

Jurassic Loli
A Loli Adventure 65 million years in the making

Framework by Myrmidont and Fluff by BLADE

Well now, welcome back to Isle nu… bar…? Uh.
Hang on a second, need to check something really quick.

…

Okay, done. Welcome back to Isle Loli, home of the Jurassic Loli amusement park. In the year 1993, John Hammond used his resources as the head of Ingen to buy the island, and start up an amusement park using dinosaur dna to make clones of them. Sadly, each and every attempt at making the park was an utter failure, as the dinosaurs broke out and went on a rampage, killing many and wrecking much of the infrastructure.

However, the fourth attempt, 'Jurassic World' was a resounding success. Until some dumbass scientist crossed the streams and made a smarter dinosaur. Er, Loli. Yeah, Loli, that's what I meant to say. This park doesn't hold dinosaurs, it hold Loli dinogirls. Anyways, you'll be spending ten years in this place, so take these to get you started.

+1000 cp

Origins

Free - Drop In
You have no relation at all to the park itself, not staff, not handling, not anything. I guess that makes you a tourist? Well, enjoy your stay here on Isle Loli.

Free - Ranger
You've got the hands on work, keeping an eye or twelve on the Lolis and making sure that they stay healthy and happy, and that they play nice with the crowds.

Free - Management
The other side of park management, the desk jockeys who control all the money. You have a really nice chair, and god forbid you have to actually go outside and do things.

Free - Loli
The main attraction, the stars of the show, the ones everyone here came to see! ~~A dinosaur!~~ A Loli! Put on a show for the tourists with your cute rawr noises!

Loli Type (only available to Lolis)
Free - Small Loli
You're just an average girl, representing a kind of dinosaur no bigger than a car. Raptor, pterodactyl, triceratops, you get the idea. You've got some cosmetic features representing this, and post jump will acquire your chosen dino as an alt form. Incompatible with Big Loli

100 cp - Big Loli
I take that back, you're bigger than a car. Brachiosaurus and Tyrannosaurus Rex, for example. As before, you've got some animal traits reflecting your chosen dino, and get it as an altform after the jump. Incompatible with Small Loli.

100 cp - Hybrid Loli
Okay, so this is weird. You aren't just one dino, you're two. Or maybe even three, four, or five, if you buy this multiple times. Pick another dino or reptile (or anything other than a normal mammal, really). Whoever made you spliced some of that dna into you, granting you some sort of biological weapon, such as a chameleons color changing.

100 cp - Oppai Loli
You what now? I'm sorry, we don't serve your kind here. ...Urg, fine. You aren't a newborn Loli, made of the Jurassic World park, you were made for the original Jurassic Pack. As such, you have an actual chest. And probably a huge number of battle scars. You're older, stronger, and smarter than all the other Lolis. Which means you probably aren't a Loli anymore, you heretic.

Perks

Standard Discount Rules. Discounts as appropriate, with 100 cp being free.

Drop In

100 cp - Loli Fanatic

Pick a topic, you're now a trivia master. ...What? Thats it, thats all this does. Be it Lolis or Dinos, or something else entirely, you're a master of trivia. Okay, fine. Two fields, such as Lolis AND Dinos! Or something else, you plebeian.

200 cp - AAAAAAHHHHHH!!!!!

The first park collapsed before it ever properly opened, thankfully. As a result, civilian casualties were basically nonexistent. So, as befitting someone who has no relation to this mess, I give you - the power to run away! You're just a tiny bit faster, luckier, more intuitive when trying to run away or escape from an event you didn't cause.

400 cp - We Need More Teeth

While you aren't that good at making plans yourself, what with not knowing a damn thing about what's going on behind the scenes, you're great at saying things that give others a eureka moment. You know, like 'We need more teeth' giving someone the brilliant idea to let the Trex lose so they can out-rampage one of the other Lolis.

600 cp - Background Character

You just aren't important, it seems. As a result, you're utterly bland and will go unnoticed more often than not. If you wanted to, you could just walk out of a hostage situation because they didn't pay attention to you. If the Loli's were to get lose, they'd chase after literally anyone but you, so long as there's even a single person to chase after. If you're the only one available, you aren't really part of the background anymore, but until then you'll literally be the last person to get injured.

Ranger

100 cp - Still Not A Navajo

You are excellent at all this outdoors stuff. You could survive in a jungle for a few days with nothing but a knife, and have better than average tracking skills. You also have decent animal handling skills, letting you get in close to the Lolis without to much fear.

