Manyuu Hikenchou

A Jumpchain Redux by /u/TacticalSonnet

This is not the feudal Japan you are familiar with. The great Manyuu Clan seized this land in a great war decades prior, and they value one attribute above all others; breasts! Big breasts guarantee you wealth in this world, while a small chest will leave you condemned and outcast. The Manyuu Clan horde the secrets to nurturing big, bountiful breasts, and strike down any woman well-endowed enough to pose a threat to their hierarchy. It is a cruel world, but one woman hopes to change that.

In a few days, Chifusa Manyuu, heir to the Manyuu Clan and last member of an ancient bloodline, will flee her home and rebel against her father's breast-based society. She and her squire Kaede will journey far to unlock the secrets of the Chichinagare, a technique that could overturn the Manyuu Clan and give the power of breasts back to the people. This is the strange, fantastic, and often-silly world you will spend the next decade in.

Take these points and enjoy!

+1000cp

Age & Gender

All may enjoy the beauty of breasts! You may choose your age and gender freely.

Background

Select one Background to determine your starting point and history in this world.

[Free] Rebel: You clash with the system. Like Chifusa, you stand outside the hierarchy enforced by the Manyuu Clan. Whether you actively fight against their authority or simply choose not to play their games, you have freedom that others could only dream of. This Background can also serve as a *Drop-In* option for Jumpers looking for a fresh start.

[Free] Manyuu Clan Noble: It's good to be on top! The Manyuu Clan has reigned as the most powerful political force in Japan for decades, enforcing its breast-themed ideology on the rest of the nation. And as a highly-ranked member of the Manyuu Clan, you stand to benefit a great deal from their supremacy. Whether you are a fierce samurai or a loyal administrator, your work helps uphold this sex-focused society.

[Free] Landowner: The Manyuu Clan aren't the only important people around here. Quite a few citizens have the wealth, influence, or genetic gifts to flourish under the Manyuu's rule. Put your biological and financial inheritance to work as you carve out a better life for yourself, regardless of who the Manyuu say are on top.

[Free] Commoner: It's the Manyuu's world. You're just living in it. You are one of the common folk; the farmers, fishers, craftsmen and caregivers that make up the majority of Japan's citizens. You may not have flashy sword skills or fancy titles, but some of the best kept secrets of this land are closely guarded by simple souls like you.

Perks

Perks that match your Background can be bought at half price. Perks that match your Background and cost 100cp can be taken for free.

General Perks

[100] Student of the Sword: This is not a peaceful time, Jumper. With the Manyuu clan ruling by force and opportunists roaming the land, those who can't defend themselves will be taken advantage of. Thankfully, you're far from helpless. You've been trained in the ways of swordsmanship, and can wield a katana as effectively as any samurai. To start with, your skill would make you a valuable warrior for any clan, but dedicate enough time and effort to your training, and you could surpass even the greatest of the noble scions.

Alternatively, this purchase could grant you skill with another weapon, such as the tachi or naginata. With each additional purchase, you may choose another weapon or style to become proficient in.

[100] Expert Painter: With so much beauty in the world, there is a great demand for those who can immortalize it in art. You have become an expert artist in one style of your choice, from the physical mediums like painting and sculpting, to the intangible arts like song and poetry. Additionally, this perk makes it easier for you to convince others to participate in your art. You'll never want for models, actors, or other accompaniment ever again!

[100] Knockout: In a world so obsessed with one physical attribute, it can be easy to forget that breasts alone do not bestow beauty. Like the famous cherry blossoms, you are a hidden flower, capable of drawing the gaze of even those who wouldn't normally be attracted to you. From obvious features like your figure, to smaller details like your hair and eyes, you could challenge even the fabled Chikumi for the title of fairest in the land.

[200] Mother's Power: In a world where lineage grants enormous power and privilege, you are uniquely suited to shaping your own bloodline. Your body is built to bear children, ensuring that not only will your children grow up healthy and strong, but that you will suffer no ill effects during or after your pregnancy. Additionally, you have incredible control over your reproduction, allowing you to determine not only *when* you have children, but which traits and abilities you'll pass on to them. Even the number of children you carry and the duration of your pregnancy is yours to control, though be warned that deviating too far from biology could have some strange effects. *See the Notes section for details.*

Rebel Perks

[100] Breasts Are Equal!: Big, flat, saggy, perky; it doesn't matter! God will never make a breast that is superior to another! With this perk, you'll never need to worry about society's expectations. Even if you refuse to conform or stand out in some noticeable way, you'll always be respected as an equal by those around you. This won't uproot the system at large, but it seems society will always be willing to make an exception for you.

