Ubicación De Inicio

Hollow Bosque

You will begin your journey within the Hollow Forest, a vast woodland hidden beneath the endless sands of Hueco Mundo. Towering white trees with crystal-like trunks stretch endlessly toward the cavern ceiling, their pale branches forming an eerie canopy that blocks out much of the moonlight. The forest is home to countless Hollows of every shape and size, making it one of the most dangerous places for a newly born Hollow to exist.

Life here follows a simple rule: eat or be eaten. Weaker Hollows constantly hide from stronger predators, while the powerful roam freely in search of their next meal. Every encounter is a struggle for survival, and every soul you consume brings you one step closer to evolution. If you wish to escape this unforgiving forest, you must first prove that you are strong enough to survive it.

Beneficios:

Unlike most Jumps, this world offers only a single Origin. You can freely decide your age and gender. And you can decide if you are a drop in or not. Because of this, instead of choosing an Origin, you are granted two discounts for each perk tier from the list below. In addition, any perks costing 50 CP or 100 CP that you choose to discount will instead become free.

General:

Hollow Biología [Free]
As a Hollow, your body is that of a spiritual creature. Your physical form is no longer that of a human or any other living soul but one composed entirely of Reishi, allowing you to exist naturally within Hueco Mundo and interact with other spiritual beings. Like all Hollows, you possess a bone-white mask that symbolizes the heart you lost upon your transformation, along with a Hollow Hole somewhere on your body that represents the emptiness within your soul which you can decide where it's located.

Your body is far stronger, faster, and more durable than that of an ordinary human spirit, granting you the physical abilities expected of even a newly born Hollow. You no longer require food, water, air, or sleep to survive, though an overwhelming instinct to consume souls constantly lingers within you. You also possess the innate ability to open Gargantas, tears in space that connect Hueco Mundo, the World of the Living, and other spiritually linked realms.

You possess the innate senses common to all Hollows, allowing you to detect spiritual pressure over considerable distances and instinctively recognize other spiritual beings. Finally, your body naturally heals from injuries over time by consuming your own spiritual power, though severe wounds and lost body parts require significantly more energy or the consumption of souls to restore.

Origen Del Alma [Free]
Every Hollow was once a living being. Here you decide what kind of soul you were before your transformation. Your original nature influences your instincts and grants a minor advantage.

Humana
You were once a human. Your Hollow instincts are tempered by reason, making you more intelligent than most of your kind. You possess greater critical thinking, planning ability, and self-control, allowing you to resist your predatory urges more easily and develop complex strategies.

Animal
You were once an animal. Your instincts remain exceptionally sharp, giving you heightened senses and natural hunting ability. However, your bloodlust and hunger for souls are considerably stronger than those of Hollows that originated from human souls, making restraint far more difficult.

Tipo De Mascarilla [Free]
A Hollow's mask is the physical manifestation of the heart it lost upon becoming a Hollow, concealing its former identity forever. Choose one of the following mask types. Each provides a minor biological advantage.

Humana
Your mask resembles a human skull. Human-type Hollows are among the most balanced and intelligent, granting a modest increase to your reasoning, memory, and learning ability.

Pez
Your mask resembles that of any fish or aquatic creature. Your streamlined form grants exceptional swimming speed and improved mobility in aquatic environments.

Mamífero
Your mask resembles any mammalian creature. Your body becomes more adaptable and resilient, granting increased endurance and resistance to fatigue.

Reptil
Your mask resembles any reptile. Your metabolism becomes incredibly efficient, allowing you to survive for months or even years between meals depending on your spiritual power. While you still crave souls, your hunger grows far more slowly than that of other Hollows.

Insecto
Your mask resembles any insect, arachnid, or other invertebrate with an exoskeleton. Your spiritual body develops a hardened outer shell, increasing your natural durability to roughly five times that of an average Hollow of comparable strength.

Aviar
Your mask resembles any bird or bat. Your body becomes naturally suited for three-dimensional movement, greatly improving your maneuverability while flying, gliding, or swimming.

Tipo De Cuerpo [Free]
Having chosen your Soul Origin and Mask Type, you now decide your Hollow's physical form. This determines your overall body structure and grants a minor functional advantage.

Aviar
Your body resembles that of a bird or bat. You possess wings capable of true flight, granting exceptional aerial speed and maneuverability.

Acuático
Your body resembles that of a fish, squid, octopus, or another aquatic creature. You move effortlessly through water with remarkable speed and agility while remaining fully capable of surviving on land unless your chosen appearance would logically prevent it**.**

Insectoide
Your body resembles an insect or arthropod, such as a beetle, mantis, grasshopper, or scorpion. You possess multiple limbs typically six or more and a naturally hardened exoskeleton that provides superior physical protection.

Cuadrúpedo
Your body is built upon four legs. This grants incredible balance, acceleration, agility, and coordination, making you one of the fastest and most responsive Hollow body types on land**.**

Serpentina
Your body resembles that of a snake or other limbless reptile. You can slither silently through narrow spaces, move with remarkable stealth, and naturally suppress your Spiritual Pressure, making it much easier to avoid detection.

Bípedo
Your body possesses a humanoid structure. Although this grants no direct increase in physical power, your upright posture and dexterous hands allow you to manipulate objects, wield weapons, and perform complex techniques with exceptional precision.

Híbrido [50 CP per additional form]
You may combine multiple body types into a single form. Each additional Body Type costs 50 CP, allowing you to mix their appearances and biological advantages into a unique Hollow physiology.

Hollow Nivel [Varies]
Every Hollow follows a path of evolution. Here, you choose where your journey begins upon that evolutionary ladder. Higher forms possess vastly greater spiritual power, physical ability, and combat potential than those beneath them.

Normal Hollow [Free]
You are an ordinary Hollow, the lowest stage of Hollow evolution. Most Hollows at this level are roughly the size of a rhinoceros, though appearances vary greatly depending on their soul. You possess no exceptional advantages beyond those granted by your Hollow Biology. While stronger than most human souls, you are among the weakest inhabitants of Hueco Mundo and serve as prey for more powerful Hollows.

Enorme Hollow [50 CP]
You are an unusually massive Hollow, standing as tall as a small building. Your immense size grants tremendous physical strength and durability, allowing you to overwhelm weaker opponents through sheer force.

Although your Spiritual Pressure is greater than that of ordinary Hollows, your large body makes you an easy target. At this level, you are a serious threat to inexperienced Shinigami and unranked members of the Gotei 13, but would struggle against seated officers.

Gillian [100 CP/ Menos Hollow]
You are now a Gillian, the first and weakest class of Menos. Standing nearly six stories tall, Gillians are towering giants feared throughout Hueco Mundo. Unlike ordinary Gillians, whose minds are consumed by the countless Hollows that fused together to create them, you are one of the rare individuals who has retained complete control over your own identity and consciousness. Your intelligence, personality, and free will remain entirely intact despite your evolution. Here you also gain the ability to shoot Ceros at will.

Although the weakest of the Menos classes, your Spiritual Pressure far surpasses that of ordinary Hollows. You are capable of matching most seated officers of the Gotei 13 in combat.Until you evolve further, your appearance resembles the iconic black-robed Gillian with its elongated white mask.

Adjuchas [200 CP /Menos Hollow]
You have evolved into an Adjuchas, the second stage of Menos evolution. Unlike the enormous Gillian, Adjuchas vary greatly in appearance and size. Some are no larger than a human, while others rival whales or even larger beasts. Regardless of their form, every Adjuchas possesses vastly superior speed, intelligence, and combat ability compared to a Gillian.

Your Spiritual Pressure is powerful enough to contend with many Vice-Captains of the Gotei 13, and your instincts and combat experience have become significantly more refined.Unlike most Adjuchas, you are no longer at risk of regressing into a Gillian should your evolution stagnate or your hunger go unsatisfied.

Vasto Lorde [300 CP/ Menos Hollow]
You have become one of the rarest and most powerful Hollow species in existence a Vasto Lorde.Despite typically possessing a body no larger than that of a normal human, your immense Spiritual Pressure eclipses that of nearly every other Hollow. Only a handful of Vasto Lorde are believed to exist within Hueco Mundo, each possessing power capable of reshaping the balance between Hollows and the Soul Society.Your combat ability surpasses that of an average Captain-class Shinigami, making you one of the greatest threats in the world. Should you enter the World of the Living, your presence alone would likely prompt the Soul Society to dispatch multiple Captains to either eliminate you or force you back into Hueco Mundo.

