Dragon Ball Fu

v1.1
by DeverosSphere

Big thanks to Masako X for inspiring this.

Hi there, I'm Fu. I've been using this trick to make time rifts and to play with history.

What's that? The Time Patrol?

Oh don't worry about them. The time rifts I'm using create fake timeline's. They aren't even connected to the Book of Beginning and the End. It should be completely safe to play with these histories just so long as you don't anger the fake Zalama or Zeno.

The problem is I've been getting a bit bored lately. Most people act and do the same things every time Goku wants to fight, Vegita let's Cell transform. I need something to shake things up.

So I thought why not outsource my rifts?
I could add someone in as the new X factor and see what happens.
Then lucky me you showed up!

So have you ever wondered about how the story of the dragon balls might have turned out differently had there been different choices or decisions along the way?
What If Vegeta had been the first super saiyan?
What If the namekians were the warrior race and the saiyans the pacifists?

I could ask you hundreds of questions like these, but i've already seen them so the real question is what is your what if?

Gain +**1000 CP**.

What's your Setting:
So when you are thinking about your time rift's "What if" think about its setting for example these are the last few i played with:

- **What if Frieza was sent to earth?**
    - Lord Cooler betrayed and killed King Cold. After King Cold's death Berryblue managed to have the infant Frieza sent to a weak planet called earth. The young Frieza was found by master Roshi and raised as his Grandson.
- **What if Raditz turned good?**
    - Raditz survived his first encounter with Goku and Piccolo becoming badly injured from the battle. He was then disowned by Vegeta and Nappa for being weak with the two clearly intending to kill him. Out of desperation Raditz joined forces with the Z-Warriors against the invading saiyans hoping to prevent his execution.
- **What if Broly Joined the time patrol?**
    - In age 850 Trunks used the Dragon Balls to summon a strong ally, someone with the kind of power to help him defend time itself. Surprisingly the person who appeared before him was a young saiyan wearing a fur pelt and a shock collar.
- **What if Vegeto became the Super Saiyan God?**
    - In this time rift the potara earrings were actually permanent and not even the dragon balls could separate Vegeta and Goku. When Beerus arrived Vegeto used instant transmission to get Tarble for the ritual and fulfilled the prophecy.
- **What if Present Cell lived?**
    - Krillin and Trunks were unable to find dr gero's basement lab and in age 788 cell awoke. The green bug man was able to sense energy and knew how underpowered he was. However thanks to the arrival of Super Android 17 he was able to go beyond perfect and become Superior Cell.

Timeline:
The first part of this is setting when in this rifts timeline you want to start.
This will choose what discounts you get.

Also just as a freebie you can exceed the duration of this jump beyond 10 years up to a maximum of 100 years but you gotta tell me how long you want before we start.

- **Dragon Ball [+100 CP] -** You start on earth in Age 749 the same year that a young girl should have met a boy with a tail. In this time the villainous Emperor Pilaf is searching for the dragon balls to make himself the ruler of the world. In the soon future the Red Ribbon army will search for the balls, the crane school will join the martial arts tournament and the Demon King Piccolo will be reborn.

- **Dragon Ball Z [Free] -** You start on earth in Age 761 the same year that an alien pod is supposed to arrive with its occupant searching for the saiyan Kakarot. Normally about a year after this time the saiyans will attack earth. Not long afterwards the vile lord Frieza will journey to the planet Namek for it's dragon balls. About four years after that Dr Gero will release his androids upon the world. Lastly five years after Gero, Babidi will attempt to revive Majin buu. You might miss that last one if you stay less than 13 years.

- **Time Patrol [Free] -** Unlike the other choices you will start outside of the standard timeline during age 850, 852, 1000 or even age 2016. At these point's the time patrol fight against the villainous Time Breakers. The time breakers cause numerous issues to the timeline by empowering villains and changing the past. They did that in order to gather energy as a part of their goal to break the seal on the Demon Realm.