200 cp - Pediatrician

Everything a growing Loli needs, you can provide. From a small talent at medicine to child rearing, and especially at keeping the wilder Lolis from biting you in the shins, you've got it all. Also applies to actual dinos, since that's vaguely relevant

400 cp - Loli Response Team

The Lolis are kinda destructive, you know? They all want to go outside and run about, and make adorable stomping and rawring noises as they smash things. You on the other hand, are verified, certified, whateverified to be qualified to handle them. You always know the best ways to put Lolis (and other things, like dinosaurs) in time out. Like how many men to take, and how much tranquilizer to use. Or if you should use milk and cookies instead of tranqs.

600 cp - Onii Chan!

I'm not entirely sure how to phrase this, it's like you have some sort of type advantage against Lolis. They all seem to think that you're just ridiculously cool and awesome and nice and amazing at headpats even though they really don't like headpats at all I mean it stop headpatting me Onii Chan! Of course, this won't help much when they're fully worked up and in stomping mode, but even then you can still talk them down better than anybody else.

Management

100 cp - The Comfiest Chair

You just have no regards for office policies do you? Your workspace is a mess, that tshirt of the original park is offensive, and why do you have toy lolis all over the place? Whatever. As long as you get a decent amount of your work done - let's say half of what you were supposed to do - you're more or less immune to being fired over said untidy habits or even not doing all the work. Basically, you've got a guaranteed job. Until things go belly up at least.

200 cp - I Give You… Loli

Okay, so. I'm going to be honest, i'm not sure how you turned Loli into some sort of worldwide fetish that people far and wide would come to visit you damn amusement park about it. But nonetheless, you have. Pick a theme of some sort - no more than, shall we say three? As long as it relates to at least one of your themes, your skills at selling to the masses gets a major upgrade, and the more the better. Lolis are okay, Dinos are wicked, and Loli Dinogirls are - SHUT UP AND TAKE MY MONEY!

400 cp - Entrepreneur

Ah, funding. That could be a problem. Well, for anybody but you. Your companies, or maybe just those you work for, never seem to hit any major financial issues. You can be a bit low, but they'll pop back in the coming months. Investors are willinging to give 'donations' for minimal return, and miscalculations seem to be in your favor. You still have to work for it, but not nearly as much as you would have otherwise.

600 cp - The Real Monsters

Of course, being a park dedicated to Lolis, it's inevitable that the whole thing come crashing down. And when it does, you won't be out of a job for very long. See, there's this thing people are obsessed with called 'Blame', usually involved in how this shit happened. But you? You're just the guy who makes Lolis, what people do with them afterwards isn't your problem or your fault. You have godly skills at not taking the blame, and when successful, can find similar positions at other companies with ease.

Loli

100 cp - Star Attraction

You are just the cutest little thing ever! Pick a theme of some sort, cute, sexy, handsome, etc, and People just gush over your for hours if given a chance. Whatever you choose, you now exemplify, with literally everything you do seeming more so than any other Loli. You at you go with those cute little rawrs!

200 cp - Loli Squad

What the only thing cuter than one Loli? Two Loli! No, nonono, *three Loli!* Whatever number you choose, you now have a damn near supernatural ability to get along with people similar to you - if your handsome, you get along with handsome people. If you're cute, you get along with cute people. If you're a Loli, you get along with Lolis. You also get a small bonus to various hunting/stalking type activities when in a group of at least three.

400 cp - Not The Shins!

Normal children just love to kick people in the shins. Loli's on the other hand, love to bit people in the shins. As a result, your super sharp teeth made specifically for biting (or not, but this still works) are guaranteed to break the skin of whomever you're biting, and for it to be way more painful than it ought to be. Be careful though, as you aren't guaranteed to get through any armor they may be wearing. And you might hurt your teeth like that!

600 cp - Loli Finds A Way

All those nasty mean people who keep trying to put you in time out and don't want you to go outside so you can rawrmapge with your friends! You'll show them! You're gonna bit so many shins! See, when it comes to escaping, you are just crazy lucky. Whether this is one of your friends breaking out and then coming back for you, or an equipment malfunction on the part of the staff, or just a guard being distracted by a box of donuts for ten minutes, opportunities for you to slip away - or just break out - seem depressingly common.

General

100 cp - Mechanic

Stranded in the middle of the park with two broken cars, and what do you do? Break one down to fix the other! While you aren't a professional, you do have enough skill to make a working car out of maybe two or three broken ones, as unlikely as that seems. Just be careful, the roar of the engine might not be what you want when trying to hide.