Arrancar [300 CP]
You have achieved a level of evolution that only the most exceptional Hollows ever attain. You have shattered the boundary separating Hollow and Shinigami to become an Arrancar.

By removing the majority of your Hollow Mask, you have gained a body nearly indistinguishable from that of a Shinigami while retaining your Hollow nature. Normally, only Menos-class Hollows evolve into humanoid Arrancar, but purchasing this perk guarantees that your Arrancar form is completely humanoid regardless of your previous Hollow stage. Your Hollow Hole remains the same place upon your body, while the remnants of your Hollow Mask remain upon your head or face in whatever shape you desire.

As an Arrancar, your spiritual body becomes vastly more refined. Your Spiritual Pressure increases dramatically, making you approximately three times stronger than your previous Hollow form. Your Hollow instincts remain intact, but are now tempered by greater intelligence and control. And you automatically gain the ability to use the fundamental techniques shared by all members of your race. Your skin naturally develops Hierro, allowing you to harden your spiritual body into armor capable of withstanding blows that would easily tear lesser Hollows apart. Your senses evolve through Pesquisa, enabling you to detect and analyze Spiritual Pressure with remarkable precision across vast distances, easily locating both allies and enemies.

Your mobility in using Sonído, an advanced high-speed movement technique that allows you to vanish from sight and traverse the battlefield with incredible speed while masking your presence far more effectively than a Shinigami's Shunpo. At range, you gain access to Bala, compressing your Spiritual Pressure into projectiles that sacrifice some destructive power in exchange for extraordinary speed.

Finally, you possess the Hollow race's signature offensive techniques. Cero allows you to unleash concentrated beams of devastating spiritual energy capable of obliterating most enemies before you. Also you may employ Gran Rey Cero, a forbidden variation created by mixing your own blood into a Cero. The immense Spiritual Pressure released by this technique is so overwhelming

that it is said to distort the very fabric of space itself, making it one of the most feared attacks available to an Arrancar.

However, the greatest power possessed by every Arrancar is their Resurrección.

Upon becoming an Arrancar, your soul manifests a Zanpakutō that seals away the overwhelming majority of your Hollow power. Approximately eighty percent of your true strength is contained within this blade. By releasing it and calling its true name, you return to your original Hollow form, reclaiming your sealed abilities in a perfected form.

A Resurrección functions similarly to a Shinigami's Bankai, multiplying your overall combat capabilities by approximately ten times while restoring your Hollow physiology and granting powerful supernatural abilities unique to your chosen aspect.With the form gain will not be 100% as your hollow form.

Choose one Resurrección Aspect below for free. Additional Aspects may be purchased for 300 CP each.The strength of every Resurrección scales alongside your Spiritual Pressure. You may also choose other Resurrections found in the series if you wish.

Dominio
The Aspect of Control.Upon release, black gravitational spheres begin orbiting your body while a crown and mantle of condensed Reishi form around you. You gain complete control over localized gravity, allowing you to increase, decrease, redirect, or manipulate gravitational forces. You can crush opponents beneath immense pressure, pin enemies to the ground, alter projectile trajectories, or create gravitational wells that pull nearby targets toward a single point.

Tempestad
The Aspect of Storms, Your Spiritual Pressure erupts into a violent thunderstorm as lightning courses across your body. Every attack you perform becomes infused with lightning, including your punches, sword strikes, Bala, and Ceros. You may summon bolts of lightning from the sky, generate storms that blanket the battlefield, and hurl condensed spears of electricity capable of piercing enemy defences .

Espejismo
The Aspect of Illusions Your body becomes wrapped in shimmering distortions that bend both light and Spiritual Pressure. Those who perceive you find it nearly impossible to determine your true location. You effortlessly create convincing illusions, mirror images, false sounds, and distorted spiritual signatures. Even experienced opponents may find themselves attacking afterimages while your true body remains elsewhere.

Plaga
The Aspect of Disease.Your Hollow Hole begins releasing a dense black miasma while the remnants of your mask reshape themselves into the visage of a horned plague doctor. Your Spiritual Pressure becomes a supernatural contagion. Wounds inflicted by you spread spiritual diseases that weaken Hierro, suppress regeneration, drain Spiritual Power, and gradually cripple an opponent's body. You also create poisonous Reishi clouds and command swarms of parasitic spirit insects that spread your infections across the battlefield.

Fantasma
The Aspect of Ghosts.Your body becomes partially ethereal, surrounded by ghostly wisps. You freely phase through solid matter and ignore attacks from opponents whose Spiritual Pressure is significantly weaker than your own. Your attacks bypass conventional armor by striking directly at the spiritual body, while lingering afterimages confuse enemies and make predicting your movements nearly impossible.

Solaris
The Aspect of the Sun. Golden flames engulf your body, illuminating the battlefield like a miniature sun.Your attacks radiate intense heat capable of melting steel and evaporating weaker spiritual techniques. Your Bala and Ceros become blazing solar blasts, while your sword strikes release arcs of concentrated sunlight. The brilliant radiance surrounding you blinds nearby enemies and continuously scorches everything within your presence.

El Infierno Se Acerca [300 CP]
Oh, my, Jumper it seems your soul bears an even darker history than most. You were a Sinner of Hell, condemned for committing a truly unforgivable sin during your mortal life. Yet, through impossible circumstance you escaped the depths of Jigoku and found refuge within Hueco Mundo.

As a Jigoku no Gaki, your Hollow Hole migrates to the outside of your body, becoming surrounded by blackened flesh and infernal markings that further twist your appearance into something far more grotesque than an ordinary Hollow. This infernal corruption significantly enhances your physical abilities and Spiritual Pressure, making you noticeably stronger than an Arrancar of comparable power. More importantly, you gain command over the Chains of Hell, the black chains that bind every sinner to Jigoku. You may freely manifest and control these chains. They are extraordinarily difficult to break, and according to the legend, only beings that have transcended ordinary existence or possess power comparable to the Soul King can sever them through raw strength alone.

Hell's influence also grants you flashes of supernatural insight. By focusing upon a person, object, or location, you may occasionally witness fragmented visions of their past or glimpse fleeting possibilities of their future. Finally, your spiritual presence becomes unnaturally distorted by Hell itself. Your Reiatsu is exceptionally difficult to detect, track, or accurately measure through conventional sensory techniques such as Pesquisa or spiritual perception.

100CP:

Asesino Nato
As a Hollow, killing comes as naturally as breathing once did. Your predatory instincts have been refined to perfection, allowing you to instinctively understand how to use every natural weapon your body possesses, whether they be claws, fangs, tails, horns, or even your Zanpakutō after becoming an Arrancar. Every strike is delivered with lethal precision, making you an exceptionally efficient hunter and killer.

Matar, Matar, Matar... Y Volver A Matar
For a Hollow, killing is simply another means of survival. With this perk, you no longer feel guilt or hesitation when taking a life. Instead, battle and slaughter fill you with exhilaration. The more enjoyment you derive from combat and bloodshed, the more your Spiritual Pressure surges, proportionally increasing the power and lethality of your attacks until the battle reaches its conclusion.

Jugando Con La Comida
Not every hunt is worth ending immediately. Many of your prey, ordinary Humans, Pluses, or inexperienced Shinigami are too weak to provide a satisfying challenge. You possess absolute control over your own strength and Spiritual Pressure, allowing you to effortlessly hold back your attacks to any degree without accidentally killing your target. Whether you wish to toy with your prey, prolong a battle, or capture someone alive, your strikes remain exactly as lethal as you intend.

Científico Loco
Like Szayelaporro Granz, the Eighth Espada, you possess an unsettling brilliance for biological and spiritual experimentation. You instinctively understand how to capture living subjects without accidentally killing them and can perform complex experiments upon Hollows, Humans, Shinigami, Quincy, Fullbringers, and other spiritual beings with remarkable precision. Your talent allows you to push subjects to their absolute limits while extracting the maximum amount of knowledge before their bodies finally give out, making you a master of dissection, modification, and spiritual research.

Palabras Retorcidas
Your very voice carries the malice of a true Hollow. Whenever you speak with the intent to intimidate, your words instinctively invoke fear, dread, and despair within those who hear them. Opponents with significantly weaker Spiritual Pressure may find themselves frozen in terror or compelled to flee before you, while stronger foes still experience an instinctive sense of unease.

