Generic Sexdollification (Blowup doll transformation) Jump

You're in a world where people get transformed into blow up dolls/balloon people. An inflated version of themselves that's useful only for sex. I hope you have fun for the decade of your stay here. Take these 1000 Doll Points (DP)

There are two origins, Balloon maker and Balloon babe.

Balloon maker: You're a dude or woman who turns others into blow up dolls for sex or selling them.

Balloon babe (+100 DP/Free): No one knows why they started appearing but some people were suddenly turned into blowup dolls. The first version of these dolls were stationary things that could telepathically speak with their users. It was how people figured out that these dolls used to be people. These Human-origin blowup dolls (or HBD for short) didn't have any rights on account of being sexdolls. A few years ago, a second version of these HBDs began appearing, dolls that could walk and use items and tools (if they have enough practice and patience). These HBDs can talk but they're comfortable with just having sex and looking after their owner's house. Which led to people marrying these dolls and the dolls being given some rights. A HBD is made up of Incredibly tough rubber like material that's almost impervious to damage and healing itself via consuming semen in the case they're damaged (damaging them needs a monumental effort). They can subsist off of cum indefinitely and prefer it. They're self cleaning too and their holes are incredibly comfortable and snug. The appearance of dolls depends upon their original appearance but there are some similarities. An O-shaped mouth that loves sucking on something and vagina and anus shaped holes where they usually would be in women. (There are male and futa versions but they're the minority, most of the time it's female dolls). For free, you can be a second generation HBD or you can take 100 DP and be a first generation.

General Perks:

Attractive (100): You're incredibly attractive and with assets that won't be out of place in a hentai. Thankfully, they somehow fit your lovers comfortably. The rest of the world’s population is similarly attractive (ups the beauty levels of the population by a digit or three on a scale of ten).

I'm not a toy (Free/100 DP): Usually people get targeted randomly by those who want a human-origin blow doll of their own but it'd be boring if you get turned into one suddenly. So, this perk protects you from unknowingly getting turned into a HBD. If someone wants to turn you into a blow doll, you'll get a premonition two minutes beforehand and they need to be less than 6 feet near you to turn you. It's free for this jump but 100 DP to carry forward into future jumps. In future jumps, you'll get premonitions if you're going to get hit with a lewd curse or transformation and they still need to be a few feet away from you to affect you.

Balloon maker:

Flexible Form (100 DP): These dolls are mostly into men or those with dicks for some reason, which means you'd be in a tough spot if you don't have one. Fortunately, there seems to be a drug or a spell in the market that turns you into a member of the opposite sex (male or futa if you're a woman and vice versa). Your body soaked up this drug or magic and now you can shift your form whenever you want and as long as you want. Your appearance as a member of a different sex would be similar to your original appearance almost as if you're opposite gendered twins. You know how to cast this spell or create this drug so you can share it in future settings and maybe make a permanent version if you're talented enough.

Mind-blowing me (200 DP): Your luck when it comes to sex is legendary. Opportunities to have sex or relationships keep falling in your lap with surprising frequency. And somehow all of these people are of your preferred sex, appearance and personality and don't mind sharing you or ignoring your proclivities.

Easy targets (400 DP): You keep running across people who can be transformed into various lewd ways without resulting in a fuss from the authorities or their families. Maybe they don't have friends or maybe they like the changes enough or it might be that those in the government don't mind you doing this as long as they get a chance at fooling around with a doll or toy of their own. You'll also find that any attack or spell or experiment that has a lewd result works way better on anyone, almost as if they don't have any resistance to it. Your attacks will be their kryptonite.

