Omnitrix Customization Section

You will receive a **2000 OP (Omnitrix Points)** stipend to spend on upgrades and other various options. You can convert CP to OP at a 1:2 ratio. You receive three discounts that can be used on any option shown below. For the options with multiple levels you only receive or pay the listed price for the tier you choose. For example if an option has a +100 OP, -100 OP, and -300 OP option then you only pay the chosen amount. You don't have to purchase the first option to receive a higher tier upgrade.

Lockout +200 OP
Whenever you transform back into your normal form, the Omnitrix enters a mandatory recharge state, rendering you unable to transform until the recharge is complete. This downtime can range from a few minutes to an hour, depending on the duration and intensity of your previous transformation. On average however, this will be five to ten minutes ignoring extreme circumstances. During this period you will be forced to strategize and adapt, instead relying on your enhanced abilities.

DNA Scanner - Free

Whenever you come into contact with unknown life forms, the Omnitrix automatically scans their genetic makeup, unlocking new transformations within its vast database. This enables you to expand your repertoire of forms, granting you a wider range of powers, abilities, and attributes.

- **Upgraded Scanner - 100 OP:** For an additional 100 OP you can upgrade the scanner to unlock unique variants of other species. For example, Osmosians and Mutants who are still humans. You will unlock your own unique powers within these forms similar to how Dial's Asgardian form possessed a unique domain.

Personal Touch - Free
While Dial's abilities and forms are similar to Ben's, he does have some unique aspects as well. For example, Jury Rigg wears a Black Sabbath shirt similar to Tony and his Omnitrix takes the form of a gauntlet rather than a watch. This option will allow you to customize the Omnitrix itself and your aliens' appearances to a degree. These changes will primarily be cosmetic however, so you can't make your aliens stronger arbitrarily.

Time Limit +100 OP
The Time Limit perk modifies the standard functionality of the Omnitrix, granting you control over its time constraints. By default, the Omnitrix allows for transformations lasting up to ten minutes before reverting you back to your default form. However, with this perk, you have the ability to tailor the time limit to better suit your needs.

- **Timer Extension - Free:** If you desire a longer duration for your transformations, this option is for you. With Timer Extension, your time limit is extended to a full hour, giving you ample time to utilize the powers and abilities of your chosen form before returning to your default state.
- **Time Limit Begone - 300 OP:** For those who find even an hour constraining, Time Limit Begone offers the ultimate freedom. By choosing this option, the time limit is entirely removed from your transformations. You can now remain in your chosen form indefinitely, allowing for uninterrupted exploration, extended rest, or comprehensive testing of your various forms. There are no time constraints to hinder your adventures.

Repair Protocol - 100 OP
The Omnitrix is not only a tool for personal transformation but also a powerful healing device. With the Repair Protocol perk, the Omnitrix gains the ability to repair damaged DNA in others. Whether it's individuals who have undergone experimental procedures, suffered from genetic conditions, or experienced excessive mutations, the Omnitrix can initiate a restorative process. The Omnitrix will normally repair the damage and adjust them to an optimal setting. For example, a dog with a rampant absorbing ability instead gained metal skin.

By activating the Repair Protocol, you can channel the Omnitrix's healing energy into those in need, rejuvenating their genetic structure and aiding in their recovery. This ability grants you the power to alleviate the suffering of others and restore their physical well-being. This will allow you to either merge the two jumps or for you to take all of your purchases into a new world. Just remember you can't run from the drawbacks, no matter how hard you try to.

Self-Insert - 0 CP
So you want to be one of the named characters huh, well if you take the appropriate background, and then you will get to take their place. This won't give you any of their skills unless you buy them however. Otherwise you are free to go in as any character you would like.

Extended Stay +100 CP
For each purchase of this your time here is extended 10 years. Just be careful this world has a number of dangers even to those who stand at its peak. Staying here may give you some more opportunities, but it also carries many perils. Lastly, depending on how long you plan to stay you may need to find some method of extending your lifespan.