- **Dragon Ball Super [-100 CP] -** You start on earth in Age 778 the same year that the God of Destruction Beerus awakes beginning his search for the Super Saiyan God. About that time Frieza will be resurrected and will find a new power before attacking the earth. Shortly afterwards a tournament will begin between universe 6 and universe 7. Later Zamasu's Zero Mortal Plan will begin followed by the tournament of power. There is some more stuff that happens including a new saiyan called broly and a world eater called Moro but i don't remember it all right now.

- **Dragon Ball GT [-100 CP] -** You start on earth in Age 789 the same year that emperor Pilaf was supposed to use the red star dragon balls to make goku a child. In this time the Tuffle Machine Mutant Dr. Myuu will complete his ultimate creation to exterminate the Saiyans and restore his kind. Soon afterwards the dead villains of the post will rise alongside the arrival of Hell Fighter 17, followed by the corruption of the dragon balls and the birth of the 7 Shadow Dragons.

- **Dragon Ball Evolution[+700 CP] -** That's clearly a mistake, you don't know what you're doing, this timeline is terrible. But hey, you get more points ... and I dont realy have any perks or items for this its just really really dumb…

New Body Who This?:
So Who do you want to be in your “what if”?

Instead of being given an entirely new body you will begin taking the body of any one person who should exist in your time rift at the date that you start.
Just please pick someone relevant otherwise it's boring for me to watch.

Don't worry you won't just be gaining their body you also get their power level as well as all of the knowledge, memories and skills they had before you took over.

This normally means that no one can tell the difference.

It's so effective as camouflage that even when I 'm disguised as Whis not even that rifts Zeno noticed I was fake.

Just be careful you don't want to bite off more than you can chew raditz picking a fight with frieza won't end well.

Depending on your “what if” you will either start as they do in the official history or you might instead begin in an alternate timeline where your choices are reflected in their background.

You will gain the body as an alt form post jump.

Perks

Now let's get down to the perks unlike other jumps, these don't give you any boosts. These perks let you change the settings for the new time rift beyond your “what if” question.

The **100 CP** Perks are free for your Timeline and All other Perks for that Timeline are discounted to half price.

You need to set these before you go start but keep in mind that your changes could have a knock on effect and the history of this rift will bend to accommodate your choices.

Post jump you could use these settings to change any world you have already completed in a past jump. Just be careful not to anger that world's version of the time patrol.

General Perks

- **Is nappa wearing a toupee? [-100 CP] -** with this you can choose and change any Characters in universe age, gender and general appearance but the chosen values must be within valid parameters for that character and as far as anyone knows that how they have always been.
- **Princess of all Saiyans [-50 CP, Free with “Is nappa wearing a toupee?”] -** This perk lets you change your new bodies in universe age, gender and general appearance this must be within valid parameters for your character.
- **Cannon or Cannot [-200 CP] -** When you start you can choose what extended media is canon to your “what if ”Maybe you like “Dragon Ball: Sleeping Princess in Devil's Castle” Dabura might mention it. Perhaps you like both “Dragon Ball Z: Broly – The Legendary Super Saiyan” and “Dragon Ball Super: Broly” Vegita might think It's odd how all the Legendary Super Saiyan’s are named broly.
- **My name is Goku and I'm a Saiyan, from Earth. [-400 CP] -** Well not necessarily with this you can make any character any race and change where they are supposed to start.
- **And then we can wish Raditz back to life. [-600 CP] -** What happens when you die? Well the dragon just brings you back. With this option if you are dead for a year then your own personal shenron brings you back to where you died. Yes I know it's inconvenient to wait around for the dragon but at least this world has an afterlife just hope the planet didnt get blown up while you've been gone. I'm sure if you ask nicely they will let you hang out in the afterlife while you figure out a ride home.

Dragon Ball

- **I like marsh mellows! [-100CP] -** who doesn't but perhaps people shouldn't with this you could make anyone like or dislike any food. Maybe Buu hates candy or Beerus loves the taste of sprouts, you could even make Whis hate pudding think of the possibilities.
- **You little freak! What do you think you are doing! [-200CP] -** I swear it's all a misunderstanding and with this perk she’d believe you. This setting lets you change the basic personality of any character. Have you ever wanted to see a trusting Bulma, a chill Frieza, a cunning Buu or a kind Zamasu? Well now you can.

