

Yurisekai / World of Yuri
Jumpchain by Cthulhu Fartagn

The Story Thus Far

One day in 2018, two young girls were walking home from school. Isuzu Hino and Yuuri Kuroi. They were ordinary girls, with very little about them that made them stand out, that made them special. Well, other than the fact that both of them were doujinshi artists specializing in yuri works. Although friends, Kuroi was far more successful than Hino, for they each had a preferred style of yuri - and Hino's didn't sell as well. Kuroi began to lecture Hino about how men shouldn't show up at all in a yuri work, only for both of them to be violently introduced to Truck-kun's front fender as they wandered into traffic; too busy arguing about the quintessential essence of what makes a good yuri manga to notice.

Isuzu Hino then woke up as an elf in a fantasy land, with a rather beautiful girl standing over her, supposedly having saved her from an attack on her village by the Demon King. She didn't get a cheat skill, but she did wake up in a world that seems to be right out of one of Kuroi's works, something that you can be sure made her quite happy.

You… will probably not start your ten years here with a princess standing over you, but we can all dream. To help get you started, take these.

+1000 cp

Origins

Artist

Congratulations, you're a filthy doujin artist! You are in fact, a third artist, likely a friend to the other two, and your last memory was of being hit by a truck. Congratulations, you've been Isekai'd to a fantasy world! Now, you are stuck in the body of a rather dashing young woman who vaguely resembles your normal human self, and this may present some issues. Or, it may present an opportunity.

Local

Congratulations, you're a local of the fantasy work of Yurisekai! If it has an actual name I have no idea what it is, so I'm just going to call it Yur. You could be anything from a maid to a princess to the demon lord herself, though that last one seems fairly unlikely. Still, while the world you live in is a rather strange one thanks to the curse that the demons cast over the land, you don't exactly have a bad life.

Both origins are set to female, and this is mandatory. Sorry, but it's that kind of story.

Discounts are half off as appropriate, with 100 cp perks discounting to free.

Perks

Artist

Curse

Free, Exclusive, Mandatory - Chocolate Lily

The rules of summoning in this world are honestly fairly unusual as far as isekai plots go. You see, the people summoning you don't actually want a hero. Or a villain, in case that was your second thought. No, they're using your soul as fuel for a massive curse to spite their enemies with. You still have a physical form, a new body more appropriate for this world, but most of your power from your summoning is tied up in maintaining this curse instead of granting you a traditional cheat.

The current curse has two aspects, it periodically sends any woman it manages to infect into a lustful stupor as well as any man who sees an infected woman, and kills the man if they touch her. This means that the women must be pleasured by other women in order to regain their sanity, and kept at a safe distance from any man. Or, more poetically, love between women is mandatory, and men are unnecessary. Luckily, women infected by the curse are marked with a 'tattoo' of a fleur de lis above their womb, giving an easy sign for when someone is now a danger to society and to themselves.

You may choose the effects of your own curse as you please, one for men and one for women. Ideally you'd stick within the theme that this world has going for it, that being Yuri, but strictly speaking it's not actually required. I will pout at you if you don't though.

100 cp - I'm Just An Ero Artist!

The name of this perk says it all. Despite only being a teenage girl, you're an accomplished artist with a keen eye for drawing the female form, and a half decent storyteller to write a plot to go along with it. Your own tastes might be shit and the resulting story might not sell well, but if nothing else it will actually be good art. You also have a knack for finding niches that share your opinions on certain fetishes, and a decent level of skill at marketing your stuff to said people.

100 cp - I Drew It, So In Theory I Can Do It

Be honest with me - are you using your art to vent about how much you want to do those things, or drawing from your own experiences to help write the plot? Either way, your skill in the two areas are now linked. Learning to draw people in the act of lovemaking makes you better at it yourself, and learning all the right places to touch somehow increases your skill at drawing those places. This doesn't create a feedback loop, but it does mean that drawing something makes you better at it.