Lone Son +100 CP
Yearn to find your place among the ranks of heroes with the Lone Son drawback. Your life echoes the poignant sorrow of notable figures like Tony Stark, as the untimely demise of your parents has left you bereft of their love and guidance. Stripped of the support and nurturing that family provides, you will venture into the world alone, burdened with the weight of your tragic past. This solitude can be isolating and challenging, as you face the trials and tribulations of your journey without the comforting presence of kin. The absence

of familial bonds may fuel your determination to forge your own destiny, but it can also leave you vulnerable to emotional struggles and a sense of longing. Are you prepared to navigate the complexities of heroism with the knowledge that you walk this path without the familial support enjoyed by others?

I Hit My Head +100 CP
Something appears to have gone wrong upon entering the jump. As a result you have forgotten all information related to the future of this setting beyond what your origin provides. You will have no knowledge of events or people that have not yet occurred. As far as you are aware this world is a brand new setting waiting for you to discover its secrets.

The cause of this memory erasure is unknown and cannot be reversed by any means available to you. You will have to rely on your instincts and natural abilities to survive and thrive in this new world. While this may give you a sense of freedom and the chance to start anew, it also means that you are vulnerable to being caught off guard by unexpected events and enemies.

Afraid of What They Don't Understand +100 CP
Due to the general public's fear and lack of understanding of superpowers and extraterrestrial beings, you may encounter negative reactions from them. People may react with fear, panic, or hostility when they see you, making it more challenging to approach or help them. You may need to take extra precautions to avoid drawing unwanted attention to yourself, or risk facing the consequences of those who fear what they do not understand.

Illegal Status +100 CP
Due to circumstances beyond your control, you do not have legal citizenship or documentation in the world you are currently in. This can make it difficult to find work, housing, and even basic necessities like healthcare or education. The biggest problem is that situations tend to attract attention, particularly when it comes to those with superpowers. Having no identity could easily lead to others suspecting you of criminal activity or make others overestimate your threat level. You may be subject to surveillance, harassment, or even vigilante justice from those who view you as a potential threat.

Paranoid Vision +200 CP
You possess an unprecedented level of paranoia, akin to that of the legendary Nick Fury himself. Constantly on high alert, you find it challenging to trust others and often see potential threats where others may not. This hyper-vigilance can consume your thoughts and actions, leading to strained relationships and a constant state of suspicion. You may find it difficult to form genuine connections and collaborate effectively with others, always questioning their intentions and doubting their loyalty.

Your relentless pursuit of uncovering potential threats can consume your life, as you constantly analyze every situation, searching for hidden dangers and conspiracies. This level of vigilance can become exhausting, both mentally and emotionally, as it hinders your ability to relax and enjoy the present moment. Your heightened suspicion may also lead to misunderstandings and unnecessary conflicts, as you are quick to perceive innocuous actions as potential threats.

Navigating social dynamics becomes a challenge, as you question the motives of even your closest allies. This deep-rooted paranoia may isolate you from forming meaningful bonds and hinder your ability to build trust. It is crucial to find a balance between caution and open-mindedness, allowing yourself to let down your guard and cultivate genuine relationships while still remaining aware of potential dangers.

Unforeseen Heroic Encounters +200 CP
In your eventful life, unforeseen heroic encounters have become somewhat of a norm. Whether it's battling monstrous creatures, foiling villainous plots, or finding yourself in the midst of chaotic situations, you often find yourself drawn into extraordinary circumstances without warning. Despite your best efforts to plan and prepare, fate seems determined to throw you into the midst of danger and adventure, often leaving you without the support or assistance you desire.

It's not uncommon for you to find yourself facing formidable challenges and unexpected foes without your trusted allies by your side. While your resilience and resourcefulness may allow you to navigate these encounters, the burden of shouldering the responsibility and facing these trials alone can take its toll on your mental and emotional well-being. Prepare yourself for the possibility of being thrust into dangerous situations without the aid and support you would typically rely upon, as fate has a habit of leading you down the path of heroic encounters, regardless of your intentions or desires.

Hunted by Hate +200 CP
You have made an enemy in the form of a hate group that despises everything you stand for. This could be a group like the Watchdogs who despise the Inhumans, a mutant

supremacist like Magneto, or a group like Hydra who seeks to create a world order based on their twisted ideology. They will go to great lengths to hunt you down and eliminate you, using any means necessary. This may include using propaganda to turn the public against you, bribing or blackmailing individuals to betray you, or even resorting to assassination. You will need to constantly be on the lookout to avoid being captured or killed. This drawback could also attract unwanted attention from other groups or individuals who share similar views with your enemy, making it difficult to trust anyone and forcing you to constantly look over your shoulder.