- **Who is Fortuneteller Baba? [-300CP] -** I don't know and neither does anyone else but everyone knows “Ghost Summoner Steve” Roshi’s accountant! Yes with this perk you can get rid of cannon characters and make new OC characters. You decide who they know and who they are related to. sadly unless you use other perks or they take someone else's place, These guys are just generic Humans what's worse you can’t start in these bodys.
- **Goku! Wedding is not a food! [-400CP] -** Poor Chi-chi she loved Goku so much well she did but she doesn't have to. With this you can change the relationships of anyone in the time rift. Perhaps Bulma hates Vegeta, mabey Freiza loves monkeys, you could even do the impossible and make Roshi a hit with the ladies.
- **The Future? It couldn't hurt to take a peek. [-600CP] -** I know I said you had to start in that year but with this you don't have to. You can change the date to any year on the timeline and if someone existed at the time that didnt for the time you picked, you can have their body instead.

Dragon Ball Z

- **Does a machine like yourself ever experience fear? [-100CP] -** They do now that is if you want them too but it's not only machines. Do you want frieza to be a coward or Kid Buu to think more like a real kid? Now they can be with this you can change the emotional and mental state of anyone or anything in the time rifts universe’s.
- **It’s Not An Overseer That The Earth Needs Right Now [-200CP] -** Why was Kami the Guardian of the Earth why wasn't it Tien Shinhan and why wasn’t Dabura the galactic emperor well now they can be you can use this to change the occupation of anyone in the time rifts universe’s.
- **While you've been taking it easy, I've been developing a new attack. [-300CP] -** “Kamehameha” seen it, “Solar flare” done that. Why is it that the techniques are always the same? At least Vegito had the “Final Kamehameha”. Well with this you can now design custom technique and choose who knows them. Just keep in mind that the more powerful techniques tend to drain more Ki.
- **I’m not talking about Goku. [-400CP] -** Why is Goku always the main character? Why does he always have to beat the bad guys? Well with this he doesn't pick one person to be the protagonist of your time rift.
- **This isn't even my final form [-600CP] -** It's interesting that saiyans turn into big apes and Zarbon can look like a monster but humans and namekians never change. Not anymore now you can pick as many races to have as many physical transformations as you want. You can change how they look as much as you want and how change affects them but keep in mind this won't bring about any hair color or golden transformations.

Time Patrol

- **Boring [-100CP] -** What do you mean? This is supposed to be fun oh well if you want to you can set it so that when things are getting too boring you can choose for your body to go on autopilot. You could set a timer or alert for when specific events happen but it will switch off if something interesting happens.

- **I Don’t Know Who You Are, But Thank You [-200CP] -** Why i’m your old pal Fu of cause you remember me or at least you could. With this perk you could change who knows what secrets and who knows or doesn’t know who when the jump begins.
- **I want to be drop-dead gorgeous! [-300CP] -** Fine fine. If you want to insert or own OC that badly you can do it with this perk. You can pick a race that exists in your time rift but unless you set them up with the other perks they will look like a generic member of that race with no one knowing who they are. Oh also unless you change it with perks you only know the basics and your power level will start at the level of Yajirobe. Don't worry if you put in the time and effort you should be able to catch up and keep up with the power scaling,
- **I really should get out and exercise... [-400CP] -** You know how people say knowledge is power well with this perk. You can alter the base power level, the basic intelligence and each one’s growth rate for any character.
- **My Time To Patrol [-600CP] -** As a time patroller you can visit other timelines if you pick this perk you can choose 1 other timeline and gain all discounts for its perks and items.

