will cause you to shrink or grow in size randomly. Please note that rubbing the food or liquid on other parts of your body may have other effects; for instance, rubbing a growth-inducing Eat Me cake over your breasts will cause you to lactate indefinitely, while rubbing the shrinking Drink Me liquid over them would stop your lactation. Strangely, they are identical in appearance to the Blank Bait.

Blank Bait (300 AP)- A dozen various cakes and bottled drinks that say to eat or drink them. However, they are all "blanks" that actually contain cursed, lewd poisons inside. If someone consumes a blank, they'll suffer a random "poison" that has lewd consequences, and automatically learn the kind of poison and the specific treatment method necessary to cure it (always something absurd and lewd). See the various Poison drawbacks for examples on kinds of poisons, though you can imagine that there are plenty of others, too; unlike the drawbacks, following the instructions entirely cures the victim's ailment, unless they receive the same effect from swallowing another blank. The poisons are impossible to detect or identify until they are consumed; in fact, they look identical to the Eat Me, Drink Me treats.

Genso Jump Waiver (600 AP, Free with Intensified [+600] To Another [Eastern] Wonderland Drawback)- A special card, tied to a mysterious feather, that lets you "Genso Jump" to a lewd version of Gensokyo (Touhou Project) whenever you wish. However, the magic is linked to your personal desires, and you'll arrive in a location with people/beings who will most strongly capture (and overwhelm) your lust. You are only allowed to stay if you can overcome their lustful traps. Fall to their power, and you will be sent back out; it's harsh, but that's the rule. You can come back as many times as you want, but if your perverted heart remains unchanged, you may face a terrible challenge.

Companions

I'm sure you'll make many fun friends in Wonderland! Maybe even someone you'll truly cherish – both innocently and lecherously.

More New Arrivals (100/500 AP, Can Pay Extra for Increased Stipend)- You can import pre-existing companions or gain entirely original companions. For 100 AP, you get a single companion, while for 500 AP, you can import up to 8 companions. Each gets a background suitable for the jump and 400 AP to spend; you may spend additional AP to proportionally increase their stipend.

Cosplayer Girl (100 AP)- Not a real Alice, but rather a cute girl cosplaying as her. Alternatively, you can have her theme be a different fairy tale character like Little Red Riding Hood. Can be purchased multiple times.

Canon [By Doujin Scale] Character (200 AP)- With this purchase, you gain a character canonical to the doujins (i.e., Queen of Hearts, the Duchess or her Cook, Alice's sister) as a companion. Can be purchased multiple times for different characters. The White Rabbit cannot be purchased with this specific option; see separate entry.

Another Wonderlander (200 AP)- You gain an original companion who fills the role of an Alice in Wonderland character who has not yet appeared in the doujins (the Caterpillar, the Mad Tea Party, the Tweedles, the Red and White Queens, etc.). Like the rest of Wonderland's denizens, they're guaranteed to be sexy and lewd.

Beastly Friend (200/400/600 AP)- Besides people who look relatively normal, Wonderland also has plenty of other…things, from giant slugs and wasps and worms to utterly weird shapes that could be flora, fauna, or something else (and they all have dicks). For 200 AP, you get a single creature (at least as tall as a man), for 400 AP you get a dozen beasts, and for 600 AP you can get a whole menagerie.

White Rabbit (400 AP)- A bunny girl (human girl with rabbit ears) who is somehow able to go back to your old world(s). She's always running late and getting in trouble with her boss, so she's made a deal with you. Whenever she's late, you'll "rape" her so she has an excuse. In return, each time you rape her, she'll give you something she picked up while in your old world; it can be something random or something you specifically requested, as long as it's something she can feasibly obtain during her travels.

Android Alice (400 AP)- A special kind of robot created by an alien race to eliminate sex crimes (which didn't work out exactly…). Though a robot on the inside, she looks perfectly organic on the outside. When awake, the android will detect whenever you seek to have sex or perverted actions with someone; she'll then swiftly intercept you and drain you instead, thus saving the victim. To make love, Alice establishes a link with her android body to receive your thoughts and desires. She'll then shape her body to fit your ideal (skin, body fat, nipples, vagina, etc.); she can even mimic being pregnant, though their artificial body makes child making impossible, sadly. She can likewise adopt various personas to match your kinks, becoming anything from a motherly figure to a spoiled daughter. Can be bought multiple times.

Drawbacks

You can take up to +600 AP in drawbacks. Please note that Poison drawbacks and the like that inflict curses on largely female genitalia and body parts will still bring similar pain to you even if your body lacks those features (in fact, your ordeal will probably be worse, as the curse and cure can go horribly wrong if your body isn't built for it).

Bigger or Smaller Adventure [Time Frame] (100 AP)- With this drawback, you can halve your time in the jump (reduce it by 5 years), or double your stay (increase it by 10 years). You buy take this multiple times.

Returning Wonders (+0 AP)- Any past jumps themed after Alice in Wonderland that you have visited are now merged into this jump – after being painted appropriately with vibrant lewdness, of course. Characters, places, events, and other things you experienced from those past Wonderlands will carry over to here.

