The World of Tamano Kedama

A Jump by Sistercomplexkingpin
Version 1.1

Introduction

Step into an imaginative world brought to life by Tamano Kedama, where original works like *Lulum Serices*, *It's All Your Fault*, and *I'm a Servant to These Small Succubi* unfold. In this setting, succubi are central inhabitants. Besides their hidden existence, the world mirrors Earth as it was in 2018. Usually, succubi conceal themselves from the general public, making the world seem devoid of supernatural phenomena. Their true nature only emerges when it is time to feed.

You will arrive in this world one week before Tiffany Lilith Stella becomes a High Succubus, and you will remain here for ten years after that event. Since all major events in this setting take place in Japan, your starting location will also be in Japan, somewhere near where the story's events are destined to unfold.

Take these **+1000 Charm Points** to start your journey into this world of debauchery.

Origins

Any origin can be taken as Drop-In.

Regular Human (Free)

This world is largely populated by ordinary humans, and you are one of them. Your age and skill set determine the background you possess. You might be a student, a teacher, or an average businessman, depending on what best fits you. Regardless of the role you choose, you may decide whether your background includes existing connections or whether you begin entirely alone in this unfamiliar world.

Charming Succubus (-200 CP / Restricted to Female)

Succubi are an all-female race with no male members. They can be born from a wide variety of sources, including plants, magical beasts, humans, and other origins. To survive, succubi require human essence, which they extract from a human's life force or semen during intercourse. To do this without exposing themselves, the succubus society has formed long-standing arrangements with influential men in the world's political spheres. Acting as escorts for favors and resources, allowing them to better conceal their existence from the world.

Succubi also possess their own separate dimension called the Dream World. However, most choose to reside in the human world instead. You are a succubus yourself. Whether you possess an established history within succubus society or are a newly born and unknown existence in this world is entirely up to you to decide.

You can choose your age freely for all origins, as long as it's within reason.

Perks

Perks are discounted 50% for their respective Origin, with the 100 CP Perks being free.

General Perks

Basic Protection (Free)

In this setting, it is expected that you will engage in a lot of sex, and dealing with the complications that might arise from it would be an unnecessary nuisance. With this perk, your body will never suffer organ strain or soreness as a result of sexual activity. You are also completely immune to sexually transmitted diseases and infections, ensuring that your sexual organs and orifices remain entirely free of infection. Finally, you gain full control over your fertility, allowing you to prevent any unwanted pregnancies at will.

Art Perspective (-100 CP)

A new perspective has been unlocked, allowing you to perceive the world in an entirely different way. You can now alter how reality appears to you by changing its visual style. You may view the world through the art style of Tamano Kedama, or adopt the style of another artist or studio if that better suits your taste, such as Ufotable, MiHoyo, MAPPA, or any other style you are familiar with. As long as you understand the chosen art style, you can reshape the appearance of reality to match it. This perk affects only your own perception and has no impact on the actual world or other people. You may activate or deactivate this ability at any time.

Hentai Physics (-200 CP)

Reality is not like the hentai you watch. Bigger is not inherently better and can often be painful, and many sexual activities normally require extensive preparation. With this perk, however, you can bend physics to follow the logic commonly seen in hentai. The sexual organs and orifices of both you and your partner can comfortably stretch to accommodate objects of any size, with pleasure increasing the more they are stretched. Anal activity requires no preparation, as both you and your partner will always be perfectly clean and naturally lubricated upon penetration. Likewise, the mouth will automatically produce sufficient saliva to ensure oral activity is consistently comfortable and pleasurable. With this ability, you never need to worry about physical limitations during sex again.

The Ideal You (-400 CP)

Ever wanted to look different, or felt dissatisfied with your current appearance? This perk allows you to freely reshape how you look, as long as the total change does not exceed 50% of your original mass. You may alter your height, proportions, weight, and the size or shape of any body part according to your preferences. You can also apply permanent makeup of your choosing and change the color of your hair, nails, skin, and eyes to any color you desire.

Additionally, you gain full control over body hair, allowing you to remove it entirely or keep it in only specific areas. You may also decide whether your hair and nails grow naturally or remain at a fixed length, automatically returning to that length if they are cut. You may change your appearance once per month.

The World of Succubus (-600 CP)

What a wonderful world this is, filled with the sin and debauchery brought about by the presence of succubi. What if you could bring this corruptive race with you wherever you go? With this perk, you can. Whenever you enter a new jump, you may introduce the succubus race from this setting into the current world. You may even choose specific canon female characters from that setting to be transformed into succubi.

Once introduced, succubi are seamlessly integrated into the setting as though they had always been part of it. However, this integration does not alter any canon events that occurred prior to your arrival.

Regular Human

Fluid Overload (-100 CP)

Running out of bodily fluids while feeding a succubus can be both awkward and dangerous. This perk eliminates that concern when the need arises. The cost of producing bodily fluids, whether semen, breast milk, or even blood, is reduced to 1% of its normal expenditure. This allows you to produce an extraordinary amount of fluids without experiencing fatigue or strain, rapidly replenishing whatever is lost almost instantly. However, it is still possible to run dry if the amount drained exceeds what you are capable of producing.