Dragon Ball Super

- **My ears do more than just frame my face [-100CP] -** Yes they do. You can now add and change the physical features of any race as well as how efficient they are. Should Tien Shinhan's third eye see ki? Should all saiyans have twin tails for flight? Should the Namekians lose the antennae and gain a full head of luscious hair that’s up to you now.
- **All Hail Vegeta, Prince Of No One. [-200CP] -** Why does no one follow him after all he is a prince then again he doesn't have to be with this perk you could make anyone have any peerage ranks or titles. Should Bardock the king of vegeta and Piccolo the king of earth? However what is a king without followers? You can also make as many people support anyone you granted a title to as you like.
- **An angel? So Whis is an angel? [-300CP] -** Yes he’s an angel, I’m mostly a demon by the way. What about Kryptonians, Daleks, Tauntauns, Elves or even Muppets? With this perk you can make any race from your previous jumps cannon and any cannon race non-canon you could even make a new race but unless you have other perks your customisation of them is limited and power wise they are kind of average.
- **How does a Saiyan have such incredible power? [-400CP] -** Why should saiyans be so strong? Why are humans so weak? Well they don't have to be with this perk you can change the average power level and growth rate of every race.
- **just call me Golden Frieza [-600CP] -** but why stop there, why not a Golden Namekian or Legendary Super Humans. Yes! with this perk you can now pick as many races to have their own golden form in the same vein of super saiyan or golden frieza as well as how much of a boost that gives. Also if you already have **“This isn’t even my final form”** you can add as many additional number and color forms as you want. Just watch out for Super Human God Super Human Krillan he's tougher than he looks.

Dragon Ball GT

- **He told me Mister Satan is...the world's hero. [-100CP] -** sorry Uub he lied but with this perk you can make hero's be seen as villains and nobodies seen as the greatest bestowing the credit and blame for anything on anyone, but they don't necessarily have the power to back it up. Im sure vegeta would feel fairly disappointed when he takes vengeance on Hercule Satan for blowing up his homeworld.
- **No! You're not my grandpa! [-200CP] -** You say that pan but well actually with this perk you can change that if you want Pan can be completely unrelated to both Gohan and Videl. You could make Turles the older brother of Goku in fact you can go as far as making it so that Yamcha is Trunks daddy but unless you make the mommy a saiyan Trunks would become a full human.
- **A thing of extraordinary magic and power [-300CP] -** Well the dragon balls are magic and Babidi uses magic. Ok I see your point fine with this perk you can add other power systems from other worlds into the time rift as well as who can use them it won't change how powerful people are just what kind of power they use. I wonder what Goku's stand would be?
- **So...uh...do I have to go back to school now? [-400CP] -** Why not perhaps we should change the genre Goku could be the protagonist of his own school harem, Gohan could start working in an office comedy drama and why don't we send Trunks off to his own Isekai i mean his future self already had the sword.
- **Now, witness the wrath of a Tuffle reborn in a Saiyan body! [-600CP] -** Why stick to the one body when you can hop about. With this perk you can swap to any other person gaining all of the knowledge, memories and skills that they have don't worry about your old body, they will go about thinking that they made all those choices but you can only keep one body per time rift.

Items

Ok let's get down to the goodies you can take these into your what if and as far as everyone is considered yeah he had that before and you keep it post jump.
For the discounts the 100 CP Items are free for their timeline and all other Items are discounted to half price for their respective timeline.

General Items

- **Timeline Media [Free] -** This well it's all dragon ball media relevant to your selected timeline. This stuff includes manga, anime, movies, toys and games in every format with all required equipment to use it. This stuff is fun and good for research.
- **Bag of Zeni [-50 CP] -** What's Zeni oh it's a form of currency that is used across large parts of this Earth. At some point the 10,000 Zeni bil even has the "hero of earth" Mr. Satan appearing on the front of it. Each purchase of this item comes with a nice self cleaning Bag containing 100,000 Zeni.
- **Capsules Corp Case [-50 CP] -** What do you think of this small case its got the Capsule Corporation logo and six capsules inside they turn into some fun things: a house, an electric rice cooker, a motorcycle, a small submarine, a small jet plane and even a hover vehicle that is shaped like a specific pink pillar.
- **Distorted Time Eggs [-200 CP] -** How did you get that? I'm going to have to go back on what i said you can have this after you leave the time rift. Trust me you don't want to see what happens if you use it inside one. Why? Well you can use these eggs to make new time rifts with either a random "what if" or your own. The important thing is that you can customise it using the perks you purchased above. Also if you don't absorb the energy from that time rift when you're done it will revert back to the egg and you can use it as many times as you want.