Olfateando A La Presa
Your predatory instincts allow you to detect worthy prey with remarkable ease. Whenever your hunger for souls awakens, your senses instinctively guide you toward nearby souls possessing enough Spiritual Pressure to be worth consuming. Within minutes of your hunt beginning, you can accurately track promising prey through their spiritual scent, even across great distances.

Manos De Acido
Your hands secrete a corrosive spiritual acid at will. Anything you touch that is not of your own species begins to suffer painful chemical and spiritual burns capable of eating through flesh, bone, and weaker spiritual defenses. You possess complete control over this ability, allowing you to suppress or intensify its corrosive effects as desired.

Predation
You possess a long, muscular tongue similar to that of a Menos Grande, capable of extending tremendous distances with incredible speed and precision. Strong enough to pierce flesh and many forms of spiritual armor, it can impale or wrap around a target before rapidly retracting, dragging them helplessly toward you.

Oppression
Your Hollow physiology possesses extraordinary elasticity. You may freely extend any part of your body including your arms, legs, neck, tail, claws, or other natural appendages to approximately three to four times its normal length without sacrificing strength or durability. These extensions retract just as quickly, allowing you to surprise opponents with unexpected reach, strike from unusual angles, or seize enemies who believed themselves safely out of range.

Transcribe
Hidden within one of your claws or fingers is a specialized spiritual appendage designed for extracting information. By piercing or firmly grasping a target, you may extend this organ into their body and directly read fragments of their memories. You can search for specific information, such as names, locations, techniques, relationships, or recent events, while leaving the victim alive if you so choose.

Escupir Rastreador
By licking or spitting upon a target, you mark them with your unique spiritual scent. So long as they remain within the same plane of existence, you always know their general location regardless of how well they hide or disguise their Spiritual Pressure. The mark naturally fades after several weeks but may be renewed at any time through another application of your saliva.

Hollow Disparo
You possess the ability to fire concentrated beams of Spiritual Energy directly from your eyes. These Hollow Shots are launched almost instantaneously, making them extremely difficult to anticipate or evade. While individually less destructive than a Cero, they require virtually no charge time and can be fired repeatedly in rapid succession.

Armas Naturales
Your body develops additional built-in weapons beyond what your base form would normally allow.You may add natural weaponry such as claws, fangs, horns, spikes, or similar biological armaments to your body. These weapons are fully integrated into your form and scale with your strength and durability. They can be shaped and positioned however you wish, as long as they fit your overall biology. They are as durable as the rest of your body and will regenerate if damaged or destroyed. This perk may be purchased multiple times to add more or varied natural weapons.

Sincronización Cognitiva
You possess the ability to establish a direct mental link with any allies you willingly trust. Once connected, you can instantly broadcast everything you currently see, hear, feel, or otherwise experience to every member of the network in real time. This allows your allies to react as though they were witnessing events through your own senses, making ambushes, coordinated attacks, and battlefield tactics vastly more effective. The connection functions across considerable distances so long as everyone remains within the same plane of existence, and only those you willingly include may access the network.

Partes Del Cuerpo Explosivas
Your body becomes a weapon, one that punishes those who strike you. Choose one body part such as an arm, tail, head segment, or other appendage. When this part is struck repeatedly. After approximately three successful hits, it will destabilize and detonate violently, damaging everything nearby except you. The explosion is powerful and scales with your overall strength.The destroyed body part will regenerate over time, allowing repeated use of this ability. You may purchase this perk multiple times to designate additional body parts as explosive.

200CP:

La Amargura de un Hollow
As a Hollow, you are notoriously difficult to kill. Even without possessing any regenerative abilities, your body continues fighting long after it should have collapsed. So long as your Spiritual Pressure remains, you can continue fighting through injuries that would instantly destroy almost any other being. This unnatural resilience is born from the Hollow refusal to perish. Pain, blood loss, and catastrophic wounds have little effect on your combat ability, allowing you to ignore injuries that would cripple others and continue battling at nearly full efficiency.

Eliminación De Dos Golpes
One of the most common tactics employed by Shinigami, Quincy, and other Hollow hunters is to end a battle with a single decisive strike, usually by destroying the head or another vital point before their prey can react. Such methods no longer work so easily against you. The first attack that would otherwise kill you will instead leave you barely alive, regardless of how catastrophic the wound may be. Only a second truly lethal attack delivered before you have a chance to recover can finish you off. This protection refreshes once you have fully recovered from the previous near-fatal injury.

Ataques Instintivos
On the battlefield, hesitation is death. Your combat instincts have evolved beyond conscious thought, allowing your body to react before your mind even realizes danger is present. Whether attacking, defending, dodging, or countering, every movement is guided by pure predatory instinct honed through countless battles. As you continue fighting, your body rapidly adapts to your opponent's style, becoming increasingly efficient until your enemy is finally defeated.

Luchadora De Ciencia
Knowledge is an unusual weapon for a Hollow, but in your hands it is every bit as deadly as claws or Ceros. Whenever you possess detailed knowledge of an opponent's biology, abilities, techniques, or fighting style, you instinctively exploit that information to create effective countermeasures and tactical advantages. You quickly identify weaknesses, predict patterns, and capitalize on openings that others would overlook, allowing preparation and research to become powerful weapons in their own right.

Separación Del Alma
A sinister technique made infamous by the Hollow Shrieker, this ability allows you to forcibly separate the soul from a living being by severing their Chain of Fate. Once extracted, the victim's soul may be implanted into another living body of your choosing, effectively forcing two souls to coexist within a single vessel. This process is permanent and cannot be naturally reversed, making it a horrifying method of imprisonment.

Quimera Parca
A forbidden fusion technique first demonstrated by Emilou Apacci, Franceska Mila Rose, and Cyan Sung-Sun, this ritual cannot be performed alone. You require at least two willing allies of the same species as yourself, and each participant must willingly sacrifice the same limb as part of the ritual. Upon completion, the severed limbs fuse together to create a monstrous Chimera that possesses the combined physical traits, natural weapons, and unique abilities of all three participants.

The resulting creature possesses Spiritual Pressure and physical abilities approximately three times greater than any one of its creators alone, making it a terrifying force on the battlefield. However, the Chimera is completely mindless and incapable of distinguishing friend from foe beyond recognizing you and the participants of the ritual. It exists solely to destroy anything it perceives as hostile until it is finally slain or its Spiritual Power is exhausted. And Once defeated or dismiss the missing limbs will grow back with in a week.

Señuelo
Like Grand Fisher, you possess a specialized lure that extends from your body, usually emerging from your head, though its exact appearance is yours to decide. This lure naturally conceals your true body while attracting potential prey with sufficient Spiritual Pressure to be worth hunting. Only beings possessing Spiritual Pressure, magical energy, mana, or an equivalent supernatural power can perceive the lure, making it invisible to ordinary people. The lure can freely transform into any person, creature, or object you desire, allowing it to act as an incredibly convincing decoy to tempt victims into lowering their guard.

Regüeldo
Like the giant Hollow Hooleer, you possess the devastating technique known as Regüeldo. By exhaling an immense blast of condensed Spiritual Pressure, you unleash a destructive breath attack capable of erasing weaker spiritual constructs, barriers, Kidō, and other supernatural techniques caught within its path. Any spiritual phenomenon fueled by Spiritual Pressure, mana, or a similar source of mystical energy that is significantly weaker than your own can be overwhelmed and destroyed outright by this attack.

Hipnosis
Your eyes possess the supernatural ability to place others under hypnosis. By making direct eye contact and activating this power, your victim's eyes briefly glow red before falling under your influence. While hypnotized, they become highly susceptible to your suggestions, making it easier to deceive, manipulate, interrogate, and command them. The effectiveness of this ability depends on the difference in Spiritual Pressure between you and your target.

Arma Espiritual
You possess the ability to condense your Reiatsu into a glowing spiritual weapon of your choosing, whether it be a sword, spear, axe, bow, hammer, or any other melee weapon. This weapon possesses durability and cutting power proportional to your Spiritual Pressure and can be summoned or dismissed at will. Furthermore, you instinctively gain proficiency with whatever form your weapon takes, allowing you to wield it as though you had trained with it for years.

Dispersión De Bulbos
Hidden within your body is a specialized organ that produces parasitic spiritual seeds. You may fire these seeds into your targets with remarkable speed and accuracy. If a seed successfully embeds itself within the head of a victim whose Spiritual Pressure is significantly weaker than your own, it rapidly takes root within their body and nervous system, placing them completely under your control. Those infected become living puppets, obeying your commands with absolute loyalty while retaining all of their memories, skills, and abilities. You may issue simple or complex orders, control their movements directly, or allow them to act independently while following your instructions.

