Generic CYOA Jump

Power Unnerfer Supplement

In the Original Generic CYOA Jump Supplement, after you completed your Jump, any power you got from the Jump is nerfed to make you equal in raw power to a top-end comic book magic user, such as Nabu, Doctor Strange or Victor Von Doom (on one of their good days) while also locking multiverse traveling abilities to the local multiverse. Using this supplement, these restrictions now don't apply to you. If you gained Omnipotence, that's still Omnipotence even after the Jump. If you gained Omniversal travel, that's still Omniversal travel after the Jump.