Dragon Ball

- **Power Pole [-100CP] -** This is a copy of that magical, length-changing staff that Goku used to use. Did you know it was supposed to be used to travel from Korin Tower to Kami's Lookout?
- **Fox Mask [-200CP] -** What do you think of this simple fox mask It has some cool features if you're wearing it. The mask perfectly hides not only your identity but also your internal ki and power level even when flying.
- **Personal Nimbus [-400CP] -** This is better than Goku's old ride, it's a magical cloud capable of flying at your maximum speed. You can also change its colour and the requirements to ride it whenever you want.
- **Ultra Divine Water Tea Pot & Cup Set [-600CP] -** Who wouldn't want a cup of poison but this Tea Pot contains a limitless supply of Ultra Divine Water, it's a magic water that will draw out all of the drinker's current potential. Don't worry buddy if you drink it using the cup from the set the poison can't kill you but it will still hurt like HFIL.

Dragon Ball Z

- **Little Qipao Outfit [-100CP] -** Well don't you look dashing you got a copy of Gohan's outfit from the day raditz kidnapped him. Your outfit however perfectly changes size to fit you and should you add any special items or accessories, the outfit will be displayed as though it was always a part of the ensemble.
- **Ultimate Scouter [-200CP] -** This is something I had fun making. It's similar to what the Frieza's army uses, this scouter can take the form of any model as well as containing the functionality of all scooter models. This scouter has no upper limit for the measurement of power levels and retains the highest registered power level for an individual as well as their current level meaning that someone just lowering their power level won't hide them from this scouter
- **Ultimate Saiyan Pod [-400CP] -** This is a good training tool. I built it to look like a normal one person Saiyan spaceship but this one comes with a top of the line cloaking device and shield system. While being used for transport the passenger is put into a sleep inducing healing pod that puts their body through high intensity sleep training that scales to why they can take.
- **Ultimate Z Sword [-600CP] -** What no this isn't the real Z sword but it is a good copy this one can change form to any weapon the user wants and if it actually gets broken the sword will reform while the person swingin it about gains both the results of the Old Kai's ritual and also the knowledge of how to perform the ritual on others. Good luck picking it up though.

Time Patrol

- **Groundbreaking Science [-100CP] -** Now this is a good read this is a signed copy of the book written by Gohan in age 804 on the understanding of ki usage. It was a hit with lots of people in the general public learning how to fly. A cool thing about this one is it updates whenever you jump with a new chapter as if written by Gohan on the ki principles of that jump world.
- **Scroll of Time? [-200CP] -** Well this isn't really a normal scroll of time, this one is a little more fun and allows you to view any alternate dragon ball timeline you are not in as a manga, anime or movie just so long as you ask it the right way.
- **The Masked Saiyan’s Mask [-400CP] -** This is a copy of the mask my mother made. This one emits demon ki that If you put the mask on you could use the demon ki as Dark Energy to enable supervillain mode. Dont worry unlike the original this mask cannot be used to brainwash anyone. If you put in a little practice you could learn to incorporate the demon ki allowing you to channel and possess demon ki without even going berserk. Maybe you could even do my version of the Super Saiyan transformation it's legit look it up. Hum I wonder if there's a Super Saiyan Demon Super Saiyan?
- **Parallel Quest Generator [-600CP] -** I might have “borrowed” this from the time patrol this little droid is like a holodeck that can generate simulations of either random missions that simulate anyone from the universe’s of the dragon ball’s both the canon and non cannon or you could build a custom simulation. Should you be sufficiently harmed the simulation will end however if you complete the simulation you could earn clothing, money and even combat techniques.

Dragon Ball Super

- **Super Dragon Radar [-100CP] -** I've got to hand it to Bulma, It's impressive a human could make the super dragon radar oh but this one is my own spin on it. This Super Dragon Radar unlike the regular Super Dragon Radar can pick up all dragon balls across all local timelines as well as all of the 12 universes. Plus I'll also throw in a complete set of blueprints for every version of the dragon radar.
- **Sorbet's Ring Laser [-200CP] -** It's a surprise that such a small ring can do such harm but the lazer from this ring bypasses energy defences its useful against those who use energy shields but harmless to those with a durable body.
- **Time Ring [-400CP] -** I swiped this from Zamasu when he wasn't looking. This ring lets you travel through time and i've fiddled with it so it will think your a Supreme Kai. The ring can also protect you from being affected by any changes in the timeline or other time based effects this should be quite the surprise to Hit.
- **Cube [-600CP] -** This baby is a top of the line vehicle of the gods. This can be used to travel anywhere in the 12 universes' it may not be as fast as instant transmission but it can go a lot further.

