Generic Loli Jump

Version 1.0

This is you chance to become a little girl just like you have always wanted… or perhaps you just want to be inside one. Either way, this jump isn't connected to any particular world, but can be used to play in one of several different worlds. Some of these worlds have stories that you can become part of for a reward, found in the scenarios section.

+1000 CP

Age and Gender:
Your age and gender are based on your origin.

Origins

Lolicon

You like little girls in ways you shouldn't, and they like you back the same way. You may pick any age 15 or higher. Your gender is male.

Loli

You are a little girl, cute as a button. But the problem is you like things little girls shouldn't.

Oppai Loli

You are an early bloomer, even though you are a little girl you are still sexier than some adults.

Perks

General perks are at full price; each origin gets their 100 CP perk for free and all other perks listed under their origin for 50% off.

Shades of Grey (Free/-100cp): If you are going to be a Loli of any type during this jump, you are going to be raped, at least according to the law. This perk makes sure that the only the people you find sexually attractive will try to rape you, statutory or otherwise. This perk is free for the Loli and Opai-Loli origins for the duration of the jump, but costs 100cp to keep in future jumps.

Porn Psychology (Free/-100/-200cp): In real life, sexual encounters can cause psychological problems; however in during this jump this won't be a problem, just like in a porno you will walk away from any sexual encounters you have without any form of psychological scarring. This is free for this jump, but 100cp to keep. For an additional 100cp, this will also apply to any and all of your sexual partners.

Children are Adaptable (Free/-100 CP): You are probably not ready for more fun forms of play, at least not yet, but that will change. Your body adapts quickly to the physical demands of any fetish you are engaged in. Your first time may hurt, but your second time won't. You also have an instinctive understanding of how to practice in order to prepare for more extreme sex acts. This is free for the duration of this jump, unless you take the ***A Bit Too Tight*** drawback, but for 100 CP you can keep it for future jumps.

Onii-San No Baka (-100): You are fluent in tsundere. You are capable of giving and receiving mixed signals with the true feelings being conveyed.

A is for Anal (-100): You will probably end up being distracted and forget to study, but with this perk you can ask your teacher for extra credit after class. You can trade sexual favors for better grades, the resulting extra credit will be based on your skill at pleasing teacher. You can also trade sexual favors for improving any other form of performance review, however be warned this doesn't protect you from the people you bribe coming to expect sexual favors from you as a matter of course.

Teacher's Pet (-100): This is the inverse of the above perk, providing your teacher with sexual favors improves your ability to learn from them. Having sex with your teachers after class gives minor benefits, while servicing them under the desk during class will double your learning speed. If you also have ***A Is For Anal***, you learn as much from trading sexual favors for grades as you would having earned those grades conventionally.

Lolicon

Sexual Awakening (-100 CP): Sex just isn't quite as fun if your partner can't enjoy it, but that won't be a problem for you. You can give someone without a libido the capacity for sexual desire with a lustful glance, and you can similarly grant someone the capacity to enjoy sexual stimulation with a touch. This is mainly used on little girls, but also works on people with nerve injuries or other problems that prevent them from enjoying sex.

Puppy Love (-200 CP): Maybe it's your scruffy beard, maybe it's the kind look you give them, or maybe it's just how cool you are. No matter what is the "it" you got, you have something that makes little girls develop crushes on you.

Sempai (-400 CP): Whenever you do something forbidden with someone else, they won't use your name while discussing it, but rather use a nickname. Lolis will typically give you cute nicknames like Onii-San or Sempai.

Love conquers Law (-600 CP): Love is truly the greatest force in the universe. As long as your sexual partners are willing, you will never face negative consequences for your affairs with them.

Loli

A Kitten in heat (-100 CP): You are a little thing aren't you, but that doesn't stop you from having needs. You will always have a libido and the capacity to enjoy sexual stimulus no matter how young you are. As an additional bonus, you can switch your libido into an overdrive like a cat in heat.