Perverted Trailblazer (600 DP): While no one knows the exact reason for why people are getting turned into blowup dolls, the truth is that there's someone out there with enough intelligence and perversion to think of turning people into mockeries of themselves, whose biology breaks our understanding of physics. You're a genius in multiple fields of physics and magic, able to combine your knowledge of science and magic to make things that are exponentially better than using one or the other. While you can make normal technology and inventions, if you make inventions and spells that have a lewd component to them, they are significantly better than the outcome you'd get normally.
(Where before you could have made some Golems to upload the consciousness of a person, if you make a slime golem that recharges itself via sex, it'll be significantly faster, stronger and plain better when compared to a rock golem that runs on ambient mana).

Balloon babe:

Don't move (100 DP): Well, you can't really move around unless you're a second generation HBD and even then, you're not at that level of a human. While Blowup dolls don't get bored due to their state, this perk ensures that you don't get bored or crazy by staying in the same place

and doing the same thing for years or centuries on end. You can go into a trance and while away the years if necessary or if you don't have anything else to do.

I've still got it (200 DP): Some skills or powers might degrade due to loss of use but you seem to retain them even if you've spent centuries without using them. Even if you spent a century as a statue, the moment you regain your body, you can run around and so everything you knew how to do with the exact same power and control as you used to have.

Reinflation (400 DP): Do you think it's air that's filling your body? It's not completely air but it's your soul and memories and everything else that makes you ‘you’ mixed with tiny quantities of air to mimic the feel of a blowup doll. That's why blowup dolls become dumber if they lose their ‘air’ but while they can repair (or heal) themselves via sucking dicks, you seem to have taken it a step further. Where usually HBD can't keep their gaseous form outside their doll body, you can keep yourself together outside your doll body and even jump to a different body when necessary. Your soul will overtake theirs and consume their soul to cement your existence in them, regaining all your perks and powers and skills. Every jump if you die, you can jump to a new body and continue your chain. (The amount of time you can stay outside a body in your gaseous soul form depends upon your willpower, with it ranging from 10 minutes with just this perk to 10 hours if you have endless amounts of will power).

Super Balloon girl (600 DP): There were rumours that this Blowdoll transformation is some kind of government project for creating super soldiers. Now those rumours are true. You're a government experiment of some kind involving legitimate super powers instead of just being an almost invulnerable sextoy. Pick three to four super powers that follow a theme and can be linked to your rubber body. Maybe you're elastic and can shrink or stretch to fit in hard to enter places without losing any of your soul air. Maybe you've super strength and flight as long as you're in your Blowdoll body? Maybe you can turn your surroundings into an elastic material with a thought? The possibilities are endless but even if you have this Blowdoll form be a super form you can access at will, the powers from this perk only work if you're in your doll form. (For example if you have super breath and shapeshifting and transformation powers, you can shift into a normal human form but can't access super breath and shapeshifting while you're a normal human).

Items:

There are no origin specific items but you get two discounts per price tier.

Canisters and cabinets (100 DP): It's hard to store or house dolls if you aren't using them. This is especially true for first generation dolls. These canisters can indefinitely store the ‘soul gas’ of a doll and the cabinet has enough space to store inert dolls. If you prefer, the canisters can look and work like onaholes that suspiciously look like the person they're storing. The onaholes are self cleaning and self repairing. The consciousness of the stored person is in

sleep as long as they're not in use, only activating when you're fucking them and going to sleep when you're not.

Bodymod gases (100 DP): Since the air filling a doll is its memories and personality, you can modify it if you know what you're doing. A few months after the second generation dolls began appearing, these gas canisters began being sold. Sealed inside them are some generic personalities and traits filtered from some women or men. The process is harmless or so they say but you can use these devices to add a new personality mod to your doll that temporarily grants them various skills and kinks for a day or two or an hour or two depending upon the dosage you add to them. The instructions are detailed and easy enough to understand and use and there are even do it yourself kits to harvest and upload personalities but you need to pay an undiscounted 100 DP more for that.

House (200 DP): You've a two storey house in the suburbs with all expenses paid that stays out of notice of your enemies or other people unless you have drawbacks that override this protection. Or if you deliberately antagonise someone and hide here. The house has refilling food and other amenities. And a bike or a car that repairs itself and doesn't run out of fuel.