Contención Gástrica
Like Dondochakka Birstanne, your stomach functions as an enormous spiritual storage space far larger than its outward appearance would suggest. Within it resides an effectively limitless number of insect-like Hollow spirits similar to Bawabawa, which you may summon from your mouth at will. These creatures obey your commands without question and can be used as scouts, mounts, transport, or allies in combat. Your stomach also serves as an extradimensional storage space capable of safely containing weapons, equipment, supplies, and other objects regardless of their size. You may swallow an item to store it and regurgitate it instantly whenever needed, with everything remaining perfectly preserved while inside

Glándula tóxica
Like Loly Aivirrne, your body possesses specialized toxic glands capable of secreting a potent spiritual venom. You may freely coat your hands, claws, fangs, natural weapons, or even any weapon you wield with this deadly toxin. Any opponent wounded by these poisoned attacks begins suffering from a rapidly spreading spiritual poison that weakens their body, dulls their senses, and steadily drains their vitality.The poison continues to spread through both the victim's physical body and soul until they either succumb to its effects or the toxin is neutralized through sufficiently powerful healing.

Deslizante infinito
Your body produces a translucent green spiritual fluid that you can spit or secrete from your mouth. Anything coated by this substance has its friction reduced to nearly zero, causing weapons to slide harmlessly off their targets, attacks to lose their grip, and objects to become almost impossible to hold securely. Even powerful strikes may glance away with little effect if they fail to find purchase.

Parcial Resurrection [Arrancar Only]
Not every battle requires the full release of your Resurrección. You have the ability to manifest individual aspects of your released form without fully activating your transformation. At will, you may transform any part of your body into its Resurrección counterpart while the rest of your body remains unchanged.

Any transformed body part gains the physical attributes and supernatural abilities it would normally possess during your full Resurrección, though at a reduced level of power proportional to the amount of your body transformed.

Inhalación Del Alma
You possess the ability to literally draw the souls from living beings through your mouth. By opening your jaws and focusing upon a target, you create a powerful spiritual suction that tears their soul from their body and pulls it toward you. Victims with significantly weaker Spiritual Pressure are unable to resist and have their souls completely extracted, while stronger opponents may struggle against the pull depending on the difference in power.

Cero Doble [Menos-Class Hollows Only]
You possess the rare technique known as Cero Doble, allowing you to counter enemy energy attacks with overwhelming force. By swallowing an incoming Reiatsu-based attack other magical projectile you absorb its energy into your own body rather than suffering its effects. You may then immediately unleash it back at your opponent after fusing it with one of your own Ceros. The resulting Cero Doble combines both attacks into a single beam far more powerful than either would have been individually.

400CP:

Alimentarse De La Violencia
Violence is the truest expression of a Hollow's existence. Every battle feeds the beast within you, and every brush with death strengthens your resolve. Whenever you fight an opponent who is significantly stronger than yourself and survive, your Spiritual Pressure and physical abilities permanently grow throughout the battle. Every strike you land, every wound you suffer, and every hardship you endure fuels this evolution, allowing you to rapidly close the gap between yourself and your opponent. This explosive growth continues until your overall power reaches roughly that of the enemy you are currently facing, making you a terrifying underdog who becomes more dangerous the longer the battle continues.

Atacar Desde Las Sombras
To a Hollow, an ambush is often far more effective than a direct confrontation. You have mastered the art of concealing yourself, allowing you to suppress both your physical presence and your Reiatsu to an extraordinary degree. Even experienced Shinigami and spiritually aware Humans will struggle to notice you unless they possess exceptionally refined spiritual senses. You also instinctively silence your footsteps, breathing, scent, and any other signs that might reveal your presence, allowing you to stalk prey unnoticed until the moment you choose to strike.

Sonído Master
Much like Zommari Rureaux, the Seventh Espada, you have reached the pinnacle of Sonído mastery. Your movements consume virtually no stamina, allowing you to use Sonído continuously for hours or even days without exhaustion. Your control is so refined that you can chain together countless instantaneous movements without losing momentum or awareness. Furthermore, your speed is so overwhelming that you can leave behind tangible afterimages known as Gemelos Sonído, each capable of confusing opponents and creating openings that allow you to overwhelm your enemies with attacks seemingly coming from every direction at once.

Hollowfication Veneno
Your fangs, claws, blood, and other bodily fluids carry a potent spiritual venom capable of inducing Hollowfication. Any living being successfully infected gradually begins transforming into a Hollow as the corruption spreads throughout their soul. The process is slow enough to be observed but extremely difficult to halt without powerful purification or soul-based healing. Those who succumb completely lose themselves to their Hollow instincts, though individuals possessing exceptional Spiritual Power or unique resistances may delay or partially resist the transformation.

Fusión De Espíritu y Cuerpo
Like Metastacia, you possess the horrifying ability to merge your own body with that of another living being. By extending specialized tendrils or tentacles into a target, you infect and fuse with their body at the spiritual level. As the fusion progresses, your original body gradually disintegrates while your consciousness takes residence within the host. The victim's appearance becomes visibly corrupted with Hollow-like features, and you gain direct control over their body while retaining access to their physical abilities and memory.

Rosa Blanca
Like Charlotte Chuhlhourne, you possess the ability to create a massive barrier of dark, thorn-covered vines that rapidly grows around yourself and your chosen target. At the center of this prison blooms a magnificent white rose, whose spiritual influence completely isolates everything within from the outside world.Those outside the barrier cannot see, hear, or sense what occurs within it, while the Reiatsu of everyone trapped inside is completely concealed from external detection. Likewise, those within the barrier are unable to perceive events occurring outside until the technique is dismissed or destroyed. The thorny vines themselves are incredibly durable and razor-sharp, punishing anyone who attempts to force their way through them.

Elementales
Choose one element Earth, Fire, Water, or Air. Your Hollow body develops a specialized organ dedicated to producing and manipulating your chosen element allowing you to create, shape, and control it with remarkable ease without relying upon the surrounding environment.

Your control over this element is instinctive rather than learned, allowing you to wield it as naturally as moving one of your own limbs. While your techniques may initially lack the refinement of those who have spent years mastering elemental arts, they make up for it with overwhelming power and raw output.This perk may be purchased multiple times, each purchase granting mastery over one additional element.

Copia Al Carbón
You possess specialized glands within your back that produce a massive quantity of black spiritual fluid. By launching this liquid high into the air and whenever even a single droplet comes into contact with a target, it rapidly grows into a fully formed Carbon Copy of that individual.

Each clone faithfully replicates the target's physical abilities, natural talents, fighting style, and supernatural techniques up to the level they possessed at the moment they were copied. Although the clones are slightly weaker than the originals, they are completely loyal to you and will relentlessly attack their source or any other enemy you designate. You may also alter minor aspects of their appearance for your own amusement. Destroying a Carbon Copy rarely solves the problem. When one is defeated, its body dissolves into numerous smaller masses of black fluid that can each regenerate into another Carbon Copy, gradually increasing your army's numbers as the battle continues.

Senescencia
A supernatural field constantly surrounds your body, distorting the flow of time within its radius. Any opponent attack that enters this field has its movement drastically slowed, making even the fastest assaults appear sluggish while you continue to move and react at normal speed. This overwhelming advantage grants you ample opportunity to evade, defend, and counterattack before your enemies.

Also anything you touch may be subjected to accelerated aging, causing the natural passage of time to occur in an instant. Flesh withers, bones become brittle and fracture, metal rusts away, wood rots into dust, and even spiritual constructs gradually decay beneath your touch. The greater the difference between your Spiritual Pressure and your target's, the more rapidly and completely this aging takes effect.

Teatro de Titere
Your body develops a series of wing-like appendages or tentacles upon your back, each capable of seizing and restraining a target. After successfully capturing an opponent, a specialized spiritual seed absorbs information from the victim before swelling before bursting open to create a small voodoo doll perfectly resembling its original.

This doll is linked to the victim's body and soul. Any damage inflicted upon the doll is reflected onto the original target. While superficial damage causes corresponding minor injuries, the true horror of this ability lies within the doll itself. By opening the doll and manipulating its internal organs, you can inflict debilitating damage directly upon the victim's corresponding organs without physically touching them. The victim experiences the effects immediately, suffering crippling injuries while often having little understanding of what is happening to them.