100 cp - Your Love Makes It Better

With the curse being what it is, there are quite a few people who suddenly lost family members - mostly men, because the curse isn't fatal to women - and are in grieving as a result. I won't say that you have an easy time taking advantage of these women, but you do have a knack for soothing their pains and helping them move on. Part of that is physical affection, the simple feeling of intimacy without much in the way of expectation, but the rest? The rest is some incredibly cheesy and cliche lines that you've probably used in your works at least once before. Turns out, they actually work. Put the two of them together, and your presence ends up being oddly calming to those in pain, regardless of if you actually put the moves on them.

200 cp - Help Me Test This Position
Back on Earth, if you were quite lucky then you probably knew one or two other people who were also artists of the same persuasion as you. That is, cute girls who drew other cute girls doing other cute girls. And one of those cute girls probably asked you to model for her, so that she'd have a better knowledge of how to draw her yuri manga. And then probably paid you in sex. You have an easy time making friends with those who share your interests, and an easier time asking for favors that push the boundaries of normal friendship. Like nude modeling so you can draw a manga about the two of you having some incredibly kinky sex. Whether this is purely business or just you looking for an excuse to get an eyeful, that's something you'll have to decide for yourself.

200 cp - You're Here As Well
Love between women being mandatory.... Men being utterly ignored… Doesn't that seem to be oddly familiar to you? Yes, you're almost certain that you've read a story like that in the past. Then, this must be HER doing! For some reason, you have a rather remarkable ability to guess the culprit of crimes and potential perpetrators not by any deductive reasoning, but through things like art style, personality traits, or how overly complex the scheme is. You were once a writer of sorts yourself, so dissecting the genre and conventions of this one to discover the truth is fairly easy for you. All you need to do this is a level of familiarity with the target, whether it's an afternoon chat or even a book they wrote.

200 cp - It's A Sexual Revolution
In your quest to draw the most lighthearted yuri manga possible, you delved into some deeply disturbing things to practice in the bedroom. Vibrators, oil, some incredibly weird positions that you aren't sure the human body can actually make, and dozens of different ways to kick the guy out of the picture, all of it is… perhaps not within your grasp because you've never actually used it, but you have a near encyclopedic knowledge of the female body and how to pleasure it. You also have a knack for recreating these things here in the fantasy world, using small amounts of lighting magic instead of electricity, the goo from slimes instead of traditional oils, so on and so forth. Even with only having read about it, you're still going to blow their minds.

400 cp - The World Hasn't Ended Yet
So, despite Kuroi's best attempts at pretending the male gender doesn't exist and never gets any screen time, the world has not ended yet and human civilization continues to exist. How strange. You'd think that a curse designed to kill off all the men would have more of an effect, but I guess not. Or, more accurately, regardless of what your own curse actually is, quite a few of the negative side effects and things of a similar nature just sort of… fail to happen. Society might get a little weird as it tries to compensate for such things, but as long as you don't completely eliminate all the men then the human race will just keep on trucking along. Similarly, the damage you may or may not deal to society just sort of gets brushed over and dealt with.

400 cp - Made For Yuri
So here's something interesting. After being hit by the truck and used to fuel the curse, Isuzu woke up to Princess Carloline standing over her, but Kuroi? She arrived in the fantasy world almost 100 years in the past - or I suppose, Isuzu was a century late. Similarly, you may choose to have the effects of your curse propagate backwards through time, up to a maximum of 100 years prior to your actual entrance to the jump. The effects won't be as strong as you personally could bring to bear, but that's to be expected with you not actually present. Still, you could massively change the nature of the world with this, if you desired to do so.

400 cp - The Curse Itself
Well now, this is interesting. I mentioned before that you would be arriving in a body not your own, as a consequence of the summoning process. With this, that doesn't need to be true. You may now exert a level of influence over everyone that is infected by your curse, seeing through their eyes, guiding their hand, and even using them to propagate yourself even faster. Of course, while this does come with several benefits - being a borderline memetic infection in and of yourself can be amazing in the right circumstances - it does mean that you no longer have a body of your own, and if you ever run out of infected bodies, that will qualify as your death. On that note, if you're buying this while NOT being an artist, then you may instead choose to propagate any curses you embody in a similar manner. You will need to find those on your own time however.