Bad Publicity +200 CP
You have caught the attention of the authorities and local politicians who view your actions with suspicion and distrust. This could be due to your vigilante activities, controversial opinions, or simply being a misunderstood figure. Regardless, your every move will be scrutinized, and even heroic deeds may be viewed as criminal acts. If you defeat a dangerous villain, but the surrounding area is damaged in the process, the media and politicians are more likely to demand your arrest for endangering the public rather than praising your heroism. This can lead to a constant state of stress and the need to constantly watch your back, as the authorities may seek to bring you in for questioning or even arrest you on false charges. Thankfully you can receive support from the public, other heroes, and organizations like SHIELD should you be a true hero.

Battle of Love +200 CP
Like Rath you believe that combat is the ultimate expression of love and devotion comes with its fair share of challenges and misunderstandings. While you see throwing a punch as a passionate declaration of affection, others may not share the same sentiment. This can lead to confusion and awkward situations as your unconventional approach to love and marriage clashes with societal norms. Engaging in battles to express your affection may be met with perplexity and disbelief, making it difficult for others to understand your motivations and view your actions as unconventional or even inappropriate.

Furthermore, the expectation of marriage following a victorious fight can lead to complications, as not everyone will accept or understand this tradition. Forcing someone into a marriage through combat may be seen as archaic or unacceptable, straining your relationships and hindering genuine connections. Additionally, your focus on combat as a manifestation of love may overshadow other aspects of a relationship, making it challenging to express emotions and connect emotionally outside of battle. It's crucial to navigate these challenges with sensitivity, finding a balance between your passion for combat and understanding the complexities of love to maintain healthy relationships and avoid misunderstandings that hinder personal growth and connections with others.

Obsessive Resentment +200 CP
You have a deep-seated flaw that manifests when someone dislikes you or expresses any form of negative judgment towards you. Instead of brushing it off or moving on, you find yourself obsessing over it, unable to let go of the perceived offense. This tendency to dwell on the opinions of others can consume your thoughts and emotions, affecting your overall well-being and hindering your ability to focus on the present.

Whether it's a slight insult, a disagreement, or a general dislike, you have an unfortunate inclination to obsess about it for an extended period. The negative remarks or feelings towards you may replay in your mind repeatedly, leading to resentment that lingers for years, poisoning your interactions and relationships. This obsession can be a drain on your mental and emotional energy, potentially clouding your judgment and preventing you from fully engaging in new experiences.

While you recognize this flaw and strive to improve, your attempts to overcome it often prove challenging in the heat of the moment. It's important to be mindful of this drawback and actively work towards redirecting your thoughts and emotions in a more constructive and positive manner. Failure to manage your obsessive resentment may result in strained relationships, missed opportunities, and an overall negative impact on your well-being.

Follow the Light +400 CP
Similar to the tragic fate of the Winter Soldier, you will find yourself ensnared in the clutches of Hydra's insidious brainwashing. Your mind will be subjected to intense manipulation and conditioning, erasing your autonomy and transforming you into a relentless weapon under their control. The tendrils of Hydra's influence will be deeply ingrained within you, compelling you to carry out their sinister agenda against your will. Breaking free from this mental imprisonment will be a harrowing struggle, requiring immense strength and resilience. Are you prepared to face the darkness within and fight against Hydra's control?

You Want Me to Work With Monsters +400 CP
It would seem that you share Nikolai's stalwart spirit of justice and unwavering commitment to the honorable defense of the innocent. You refuse to work alongside individuals who do not align with your sense of righteousness. This means that you will adamantly reject any cooperation or collaboration with those you perceive as being morally compromised or having a criminal background. When it comes to assembling a team or joining forces with others, you will actively vet their alignment and past actions. If you find that someone does not meet your strict criteria, you will refuse to work with them, regardless of their abilities or potential usefulness. This unwavering stance may lead to conflicts, disagreements, and strained relationships within your team or organization.