To Another [Eastern] Wonderland (+0/600 AP, No Points If Taking Genso Jump Waiver)- Did I mention that Tomoki Tomonori has also written numerous *Touhou Project* doujinshi, too? Now, Wonderland also connects to their version of Gensokyo somehow, where many of the lewd things from the doujins may very well happen to you should you arrive there one way or another. If you have been to a *Touhou*-themed

jump before, your actions from that past jump(s) will affect this version of Gensokyo, but the lusty atmosphere of the loli-loving doujins remain strong regardless.

For +600 extra points, you'll need to stay in Gensokyo for at least a week without leaving, which will be harder than it seems. For Gensokyo is not a place for the weak, and you'll need to prove that you are strong enough to withstand the various sexual intrigues and torments of the locals. Should you succumb entirely to their advances, you'll be sent back Outside. And "rest" assured, whenever you enter Gensokyo, you'll end up thick amongst those who will most tempt and dominate you – and you'll be separated from all companions, so don't expect anyone to come save you.

Fail the +600 AP challenge, and you fail the jump. On the bright side, should you last a week against temptation in this hentai version of *Touhou Project*, you can have as much fun as you want without fear of being ejected.

Curious to a Fault (+100 AP)- You're always curious about new things, whether it's eating a mysterious cookie or checking out a cave where you heard strange noises. And now, indulging your curiosity is more likely than ever to result in something troublesome…and lewd.

Gullible (+100 AP)- You're inclined to believe anything you're told, no matter how ridiculous or lewd.

Poison of the Aching Boobs (+100 AP)- Your breasts constantly hurt as if they're burning. The only way to temporarily relieve your symptoms is to breastfeed until your lactation ends.

Poison of the Aching Cunny (+100 AP)- Your insides will churn painfully until someone sticks a penis and semen into your deepest part, though the ailment will return eventually time and time again.

Poison of the Leaking Love Juices (+100 AP)- You will constantly leak painfully, and can only be cured temporarily if you get your pussy licked until you squirt.

Poison of the Thirst for Saliva (+100 AP)- You have an unbearable hunger for saliva that will only temporarily subside if you receive a "creampie" while tongue-kissing and sharing saliva with someone.

Poison of the Lonely Womb (+100 AP)- Your womb will hurt until, shaking your hips all by yourself, you grind your cervix and take sperm into your uterus; the cure is only temporary, though.

Poison of the Super-Itchy Nipples (+100 AP)- Your nipples itch all the time and get worse whenever you scratch them. The only way to temporarily relieve the itchiness is to get cream-pied while having your nipples rubbed by someone else.

Poison of the Drunkard Blurting Out His Heart's Desires (+100 AP)- You will spontaneously say and do whatever you desire, unable to be reined in by embarrassment. Also, while in this state, any ejaculations will result in 100% pregnancy for whoever you have sex with, regardless of age. Fortunately, the effects will subside after waiting for 8 hours; after that point, you'll become infected by the poison again in 24 hours, as the cycle repeats.

Short Memory (+100 AP)- This land has so many wonderfully lewd things that you don't really bother to root yourself in the past for long. You easily forget things (even things that happened just the other day), and your carefree nature means you won't notice you forgot or even care about what you forgot.

Glutton (+100 AP)- You have a big appetite, and you'll eat any food (and drink any beverage) that you see. In Wonderland, where many things may have…unusual effects when consumed, you may soon get in over your head.

I'll Have to Go Get It Back! (+200 AP)- Whenever you have a sex with someone/something, you'll randomly drop something precious to you – it could be anything from a thimble to a powerful weapon, but it'll be something you consider valuable and precious. If you want it, you'll have to go back to get it…and likely get into another sexual adventure, and lose something else in the process, rinse and repeat.

"I Came Here to Fuck!" (200 AP)- Upon arriving here from far beyond, you received a special marking upon your body. It signals to every girl in the surrounding area, in a loud voice, that "I came here to fuck!" Naturally, they'll seek you out for pleasure and refuse to let you escape, ever.

Spell Trance (+200 AP)- Whenever you try to cast a spell (or use some sort of special ability), you will lose all your senses and enter a trance until you've finished casting the spell or a half-hour has passed (whichever is longer). While you're in this

state, someone could completely molest your body or rape you without you ever noticing – and you'll remain unaware that anything strange happened to you even after you wake up.

Warehouse Lock (+200 AP)- For the duration of this jump, you cannot access your Warehouse, or any similar bases/properties you possess.

Mundane Body (+200 AP)- You lose all your special powers and are reduced to your basic (plus Body Mod) form.

Anti-Loli (+300 AP)- You find the whole loli concept to be utterly loathsome and disgusting, and you'll feel creepy and guilty if you even think of a little girl as sexy – and feel even worse if things go further. Unfortunately, you're bound to meet all sorts of little girls who embody the loli vibe and really want to tempt you and have sex with you.

Not a Fan of Sex (+300 AP)- You don't like sex – both doing it and seeing it – and just the thought of it leaves you rather queasy and disgusted. So you probably won't have much fun in this lewd wonderland.