600 cp - A Life Of Lilies
Due to the nature of the curse, the soul is far more important than the body. In fact, your soul is currently in an entirely new body. If you wish for it, then at the start of each new jump, you may choose to have this particular event continue to happen to you. Replacing a life in this manner comes with a number of minor benefits. Some simple physical skills, perhaps a talent for magic and some spells under your belt. Rarely the full powers or skill set of the person you have taken over, but enough to reasonably fake them. ...You do not get their memory, however, though if you wish I can arrange for your new body to undergo a simple accident and take a blow to the head. Lastly, this is not a perk designed to grant you extreme amounts of power, but rather a social connection. You may not reincarnate yourself as the main character, whoever that may be, but their sister, next door neighbor, or lover are all fair game.

600 cp - Queen Of A Yuri Harem
Though the reasoning behind the truth of the curses may vary, the end result is the same. They exist to make things more yuri, to spread it wherever they go, and to show it's glory to every woman. Regardless of the method through which the curses work, these facts remain. With this, your curse has a more subtle effect, a more permanent and lasting one. Anyone you infect, be it fully or the barest touch, will eventually become yuri as well. Perhaps not as much as you, with them still tolerating the presence of men, but so long as you continue to exist then the world around you will inevitably slide towards the love between women being the only love worth mentioning.

Local

100 cp - Youthful Indiscretions

With the world being what it is, the first thing you need to realize is that dignity is counterproductive to curing people of the curse. With that in mind, you may dull or outright turn off your own sense of shame whenever you wish. If it's for your health, can you really complain about being pushed down by a half dozen maids who are about to have their way with you? I mean, you can, but if something like that is enough to make you die of embarrassment you won't last very long. In addition to that, you'll find that you have a remarkable talent for actually being able to acknowledge that something bad isn't your fault, even if sometimes it does seem like YOU were the killer. It's the curse's fault that the knight died, not yours.

100 cp - Come With Me

Being a princess is a stressful job, especially when your kingdom is under siege by a curse that turns your own citizens against you. You may find yourself wishing that you had a way to unwind and relax, a way to not be a princess for a few hours. To that end, you've figured out how to take advantage of the 'cleansing protocols' to get yourself laid. More importantly, you can also keep your relationships hush hush and your partners quiet. The masses - and arrogant nobles who think they have a chance with you - would make even more work and stress for you if this were to get out after all.

100 cp - Resident of Fantasy

You want to know the best part about living in a fantasy world as compared to a more modern world covered in steel? Magic. In fact, while it may not be everywhere or something that everyone can learn, it certainly is something that you have had the chance to learn. You now know a couple of simple spells, such as Healing Wind or Fireball, that you can call up with relative ease and use for quite a few times before exhausting yourself. ...I should also mention that the local healing spell is optimized for use in the bedroom, restoring stamina and resetting the refractory period so that you can keep going long past your normal limits. You don't have to pick that one up though, I just can't imagine why you wouldn't.

200 cp - The Beast's Eyes

As hard as it is to mistake the actions of someone under the effects of the curse for anything else, it is technically possible to do so. Luckily for you, the Chocolate Lily curse manifests physically on any infected woman in the form of a small brand, giving you a clean and unmistakable sign of that infection. With this, so do any other curses or illnesses you may come across. Figuring out what mark matches what disease may take some time, but once you manage that you'll never manage to mistake it for something else. If you wish, there can even be submarks determining the severity or sub-variations of whatever you have been inflicted by.

200 cp - Unprofessional Maid

A normal maid is expected to be presentable at all times, and to clean up whatever mess might get made. You, on the other hand, are expected to turn your masters guests into a sticky mess and give them the best service you can give. Despite that expectation, you are not actually particularly skilled in the bedroom - if anything, you have more in common with a professional masseuse, manipulating the body into a puddle of orgasms without an ounce of sexual intent on your own part. It would probably be quicker if you just had sex with them, but you probably aren't into women. Yet. In addition, you are actually remarkably quick and efficient about cleaning up messes that result in your service.

200 cp - Vision of Beauty
Is it magic? Is it selective breeding? Is it a blatant yuri power fantasy? Why not all of the above? You are now a top notch beauty, easily eleven out of ten, that exudes an aura of purity and innocence that most men and even some women can't help but want to get close to, to get to know you in a more… intimate manner. In addition to that, every other woman in the world receives a minor boost to their appearance, a mere plus one to your eleven. It's no good to be waited on hand and foot by ugly girls now is it?