Curse removal pendant (200 DP): A pendant that looks like a blowup doll, by touching it to someone you can revert their blowup doll transformation or lock it in and make it impossible to turn them back. Post jump you can use it to remove or lock curses permanently.

Inflatrix (400 DP): It started when an alien device did what it did!
And stuck itself upon his wrist with secrets that it hid!

Bam bam bam. You got an alien device on your hand, one that lets you transform into ten balloon babes (balloon versions of female characters) of your choice from fiction. The balloon form is immune to damage but its abilities are weaker versions or weaker variations of those characters' powers. You can add ten more characters to the device's roster every jump (but these characters should be from that setting). (The powers are around 25% to 75% their usual strength depending upon how powerful the target is).

Blowup industries (400 DP): A veritable industry juggernaut. This conglomerate produces all kinds of things, from the mundane to the supernatural depending upon the setting in question. You make billions on legitimate products and not so legitimate products. Maybe you're the company that produced the bodymod gasses? The nature of the company changes from setting to setting. It may be a guild in fantasy settings and a huge corporation in cyberpunk.

Companions:

For free, you can import or create 8 companions and give them an origin and 600 DP to spend on perks and items. For 100 DP, you can import all your companions but apart from the first 8

who get 600 DP each, the rest can only take the balloon babe origin and its first two perks with no DP to spend elsewhere.

Expies (Free/50 DP): Since this is a generic setting, you can buy blowup doll versions of characters from any media you know of. For free, they can be first generation blowup dolls with just their personality and no powers to use. For 50 DP, you can summon two second generation dolls that can move around and do things but with their powers at less than 50% of their original level and suitably modified to fit the balloon/rubber theme. (You can decide if they can gain a human or humanoid form post jump but their powers would still be weaker unless you've some ways to get around it).

Goo girl (Free/Optional): A weird accident involving transfer of souls into golem bodies and your cum led to this girl getting turned into a golem formed from your cum. She's a good girl who fell in love with you at first sight and tries her best to make your life comfortable. She's tiny for now but she can reach the size of a human after a few doses of your cum. She can eat food but prefers covering it with a huge load of your cum before eating (thankfully one harmless side effect of her sucking you off is that you can cum huge amounts without any health problem).

KINKY QUEEN

Drawbacks:

Supplement toggle (+0 DP): Supplement this document to another jump. That jump's setting becomes the core setting you'll be entering and Blowup dolls start appearing or will have been a thing for sometime now in that setting.

Fanfic toggle (+0 DP) (Can only be taken if you have supplement toggle): Instead of going to the canon version of the setting, you'll be going to a specific fanfic of the setting or even a version that runs on fanon tropes:

Knee pains (+100 DP): You've knee or hip pains for the duration of your stay here, it can be reduced but can't be removed completely.

Erectile Dysfunction (+200 DP): You can't get it up or go into the mood at all. For the duration of your stay here, you can't orgasm.

Bumping Uglies (+200 DP): Whenever you have sex, 90% of the time, it'll be with people you don't like. Maybe they're really ugly, maybe their personality is terrible or they smell really bad.

No Jumper, you're the Blowup doll (+300 DP) (Can only be taken by those with the Balloon maker origin): Unfortunately, it seems you entered this setting as a Blowup doll. Don't worry, jump-chan arranged a caretaker for you. This nice young man would feed you his special juice (cum) daily. You'll love sucking him, I'm sure.

Uh oh (+600 DP) (Can only be taken by those with the Blowup doll origin): It seems your transition to this jump had a minor hiccup. You lost access to your powers, items and companions and it seems you're brought down to human level intelligence. Also, your boredom proofing perk from the Balloon babe origin isn't working. I hope you won't go mad before your stay here is completed.

Notes:

I don't know what made me do this jump but I'll try to stop making these weird generics for now.