Regeneración De Alta Velocidad
Like the most powerful Hollows, you possess an extraordinary regenerative ability capable of restoring even catastrophic injuries in mere moments. Lost limbs, destroyed organs, shattered bones, and massive wounds can all be regenerated within seconds, provided you possess sufficient Spiritual Pressure to fuel the process.

Your regeneration is so potent that you may deliberately sacrifice parts of your own body to activate Solita Vista, a technique by removing and crushing one of your eyes to replay your memories, sights, and even the emotions you experienced to those around you. The destroyed eye is then rapidly regenerated, allowing the technique to be used repeatedly so long as you have the Spiritual Power to sustain it.

Anular Arma
Like Metastacia, your body possesses a unique anti-weapon ability. If an opponent makes direct contact with the specialized tendrils upon your body, you may instantly release a pulse of corruptive Spiritual Energy that permanently destroys a single soul-bound weapon for 24 hours.This ability may only be used once per night, as the tremendous strain it places upon your spiritual body requires time to recover.

Drenaje De Realatsu
You possess the ability to continuously drain Reiatsu from those around you. An aura constantly surrounds your body, steadily siphoning Spiritual Pressure from nearby enemies and transferring it directly into yourself. While the passive drain is relatively slow, it gradually weakens your opponents while replenishing your own reserve.

Direct physical contact dramatically amplifies this ability. By grabbing or otherwise maintaining contact with a target, you can rapidly absorb vast quantities of their Spiritual Pressure, quickly exhausting weaker opponents while significantly restoring your own. This technique functions not only against Reiatsu, but also against equivalent supernatural energies such as mana, ki, chakra, prana, or similar power sources in future worlds.

Silbido
You possess the Hollow technique known as Silbido, allowing you to command lesser Hollows through a supernatural whistle. By whistling, you may call forth Hollows significantly weaker than yourself from nearby areas or spiritually connected locations such as Hueco Mundo, emerging through small Garganta-like openings or other nearby spiritual pathways. Any Hollow that answers your call instinctively recognizes your overwhelming Spiritual Pressure and obeys your commands without hesitation. These summoned Hollows remain loyal for as long as they remain in your presence, carrying out orders ranging from simple attacks to scouting, guarding, or transporting objects. Infuture Worlds you are able to summon Hollows from Heuco Mundo from the bleach universe with ease with no issue.

White V.2
Much like White, the artificial Hollow created by Sōsuke Aizen, your soul is an artificial construct composed of numerous Soul Reaper souls layered together into a single being, granting you an exceptionally stable and refined spiritual composition. Unlike ordinary Hollows, whose Reiatsu carries an unmistakable aura of malice and corruption, your Spiritual Pressure possesses the pure characteristics of a Shinigami. To spiritual senses, you appear to be a Soul Reaper rather than a Hollow, allowing you to conceal your true nature from all but the most discerning observers.

Because your very soul possesses the nature of a Zanpakutō, your attacks inherit one of their most fundamental qualities. Whenever you strike a Hollow or another being composed entirely of evil, corruption, or malevolent spiritual energy, you may choose to purify them instead of destroying or consuming them. Rather than being erased, their souls are cleansed of corruption and sent peacefully to the Soul Society or the appropriate afterlife or equivalent realm in future worlds. You may freely choose whether each attack purifies or kills, allowing you to spare those who deserve salvation while still destroying enemies when necessary.

Eternal Resurrección [Arrancar Only]
One of the greatest limitations of an Arrancar's Resurrección is the immense strain it places upon the body, forcing most releases to last only a short time before they must be deactivated. You have completely overcome this weakness. Your Resurrección may now remain active indefinitely, requiring no time limit and placing no continual strain upon your body beyond the normal energy expenditure of using your abilities.

This mastery extends beyond your Hollow powers. In future worlds, any transformation, release state, powered-up form, battle mode, or similar enhancement you possess no longer suffers from arbitrary time limits or forced deactivation due solely to maintaining the transformation itself.

600CP:

Manipulación De Arena
Your body becomes similar to that of Runuganga, transforming into living sand while still retaining your overall shape. As a being composed entirely of sand, you may freely manipulate every grain that makes up your body, allowing you to reshape yourself, create weapons, or disperse into countless particles to avoid conventional attacks. You can control the surrounding sand with equal ease, forming massive sinkholes, walls, dunes, and violent sandstorms capable of trapping or overwhelming groups of enemies. Your sandy physiology grants exceptional resilience. So long as enough of your body remains intact, you can rapidly regenerate damaged or destroyed limbs by gathering nearby sand, making you highly resistant to most physical attacks and many forms of Kidō that rely on direct impact.

Menos Generación [Menos-Class Hollows Only]
You possess the ability to generate new Gillian-class Menos directly from your own body. By opening your mouth, you release a writhing mass of black spiritual matter covered in countless Hollow masks. Over the course of several moments, this mass separates and takes shape, forming one or more fully grown Gillian under your command. These Gillians are completely loyal to you and instinctively obey your orders without hesitation. Their strength is comparable to that of naturally occurring Gillians.

Primordial Hollow
Long before the rise of the Espada and the modern hierarchy of Hueco Mundo, there existed ancient Hollows whose power rivaled natural disasters. Like Ikomikidomoe, you are one such primordial being, possessing the potential for virtually limitless evolution through the consumption of other souls. Whenever you devour a living being or spiritual entity, you permanently assimilate a portion of their Reiatsu into your own rather than merely satisfying your hunger. Over countless battles and feasts, your Spiritual Pressure can continue to grow without any natural upper limit.

Your ancient nature also grants you extraordinary resistance to purification and destruction. Unlike ordinary Hollows, being struck by a Zanpakutō is no longer guaranteed to purify your soul. Even after suffering catastrophic injuries that would obliterate lesser Hollows, you can continue to cling to existence through

your immense Spiritual Power. So long as even a fragment of your spiritual body remains, complete annihilation is exceedingly difficult. In future worlds, abilities that would normally erase, purify, or permanently destroy beings similar to yourself are significantly less effective, often requiring overwhelming power or specialized sealing techniques instead.

Camarada
Like Coyote Starrk, you possess the extraordinary ability to divide your own soul into independent fragments without suffering any lasting harm. By shaping these fragments with Reishi, you may create loyal spiritual companions in the form of any creature you desire.

These soul companions relentlessly pursue any target you designate. Upon reaching their prey, they may bite or collide with the target before detonating in a devastating explosion whose destructive force exceeds that of an ordinary Cero. Because they are composed entirely of Spiritual Pressure, physical attacks pass harmlessly through them or merely disperse their bodies for a moment before they rapidly reform.

Hollow Árbol
Like Rudbornn Chelute, you possess the ability to transform part of your body into a grotesque Hollow tree. One side of your body becomes wrapped in twisted branches that extend down to your waist. From the countless Hollow skulls growing upon these branches, you can continuously generate an effectively unlimited number of Calaveras, skeletal Hollow servants created directly from your own Reiatsu.

These Calaveras are completely loyal and obey your commands without question. Each one wears a simplified replica of your clothing, armor, and any equipment you possess, while their Hollow masks resemble plain skulls with elongated incisors and no lower jaw. Although each individual soldier is significantly weaker than you, they are remarkably durable and can quickly overwhelm enemies through sheer numbers.

Respaldo
Like Roka Paramia, you possess the ability to weave countless threads of Negación energy capable of storing, transferring, and preserving information. These threads may be spread across the environment, where they act as an enormous spiritual archive, recording your memories, experiences, and even the structure of your soul. As long as at least one archive remains intact, you possess a spiritual backup of yourself that can be used to restore lost memories or repair damage to your soul.

These Negación threads are incredibly versatile. They can stitch severed limbs back onto your body, and redirect Ceros and similar energy attacks by altering their trajectory. Most remarkably, your threads continuously analyze the supernatural abilities they encounter. After gathering sufficient data on a technique or power you can create an imperfect imitation of it using your own Spiritual Pressure. These copied abilities faithfully reproduce the original's general function but are always somewhat weaker and less efficient than the genuine article. You may only replicate abilities your own body is capable of supporting, and powers vastly beyond your level remain incomplete until you become strong enough to wield them.

Segunda Etapa [Arrancar Only]
Resurrección is the power possessed by every Arrancar, representing the release of their sealed Hollow nature. However, a select few transcend even this state. Just as a Bankai is the evolved form of a Shinigami's Shikai, Segunda Etapa is the perfected evolution of an Arrancar's Resurrección.