400 cp - Demihuman
The curse, for all its power, seems to be something that is designed to specifically target humans. That's why so much of their hope in ever finding a cure or counterspell of some kind for it rests on the shoulders of those who are not humans. You have a choice here - you may become a Beastfolk, who resemble humans with the occasional animal parts such as ears and a tail, or an elf which ought need no description. Beastfolk are more physically powerful and possess immense stamina, while elves are considered more intelligent and magically powerful. Both of them are highly resistant to illness, disease, curses, hexes, and other forms of dark magic.

400 cp - Royal Knight
In order to keep the infected women away from any men, most of them are squirrelled away into a number of castles that have been turned into something between a safe haven and a quarantine zone. A group of male knights patrol the outskirts, but a team of female knights - of which you are now one - keep those men out and the infected women in. Beyond simply being a competent fighter, you specialize in subduing your opponents, be they lust crazed women or men willing to risk death to enter the forbidden paradise. Actually, you have an easier time fighting against men period, as well as enough self discipline to mostly blunt the effects of the curse on your mind, if not your body.

400 cp - Magical Researcher
While Lilian might be a genius of lust, she still needs someone to make her ideas a reality, and she definitely can't do mass production on her own. Not while still curing women of the curse at least. That's where you come in. You're a dab hand at all sorts of elemental magics, knowledgeable if not skilled at wards, and plenty talented at turning those things into enchanted items. And believe me, that elf girl will be pushing you and your department to the brink in the days to come, and once people figure out how to use the things she makes, the demand will only get worse. If only these things weren't so useful for curing the curse… Maybe you should do some research into that in your spare time?

600 cp - Noble Blood
Born beautiful and grew up better, you are an extremely lucky individual. You are no ordinary girl but a beautiful flower of the human kingdom - a member of the royal family. While this doesn't grant you much in the way of power, your training means that you can single handedly run an entire kingdom while also having time for an illicit relationship on the side and personally overseeing a number of projects. For some reason your skills only seem to heighten when tested against men - kicking men out of their positions and taking over their responsibilities and duties is practically child's play to you. It probably has something to do with how unreliable they are compared to you.

600 cp - Aphrodisiac Wave

One thing that makes the Chocolate Lily curse so infuriating to deal with is how quickly it can snowball into something much worse if left unattended for any length of time. An infected woman who comes into contact with another infected woman immediately suffers from the effects of the curse threefold, as well as releasing a burst of energy that is likely to infect even more women. Add those additional women to the mix, and this effect can leave an entire town infected or worse in hours, and effectively unable to be cured for years. You are, for better or for worse, a remarkably talented magician with a speciality in light and healing. This also means that you are a natural conductor for the curse, potentially infecting an entire town if you accidentally set an Aphrodisiac Wave off.

Items

Artist

100 cp - Art Supplies

What is a mangaka without something to draw with? Not a mangaka, I would assume. That's why you've either somehow managed to bring a small supply of pens and pencils of various colors, some notebooks and high quality paper, and a few miscellaneous tools with you when you got summoned, or begged for them once you were more established in your new life. The end result is a small box full to the brim with just about every drawing supply you could reasonably want that seems to refill itself whenever you look away from it. You can also have a desk and chair to draw on to go with your things to draw with if you desire them. All you need now is someone to publish your works...

200 cp - Mangaka Circle

What a coincidence, someone to publish your works! This online group represents a small collection of artists who share your love of yuri and want to get it out into the world. If you need help with the plot, the 'plot', or the "plot", they'll happily lend a hand so long as you return the favor. And your completed works can be sent to the admin, who will then see them physically printed out. Of course, that's on Earth - here in the fantasy world, this is merely a small printing house owned by a woman who adores your works, and staffed by a number of younger ladies who will offer more or less the same benefits as the online group.