[200] Selective Slicing: To an aspiring hero, collateral damage is unacceptable. And yet, life has a habit of getting in the way of your goals. Thankfully, you have the supernatural ability to guide your attacks, letting you strike true and leave the innocent unharmed. This perk doesn't make you any more accurate; you'll still need the expertise to land your shot. But so long as you have the skill to hit your opponent, you needn't worry about affecting anything but your target. Why, with this perk, you'd have the ability to slice through the tentacles of an aggressive octopus without harming the fisherwoman caught within them.

[400] Attire Assault: The warriors of this world seem to have an agenda against their opponents' wardrobes. With this purchase, you may direct any of your attacks or abilities at an individual's clothing instead of the individual themselves. Whether you seek to shatter armor or simply humiliate your foe, you can efficiently target their equipment, garments, and anything else on their person without harming them.

Additionally, you may apply this effect defensively, redirecting the damage of an opponent's attack onto your clothes. This may be accomplished twice per set of clothing; the first attack will leave you *barely* decent, while the second attack will destroy every stitch on your body. Still, if you can bear the embarrassment, the ability to negate attacks could prove quite useful.

[600] Upheaval: It's a cruel world, but maybe you can do something about that. Like the rebel Chifusa or the mysterious Breast Robin Hood, you have the power to undermine the establishment and cause lasting societal change. You could encourage acceptance by fighting against an oppressive government, or inspire compassion with your own good deeds. Act consistently and you'll cause a cascade of change in the people around you.

This effect also applies to individual interactions. Treat an opponent with honor and they will act honorable in return. Make an honest effort to help someone and more often than not they will accept your help. Even harsh enemies can be swayed by this power, letting you turn old rivals into powerful allies in your fight for a better world.

Manyuu Clan Noble Perks

[100] Intimidating Presence: The Manyuu clan quickly rose to power in a time of national turmoil, and they sure didn't do it by asking nicely. Like their fiercest clan members, you now excel at leaving your enemies frozen in fear. Whether you're cowing a family of peasants with a choice threat or spreading dread without a word, few can resist your menacing aura.

[200] Female Body Inspector: The administrators of the Manyuu Clan have a discerning eye, letting them spot potential talent and threats to their authority. More specifically, they monitor the women of this land, deciding whose busts make them worthy of marrying into the clan and whose must be cut down to prevent a challenge to their dominance. With this perk, you not only have an incredible knowledge of human anatomy, but also an uncanny ability to predict how a body will develop. With a brief analysis, you'd know exactly what a person would be capable of and to what degree their body could change. The Manyuu will pay dearly for the knowledge of who is a late bloomer and who will not grow naturally.

[400] Ouka: Like the Manyuu's most fearsome servant, your speed is unrivaled. Your attacks fall so fast even skilled opponents will struggle to respond, and your reaction time makes dodging their strikes almost trivial. Even your agility is bolstered by this perk, letting you easily cut off an enemy's escape or maneuver to a more advantageous position. No matter how your abilities change, you'll always be able to act with haste.

[600] Our Word Is Law: The powerful don't just flourish in their society, they *define* it. With this perk, you gain the ability to fundamentally alter each world you visit. Upon entering a setting, you may change the society of that setting to suit your wishes. You could use this like the Manyuu did, making a physical attribute into a life-defining status symbol. You could choose to elevate a group of people, or tear down such rankings if they already exist. You could even affect political systems, replacing democracies and cooperation with a world where the strong rule the weak.

This doesn't determine your place in this new society; if you want to thrive, you'll need to live up to the ideals you set. But when it comes to reshaping civilization, your power can't be overstated. You may make this change at the start of each future jump.

Landowner Perks

[100] Preferential Treatment: Whether you're acting flirtatious and seductive or bashful and blushing, you know how to get people to give you what you want. You can leverage all of your physical assets to enhance your persuasiveness, making you a force to be reckoned with in any social circle. This perk also makes you an exceptional dancer, letting you approach aristocratic courtly functions and a traditional village pole dancing competition with equal grace.