Upon activating your Segunda Etapa, your appearance undergoes a second dramatic evolution, and your Spiritual Pressure erupts to an entirely new level. The sheer density of your Reiatsu becomes so overwhelming that it instills genuine fear into those around you, with weaker opponents often finding it difficult to even stand in your presence. Every aspect of your Resurrección is amplified, dramatically increasing your physical abilities, Spiritual Pressure, regeneration, Ceros, and every power granted by your Resurrección Aspect to an entirely new magnitude.

More importantly, achieving Segunda Etapa means you have surpassed the natural evolutionary limits of an ordinary Arrancar. In future worlds, whenever you

possess a transformation, release state, powered-up form, or similar evolution, you gain the potential to develop a superior "Second Stage" beyond its normal limits. While this new evolution must still be unlocked through training, experience, or appropriate circumstances.

Espada No. 0 [Menos-Class Arrancar Only]
Well, well, Jumper... it seems your power has reached the very pinnacle of Arrancar evolution. Whether you choose to serve Sōsuke Aizen or carve your own path is entirely up to you, but there is no denying the truth your raw combat ability places you among the greatest Arrancar ever to exist.

As now while in your Resurrection your physical strength, speed, durability, Spiritual Pressure, and mastery over your Hollow abilities now rival those of Yammy Llargo, the current Espada No. 0, and Cien Granz, the original Espada No. 0 before Szayelaporro Granz separated himself from his elder brother.

Your Reiatsu is so vast that weaker spiritual beings may just die simply by entering your presence, while experienced warriors instinctively recognize you as a calamity worthy of the highest caution. Your other innate Hollow technique are enhanced to match your overwhelming Spiritual Pressure, making even your simplest attacks devastating. In future worlds, this perk ensures your raw physical capabilities and innate racial powers always remain among the absolute pinnacle of whatever species or race you belong to, standing alongside the greatest natural specimens that race has ever produced.

Yo Soy Legión
Like Pícaro, the 102nd Privaron Espada, you are a truly unique Hollow. Rather than being the result of a single dominant soul consuming countless others, every soul within your being has become a unified whole. Your existence is divided among up to 200 Hollow bodies, each one a complete extension of yourself rather than an independent individua as you are still in control of this hive mindl. Every body shares a single consciousness, allowing them to think, communicate, and coordinate perfectly as though they were one being acting through many forms.

Your total Reiryoku is evenly distributed across every active body. Should one body come under threat of destruction, the others instinctively redirect additional Spiritual Pressure to reinforce it, dramatically increasing its chances of survival. Likewise, if one of your bodies is destroyed, the Reiatsu contained within it is immediately reabsorbed and redistributed among the remaining bodies, ensuring very little of your total power is permanently lost.

Every body may fight independently, allowing you to attack from hundreds of directions at once while executing perfectly synchronized techniques and tactics impossible for ordinary beings. Any transformation, release state, or enhancement activated by one body is instantly shared across every other body under your control, causing all of them to transform simultaneously.

Memoria Hollow
You are perhaps one of the most terrifying Hollows to ever exist. Whenever you personally slay and consume another being's soul, your power does more than simply devour their existence it devours their memory as well. Upon consuming a soul, all memories of that individual are erased from the minds of every other person who knew them, as though they had never existed.

Only the memories of the person themselves are removed. Physical evidence, written records, photographs, magical recordings, and the consequences of their actions remain completely unchanged.

El Aspecto de la Muerte
Every Hollow is born embodying a fragment of death itself. Their powers, instincts, and very existence are shaped by the Aspect of Death they represent. While countless lesser aspects exist, there are ten Aspects recognized as the purest manifestations of mortality, each once represented by the Espada under Sōsuke Aizen. Here, you choose one Aspect of Death to embody. This perk may be purchased multiple times, each purchase granting another Aspect.

Soledad
Loneliness is one of the cruelest ways a soul can perish. When you stand alone, separated from all allies and companions, your true power awakens. Whenever you fight without any allies assisting you, all of your abilities, techniques, and overall combat capabilities become ten times stronger until another ally joins the battle.

Tiempo
Time is the great equalizer, for everything eventually withers before its passage. Every attack you make carries the certainty of mortality itself. Your attacks cannot be ignored, bypassed, or nullified through conventional invulnerability, immortality, or abilities that simply prevent death. If something can die, your attacks can eventually reach it.

Sacrificio
To live is to one day say goodbye to those we cherish. Whenever one of your allies dies during battle, you gain a tremendous increase in power proportional to the bond you shared with them. The closer your relationship, the greater the increase, transforming grief into overwhelming strength.

Vacío
In the end, nothing truly lasts forever. Whenever you kill someone, you may choose one action they performed during their lifetime and erase that action from history. Reality naturally adjusts around the missing event, ensuring later events still occur through other means whenever possible, but the chosen action itself is forever forgotten and undone.

Desesperación
The awareness of mortality fills every living being with despair. By embodying this Aspect, your Spiritual Pressure forces enemies to experience the crushing certainty of their own inevitable death. Those who face you must battle not only your power but also an overwhelming sense of dread and hopelessness that erodes their courage the longer the fight continues.

Destrucción
Death leaves only ruin in its wake. Anything destroyed by your attacks becomes extraordinarily difficult to restore. Broken objects, shattered barriers, severed limbs, and ruined landscapes resist repair by all but the most powerful restorative abilities or complete reconstruction, as your destruction itself lingers upon them.

Intoxicación
Many meet their end through poison, alcohol, drugs, or other intoxicants. Your Reiatsu continuously inflicts the sensation of whatever intoxicating substance you choose upon those around you. You may freely change the effect, causing victims to experience drunkenness, hallucinations, dizziness, euphoria, numbness, or similar impairments without the substance ever entering their bodies.

Locura
Everyone is born mad and madness lies dormant within every soul, waiting to surface. Your Spiritual Pressure awakens that hidden insanity. Those exposed to your Reiatsu will gradually lose their reason, suffering paranoia, violent impulses, or complete mental collapse depending on their resistance and the difference in Spiritual Pressure between you.

Codicia
To live is to consume, and to consume is to kill. Whenever you devour the soul of a Hollow or another supernatural being, you may permanently claim one of their innate abilities as your own. Once acquired, the ability becomes a permanent part of your arsenal and naturally scales with your own Spiritual Pressure.

Ira
Anger has driven countless people to their deaths. The greater your rage becomes, the stronger you grow. Every surge of anger amplifies your Spiritual Pressure, physical abilities, and destructive power. The more furious you become, the more overwhelming your strength becomes, with no defined upper limit beyond what your body can withstand.

Hollow Monarquía
You possess the natural charisma and overwhelming presence of a true Hollow monarch. Your Spiritual Pressure instinctively inspires loyalty, causing Hollows significantly weaker than yourself to recognize you as their rightful ruler and willingly gather beneath your banner. Whether through admiration, respect, fear, or devotion is entirely your choice, allowing you to shape the culture of your followers much like Tier Harribel's beloved Fracción or Baraggan Louisenbairn's utterly loyal servants.

Those who willingly swear themselves to your service become exceptionally loyal, remaining steadfast through hardship, temptation, and even the threat of death. While this perk cannot force absolute obedience upon unwilling equals or superiors, those who genuinely choose to follow you will rarely betray your trust without extraordinary circumstances.

Finally, you may determine the nature of your rule. Your kingdom may be built upon compassion, fear, honor, strength, ambition, or any other ideal you desire, and your followers will naturally adopt and reinforce that culture over time.

Arrancar Uniforme [Free Arrancar Only]
Upon becoming an Arrancar, your appearance becomes far more humanoid, and with it comes an appropriate wardrobe. You receive a set of pristine white Arrancar clothing in any style or design you desire, whether it resembles the traditional uniforms of Las Noches or something entirely unique. These garments are composed of your own Spiritual Pressure, making them exceptionally comfortable and surprisingly durable despite their elegant appearance.

Should your clothing become damaged or completely destroyed, it will gradually repair itself by drawing upon your Reiatsu, returning to perfect condition within twenty-four hours.

Zanpaktou [Free Arrancar Only]
As an Arrancar, your sealed Hollow power manifests as a Zanpakutō, the weapon that contains your Resurrección. Choose any melee weapon to serve as your Zanpakutō, its appearance, name, and release command are entirely yours to decide.Alternatively, you may freely import any melee weapon you already own into this role.