Sleeping Beauty (-200 CP): You are so cute in your sleep, someone might want to play with you. This perk provides you with two benefits, first you retain the benefits of any stimulation you receive while asleep. Second you you can choose to remain asleep while someone stimulates you sexually, letting them play with you as much as they want.

Really 500 years old (-400 CP): Being a loli is fun, so it makes sense that you would want to stay a loli. You can choose to manifest a form of dwarfism that will keep you looking like a little girl no matter how old you get. In any jump that allows you to choose your age and gender, you may choose to be a little girl for free.

Innocence (-600cp): Its hard to be innocent when you are not, but you can manage it. You can choose to temporarily suppress memories of things that took away your innocence and adopt the persona of a completely innocent little girl. Your are always aware when you have something suppressed, and can restore them reflexively at any time. Your body also recovers from any form of sexual acts and no sex act will ever lose its novelty or pleasure from repeated experience.

Oppai Loli

Impossible Clothes (-200 CP): Your boobs are so big that your clothes would hang off them like a curtain, hiding their true beauty, unless… you can now make your clothes stick to your body as if they were wet or you were using body glue. When using this ability you this ability you can instinctively make your clothes stick where it is most appealing to see the details, and hang loose in other places.

Milk and Honey (-400 CP): Your udders aren't just big, they are full of tasty milk too. You can lactate even if you aren't pregnant, producing excessive amounts of milk. Furthermore, your breasts can cum by squirting milk when you are brought to climax. Also, if you have *A Kitten in Heat*, your pussy juice tastes like honey, and you can produce literal bucket loads of it when you switch your libido into overdrive.

Pillow Princess (-600 CP): You are the crowned princess of pillows, chest pillows to be exact. Your boobs are big as you want them to be, and always maintain the perfect shape. They bounce if you let them loose. You will never be caused pain by the weight or bouncing of your breasts. In fact the feeling of your melons bouncing arouses you. Finally you are really great at titty jobs, and your breasts are sensitive enough that you can climax from giving someone a boob job.

Anyone you invite into it couldn't help but think the owner needs to be spoiled. It is also easy to access, using a small key that works just like the key to your cosmic warehouse. It doesn't have much room for storing things across jumps, only its furnishings really, but you can combine all the closets you buy in this jump with it so they don't take up any room in your cosmic warehouse.

Sacred Shimapan (-600 CP): A loli can't just pull down her own panties when it is time to have fun, that wouldn't be cute and innocent. The locker room will follow you whenever you move to a different school, and can be accessed via cosmic warehouse whenever you aren't attending school.

He's also a werewolf, and master of disguise who makes his own costumes, and wants to eat lolis the fun way. This dangerous person has the lolicon origin and gets 600 CP to spend on perks and abilities.

Drawbacks

You may only take a maximum of 800 CP worth of drawbacks.

Narrow Strike Zone (+100 CP): For the duration of the jump, you only find a single body type sexually attractive. If you are a Lolicon you can choose either Loli or Oppai-Loli. If you are a Loli, you can choose either loli, big brother, bad boy, or fatherly.

Parental Involvement (+100 CP): Parents and teacher are going to try and stop you from having any fun. You can either try to be sneaky or take your punishment.

Unwanted Attention (+200 CP): For the duration of this Jump, Shades of Grey and any similar perks are disabled, and you are guaranteed to be have a stereotypical fat ugly fat guy take interest in you.

Insistent Attention (+200 CP): You are going to get raped at least twice a year for the rest of the jump.

A Lack of Attention (+200 CP): You haven't really bothered to pay attention to the way the world works, this has left you hopelessly naive. You will find it hard to wise up for the duration of this jump, and even if you do, a different blind spot you have will end up getting taken advantage of.

A Bit Too Tight (+300 CP): Loli pussies are just a tad too small. This won't prevent you from enjoying sex, but you will have to deal with pain from chaffing afterwords, and losing your virginity will hurt if you are a loli.

Back to school (+300 CP): All of your powers and skills are reduced to a novice level as appropriate to your age. Yes, this includes your sexual skills and experience.