[200] Cunning With Coin: The Manyuu Clan may tout their bloodline, but many clever women with the right breasts have accrued plenty of power for themselves. Whether you're a merchant trading goods or a business owner producing them, you know how to turn a little capital into a whole lot of profit. You can spot opportunities a mile away, and can market your wares to anyone who might possibly need them. If you sell the right goods and make the right allies, you might wind up rivaling the Shogun in influence.

[400] He's So Silly: The true mark of privilege is how free you are to act. Like many powerful figures in this world, your behavior is more likely to be met with a wag of the finger than any true lasting effects. Attempt to fondle a voluptuous woman in the street? She may knock you around but would let you go on your way without thinking less of you. Want to manipulate your marriage and steal your husband's fortune away? That's just politics, or so the peasants assume. This effect is reduced if your actions actively harm others, and some crimes will be taken seriously no matter who you are. But for most things, consequences seem to slide off your back.

[600] Berserker Rage: Doomed be those who harm a man's love. Like a certain unassuming noble, you have a vengeful passion inside of you that can be harnessed to devastating effect. Once a day, when something or someone you truly care about is threatened, you may enter a state of unstoppable fury. In this condition your martial prowess overflows, allowing you to take on a hundred opponents single-handedly. But beware the tunnel vision that accompanies this power. Once you release the beast inside, it will not rest until those that threatened your beloved are thoroughly vanquished.

Commoner Perks

[100] Mystique: Whether you're a rogue like the Tit Thief or just a stacked countrywoman looking to avoid the Manyuu Clan's scrutiny, there are plenty of reasons to hide your appearance. Thankfully, you're a master of disguise. Wield your wardrobe to downplay your own attractiveness, present yourself as another gender, or even maintain a complete secret identity. Your features are yours alone to reveal.

[200] Mermaid: Did you grow up in Matsue Village? Because you're a natural seafarer. You can swim better than most fish, dive for impressively long spans of time, and have been fortified by a life of physical labor. Even a petite peasant could push boulders around with this perk! In addition, you'll no longer be hindered by your own body, its proportions, or even the clothing you wear. You could dive for pearls with floats the size of Chifusa's, or chase down your enemies in an absurd costume like Kagefusa. Let other women worry about the weight on their spines. You stay cheerful and perky no matter what lies in store!

[400] Folk Healer: Without access to expensive or advanced treatments, most villages have worked wonders with traditional medicine. By combining herbalism, acupuncture, and massage therapy, you can treat fevers, sore joints, and countless other common ailments. Serious injuries will still require more developed treatments, but your techniques can accomplish things that would impress even modern physicians, such as stimulating milk production or even enhancing one's romantic life. Of course, between your knowledge of the body and your prowess as a masseuse, you wouldn't need ancient secrets to impress any partner lucky enough to share your company.

[600] Shinobi: You eschew the brash methods of bushido in favor of a more subtle art. With peak flexibility and superhuman agility, you could scale fortress walls and leap across rooftops without a sound. As an unparalleled spy and assassin, you know which weak points to strike to bring your enemies down, whether your foe is a skilled swordsman or a ruthless government. Finally, you have mastered the legendary stealth techniques of the ninja. Against all but the most perceptive opponents, you'll only be seen when you want to be seen.

Breasts

Yes, you can spend your hard-earned Choice Points on custom boobs of your very own. What a world! Of course, breasts aren't just bags of fat and tissue in this land. They represent status, with the curviest women in the world winning prestige and power, so long as they are clever enough to capitalize on their natural gifts. Whether you are a simple serf, a Manyuu Clan noble, or a rogue element, your choice in this section will determine the influence you wield in this world.

If you took the **Anatomy Toggle** Drawback, you can adapt this section to bestow the equivalent endowments selected in your drawback. *See the Notes section for post-jump details.*

[+200] Washboard: You are subhuman, not worth the attention or pity of anyone important. At least, that's what society says. You are flat-chested in a world that does not treat such deficiencies kindly. Even the most skilled sword master of the land found it nearly impossible to find work with a chest like yours, and faced constant ridicule when she did. Even criminal punishments are worse for women with no chest. Without breasts to deprive you of, the Manyuu will skip straight to executing you. That said, a very rare few prefer this figure, and the rebel Chifusa seeks to overthrow the breast-based hierarchy of this land. Perhaps there *is* hope for you after all.