100CP:

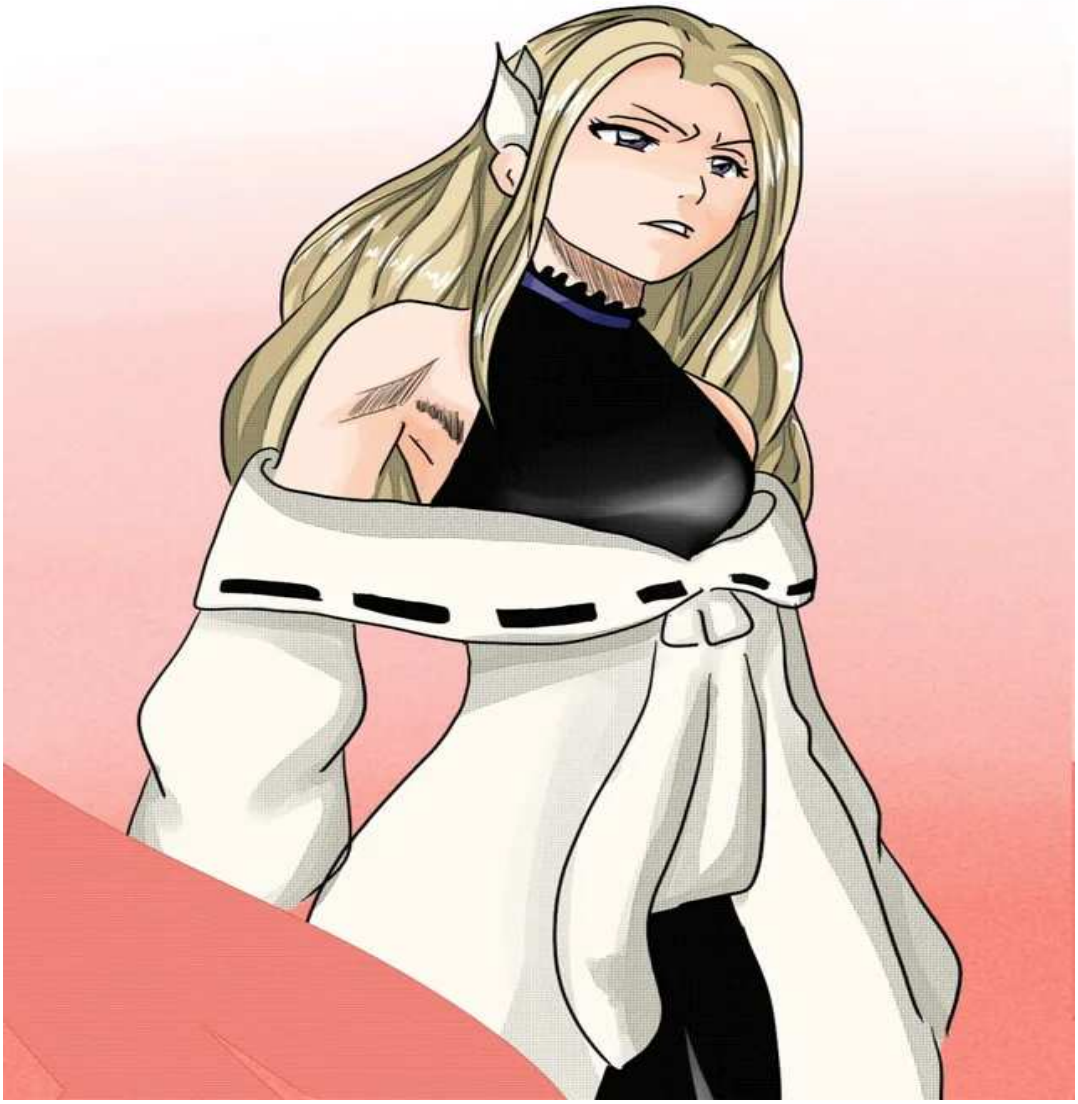

Hollow Alimento
You receive a constantly replenishing stockpile of specially prepared food designed for Hollows. When consumed by you or any other Hollow, this food completely suppresses the unnatural hunger to devour souls for the next twenty-four hours without reducing strength. In future worlds, this food adapts to its consumer, satisfying any supernatural hunger or biological craving that would otherwise drive a creature toward madness or the consumption of sentient beings.

Errores En La Grabación De Espíritus
You possess a colony of tiny spiritual insects that can be secretly implanted into people, objects, and locations. Once attached, these bugs continuously gather information about everything their host sees, hears, and experiences, transmitting it directly back to you. They are ideal for observing enemies, studying unfamiliar abilities, or collecting valuable intelligence before engaging an opponent. The bugs remain hidden unless specifically searched for through powerful spiritual perception or similar abilities.

Smartphone
You possess a specialized smartphone engineered by the Soul Society. Through advanced spiritual technology, it is capable of intercepting, infiltrating, and monitoring the communications of Shinigami and many forms of Soul Society equipment. In future worlds, this device automatically adapts to the local technology, becoming an exceptionally capable hacking tool for infiltrating the communications and digital networks of any organization you oppose.

Banda
Somehow, you managed to obtain this exceedingly rare item from Kisuke Urahara's shop. While worn around your head, this simple-looking band renders you completely immune to illusions, hallucinations, hypnotic effects, and other forms of deceptive perception, regardless of whether they originate from.

Sin Datos
Your existence is an absolute nightmare for anyone attempting to gather intelligence. Any records, reports, measurements, surveillance footage, or data collected about you are subtly but consistently incorrect. Your abilities, appearance, Spiritual Pressure, and even your past actions become riddled with inaccuracies, making reliable information about you almost impossible to obtain. In future worlds, this protection extends to magical divination, prophetic visions, precognition, digital databases, and other methods of collecting information, ensuring your enemies are constantly misled by incomplete or false data.

200CP:

Quincy Cross
You possess a genuine Quincy Cross, the spiritual focus used by Quincy to create their signature spirit weapons. Despite being a Hollow, your unique nature allows you to use the cross without suffering the usual incompatibility. By gathering Reishi, you can naturally form a Quincy bow and fire spiritual arrows with the proficiency of a trained Quincy, requiring no prior instruction. Your skill with these weapons improves alongside your Spiritual Pressure and mastery of ranged combat.

Cebo Hollow
You receive a pouch containing ten Hollow Bait capsules. When one is crushed or thrown into the air, it releases an irresistible spiritual signal that attracts hordes of nearby Hollows to your location. These Hollows are not loyal to you and will attack anything they encounter, including yourself if given the opportunity. The supply replenishes at the start of each week. In future worlds, the bait instead attracts the nearest equivalent species of hostile supernatural monsters.

Mascota Hollow
You gain a loyal Hollow companion in the form of an adorable pet. By default, it takes the shape of a small dog, though you may instead choose any harmless household pet. It is completely loyal to you and possesses an uncanny ability to soothe the emptiness within your soul. Spending time playing with or caring for your Hollow pet calms your instincts, eases your Hollow hunger, and greatly improves your emotional well-being.

Bóveda
Like Szayelaporro Granz, you possess a secure personal vault located wherever you desire. This hidden chamber is extraordinarily durable, resisting all but the most overwhelming attacks, and cannot be entered without your explicit permission. The vault may be used to safely store weapons, research, experiments, treasures, or prisoners, and its contents remain perfectly preserved until you return.

Gigai Hollow
You receive a specially engineered Gigai designed exclusively for Hollows. While inhabiting this artificial body, your Reiatsu is completely concealed, causing you to appear indistinguishable from an ordinary human to both spiritual and mundane observers. The Gigai suppresses all of your Hollow abilities while worn, preventing you from using your supernatural powers until you willingly leave it. It is ideal for living among humans or avoiding unwanted attention.

400CP:

Control del Corredor
You possess a specialized control device that can be linked to a single building or fortress. Once connected, you gain complete control over its internal layout. Corridors may shift, walls may rotate, hidden passages can appear or disappear, and trapdoors or sealed rooms can be created at will. Those inside quickly become disoriented, allowing you to effortlessly guide, isolate, or trap intruders throughout the structure.

Fortaleza Hollow
You own a floating fortress created through the fusion of numerous living Hollows. Roughly the size of a castle, this grotesque stronghold serves as both a home and a battlefield. While inside your fortress, your Spiritual Pressure is enhanced, your regeneration becomes significantly faster, and your defensive abilities are greatly strengthened. Invaders find themselves constantly harassed by the fortress itself, making you vastly more difficult to defeat while defending your domain.