While your determination to uphold justice and defend the innocent honorably is commendable, this drawback introduces significant challenges in forming alliances and building effective partnerships. It may limit your options and force you to work with a smaller pool of individuals who meet your exacting standards. This could potentially hinder your mission success and create tensions within your team dynamics. Be prepared to face the consequences of your refusal to collaborate with individuals who fall short of your expectations. Your unwavering commitment to your principles may isolate you from potential allies, leave gaps in your capabilities, and make certain situations more challenging to navigate.

Forgotten Payments +400 CP
It seems that your benefactor forgot to pay for access to the game or failed to upgrade your deal. As a result you have been restricted and aren't allowed to use items that don't belong here. In addition, you have been banned from accessing your warehouse while you are here. You get to keep access to your powers, but any items that don't belong to this universe are forbidden.

Powers Begone +400 CP
So you thought that you could just use your other powers in order to blitz the setting did you? Well now you can't, your out of jump powers have been locked away. If you are going to survive in this world then you're going to do it with the powers that belong to this setting. As a small mercy you will be allowed to use any powers that can fit this setting such as any abilities from the Marvel Cinematic Universe Part 1 and 2 jumps, the Dr. Strange Multiverse of Madness jump, any jump related to the Ben 10 franchise, and any other jump related to the Marvel franchise.

Bunch of Knock-Offs +600 CP
Your remarkable abilities and achievements become a magnet for imitation. Just as heroes and titans inspire others to follow in their footsteps, your notable abilities will spawn a flurry of knock-offs with their own variations. When you showcase a notable ability or achieve a significant feat, be prepared for a wave of imitators to emerge. These knock-offs will possess similar powers or skills, albeit with their own unique twists or variations. Just as Iron Man inspired Iron Monger, Whiplash, and Crimson Dynamo, your displays of power will ignite a chain reaction of imitators seeking to emulate your greatness.

While these knock-offs may lack the mastery and finesse of your abilities, their sheer numbers and determination can present additional challenges and distractions. Their imitation may range from admiration and flattery to envy and rivalry, further complicating

your path to success. One small mercy is that not all of these individuals will be opposed to you. Perhaps you can even gather these individuals together to synergize your efforts. Regardless this will certainly make things a lot more chaotic with so many new Enhanced appearing.

The Big Leagues +600 CP
When Dial dealt with Strucker he wanted him to realize just how small he was in the universe and why HYDRA wasn't a true threat. To do this he transported them throughout reality showing some of the greatest threats in existence. This included the Brood, Selene Gallio, Mephisto, and Galactus. There however, was an unintended consequence of doing this. All of the threats aside from the Brood saw Dial and he was directly brought to their attention gaining their interest. Just as Dial unintentionally drew the interest of formidable beings like Selene Gallio, Mephisto, and Galactus, your arrival in the multiverse sent out a ripple, attracting the notice of these mighty entities.

While most of these multiverse powerhouses may choose to disregard you, some will become intrigued by your presence. Whether out of curiosity or a desire to manipulate you for their own purposes, they may seek you out, eager to test your mettle or involve you in their cosmic games. You now find yourself caught in the crosshairs of beings of immense power and influence. Their attention brings both opportunities and dangers, as you navigate the intricate web of cosmic entities and their inscrutable motives. Your interactions with them may have far-reaching consequences, altering the course of your journey and the fate of the worlds around you.

Time Disconnection +600 CP
You possess the unique drawback of Time Disconnection, a curse that grants you extraordinary speed and perception, but severs your ability to connect with others on a meaningful level. Your heightened senses allow you to move faster than the world around you, perceiving every detail with astonishing clarity. However, this comes at a cost—the world appears to move in slow motion, making it difficult for you to relate to and communicate with those around you.

People's actions and words seem sluggish and unintelligible to you, as if they are moronic imbeciles trapped in a perpetually slow existence. Engaging in conversations or interacting with others becomes frustrating, as their pace feels excruciatingly slow compared to your accelerated mindset. This disconnection can lead to feelings of isolation and impatience, as the world's pace no longer aligns with your own.

Be prepared to navigate the challenges of existing in a world that stands almost still, where every interaction feels like an eternity. The curse of Time Disconnection grants you

incredible speed and perception, but it hinders your ability to connect and empathize with the slower rhythms of normal individuals. Hopefully you don’t go insane, after dealing with this for a few years La Vent suffered from depression and near insanity.