[0] Tame Tits: These handfuls won't stand out, but they also won't hold you back. With your reserved rack, you needn't worry about being targeted by cruel Manyuu warriors. At the same time, you won't be winning any friends or influence with these modest mammaries. The life you make for yourself here will depend solely on your actions.

[200] Manyuu Melons: Your bountiful bosom would place you right alongside Kagefusa Manyuu and the other nobility of this world. Though these breasts are each smaller than your head, you're likely to have the best cans in your community. The prestige these puppies will grant you can open doors normally closed to those outside the Manyuu Clan or the Shogunate, giving you an in with the major players in this country. Of course, greater rewards come with greater risk. These tatas make you a target for tit thieves and vengeful Manyuu samurai alike, but the opportunities are worth it. With knockers like yours, people *know* you're important!

[400] Oppai Maximum: Great glorious gazongas! Your bust is unbelievable; far beyond the curves of even the Manyuu Clan. With breasts each the size of your torso, you're big enough to be elevated to empress on status alone. That is, if you could live long enough. While these magnificent mountains would make you the most important noble in the country, they would also make you a massive target for political rivals. Of course, jealous assassins won't be the only drawback. You can forget about bathing in a regular tub, and the increased weight and sensitivity is going to make physical exertion very difficult. But then again, with chi-chis like these, you'll never need to work again.

Secret Techniques

Despite the similarities to Japan's feudal history, this world is filled with sages and warriors who wield powerful techniques. Specifically, breast-themed techniques. You receive a **100cp** stipend for use in this section alone.

[100] Breast Slice Technique: The Manyuu Clan's bread and butter. With this technique, their swords can pass through their enemies' bodies and cut their spirit, slicing the tits from their chest. Though this technique lacks the gore associated with normal swordplay, the people of this world consider depriving someone of their breasts to be equally barbaric. Still, few can argue with the harsh dominance the Manyuu have created by eliminating their competition. Master this technique, and you may find a way to target and diminish other attributes.

[200] Boob Illusion Technique: The chests of those who employ this technique are more captivating than most. With a quick flash or the right sway, your breasts can hypnotize spectators. Though at first this technique will only stun your opponents, further training will let you target them with hallucinations and manipulate them with mental illusions. Masters of this power can even embed their targets with subconscious commands, though the exceptionally strong-willed can overcome these fantasies and hypnotic suggestions. Unlike the original technique, this power will not cause sagging.

[200] Lethal Lactation Technique: A favorite of Manyuu Clan assassins, this technique turns your chest's natural capabilities into a powerful offense. By imbing poisons and other toxic concoctions, you can "load" your teats with a deadly payload. Combined with your ability to project liquids from your chest at short ranges, and you'll have a way to blind and poison enemies that few will ever expect.

In addition to its offensive abilities, this technique also grants the user conscious control over their ability to lactate. Additionally, the necessary exposure required to train in this technique makes users immune to most mundane poisons and grants a legendary tolerance of alcohol.

[300] Breast Energy Technique: Carried in the breasts of all peoples is a spiritual energy known as Nyuki that binds them all together. Like the great Munamori sages, you can now wield this power. By manipulating a person's Nyuki, users of this technique can form deep connections to the bodies and spirits of others. Often used to break curses and heal afflictions, these bonds can also be employed in more esoteric ways. Connect to a person's Nyuki and you'll be able to read their spirit, sense their emotional state, and even infer their deeper thoughts and motivations. Carry another's Nyuki within you, and you could even extend this connection across great distances. This technique often feels discomforting or even painful for novices, however as your mastery grows, so too will the pleasure felt by those whose Nyuki you touch.

[400] Chichinagare: This is the secret of the Munamori bloodline; the technique the Manyuu sought so desperately to control, for they knew it could collapse the hierarchy they worked so hard to build. Unlike the incomplete Breast Slice technique used by the Manyuu clan, the Chichinagare allows for the direct transfer of breasts between the target and the user. A selfish wielder of this ability could not only slice away their enemy's chest but also grow their own by an equal amount. However, this power truly shines when wielded with the compassion and resolve of a mother's heart. When mastered, the Chichinagare allows its user to both take and *give* breasts, pleasurably transferring a person's attributes to another. Perhaps, with enough dedication, you can find a way to transfer other traits?