Caja Negación
You possess several Caja Negación cubes, the specialized devices used by Arrancar to imprison opponents. When activated, a cube traps its target inside an isolated pocket dimension where escape is nearly impossible without overwhelming power like being an Espada who have massive spiritual pressure . Each cube can contain a single target and may be reused after its previous prisoner has escaped or been released.

Fracción Consumible
You are accompanied by ten utterly loyal Arrancar. Should you suffer catastrophic injury or come close to death, any one of them may willingly sacrifice themselves by consuming them whole to restore your body and Spiritual Pressure to perfect condition. Each Fracción can only perform this sacrifice once, but your full complement is restored at the beginning of each new Jump.

Dispositivo de Control de Poder
Designed by a genius on the level of Szayelaporro Granz, this advanced spiritual device analyzes any target it is attached to, thoroughly recording the structure of their powers and abilities. Once sufficient data has been collected, you may selectively suppress or disable individual techniques, powers, or supernatural abilities possessed by that target. The more complete your analysis becomes, the more precise and effective this suppression is, allowing you to strip away an opponent's greatest advantages while leaving the rest of their abilities untouched if you so choose.

600CP:

Las Noches
You are the owner of a perfect replica of Las Noches. Connected to your Warehouse, this immense palace is roughly the size of a small nation, its towering white walls surrounding an endless labyrinth of halls, courtyards, towers, laboratories, gardens, training grounds, and living quarters. The fortress is fully furnished and maintained, requiring no servants to remain in pristine condition.

Within its walls are countless facilities suitable for both everyday life and warfare. These include luxurious private residences, barracks capable of housing entire armies, vast food storage and kitchens, medical and recovery facilities, libraries, research laboratories, prisons, interrogation chambers, armories, treasure vaults, meeting halls, throne rooms, observation towers, and enormous training arenas designed to withstand battles between Espada class beings. Numerous Garganta gates and transportation corridors make travel throughout the fortress effortless.

Hōgyoku
Where did you even find this, Jumper? Who would have thought that a third Hōgyoku could exist? Unlike the Hōgyoku created by Kisuke Urahara or Sōsuke Aizen, however, this one does not grant the subconscious desires of its owner. Instead, it exists solely to drive evolution, accelerating the natural growth and transformation of those who possess it.

The Hōgyoku may be used in one of two ways. First, it can instantly evolve any Hollow into a perfect humanoid Arrancar once a month , regardless of whether they were an ordinary Hollow, a Gillian, or a Vasto Lord. The resulting Arrancar is stable, fully retains its intelligence, and gains all the benefits of a naturally evolved Arrancar.

Alternatively, the Hōgyoku may be implanted directly into an Arrancar by placing it within their Hollow Hole. Once bonded, it forces their evolution beyond even Segunda Etapa, unlocking a unique third stage of Resurrección tailored entirely to that individual's soul. This transformation remains available for as long as they remain bonded to the Hōgyoku, granting them power far beyond the natural limits of an Arrancar.

In future worlds, the Hōgyoku functions as a universal catalyst for evolution. It can guide any race, toward the next stage of its natural evolutionary path, or, if that race has already reached its theoretical limit, allow it to transcend those limits and awaken an entirely new form. Such evolutions are always stable and permanent, though they require the bearer to successfully synchronize with the Hōgyoku before their full potential can be realized.

Menos Gillian Ejército
You command an army of 1,000 Gillian-class Menos, each utterly loyal and obedient to your orders. Every Gillian possesses the strength, durability, and Spiritual Pressure expected of its species. They instinctively coordinate with one another and require no food, supplies, or supervision beyond your commands.

Should any of your Gillians be destroyed, they are considered permanently lost for the remainder of that Jump. However, your army is fully restored to its full complement of 1,000 Gillians at the beginning of every new Jump, ensuring your legion is always ready to march once more.

Compañeros:

Mi Antiguo Equipo 50
You may import or create companions you have brought with you, 50 CP each, or 8 for 300CP. Each one gains a free background. and 600 CP to spend. They may not take drawbacks, but you may give them CP, spending 100 each time to give them each an additional 200.

Mi Nuevo Equipo100
Sometimes having friends would be nice. Buying this once will allow you to add any allies you've made here as companions.You may buy this multiple times.

Desventajas:

Suplemento [+0]:
Not exactly the most in-depth of places, so you can use this jump as a supplement for other jumps. The CP here can only be used in this jump, and vice versa; this includes extra CP from drawbacks.

Extensor De Tiempo [+100CP]:
You have the option to extend your stay in this world. For every 100 CP you take from this option, you can add another 100 years to your stay. The maximum CP you can gain from this drawback is 800 CP.

Personaje Secundario [+100CP]:
It seems you have a rather forgettable presence, as people tend to overlook you unless you're directly in front of them. This can make it challenging to make a lasting impression or to be noticed in social situations or interactions.

Pereza [+100 CP]:
You are unbelievably lazy when it comes to work, training, or everyday responsibilities. Unless someone constantly pushes or pressures you into action, you will naturally procrastinate and avoid doing anything productive. Left to your own devices, you will happily spend your days doing as little as possible.

Imán Delicioso [+200 CP]:
For some reason, the Hollows are intensely hungry for your soul. Each week, at least one Hollow manifests with vexing abilities, testing your resolve and cunning in their relentless pursuit.

Arrogancia [+200 CP]:
Your power has completely gone to your head. You constantly look down upon others, believing yourself superior to nearly everyone you meet. You habitually underestimate your opponents, often giving them opportunities they do not deserve simply because you refuse to acknowledge them as a genuine threat.

Amnésico [+200CP]:

You find yourself in a state of amnesia, devoid of memories from your past jumps. The experiences and knowledge you've accumulated are lost to you, leaving you in a state of uncertainty about your identity and purpose. As long as you remain in this jump, your past will remain shrouded in mystery, making it difficult to discern your true self and your place in the world

Sexismo[+200 CP]:
You genuinely believe the opposite sex to be inherently inferior. This prejudice colors your every interaction, causing you to be unnecessarily dismissive, cruel, and antagonistic toward them. You frequently sabotage cooperation, refuse to acknowledge their accomplishments, and find it difficult to treat them as equals.

No Necesito Mi Cerebro. [+300CP]:
I will not mince words, you're an Idiot with a capital I. Using your head is impossible except for headbutting. Even simple math division and multiplication would be considered a college level skill for you and you are definitely too stupid for that.

Rival [+300 CP]:
Wow. You have a rival and that person is the exact opposite of you in several areas. Mostly in personality and ideology as a person but the most vexing part is that you will not be able to defeat him/her alone for the first 8 years of your stay here. They will also stand in the way of you and your goals as much as possible, which is to say nearly every damn time. I hope you have a strong group of friends to help you here because boy you need it.

Mal Genio [+300 CP]:
Your patience is practically nonexistent. The slightest insult, inconvenience, or provocation is enough to send you into a fit of anger. While enraged, your judgment suffers considerably, making you far easier to manipulate, deceive, or lure into traps.

Infante [+300 CP]:

Your body and mentality are reduced to those of a young child, much like Nel Tu in her child form or the Pícaro. Although you retain your memories and abilities, your emotional maturity, innocence, and childlike behavior frequently interfere with serious situations. Others are also far less likely to take you seriously.

Evolución Estancada [+300 CP]:
Your evolutionary path has come to an abrupt end. Throughout this Jump, you are permanently locked into a a normal Hollow. You cannot naturally evolve into a higher Hollow class, become an Arrancar, or otherwise advance through the Hollow evolutionary hierarchy by any means. If you begin as a Normal Hollow, you will remain one until the Jump ends.

Necesidad de Destrucción [+400 CP]:
Deep within your soul burns an uncontrollable urge to destroy. Every day you feel compelled to hunt down and battle powerful opponents, leaving devastation in your wake. Ignoring this impulse becomes increasingly difficult over time, and prolonged restraint leaves you restless, irritable, and unable to focus until you satisfy your need for violence.

Devoción a Aizen [+400 CP]:
Your loyalty to Sōsuke Aizen borders on fanatical devotion. You sincerely believe in his vision and willingly place his goals above your own. No matter how harshly he treats you even if he insults, abandons, or attempts to kill you you will always rationalize his actions as being necessary for his greater plans and will find it nearly impossible to resent or betray him.

Sin Tiempo De Inactividad [+400CP]