400 cp - A Trove Of Toys

I know what you're thinking - some sex toys, no matter how high quality, can't be worth this much. Well, this isn't a bunch of sex toys, it's a bunch of magical sex toys as well as an easy way to get more of them. Beyond you already having a number of normal toys made and powered via magical methods, as well as a few things that straight up don't have counterparts back on Earth, there's also a few sheets of paper here, requisition forms for the research division. If for some reason what you want isn't already here, then you can simply draw out a rough sketch and write a simple description of what you want, and it will be added to your collection posthaste. In a less magical world, you don't simply have a sizable collection, you very likely own the entire store.

600 cp - Truck Kun

Well now, here's something interesting, an item with no direct counterpart in the fantasy world. According to the paperwork, you're now the proud owner of an Isuzu ELF, also known to the manga industry as Truck Kun. This vehicle never needs refueling, can drive itself, and has the amazing feature of sending anyone it hits on an isekai adventure. Oh, and somehow not getting caught and getting you sent to jail for running down innocent yuri artists. The individuals struck down by Truck Kun may or may not show back up in future worlds where Truck Kun has an existing presence, with a standard isekai cheat power or item, and optionally, a curse. In addition to this, you automatically receive manga and doujins based upon the adventures of those you choose to isekai.

Local

100 cp - Beautiful Things

Well, clearly there's nothing as beautiful as you, but I'm sure that even a masterpiece could be artfully decorated. To that end, you have a small supply of simple but beautiful things. White dresses trimmed in silver and gold, jewelry set with diamonds and other gemstones, even a small collection of tools to tend to your appearance with, as well as quality soaps and the like. Most of these things have a tendency to lean towards a specific impression that you wish to give - white is considered the color of purity, after all, though you need not stick to that specific theme.

200 cp - Band of Maids

Though the curse of the Chocolate Lily has shaped human society these past 100 years, there are those who are immune to it. Demihumans, such as the beast races, as well as elves. Well, the women are - a man will still die for touching an infected woman. Luckily for you, the kingdom has seen fit to place a dozen beastmen maids under your command. ...Despite what you may think, they actually are maids. Though they can and will attempt to 'cure' you if need be, they actually have very little skill in the bedroom. Perhaps you could find someone to teach them for you?

400 cp - Cursed Research

If the demons knew you had this, then they'd likely burn your entire village to the ground. A small collection of magical tomes held in an underground laboratory, detailing the nature of the Chocolate Lily curse as collected since its creation. In other words, the details on the ritual that created it in the first place are here. Well, most of them. Still, with a bit of time and a sacrifice, you could learn how to create curses of your own. Controlling them, or even predicting what they would do, is likely to take another century of study.

600 cp - Caroline's Castle

The capital of the human kingdom has long since been transformed into a makeshift quarantine zone. It's castle, once a shining jewel, is now a sort of prison for those infected by the curse. Once cured they are of course free to leave, but until then… Regardless, this castle is now your castle. It's a wonderful place to live, but it's also been converted into something halfway between a brothel and a hospital. In the future, the castle will maintain wards and other defenses, preventing curses both large and small from targeting you and making anyone that is inflicted with such a thing far easier to cure within its walls. I'd go so far as to say that any curse can be cured with enough cute girls molesting your patients.

Companions

100 cp / 300 cp - Companion Import

While the specifics of this world are very unspecific, the only people likely to be alone for any length of time are the men, something you are not. Therefore, you might as well surround yourself with as many beautiful women as you can. For 100 cp you can import two companions into the jump, for 200 cp you can import four, and for 300 cp you can import eight of them. Each companion receives 600 cp and an origin to buy perks and items with. ...I have no idea what the world of Yur would look like if there were suddenly eight additional curses and I don't really want to find out.

100 cp - Companion Export

And of course, on the opposite side of the spectrum from old friends, the yuri harem you surely came here to make. With each purchase of this option, you may companion two individuals of your choice from this world. Though, given the sparse number of women that you would likely have been introduced to, you may also use this option to pick up four individuals of your choice that are of your own creation. A town baker, a member of the guard, one of the princess's secretaries, perhaps even an elf? These created individuals do not gain cp the way a proper companion would as they are only followers, but do have a minimum level of competence. ...You may also take men here, though I should point out that there are no men worth taking.

