SHŌGUN (2024)

V 1.1 By Apocbox

The year is 1600.

For years Portuguese Catholics have richly profited from trade in Japan. They have kept its whereabouts hidden from their sworn enemies—the European Protestants. In Osaka the reigning Taikō has died, leaving behind an heir too young to rule. Five warrior lords are now trapped in a bitter struggle. All of them seek the title that would make their power absolute...

At the same time, the Dutch ship Erasmus, the last of its party, with its provisions dwindling, many of its crew dead with and the rest starving, with its captain having committed suicide, makes shore at Ajiro on the Izu Peninsula. The survivors are about to be taken prisoner. One of them is not only going to escape the fate of his compatriots but also play a crucial role in the future of this land.

Take this 1000 points to spend. You will stay here for 10 years.

The Weapon Of The Samurai +300

You not only despise guns and see everyone who uses them as dishonorable people, but you are also physically unable to use them yourself.