Items

Items that match your Background can be bought at half price. Items that match your Background and cost 100cp can be taken for free.

General Items

[Free] Bra: Surprisingly rare in this world, even when so many people could benefit from them. This garment is both fashionable and functional, stylishly supporting your ample anatomy no matter how large or small you are. Best of all, this garment will clean and repair itself at the start of each day, ensuring you are never without a way to carry your burdens.

[100] Art Supplies: Enhance whatever project you're working on with these high-quality art supplies! From paints and brushes to clay and canvases, the only thing not included in this easy-to-carry travel case is your artistic skill.

[100] Blade: These lands can be a dangerous place, so take this. Upon purchasing this item you receive a well-made weapon in a style of your choosing, from the classic katana to the strange monk's spade. Forged from reliable steel, this weapon bears the symbol of your clan. Use it to carve your destiny across these strange lands.

Rebel Items

[100] Manyuu Scroll: While it doesn't contain the supernatural techniques of the Manyuu, this scroll does hold plenty of useful knowledge. This text contains a detailed guide on living healthily and nurturing your body. With exercises to keep your body toned and dietary suggestions to promote vitality, this scroll contains all the wisdom you need to live a long, happy life.

[200] Spirited Sake: Sometimes, all that's needed to smooth the social graces is a little liquid courage. This delicious, potent alcohol works remarkably well at lowering inhibitions and encouraging revelry. Share it with friends or strangers and you'll find them much more willing to open up to you. However, be warned that trying to use this drink for nefarious purposes will cause it to sour, and drinking excessively will lead to an enjoyable but blush-inducing night with your friends.

[400] Rope of Bondage: Don't let its mundane appearance fool you; this rope is a powerful tool of mischief and domination. Virtually unbreakable, this length of cord is capable of restraining any single individual with the power of an octopus' tentacles. No matter how powerful your prisoner is, they'll be completely at your mercy when bound in these unassuming coils.

[600] Scroll of Secrets: No longer will your power be bound to fate and bloodlines. Upon purchasing this item, you may choose one perk, power, or ability to inscribe onto this scroll. Anyone who then reads the scroll may gain the power it contains, though they still will need to develop and master the ability for themselves. Though you may share this power with as many readers as you like, you may only change the technique contained within the scroll once per Jump.

Manyuu Clan Noble Items:

[100] Padded Breasts: You can't be a noble in this land of breasts if your own chest ornaments fall short! Whether you are enhancing an existing pair or creating curves where none exist, these incredibly life-like inserts will fill out your clothing to create a silhouette that any member of the Manyuu clan would appreciate. Just be careful to keep them a secret.

[200] Boob Reports: Perfect for administering the Manyuu Clan's hooter hierarchy, this document contains precise monthly measurements of the women of Japan. A Manyuu aristocrat could employ this information well to find suitable marriage prospects, while a more nefarious agent would find this report to be an excellent list of targets. In future worlds, you may select one attribute, be it something mundane like height or something exotic like a certain supernatural power. Each month you will receive an accurate and highly detailed report on all those who possess this attribute. Fight smarter, not harder!

[400] Manyuu Blade: This is no ordinary weapon. Directly imbued with the supernatural Breast Slice technique of the Manyuu Clan, this blade can cut an opponent's spirit directly, bypassing armor and diminishing their breasts. Though this would be a terrible enough fate to inflict on your enemy, you can also choose to target other attributes with your attacks. Slice away a foe's strength to leave them weak and vulnerable, or cut away their speed to prevent their escape. Even more abstract powers can be damaged by this blade, giving your attacks supernatural selectivity.

[600] Clan Castle: A powerful family needs a fortress to rule from. This impressive estate features durable battlements, a sturdy outer wall, and accommodations befitting one of the most noble clans in Japan. Staffed by loyal servants and soldiers, this strongpoint would make the perfect center of your fiefdom. Also included in this purchase is a sizable amount of land surrounding your estate. You may choose whether this land is an undeveloped nature preserve or an agricultural community to support your castle each time you import this property.