Drawbacks

+0 cp - This Is Now Yaoisekai
This world is fundamentally rooted in the fantasies of two teenage girls. A world where only women exist, and only love between women matters. However, if this irritates you for whatever reason, I can always flip things around a bit, create a world where it's love between men that matters. I'm afraid that this world is always going to be rather gay though, there's no escaping that. Oh, and you should probably go back through the jump and mentally replace every instance of 'female' with 'male' and vice versa.

+100 cp - This Can't Be Called Yuri
When love between women is forced, taken for granted, viewed as a necessity rather than the joyous thing that it is… Can something like that even be called Yuri? For you, not really. Whether it's curing the curse on others or being cured yourself, sex between others simply feels… dull. Can you even call that sex? They barely know what they're doing. Unless there is a real spark between you, an emotion, a connection, then you have a hard time getting into things. Of course, on the flip side to that, if there is something there? You get a little too into things.

+100 cp - Wash Your Hands!
Yuri sex is great, but you know what else it is? Messy. Well, that probably applies to regular sex as well, but we don't care about that. Two things happen with this drawback - the first is that the mess created through such endeavours is larger, stickier, and all around more of a hassle to deal with. The second? You're just a tiny bit obsessive about cleanliness, meaning that mess is going to be a massive irritation whenever it occurs. And regular cleanliness as well, but mostly the kind caused by you and your lover.

+200 cp - This Is What Yuri Is
So, I'm not sure if you're just extremely committed to the idea that yuri is the ideal form of love or you just hate men, but you seem to have a significant issue with the opposite gender. And by that I mean that if you were infected with the curse, you would happily put yourself at their mercy because such a thing would prove fatal to them due to the nature of the curse. Or hell, if you are a curse, then with this your effect on them is probably in the same style as that, something likely to kill. You really, really, *really*, do not like men.

+200 cp - Definitely Safe In Here
The princess of the human nation is nominally in charge of the anti-curse measures, be it overseeing the service squad as the attempt to pleasure the infected women or negotiating with the beastfolk and elves to make sure that the squad has both members and resources. As a result, she is highly defended from the curse, behind wards and enchanted items meant to keep it at bay. It's not nearly enough, it just didn't care about her. You have a very similar issue in that your luck randomly swings towards utter shit and everything goes horribly wrong right when you think things are just peachy. This gets worse when you say things like 'at least it can't get worse' or other lines that tempt fate.

+300 cp - Literally Jumping Wrong
This is probably the epitome of poor decision making, but if you absolutely cannot stand the idea of being forced into being female by this world then here you go - you are now male. This comes with the rather glaring flaw of randomly going insane with lust because of the curse and then abruptly dropping dead the instant you try to act on it. Society as a whole is also about to develop a rather intense dislike of your whole gender due to the effects of the second curse, leaving you not only in danger but as something of a second class citizen that's only good for drudge work and other unpleasant tasks. At some point in there you might be allowed to get on with some women in order to keep society going, but don't expect to keep in contact with them.

+300 cp - Did You Forget About The Demon King?
...You know, I actually did forget about the demon king. It's their fault that the curse in its current form exists in the first place, and yet they barely matter to humanity's struggle beyond existing threateningly in the background. Well, that's not true anymore, and it's definitely not true for you. See, you're now on the frontlines of the army that's responsible for keeping demonkind at bay. You'll mostly need to deal with border skirmishes and other small stuff, but you'll also be kept far away from anything even remotely interesting. Unless you learn to make your own fun, I guess. Don't think that having no applicable talents but yuri manga will keep you safe either, you'll still end up here one way or the other.

The End

Do you wish to Stay Here, make a new life amongst your friends and lover in Yur?
How about Go Home, return back whence you came, keeping all you've collected thus far?
There's also Moving On, as options go, continuing your travels to new and wondrous lands.

Notes

Q - May I have the sacred numbers?
A - On Nhentai, 245273

Q - So are the men all dead?
A - Not yet, no. They’re just sort of in the background somewhere.

Q - How does the existing curse tattoo manifest?
A - A stylized fleur de lis womb tattoo, though it also shows up on Isuzu/Lilian's tongue at the end.

Q - What does the second curse do?
A - Corrupts the minds of men so that no women will actually want them. Not nearly as dangerous.