FBI, Open Up! (+400 CP): The police will actually be trying to find and punish pedophiles, and perks that fiat prevent consequences will be disabled. You will have to either sneak or bribe your way passed the attention of authorities.

Tale of the Fisherman's Daughter (+400 CP): Tentacle monsters will attack wherever you are at every few weeks, with a notable preference for your school. You are guaranteed to be tentacle raped at least once during the jump; if you are a lolicon you still have an anus.

Scenarios

Scenarios are modifications to the jump that offer additional rewards in return for completing a mission. Failing a scenario is does not make you fail the jump, but you won't get to keep the scenario's rewards. You may only take one scenario.

Complete Madness (Any): Every scenario your origin qualifies for except ***Doujinshi Jump*** is active at the same time, and the drawback limit is lifted. The scenarios are resolved independently, but don't be surprised if they interfere with each other, actually you should expect it. Even if you don't succeed at any of them, you will get a certificate that proves you are insane for even trying.

Doujinshi Jump (Any): This option lets you combine this jump document with another one while keeping the CP pools separate, but doesn't give you any additional bonuses or challenges.

True Monster (Any): You are a member of a gang, maybe the Yakuza or SUR-13. Your role is that of a monster: You supply them with under aged goods for human trafficking and sex slavery. If you manage to keep the flesh markets supplied for ten years without getting caught, you will find all the items you bought during this jump improved in some way.

Lolis For Everybody (Lolicon Only): This world is already a bit lax when it comes to pedophilia, but you can push it farther. Campaign for office, corrupt public morals and repeal age of consent laws. Do this and you will gain the ability to remove age of consent laws in any location you end up ruling, and the reason for them existing at the same time.

Idol Master (Lolicon Only): You are a talent agent for three young girls inducted into the Idol industry. Its your job to find them gigs and schedule their practices. Keep them popular and profitable for at least half your ten years spent here, and you will gain ownership of the talent agency and be able to import it into future jumps.

To catch a Predator (Loli/Oppai-Loli Only): It turns out that the FBI need some help catching pedophiles, so they conscripted you from an orphanage. Your Job? To act as bait. If you manage to help the FBI catch a bunch of perps, you will get the *FBI Surveillance Van* for free and a acquire your squad of FBI agents as companions that share a single companion slot.

Office Lolilita (Loli/Oppai-Loli Only): You've been hired as a pleasure girl to relieve the stress of office workers. This is actually a job, and completely legal somehow, and you will get stressed about the possibility of loosing the job. If you manage to keep your new job for the whole jump, you get the office building as a property. It is 22 stories tall, comes with free utilities wherever you import it into a world, and makes people treat any sex acts done by employees inside the building as normal and legal.

Diploma Mill (Loli/Oppai Loli): Jumper, your school mates need help graduating! Tutoring? No, I wasn't talking about school, they need help graduating from being virgins. You need to help every person that attends the same school as you during this jump lose their virginity. Succeed, and you will gain the power of Universal Love.

Mahou Soujou Flash (Loli/Oppai Loli): Its horrible, this dimension is being invaded by demons that want to do lewd things to little girls. Luckily for everyone else, you have joined the cadre of magical girls protecting the innocent lolitas; unfortunately while your magical girl outfit protects you from getting hurt in a fight, it doesn't do much to protect you from being molested. If you do your duty as a magical girl and defeat the demon lord, you will get two magical girls as companions. Both the ***Skimpy Magical Girl Outfit*** and ***Tale of the Fisherman's Daughter*** are built into this scenario, but the latter doesn't count against your drawback limit.

Hug Pillow Chan (Loli Only): I know you are used to being the protagonist jump, but there is this guy than needs some help. He's been summoned into another world in order to save it, but he is bound for tragedy. People will be constantly betraying him and showing him ingratitude. If he doesn't have at least one person he can trust, he's going to commit suicide and that world will be doomed. If you manage to keep him sane though you will receive the Hero Summoning Ritual and the ritual to send them back to their home worlds.

