By: PriorPossible834

You're pretty cool so take these **1000 CP** to be more cool

Origin:

The Best Origin

You're The Best! Yay for you!

General Perks

The Best Hair Style(100)

You heard that correctly! Now all of your alt-forms can have a mullet!

The Best Music (200)

That's right! Hunka Hunka Burning Love will play at all times around you, you can modulate the volume at will to the point it can even shatter Glass!

The Best Smile (300)

It's so good that people who see you smile will pass out on the floor- stone dead, some particularly weak people might turn into actual stone!

Best Perks

Mind Control Vulnerability (100)

You know what's a cool plot point? Someone getting mind controlled and having to fight it off- this perk will make it so you can always be mind controlled regardless of your immunities and ensure you

get mind controlled at least once.

Suffering Builds Character (200)

You can make any of your Drawbacks worse whenever you want! You won't be able to make them better in anyway… but you can always make them worse.

Rival Mode (400)

From now on you'll always be weaker than the protagonist of the setting, they'll be able to keep surpassing you somehow some way no matter what you do- isn't it great that you encourage heroes to get stronger?

Power Of Friendship (600)

Good news! You'll never be able to resolve another conflict again, but your friends will after you give them a speech about the importance of friendship and how much they mean to you. In fact your friends

can't lose after you give a speech like that!

Item

The Best Snack (Free)

Chocolate Covered Orange Peels, Yummy!

Companions:

Your Best Friend

This guy is better than you at everything and your friends like him more, great guy though.

Drawbacks

What? There can't be any of those in the BEST Jump don't be silly

I think he's gone...

Alright Jumper listen up, I can get you away from this Madman but I need you to trust me alright? Take the next Drawback.

The Worst (-1000)

You lose access to EVERYTHING bought or acquired with CP for the next 10 years, you'll be sent back to a mundane earth for that entire time.

See you on the other side, Partner... what? Will I be ok? You're sweet but... you should put more trust in me.