Landowner

[100] Fancy Wardrobe: You know what separates the plump peasants from the ample aristocrats? Fashion! You are now the proud owner of a seemingly-unending supply of perfectly tailored garments. Constructed of durable, high-quality materials, these clothes fit a wide variety of styles and always emphasize your best assets. Stun commoners and nobles alike as you dress to impress!

[200] Fortune: Who needs a bountiful body when you've got wealth like this. Through frugalness or fate, you now possess a sum of 500,000 silver coins. This amount is large enough to fund your own business, ensure your decade here is spent living in luxury, or simply create the largest dowry in the land. Don't spend it all in one place!

[400] Hot Spring Inn: Built on a natural hot spring, this lovely inn would be a welcome sight to any weary traveler. With comfortable living accommodations, a soothing sauna, and a fully stocked kitchen and dining room, this structure contains anything a wandering noble or traveling merchant could ever ask for. Despite how extensive these facilities are, some strange power allows them to be operated by a single innkeeper.

[600] Factory: You seem *especially* industrious! Your commercial success has made you the proud owner of the first factory in Japan. While this facility may seem modest, its production capabilities in what is essentially a preindustrial country give you a huge advantage over your competitors. Upon purchasing this item, you may decide what goods your factory produces, from simple textiles to advanced machinery or anything in between. You receive all the necessary equipment and space for the production of this good, as well as a skilled staff of loyal followers to operate your factory. You'll still need to source raw materials and manage the shipping of your products, but your manufacturing methods will be decades if not centuries ahead of your business rivals. *See the Notes section for details.*

Commoner Items

[100] Backpack of Holding: Whether you are a skilled laborer or just a simple traveler, this backpack will help lighten your load. Constructed of sturdy, simple materials, this unassuming backpack is capable of carrying far more than even its appreciable size would suggest. Whereas a normal backpack of this size might contain a week's worth of supplies for a pair of wandering samurai, this rucksack could hold months of efficiently packed goods.

[200] Stealth Garb: These are not the bright robes of a noble samurai; these are garments of a ninja. Expertly colored to blend into the night, this suit will not rustle, overheat, or otherwise hinder your movement. Best of all, these garments contain plenty of hidden pockets perfect for carrying all the tools a ninja may find useful. Keep plenty of knives, smoke bombs, and other tricks on your person, all impossibly hidden into the slim outline of this shadow suit. Live up to the legend of the shinobi with attire made to match!

[400] Medicinal Herbs: It seems you've inherited the apothecary of a particularly exceptional herbalist. With this purchase, you now have a vast collection of remedies and medicines useful for treating almost any ailment, illness, or woe you or your neighbors are likely to encounter. Better still, this stockpile never seems to run dry. Rest confident knowing you have all the treatments, antidotes, and medications necessary for ensuring the safety and health of your community!

[600] Secret Village: In a nation steeped in civil strife, it's nice to have a place protected from conflict. Like the Munamori Clan, you are now the proud owner of a secluded village, hidden from its neighbors by local geography. Whether this settlement is masked by a natural valley, an uncrossable desert, or a thick forest, the fertile farmland and pristine landscape make this the perfect place to build a community. Upon purchasing this item, you may also decide whether to receive a group of followers to populate your village. Should you import the village into future worlds, you may decide whether to retain any changes made between jumps or to keep the village peaceful and agrarian. Regardless of your choice, the village will always be difficult to find by those you wish to keep it hidden from, and will always offer some degree of protection from any parties looking to find you.

Companions

[100/300] Custom Companion: This purchase grants you either one custom companion or the ability to import an existing companion. Whatever your choice, your companion receives a free Background and the discounts that accompany it, as well as 600cp to spend on perks and items. Alternatively, by spending **300cp**, you may import or create up to eight custom companions, each with the same Background, discounts, and stipend listed above.

[100] Squire: Whether you are a samurai, an aristocrat, or simply a farmer, you could probably use an extra set of hands. This eager young volunteer is excited to join you on your adventure through this world, and comes with a free Background, a 500cp stipend to spend on perks and items, the **Student of the Sword** perk, and the **Blade** item.

[200] Friendly Lord: This eccentric samurai seeks to escape boredom and recapture the glory of his younger days by joining your retinue. He comes with the **Student of the Sword, Cunning with Coin,** and **He's So Silly** perks, the **Blade** Item, and a 200cp stipend to spend on perks and items. So long as you can tolerate his lofty language and odd quirks, he'll likely prove to be a valuable ally.

[300] Samurai Siblings: These identical triplets represent some of the Manyuu Clan's most elite warriors. Whether by fate or politics, these sisters have found themselves in your service and will follow your commands with unwavering loyalty. They each possess the **Student of the Sword, Intimidating Presence, Ouka,** and **Selective Slicing** perks, as well as the **Blade** item and 300cp to spend on perks, items, breasts, and secret techniques.

In future worlds, you may import these sisters using a single companion slot. Any perks or items purchased will be divided evenly between the three, slightly diminishing the quality of any new powers but making up for the loss in quantity.

Drawbacks

[+0] Character Insert Toggle: Maybe you'd rather enter this world as an established character instead of someone original. By taking this option, you may replace one canon character in this story. Note that this option doesn't grant you any of their abilities, just a starting point for your journey.

[+0] Anatomy Toggle: Breasts are all well and good, but perhaps you'd like to center this story on a different physical feature. By taking this option, you may adjust Manyuu's social hierarchy to focus on another aspect of the human body. Perhaps plump posteriors are prized, or maybe male endowments receive all the attention. You could even select a trait not linked to one gender, such as hair or muscle mass. Whatever you choose, the perks and items relevant to breasts will adjust to suit the anatomy you select.

[+100] Shapeshifting Lock: In a world that bases social status on physical attributes, you'd think that an experienced Jumper would have a big advantage. But where's the fun in that? By taking this drawback, you are prevented from using any of your supernatural abilities, perks or items to change your physical appearance or body. Any shapeshifting, transformation magic, or illusory disguises have been tucked away. If you want to change your bust, you'll have to rely on your purchases above.

[+100] Unrequited Love: With all the romantic offers and intentions flying around, it's amazing how few seem to come your way. You have been forced to spend the duration of this jump as a spinster, cursed with misfortune when it comes to companionship. Most romantic partners would dismiss you outright, and those that do get to know you will only stick around long enough to leave you heartbroken. It seems that no matter how big your breasts get, Cupid still can't seem to hit you.

[+100/+200] Hands Off!: What is it about having tits the size of tea kettles that makes everyone think they have a right to touch? No matter how well-endowed you are, you now find that the people around you are a lot more grabby. Friendly gestures will often turn into sensual strokes, which could be debilitating depending on your sensitivity. For double the points, this unwanted but (generally) harmless poking has turned into some SERIOUS harassment. Expect leering and whistles wherever you go, with the worst offenders frequently getting physical with you. I hope the extra points are worth it.

[+200] Hunted: Somewhere along your travels, you made enemies of the Manyuu. Whether you disgraced an important heir or stole a precious artifact, you've earned the attention of the most powerful clan in Japan. You will be hounded constantly by the Manyuu Clan's warriors, and though some may be easily defeated, it won't be long before their elite warriors make you a priority target. Hardly a week will go by in this world when an assassin of some form or another will try to take you out, and the only way to make it stop is to bring the whole Manyuu Clan toppling down. Fight the system, Jumper.

[+300] Obsessed Pervert: It seems you have a stalker on your hands, Jumper. This determined admirer is hell-bent on finding you, capturing you, and secluding you away for their own personal enjoyment. While their tactics may start off comical and easy to thwart, they will only grow more intelligent and ruthless with each defeat. Even killing them won't end this chase, as they seem to reappear when you least expect it. You may be able to defeat each of their attempts, Jumper, but you'll have to spend all ten years of your time here on guard if you want to stay out of some pervert's dungeon.

[+300] Stripped Bare: Oh dear, it seems upon entering this world you were hit by the Jump-chan Slice Technique! All of your supernatural powers and perks have been stripped away, leaving you with only your BodyMod and the purchases you made above. Even your Warehouse access has been cut off, leaving you practically naked in this new world.