Milk Truck (Oppai-Loli only): You want to put your milk bags to the test jumper? Alright, you are challenged with producing 6000 gallons of milk over the course of the next ten years. If you want to check your progress you will find a tanker truck in a vehicle barn attached to your warehouse that will fill at a 1:1 ratio to your milk production. If you manage to completely fill the truck, you will not only get the truck and barn, but the truck will also become self filling and the milk in it will gain all of the special properties your milk gains in future jumps.

The END

All drawbacks are rescinded. If you chose a scenario it is resolved, you keep the reward if you succeeded, or it is left behind if you failed. It is time to Make Your Choice:

Go Home
Are you sure? Things like this aren’t acceptable there.

Stay
Well, if you just want to have some fun, I’m in no position to critique.

Continue
Onward to new worlds and newer girls.

Notes

Sempai: This isn't limited to just lolis, anyone you are in a conspiracy with is guaranteed not to accidentally name drop you and will forget your name while being interrogated.

Milk and Honey: your breasts can produce as much milk as their own volume per day. This is temporarily increased by pregnancies, up to double during peak production. Honey production with *A Kitten in Heat* is a bucket loads per day, with a storage capacity of three buckets. Both fluids are produced ex-nihilo and stored extradimensionally, so you don't have to worry about dehydration or bloating.

Cam Girl Studio: The perception filters include making everyone looking at you think your actually of age, hide your and/or your accomplices identities, or make it ignored by law enforcement.

Magic Pills: the permanent pills reduce the takers age, so yes they can be used as a cure for aging.

Cute Girls Room: the mental compulsion to spoil the owner is based on how cute they are, so it works great on lolis, but will be completely negated if you ever take an ugliness drawback.

Manaka Dairy Industries Order Form: you get a new order form once per week, the effect of the milk is weakened significantly when used in cooking rather than drunk. The maximum effect gives girls head sized boobs after 18 months of drinking the milk every day; for boys it depends on how much they exercise so an athlete can go full Jojo after 18 months but a fat nerd will probably get a swimmers build.

Skimpy Magical Girl Outfit: in addition to the transformation sequence, the outfit has the following properties:

- If you aren't a girl, you turn into one during the transformation sequence.
- Magical protection: the outfit makes you durable enough to survive hitting the ground at terminal velocity, though hit that powerful will knock you out.
- Roof hopping: you can jump up to three stories high and land on a sloped surface while wearing high heels with no problem.
- Basic Magical attack: a simple magical attack with moderate damage that can be us often, you can choose the specifics and there is room for trade offs.
- Finishing move: a powerful magical attack that takes 30 seconds of chanting and dancing to cast.
- Signature ability: You have one special ability, it can be a utility spell, an improvement to your physical enhancements or you can make your magical girl outfit enhance a magic system you know how to use.
- Sexual attack: since this is a setting where you are going to get raped going out as a magical girl, you have a special magic attack you can use during sex, it is almost as powerful as your finishing move but requires you to climax in order to cast it.

Tale of a Fisherman's Daughter: Tentacle monsters in this world are rape and release. Even if you should be able to fight off a tentacle monster, you will be caught off guard and only be able to start fighting after penetration.

Complete Madness: Yes, the certificate of insanity can be used for a pea of insanity in court. The

needles and padded jackets will probably help you, maybe… I'll even update it to show them what is wrong with your head, please jumper let them help you.

True Monster:

- Closet: The clothing now has hidden trackers built into it to allow you to find escapees.
- Tasty Treats: You now have versions of the treats laced with drugs that make anyone who eats them more suggestible.
- Aphrodisiacs: Now includes versions with sedatives
- Sex Offender Registry: Includes how much they are willing to pay for a child.
- Cam Girl Studio: Now includes mid range video cameras and computer for using the software.
- FBI Surveillance Van: Now includes cages and soundproofing.
- Apartment: neighbors no longer ignore you, but are instead members of a gang you are affiliated with, they have the benefits of Sempai even if you don't have a perk, each neighbor has an ability that is useful or entertaining.
- Cute Girl's Room: can be used to store a victim and take them to future jumps, suppresses memories of being abused
- Locker Room: adds secret passages for kidnapping, can be deployed to different schools from your warehouse.
- Magic Pills: in addition to age, permanency and endowment, there are also different types of pills with brainwashing effects. There are now pills that induce memory loss, naivety, nymphomania, or stupidity in addition to turning people into little girls.
- Sacred Shimapan: You can temporarily give away the sacred shimapan as a cursed item. The subject of the curse will find any panties they put on replaced with them, and will be conditioned to have their switch turned on by having their panties removed.
- Manaka Dairy Industries Order Form: you can order alternate versions of the milk that carries a curse that makes people uncomfortable while wearing either underwear or shirts. The curse mostly wears off after a week, but has a cumulative permanent effect that grows into a full on allergy after 18 months of continuous consumption.
- Skimpy Magical Girl Outfit: rather than a magical girl you are now a witch working for the demonic invaders. You have an option of having the transformation sequence not turn you into a girl, or turn you into a futa instead of turning you into a girl, and you can sell little girls to the demonic invaders for magical boons including upgrades to your witch outfit.

Since you are paying attention, you get the hidden option to buy the True Monster upgrades for your items for 50 CP each.

To catch a Predator: You need to catch at least three pedophiles every year in order to succeed at this mission.

- FBI Agents: there are three male agents, and one female agent. They are massive hypocrites, and will take advantage of your body if you let them. When importing them into future jump documents, they have two options with the perks: each member of the squad gets the perk at a quarter strength or the perk only applies to the squad as a whole. The exception is freebies, which each member of the squad gets at full strength. The squad starts with the Lolicon origin and perks, except the capstone perk is replaced with ***The Blue Wall***: police agencies will attempt to cover up any crimes the squad commits while in the course of law enforcement duties.

Diploma Mill: Violent rape and intimidation doesn't count.

- The Power of Universal love: You have the capacity to love literally everyone (if you choose

to). What do you expect for just sleeping around? I guess you could wank it into potentially improving supernatural abilities that involve love. At the very least having an endless supply of love will make it easier to manage a harem.

Mahou Soujou Flash: unlike if you simply buy the skimpy magical girl outfit with CP, your magical girl outfit is outright lewd, with a way to access all your erotic places without being removed. The scenario also allows the item to grow stronger over the course of the jump. ***Tale of a Fisherman's Daughter*** pays off the ***Skimpy Magical Girl Outfit***, so you get to keep it even if you fail the scenario.

- Magical girl team: Each magical girl has the ***Skimpy Magical Girl Outfit***, the 100 CP versions of ***Porn Psychology*** and ***Children Are Adaptable***. One has the Loli background, the other has the Oppai-Loli background, and they both get 600 CP to spend on additional items and perks.

Hug Pillow-Chan: Your job is to play support to a hero in a bad place, not to take his place. If you eclipse the hero with your powers, people will make fun of him for being weaker than a little girl, he will commit suicide and that means you fail the scenario.

- The rituals: a person summoned using the ritual is no a companion, but the ritual always selects a person who has the talents for and is predisposed to go along with whatever task you summoned them for. The ritual to send summoned heroes home will not work on you until after you have completed the jump chain. Both rituals take two hours to cast, and can only be used once per decade.

Milk Truck: To complete the scenario, you must produce 6000 gallons of milk, without perks a woman will have a peak production of 450 grams (almost 2 cups) of milk per breast per day.

- The barn: The barn does not stop time inside it like your cosmic warehouse. It has a capacity for 6 large commercial trucks with enough room for maintenance, and is equipped with loading docks and pipes to allow you to move cargo to and from your cosmic warehouse. Each truck bay has its own overhead door, and once you complete the scenario you get a garage door opener with similar properties to the cosmic warehouse key to access the truck barn.
- The Truck: Your milk truck is a single frame tanker truck with a 6000 gallon cargo tank and the milk inside will never spoil. Once the scenario is complete both the fuel tank and milk tank will refill themselves completely over the course of 24 hours. The milk inside is your milk, as if freshly harvested, however all special properties your milk has can be toggled before you begin pumping milk out of the truck.