Dragon Ball GT

- **Demon's Whip [-100CP] -** This guy is smart as a whip well because it is a whip shaped mutant machine. This guy can drain energy if he lassos around someone he can absorb their energy and either keep it or transfer it to whoever is holding the handle. Even though he isn't a real companion he could still be a real friend.
- **Shadow Dragon Ball [-200CP] -** It's beautiful isn't it a single blue dragon ball with black star's although it cant grant wishes it has other effects. Each one "consumed" grants power with the boost growing exponentially the more Shadow balls inside of you. If you've got two or more balls that have the same number of stars you can't "eat" the extra one. You can get this multiple times each time you get one Shadow Dragon ball.
- **Augmented Blutz Wave Generator [-400CP] -** Another one of Bulma's inventions this tank fires Augmented Blutz Waves you could use it either as a weapon or thanks to a little tweaking you could use it to turn anyone into either a Giant Animal or a Golden Giant Animal. It defaults to the Great ape but can be set to be dependent on the target's personality or race. It also has a randomiser function.
- **Hell Fighter Construction Guide [-600CP] -** I "borrowed" the schematics from good old gero a while ago and I wrote a complete guide on how to create and customise your very own Hell Fighter. The Hell fighter must be a mirror image of someone and it can fuse with their non hell fighter counterpart to make them exponentially stronger it's even better than if they had used the potara earrings on an identical clone.
- **Shadow Dragon Ball Set [-1000CP, Requires 1 "Shadow Dragon Ball"] -** Yes i was being a bit cheap before. Here is a complete set of shadow dragon balls. What's that you have eight balls? Well I suppose you could have the extra shadow dragon balls as a new loyal shadow dragon companion.

Companions

Good friends go a long way so if you don't want to go alone purchase from the lot below.

- **Icarus [Free] -** I thought shenron was the only dragon on earth but this lilac guy has proved me wrong. He can't grant wishes but he can fly with his small wings. He's not a fighter but he's more fun than most dogs.
- **Dogidogi [-100 CP] -** You want my pet divine bird? No! Well I suppose you can have a time clone of him. What is he? Oh he is what hatches out of a Distorted Time Egg if it's fertilized my little guy can create his own time rifts and control time on a small scale. I suppose your copy could too.
- **Shadow dragon [-200 CP]** - These guys are normally created by the overuse and built-up negative energies of the Dragon Balls they are immortal and very powerful you can pick from Syn, Haze, Eis, Nuova, Rage, Oceanus or Naturon with them taking any of their possible forms as their true form. What's more, if they like you enough once every thousand years they can grant one wish as if they were good old shenron.
- **Android ?? [-50 CP] -** You know these things were made by Dr Gero but they are totally customisable so you can choose for this one look how you want. This model is completely inorganic and comes with both the unlimited power supply and energy absorption. This one is about as powerful as imperfect cell but if you manage to get any new tech this android can integrate it. Oh and obviously its programmed with you as its master.
- **Cannon Companion Sticker [-200 CP] -** Is there a character you like in your time rift perhaps someone who is normally in the background but now up in the frount? Well if they agree to wear this Red X sticker you can take them out of the time rift and keep them for your future journeys. On the underside of the sticker it reads WARNING: This sticker dissolves on use and only functions to create companions within time rifts.
- **Import Companion [-50 CP] -** If you already had some friends you could bring them along. They can each pick their own character and get 300 CP to spend on the Items. They can also gain the body as an alt form post jump.

Drawbacks

What's that you're out of points! Well I have a few time rifts that are a bit broken.
if you use them instead i could give you some more points to spend.
Don't worry all the drawbacks go away when you leave the time rift and won't occur again.
Well unless you buy them elsewhere.