200 cp - Wulike

So, I take it you work under Doctor Wu? Or maybe a former student? Rival? Well, I suppose it doesn't matter, just so long as you have the right skillset. You now have a job with somebody - possibly the Jurassic World crew, possibly a rival, cloning the dinosaurs. You also have a bit more skill than you actually need, seeing as you're moderately talented at mixing and matching things to alter their appearance - nowhere near Wu and his hybrid freak, but it's a start. You also have a degree saying you're a proper geneticists, since that's probably relevant in later jumps.

300 cp - True Loli

Isn't it odd? That somehow, Dinogirl Lolis have their own amusement park? What if this wasn't something strange, what if thats just how they were? What if the dinosaurs *were* Lolis? Well, now they are. You may, within the first day of the jump, choose to make any group of monstrous creatures - such as godzilla - into qt girls. Younger ones will of course be Loli, while the older ones will have an actual chest. What a disappointment. Or if you prefer, they could grow back up into their monstrous forms? That'd be one hell of a good way to tell if it's safe to give headpats.

Items

Standard Discount Rules. Discounts as appropriate, with 100 cp being free.

Drop In

100 cp - Merchandising

You must have gone on a shopping spree of some sort, because you've somehow gotten your hands on a decent collection of merchandise for Jurassic Loli and Jurassic World. And some of this stuff stopped being made years ago, so really, how did you do it? Includes things like shirts, tacky snow globes, Loli of the month calendars, and figurines of all the important characters.

200 cp - Vacation Ticket

Vacation's where I wanna be, buddy on the beach where the fun is free… Oh hey, just singing a little song about vacation, because that's where you're going! You have a ticket to an all expenses paid, VIP access, vacation! It doesn't matter if you want to go to Disneyland, on a cruise, skiing in the alps, or heck, maybe come on down here to Jurassic World? Anyways, once per year you can use this ticket to give yourself and up to eight others some rest and relaxation.

400 cp - Loliaway Spray

You what now? How did you, where did you - WHAT? ...Sorry about that. You've got some sort of Loli repellent spray designed to make you smell like the worst thing ever to them. Why would you want this? They're the whole point of coming here! Well, anyways, it also works on dinosaurs for obvious reasons. One car is enough for five people, lasts six hours per 'dose' and refills each day.

Ranger

100 cp - Milk And Cookies

The perfect tool to control Lolis, a seemingly endless supply of milk (cool or warm) and chocolate chip cookies. Always at a pleasant 'just out of the oven' melty gooeyness, but not hot enough to burn your mouth or fingers. ...Also comes with a tranq gun, for emergencies. And, because why not, a special tranq that leave them with the sensation of just having eaten milk and cookies. It's a strange side effect, but that's about it.

200 cp - Motorcycle

You've upped your coolness factor with this classic motorcycle. It's loud, it's noisey, it's hella sweet, and the Loli's just love to run alongside you when you ride it. While it does run out of gas, it will also slowly refill itself over the course of a few hours. Also comes with a bunch of tools and spare parts so that you can customize it to your liking.

400 cp - Experimental Loli Containment Area

Ah, here we go. The time out room! ...you know, where you put all the misbehaving Lolis that can't be trusted near the crowds? Anyways, these 'cells' are all specially designed for each type of ~~dinosaur~~ Loli, and are incredibly hard to break out of. Mind you, that's assuming you just leave them alone. And while the system is automated enough to do so for a few days at a time, that'll just make them even crankier.

Management

100 cp - Dosh

It's not a donation, it's an investment! ...No, actually it is a donation. Well, actually, you can rationalize it however you want. One year it's winning the lottery, the next it's a bonus for good work, and the year after that it's a finders fee for some rich dude's car. Either way, you have a so called 'allowance' of half a million dollars a year. Obviously you can funnel this into your company to grease some wheels, or maybe just to buy some neat toys.

200 cp - Helicopter (License)

Hey, have you been taking lessons? ...Did your instructor just throw up? Huh. Moving on! You've got a helicopter, and your choice of a chauffeur or a license to fly yourself. And that license comes with the relevant skills, yes. Adds the appropriate fuels to your warehouse, as well as parts and tools to work on it.

400 cp - Biotech Inc

Are you too busy to make Loli's yourself? ...With science, dude. With science. Anyways, are you too busy to clone Lolis to populate your park? Are you just not a science person? Well, never fear, this item is for you! This team of morally dubious scientists (and support staff, and labs and whatnot) is everything you need in order to, well, not build it yourself, but everything you need to make them do it.

Loli

100 cp - Night Vision Headset

It's a bunch of strange hats? People seem to want you to wear it whenever you go out - or rather, when ever they let you out. It's actually a night vision camera, with a tracker built in. It lets people watch whatever you're doing on camera. Comes with 8 spares, and they all resize to fit whoever wears them.