Yes, It IS Still a Crime (+300 AP)- Who would've thought there'd actually be a court in Wonderland… Wherever you are, there are still strict statutes against sex and rape, and you will be harshly prosecuted and punished if caught.

Swimsuit Summer (+300 AP)- Every summer while you're in this jump, there will be a swimsuit contest every Sunday. Before the end of the jump, you must win first place in both the "sexy" and "cute" categories, or else you will fail the jump.

Bothersome Blanks (+300 AP)- Whenever you consume food or drink in this jump, it has a 50% chance of being a "blank" that will poison you with a random effect (see the Poison drawbacks for some examples). Fortunately, a status bar will automatically inform you of the poison's type, effects, and cure. And unlike the drawbacks, the cures are permanent…unless you happen to find another blank, of course.

Sleeping Souvenir (+400 AP)- Whenever you have sex, you will become pregnant, regardless of gender.

What Did I Do In The Original World? (+400 AP)- You cannot remember at all what your life was like before the jump – or even what the world(s) before were like.

Even if you somehow learn about your past life and worlds, you'll forget about it as soon as you stop thinking about them.

Asthmatic Princess (+400 AP)- You suffer from an incurable disease that, while neither contagious nor directly dangerous, causes you to suffer severe asthma attacks whenever you physically touch other people. For you, it's so intense that being in the same room as other people who are unmasked will close your lungs. Thankfully, wild beasts and monsters do not trigger your asthma even through close contact.

Trial of Hearts (+400 AP)- The Queen of Hearts is determined to punish you for your heinous crimes, and the only thing stopping you from losing your head is your dearest lover's devotion. So she has arranged a test for both of you. The person you are closest to will be raped incessantly by her guards, all while you watch. If your lover endures the torment to the end without abandoning you, the Queen will declare you innocent. You'll also get the loli Queen of Hearts as a companion for free. However, should your lover surrender, you will lose your head – and the jump, too.

Alien Attack (+400 AP)- Aliens from outer space have invaded this world to bring peace and order…and they absolutely cannot stand everyone's obsession with sex! They've given up on taming humanity through the android Alice initiative, and instead plan to crush all the perverts with raw force, so watch out!

Bad Kind of Rape (+500 AP)- Most of these doujins are pretty fun and cheery, with the whimsical nature of Wonderland ensuring that the various sexy loli antics don't leave anyone sad or hurt. But a couple of the doujins are a bit darker… Any sexual activity is now more painful, and you'll run into meaner and crueler people.

The End

It's the end of this story, but where is your story going now?

Return to the Original World- You've decided to head back to where you started, as you say goodbye to Wonderland and the jumpchain. You still retain your perks powers, items, companions, and any other things you've acquired.

Make Your Home Here- Why ever leave Wonderland, where you can do lewd things all day long? Now, every day is a Wonderland… You still retain your perks, powers, items, companions, and any other things you've acquired.

Depart for a Fun Journey- You keep moving forward on your jumpchain adventure, as a new world awaits with exciting surprises.

Notes

Hentai Site Warning- You can find some of Tomoki Tomonori's translated doujins online, but be warned that they are often on dubious websites, so make sure you have adequate antivirus protection before checking them out.

Continuity Toggle Drawbacks- To be clear, *Returning Wonders* and *To Another [Eastern] Wonderland* are specifically continuity toggles. They are not to be considered "supplement" toggles for previous jumps, nor do they act as a form of time travel to redo past jumps.

Blanks/Poisons Affect Everyone- Please note that while some of the curses inflicted by the Blank Bait item and the various Poison drawbacks (and the various cures for the ailments) seem to expect you to be female, this does NOT mean that you won't suffer the effects if you are a man, or if you have a bizarre form. The curses will still affect you in some manner. In fact, one of the doujins even warns that the poisons could become especially dangerous if your body isn't compatible, as the poison forces your body to do things that it's not built for – for instance, the "Lonely Womb" poison would be nigh-incurable for a man.

Change Log

1.2- Added Wonderland Denizen background (complete with respective perks), edited Typhoid Alice, added new items (Doujin Hoard, Alice Outfits, Castle of Hearts, Milking Station, Eat Me/Drink Me, Blank Bait), increased Incense Burner and EX "Vitamin" to 200 AP apiece, edited Obesity Supplement, added more companion options (More New Arrivals, Cosplayer Girl, Canon [By Doujin Scale] Character, Another Wonderlander, Beastly Friend), added Gullible drawback, edited To Another [Eastern] Wonderland.

1.3- Edited Typhoid Alice perk, made several items free with purchase of related perks, added new drawbacks (Glutton, Anti-Loli, Not a Fan of Sex, Alien Attack), made it clear that the poison drawbacks are still effective if you're male or inhuman, edited Bigger or Smaller Adventure, edited To Another [Eastern] Wonderland, edited Spell Trance, lowered Mundane Body to +200 AP, added Notes section.

1.4- Added pictures, edited Keeping Your Neck.