- **Team Three Star [+100 CP] -** This rift is a little odd. Goku is dumber, Piccolo has people in his head and nappa is a ghost. Your “What If” now has the abridged treatment regardless of if you take this or not you can have it as a setting option if you want it.
- **I am hilarious, and you will quote everything I say [+100 CP] -** When did you start talking in sound bites? Everything you say sounds like it's an advert and it's difficult to have an actual conversation.
- **Is it just me, or is he singing to himself? [+100 CP] -** Welcome to dragon ball the musical well i say that but your the only one singing that is you can't stop. Have fun!
- **Tell me. What do you know about time travel? [+200 CP] -** Time is no longer on your side. Time dilation no longer benefits you can’t use any time machines, time rings, or even the room of spirit and time and you can’t use any time stopping techniques but anyone else can.
- **we could literally GROW Raditz! [+200 CP] -** you are at the bottom of the totem pole no matter what you do, no matter what you say, you are a joke.
- **I AM THE HYPE [+200 CP] -** Talk about arrogant you've changed well in this time rift at least you have an inflated ego and self pride this might just get you killed so good luck.
- **Oh, I get it. Turn them back into humans and make them weaker [+300 CP] -** Do you remember all those Perks, Powers or other abilities that you got from Jumping about the infinite places you've jumped to well those are all gone at least inside the time rift don't worry you get it back when your done..
- **Then where did i get this muffin [+300 CP] -** Yep sorry no muffin’s also you can’t use the wairhouse or any Items from outside the Jump.

- **Grrr I wish I were a carrot! [+400 CP] -** you know how i said you were a main character well sorry your not you're the farmer with a power level of 5 sorry.
- **Are you that Frieza Guy [+400 CP] -** Hi remember that whole camouflage where no one can tell the difference? Well its not working and unless your a real good actor everyone will be able to tell your a fake.
- **Do you know what a minute is [+400 CP] -** You might not actually. Do you remember how I said you would gain all their memories, knowledge and skills well with this you wont. You will just be in their body with no idea how to use it. Don't blow yourself up.
- **Prince, has that ever worked? [+600 CP] -** you are weak so weak that you cannot beat anyone even a farmer with a power level of 5 can defeat you and there is no way you can surpass anyone.
- **Alright maggots, listen up [+600 CP] -** Hay you know that thing i said about the time patrol well it turns out i was wrong the old kai doesn't like me much and he has made that your problem so keep an eye out for the time patrol they are from outside the time rift your perks won't affect them.
- **Is that me stronger than me [+1000 CP] -** Ah we have or rather you have a problem it seems that a mirror clone of you exists in this world with the mind of whoevers body you've “borrowed”. The clone has all of you powers, your strengths and weaknesses but it is fully dedicated to completely wiping you out. It even went as far as learning the Hakai so it can permanently erase you from time and space, good luck.
- **What is a god, To a non-believer! [+1000 CP] -** Hay remember how i mentioned “Borrowing” Zamasu’s ring? Well it just so happened that Perfectly Fused Zamasu asked me who took it and somehow he thinks you're responsible. I know that wasn't cool of me but he is going to come after you so get as ready as you can he is not going down easy especially as he’s from outside the time rift so your perks won't affect him.

Final Choices

After ten years or however many you set in the time rift you can choose one of these options:

- **End your Jumpchain game and return home:** Choose this option to end your Jumpchain game and return home.
- **End your Jumpchain game and remain within the setting:** Choose this option to end your Jumpchain game and remain within the time rift you created.
- **Continue your Jumpchain game and move on to the next Jump:** Choose this option to continue your Jumpchain game and move on to the next Jump.
- **Let's do it again:** Now your talking, choose this option and we can start a new time rift with a new “what if” pick who you want to be this time and you can keep both bodies as alt forms but keep in mind you don't get any more CP you can just use the already purchased perks just without any of the drawbacks that is unless you take them again.

Notes:

- The Time works in regards to your time limit is that if you are time traveling your personally perceived time is used against the time limit but if you are slowing time down such as if you are using the room of spirit and time then the time outside of it is used against the time limit.

Changelog:
