Ben 10: Alien Supplement

By DeverosSphere V1.06

Race Points RP
If you are selecting your starting race for a Ben 10 Jump then you gain +50 RP and if no other methods of gaining RP is available you may convert CP into RP at a 1:1 ratio.

Aesthetics
It is assumed that all listed aliens will have **AESTHETIC SINGULARITY** to a sufficient degree that they match their cannon appearance.

Hybrid
This option can only be purchased if you are selecting your starting race.
In the universe there are hybrid species born of the union of multiple races, perhaps you are one of them or perhaps you are the result of the Rooters experiments.

For this you may choose up to a maximum of four of the alien races listed below or a custom alien, these races will be allowed to go as far as your Great Great Grandparents.
You may either purchase the race's at full price in order to gain all the powers and benefits of that species or take them at a proportional price and potentially grow into the race's powers. Parents will cost 50%, grandparents will cost 25%, great grandparents will cost 12.5% and finally great great grandparents will cost 6.25% with any remainder rounded down to the nearest whole number however the total percentage must equal 100%.

For example a human with a Churl grandparent and an Orbsarian great grandparent would be 62.5% human -20 RP/-12 RP, 25% Chul -50 RP/-12 RP and 12.5% Orbsarian -80 RP/-10 RP. This means that the total for this hybrid race would be -34 RP

Subspecies
Some races have multiple variations distinct enough to be stored as separate samples in the Omnitrix. While some share the same name, other samples have been so augmented that they require a different Omnitrix codename. Regardless of which situation the multiple samples are in you are able to purchase both samples as part of a **Species Combo Price** that is the more expensive variation plus an extra **50 RP** unless it is cheaper to buy them separately in which case the **Species Combo Price** will be the more expensive variation plus half the price of the cheaper variations. If you have imported one of the samples via an "Omnitrix" you may treat the import as the more expensive variation requiring only **50 RP** to unlock the variations.

Ultimate Aliens
The Ultimate Aliens are examples of the Ultimatrix forcing a DNA sample to evolve for thousands of years in a conflict heavy simulation. The Ultimate variation chosen is the most species evolution that is best suited to survive within the simulation. With master control the simulator can be changed for the DNA sample to evolve to combat different challenges.

Quick Thanks to Sweetiebott and Nerx
You both helped me fight my way through this spreadsheet nightmare.

Species Name: Ickthyperambuloid **-5 RP**

Omnitrix Codename: Walkatrout

Ickthyperambuloids are small, blue fish-like aliens. They have stubby fins for arms, a shark-like dorsal fin, and a pair of thin, spindly legs jutting from their underside. They have a wide mouth with an underbite and gills on their cheeks.

A human is a bipedal hominin characterized by having a higher and vertical forehead compared with earlier hominins. The brain volume is about 1,400 cc. The teeth and jaw are smaller and the chin is prominent. Humans are the hominins capable of creating and using complex tools, solving problems by sense and reasoning, using symbols and language, and creating complex social structures. Over time, humans have demonstrated behavioral modernity and advancement.

Nemitrix Sample: Crocodilian

Crocodilia is an order of mostly large, predatory, semiaquatic reptiles, known as crocodilians.

Species Name: Revonnahgander **-20 RP**

Omnitrix Codename: Bishop

Revonnahganders are feline-like violet-furred aliens with pointed elf-like ears. Their hair can be black, white, or purple. They have cat-like pupils and large pointed upper canines. They have small black stripes on their arms.
Young Revonnahganders have tails called bi'nthaks, which fall off at puberty. They are extremely difficult to remove and must be allowed to fall off naturally.

Species Name: Splixson **-120 RP**

Omnitrix Codename: Ditto

Splixsons are small, humanoid creatures about the size of a 10-year-old human child. They have whitish arms and faces, and wear different colored clothes. Their hands are large and possess 4 digits, and their feet are merely stubs. They have 3 fin-like growths on their head, as well as metallic parts on their arms, head or waist. Different Splixsons have these parts at different places. Female Splixsons have three pigtails in place of the 3 growths that the males have.

The overall body structure of a Sotoraggian is humanoid. Each member possesses four sharp fingers on each hand and high heel-like hooves with the front toe being longer than the back.

Sotoraggians have a strange mini-arm on each shoulder that is usually used to throw the small pikes coming out of their jetpack or bombs when their hands are occupied. Each mini-arm has three dark grey stripes.

When SevenSeven's helmet broke, it revealed bluish-gray skin and a somewhat human-shaped eye underneath. The eye had a yellowish white sclera and a thin, hyphen-shaped pupil. The eyelids also had black tarsi.

The rest of the appearance is currently unknown since every Sotoraggian seen so far is always decked with armor.

Species Combo Price: Opticoid **-540 RP**

Species Name: Terretnal Ogre **-205 RP**

Omnitrix Codename: Toepick

Members of this species are ogre-like aliens with yellowish-green skin, weed-like spikes on their arms, and pointed fingertips. Their faces are hidden behind metal cages due to how horrifying they look to anyone who sees them face-to-face. These faces are supposed to resemble an eldritch horror. They also have a layer of tentacles that covers their true faces.
Connected to this cage is their armor, which wraps around their shoulders and goes halfway down the chest, and is connected to their pants by chains. Their pants are a simple pair of black briefs, with a metal waistline matching the color of their armor.

Ultimatrix Codename: Ultimate Crashhopper (Civil War)
A hyper-evolved Orthopterran from an Unknown planet. Ultimate Crashhopper possesses additional high-tension tendons on his arms, giving him spring-loaded punches for extra power. He also possesses an enlarged abdomen capable of emitting a bright flash of light to blind foes thanks to the bioluminescent bulb located at the end of his abdomen.

Ultimatrix Codename: Ultimate Crashhopper (C-Predator)
A hyper-evolved Orthopterran from an Unknown planet. Ultimate Crashhopper sacrifices his arms at the gain of extra legs for additional kicking power. In addition, he can pop off globs from his abdomen to use as an extremely bouncy projectile.

Nemitrix Sample: Mucilator
Mucilator appears to be a fat, grey, rock-skinned alien that has small red eyes with dark purple circles around them. It has purplish-pink spheres all over its body,

Species Name: Piscciss Premann **-300 RP**

Omnitrix Codename: Klorber

Piscciss Premann resembles a fiddler crab with a goldish brown-colored armor, a sideways mouth, four scythe-like legs and a large, powerful pincer for a left hand. Within the pincer was a power blaster combined with a chemical sprayer. When he goes underground by spinning his legs, he retracts his head down, making his neck disappear.

A hyper-evolved Vaxasaurian from the planet Terradino. Ultimate Humungousaur now has armor similar to that of an Ankylosaurus with a more burly and muscular physique. Ultimate Humungousaur's back has a turtle shell like armor with long spikes running down each each side, his plated chest and torso have five spikes on each end and his tail has a blue mace on the end of it, with silver spikes. Ultimate Humungousaur's knuckles have silver barrels on them, which he can transform into four-barreled missile launchers.

Nemitrix Sample: Tyrannopede

Tyrannopede has a large, segmented purple and gray body and a red head resembling that of a Carnotaurus or a Tyrannosaurus with a horn on her forehead. Tyrannopede has four legs and six small arms with two clawed fingers on them.

Species Name: Mycelium **-405 RP**

He also now has ocular ports around his body, retaining his 360° vision and giving more room for firing his mucus.

Nemitrix Sample: Buglizard
Buglizards have a white, black, and red color scheme. They have a black head, which dons a white patch on each side. Located on these, they have four purple eyes, two on each side. They have sharp teeth and the gums protrude in their lower jaw and they have a row of red spikes running down their back, which also has a black stripe. They have four legs and black feet, each ending in 3 red claws and a red marked tail tip.

Species Name: Fulmini **-415 RP**

Omnitrix Codename: Shock Rock

Fulmini are made entirely of Omni-Enhanced energy, although what that energy actually is has yet to be explained. Their blue energy bodies are reinforced with gray rock armor that covers their head, chest, shoulders, some of their forearms, and everything from the thighs down. This rock has a green moss-like pattern on it's surface nearest the top of the body.

Ultimatrix Codename: Ultimate Chromastone (Contaminated Evolution)
A hyper-evolved Crystalsapien from the planet Petropia. Ultimate Chromastone, has integrated the crystalline genetic back-up of every creature on Petropia in order to evolve into a hybrid allowing it to generate crystals and create an energy matrix, linking energy between his constructs. He also is twice as large and much stronger.

Ultimatrix Codename: Ultimate Upchuck (Murk)
A hyper-evolved Murk Gourmand from the planet Peptos XIV. Ultimate Murk Upchuck is a behemoth with powerful legs and tail for smashing up the environment around him into easily consumable chunks for his vacuum-like inhaling ability. He also has the added ability to fire off the growths on his back as sort of h[eat]-seeking missiles.

Ultimatrix Codename: Ultimate Upchuck (Species Combo)

In addition, he can use his tail in tandem with his arms for an even larger drill. He also possesses echolocation for easier navigation.

Nemitrix Sample: Slamworm
Slamworm is a giant worm-like alien with sharp teeth, six red eyes, a wide grey beak-like mouth, and a tail ending in a pincer like a set of spikes. Slamworm possesses a creamy orange and brown hide, a white-brown underbelly, grey spikes running down her back, and four red insectoid legs on each side near the front.