[+300] Episode 7: Woah, where did that come from? It seems this humorous world hides significant peril, Jumper. With this drawback active, the normally harmless opponents and challenges you might face are mixed in with some very real danger. One day you might find yourself in a poledancing competition, only to be attacked by a murderous samurai that night. People can and will die if you're not careful, and even the most powerful Jumpers will be matched by threats emerging from the shadows. It seems you're going to have to take this world seriously after all, Jumper.

Scenarios

A New Society

*(Must take the **Hunted** Drawback.)*

It seems Chifusa isn't the only one seeking to break the grip the Manyuu Clan holds on Japan. Before the end of your time in this world, you must unseat the Manyuu Clan and thoroughly destroy the breast-centric society they have enforced for decades. You may accomplish this one of two ways. You can walk Chifusa's path, seeking to master the mystic techniques of this world and grant *every* woman in Japan a bust they can be proud of, or you can form a more traditional political revolution.

You will face many challenges in your quest. Munenori Manyuu is a ruthless tyrant who will take whatever actions are necessary to hold on to his throne. He has an army of samurai at his command and the loyalty of many of Japan's aristocrats to bolster his forces. Worst of all, the citizens of Japan have been subjected to his rule for so long that they *believe* in his ideology. Until the great majority of Japan's people leave breast worship behind and the Manyuu Clan no longer poses a threat, you will still have work to do.

Note that if you took the **Our Word Is Law** perk, its power is disabled for the duration of this Jump. You cannot use this perk to accomplish this task, and must succeed the old fashion way.

[Reward] Island Nation: Should you accomplish your task and liberate Japan from its tit-themed tyranny, the country itself will become your reward! In future Jumps, you may import this nation into the world or as a Warehouse attachment, along with all of its people and resources. Whether you choose to rule this land as a monarch or simply leave it be, this country will retain any developments or changes you make between Jumps. Let your progress carry this land and its people into a golden age!

Notes

Importing Items & Properties: Instead of purchasing the items and properties above, you may also import a similar item or property to receive its special effects. Imported items must be similar in nature to the listed item.

The Nature Of This Jump: Not only does this setting have very limited source material, but the stories that *are* featured tend to focus on a very small group of characters. As a result, there isn't a lot of evidence to use when inferring what a male Jumper in this world would look like, or how someone without breasts would interact in this society. I have done my best to create a Jump that all kinds of Jumpers could enjoy. When all else fails, feel free to fanwank responsibly.

Mother's Power: This perk grants you direct control over many aspects of your reproduction including your fertility, the number of children carried with each pregnancy, the duration of that pregnancy, and what traits are passed on to each child.. Non-female jumpers can also use this perk by passing the relevant benefits on to their partner. Fanwank responsibly.

Differences Between "Upheaval" & "Our Word Is Law": Though these two perks may appear similar at first glance, the effects they offer are completely different. The **Upheaval** perk is centered around changing peoples' minds. This can be on a grand scale, like inspiring altruism, or on the individual scale, like turning old enemies into allies. **Our Word Is Law**, on the other hand, offers a chance to alter the meta-narrative of a setting at the start of each Jump. Rather than slowly shift a society organically, you can rewrite history with the snap of your fingers. Just make sure you're willing to follow the rules you set for everyone.

Future Worlds & The "Breasts" Section: At the end of each jump, you may choose to either retain any changes made to your body during your adventures or reset your anatomy to the breasts (or other assets) purchased in the Breasts section of this Jumpdoc. You may also (separately) choose to import the social status granted by your body at the start of each jump, regardless of whether the new setting equates body parts with social status like this world does. If you choose to import with the social penalties of the "Washboard" option, then you may choose to receive a bonus **+200cp** stipend for your pseudo-drawback.

Lethal Lactation Technique: Some liberties can be taken concerning the imbibed liquids. For example, you could choose for the toxins you emit to affect your targets on contact instead of requiring ingestion, letting you poison someone by merely spraying them with the offending liquid, or intoxicating someone with a splash of potent alcohol.

Factory Item: You may change the product your factory manufactures at the start of each jump, and will receive the necessary staff and equipment to produce this product. The factory can retain changes made during a Jump, but can also be reverted to lower technology levels should you want to incorporate it into a historical or fantasy setting. This item does not include the raw materials needed for your chosen product or the means to transport the finished goods to your markets. You will need to use your business sense (or other perks and items) to solve these problems.