200 cp - Everything A Growing Girl Needs

Meat! Probably! Anyways, do you have a special dietary requirement of some kind? I'm assuming it's meat, but you could be a herbivore? Anyways, if you do, then this food item will cover it. Its a bit oddly specific - if you need three grams of a certain mineral per day, it'll spit food out to meet that demand, but if you want literally anything else it's probably not going to give it to you.

400 cp - Playground!

You've got… A part of the amusement park? Specifically, a decently sized exhibit filled with Lolis of whatever species you are (or just one if you're human or hybrid). In future jumps, this is represented by a much smaller island with just one species of Loli on it.

General

100 cp - Petting Zoo

Aw, isn't that just adorable… it's a whole bunch of little Lolis, before they hit their rebellious stage! They're all cute as a button and totally into the whole cuddles and headpats thing, so you can fawn over them as much as you like and they won't try to bite you. Well, they might if you accidentally hurt them, but if you did that you kinda deserve it.

200 cp - Genetics Lab (discount Wulike)

Okay, here we go. So, I'm assuming you know your way around a laboratory? Because here you go, your very own genetics lab. Comes stocked with everything you'd need to grow a brand new dino, up to twelve a year, and various other supplies for whatever side projects you might have.

Companions

50 cp - Companion Import

Want to bring someone along to the park with you? Well, congrats, they get a free origin, appropriate discounts, and 500 cp to play with in order to pick up perks and items. They can't buy more companions, but they can be Lolis. Make them Lolis. You know you want to~!

100/200 cp - Canon Companion

Do you not have any companions to import into being Lolis? You poor jumper! Don't worry, I can hook you up. For 100 cp, you can take any human character or small (car sized) Loli with you on your companion, or for 200 cp you can take anyone, period. Even dead people. Cloning tech is real you know.

Drawbacks
Max of +600 cp

+0 cp - WHAT DO YOU MEAN NO LOLIS?!?
...So, I guess you just want to go to the regular Jurassic Park timeline? I mean, I guess you can do that. But you'd be missing out on the Lolis! Fine, go. It's not like they were looking forward to seeing you or anything.

+0cp - Jumper World
So, you went to the original Jurassic Park did you? Met Hammond and all that? And you want those you met to remember you and all that? Sure, why not. I'm sure Rexy will enjoy chasing you around again.

+100 cp - Industrial Espionage
It would seem that Biosyn is up to its old tricks, trying to steal your Lolis and do horrible things to them! Who cares if artificial lifeforms dont have the same ethics laws normal people do, it's still a horrible thing to do! If you don't keep a close eye on your Lolis, they might be stolen! And if Biosy goes under, some other dumbass company will show up to keep it going.

+100 cp - Control Measures
You have an addiction of some sort. Maybe it's booze, maybe it's cigarettes. {insert official anti smoking psa here}. Maybe it's some weird chemical cocktail. Maybe it's milk and cookies? Either way, if you go more than a day without your dosage, you'll get really sick. If you go more than a week, you'll die!

+200 cp - Chew Toy
You're delicious! Or at least, you must be, otherwise the Loli wouldn't keep trying to bite you. Even the herbivores want a taste! ...Actually, that'd probably hurt more - crushed fingers vs cutting them off. Anyways, if a Loli can smell you, and is in a position to bite you, they'll try. And no, Loliaway spray will not save you.

+200 cp - Watch List
So… apparently you, or someone in your family, enjoys Loli just a little bit to much. Or an employee/your boss. I dunno. But for the next ten years you're going to have various governmental agencies breathing down your neck for any sign of 'foul play'.

+300 cp - When Will They Learn
I hope that the Loli Containment squad is in top form for the next decade, because you're going to have a containment break every fucking day it seems like. Seriously, did the guard forget to close the damn door because he was daydreaming about donuts or something? It's twenty feet tall for crying out loud, how do you miss something like that?!?

Ending
Assuming you survived the ten years of course.

Stay, Leave, Go Home.

Notes
When I say ‘car’ for the Loli size, i’m speaking like one of the big trucks. Not monster truck big, but up there. Like, half a school bus or something.

You can buy oppai loli for a bigger bust and working at the original park if you wish, despite not being a Loli.

The canon companion option does not include famous historical figures. Yes I know I said dead people were valid, but they aren’t part of the Jurassic Park/World story. Sorry.

The basis for the entire jump (which sadly wont fit in here)
https://imgur.com/gallery/HJUdgf5