Species Name: Vulpimancer **-600 RP**

Species Name: Atrocian **-625 RP**

Omnitrix Codename: The Worst

Atrocians have short, stubby arms and legs, with black fingers and toes (though females tend to have pink fingers). They are short in stature and have warts on their head. Yellow, blue, and pink colored members of this species, including both males and females, have been seen.
Atrocians can grow curly hair on their heads like humans, although this has only been shown on females. Males have eyebrows and lumps or spots on their arms while females don't. Their tongues can be pink or blue, and their teeth tend to be crooked, misshapen, and broken-looking, but this is probably due to their poor hygiene.

A hyper-evolved Galilean from Keplorr's Orbit. Ultimate Gravattack no longer has legs and floats entirely by manipulating his gravitational field. His skin crust becomes more jagged, as crests and peaks form on the surface. His planetary core is engulfed in his mouth now, with a red spiral circling outwards. His hands are much larger than Gravattack's. The most notable change, however, are the three smaller orbiting planetoids that spawn around him, caught in his gravitational field. They each have a little face on them that resembles Gravattack's original form in orbit mode.

Ultimatrix Codename: Ultimate Gravattack (Counter-Predator)
A hyper-evolved Galilean from Keplorr's Orbit. Ultimate Gravattack's core is comprised of a black hole that he is capable of manipulating. He can also generate planetoids capable of assimilating nearby material into their mass, growing in size and increasing their orbit.

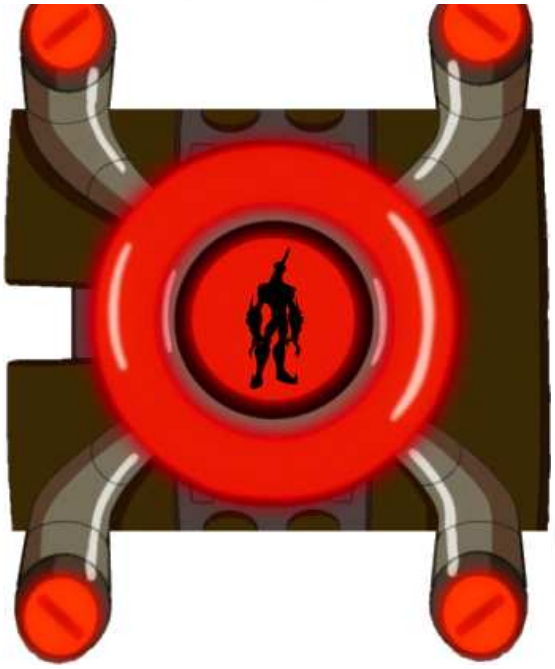

Species Name: To'kustar **-730 RP**

Omnitrix Codename: Way Big

Antitrix Codename: Way Bad
To'kustars are gigantic humanoid creatures with four-fingered hands and extremely muscular bodies that generally have a white base color for their body, face, limbs, and hands with details such as their torso and legs stripes, shoulder spots, stum-like feet, head and shoulder blades, in a primary or secondary color.

Ultimate Way Big is visibly similar to a non-evolded To'kustar however he is twice as large, some white parts of his body are blue, and he has two curved horns on the left and right sides of his head. Ultimate Way Big is able to project more powerful blasts, create cosmic energy saws and fly.

Ultimatrix Codename: Ultimate Way Big (Counter-Predator)
A hyper-evolved Evolved To'kustar. Ultimate Way Big is a MASSIVE planet-sized titan composed of Cosmic Storms, able to alter his own size and density via shedding off or generating more of the Cosmic Storm that composes his body.

Nemitrix Sample: Elefantokyo
A miniscule predatory bacteriophages composed of a crystalline nucleic acid molecule surrounded by a protein structure, This makes it look as if it were a cross between an arachnoid and crystalline mechanoid.

Species Name: Methanosian **-775 RP**

Omnitrix Codename: Swampfire

Methanosians are a humanoid plant-like alien species with a green and black colored body with root-like feet, seemingly holding rocks. Also, their shoulders and head have red and yellow petals. Methanosians can either have four or five fingers.

Ultimate Swampfire's body is dark brown in color, and now has three blue gooey shells containing an organic, blue-colored gel-like solution of kerosene napalm on each of his arms and a large one on his back. He also has a smaller pod on his front, through which his face can be seen. Ultimate Swampfire's body is composed of petrified wood.

Ultimatrix Codename: Ultimate Swampfire (Blossomed)
A hyper-evolved Methanosian from the planet Methanos. Ultimate Swampfire is now covered in a layer of methane moss, and has giant tree trunks for arms from which he can fire powerful explosive blasts, and can use said explosive blasts to leap through the air for short distances. In addition, he now can throw "scatter bulbs", which explode into a flurry of seeds that then fly out at high speeds upon contact.