Perfectly Normal (-100 CP)

It can be troublesome if others constantly question you for being accompanied by a beautiful succubus at all times. This perk prevents that issue. As long as your companions remain within 60 feet of you, people will not question your confidants in any way. Those around you may have animal ears, horns, wings, or wear extremely revealing clothing, and observers will perceive nothing as unusual, behaving as though everything is completely normal. This effect also applies to you if your own appearance differs from what is considered normal in the setting.

Dream of the Past (-200 CP)

They say intercourse is one of the most intimate acts one can share. This perk deepens that intimacy by allowing you to witness the past of the person you are with. During intercourse, you can view their past as though it were a living film, letting you understand who they are and where their trauma began. You are not reading their thoughts. Instead, you observe their memories as if you were present alongside them when those moments occurred.

Only significant events in their life are shown, specifically the experiences that shaped them into the person they are today. While you are viewing their past, time in the outside world comes to a complete standstill until you finish.

Delicious Essence (-200 CP)

Succubi require essence to survive, yet many are selective about the kind of essence they consume, developing distinct tastes and preferences. When it comes to you, however, such distinctions no longer matter. Your essence, including your life force, bodily fluids, and soul, is irresistibly appealing to all demonic entities, succubi included. Your bodily fluids, in particular, are exceptionally enticing. A single taste is enough to leave any succubus completely captivated, with all other sources of essence seeming inferior by comparison.

Continued consumption can even foster a deep dependency on you. Despite this, you are never placed in mortal danger. No matter how much essence is taken from you, a minimum amount necessary for your survival will always remain, and cannot be drained by any means.

Gehenna Seizer (-400 CP)

Many succubi view humans as little more than livestock, looking down on them with arrogance. Some half succubi even harbor open hatred toward humans, making equal relationships or courtship extremely difficult. With this perk, that is no longer a concern.

You now possess charm and charisma capable of matching even the succubi themselves, allowing you to captivate them through honeyed words and alluring actions. Even races or individuals who despise your species will find themselves far more tolerant of you. As an added effect, the stronger someone's hatred toward your species is, the more irresistibly drawn they become to you on a personal level. They may continue to resent your species as a whole, but they will make a clear exception for you alone.

Demon Magnet (-400 CP)

Some people are completely ordinary, yet still draw succubi to them like moths to a flame without making any effort. You now possess this same quality. Demonic and evil entities are naturally drawn to you and view you in a favorable light. You carry an aura that softens their cruelty toward you, encouraging kinder behavior, preferential treatment, and advantageous deals without the need for manipulation or deception. Succubi in particular will be instinctively pulled toward you, abandoning their original feeding targets to seek you out instead.

Lust Overpowers All (-600 CP)

Those succubi and their pesky spells often allow them to act freely, even when you could overpower them physically. That is no longer an issue. You now possess an innate resistance to magic and soul manipulation, reducing the effectiveness of spells cast upon you and making your soul far more difficult to tamper with or steal. However, this is not the true strength of this perk.

Its full potential manifests when you feel lust. The more intense your lust becomes, the less effective all forms of magic and soul manipulation are against you, to the point where you can shatter spells through force of desire alone. When your focus narrows completely, and your intent becomes singular, no spell will be capable of standing between you and your target.

Succubus Breaker (-600 CP)

Outlasting a succubus in sex is nearly impossible, and satisfying their insatiable appetite is even harder. Fortunately, you now possess the perfect tool for the task. You gain what can truly be called a Succubus Breaker. At will, you can increase the length of your penis to 30 inches, becoming extremely thick, while releasing a scent that strongly intoxicates females, especially succubi. The fluid it produces acts as a powerful aphrodisiac, greatly increasing the pleasure others feel and driving even those who normally feel little desire into intense lust. You do not require refined sexual techniques. The simple act of penetration and thrusting alone is enough to push a succubus to beg for mercy under the intensity of the pleasure. Afterward, nearly any succubus or other female will submit to you completely. If you did not previously have a penis, one will form for this purpose.

Charming Succubus

Succubus Physiology (Free / Mandatory & Exclusive to Charming Succubus)

Although succubi resemble humans at a glance, their anatomy is fundamentally different, as they don't age and are immune to regular human diseases. They possess short elf-like ears, slit pupils, either small black wings at the waist or a black spaded tail, and a small glowing tattoo-like crest over the womb area that only appears when they are aroused.

Every part of a succubus is designed for intimacy, down to their internal organs. Their tongues are highly flexible, and their mouths are structured to produce no germs or dental problems. They feel warm, generate abundant saliva, and are shaped to make oral sex exceptionally comfortable, closely mimicking the sensation of a vagina.

Their mouths and throats are erogenous zones.A succubus' body and hair are impossibly soft, smooth, and silky, surpassing even the finest bedding in comfort. They have no body hair aside from their head, and their hair never suffers from damage, thinning, or loss, no matter how roughly it is pulled. Their bodies are extremely flexible, allowing them to bend into positions impossible for humans without pain or strain. Their skin never sags, blemishes, or suffers from any condition, and only tans if they choose to. Succubi survive entirely on essence, meaning they do not require food or water, though they still need sleep. They can eat or drink for pleasure, but gain no nourishment from it, and their bodies produce no waste. Their shape never changes regardless of consumption or lack of exercise, maintaining itself perfectly at all times.

Their sexual anatomy is far beyond human norms. Their anus, anal canal, and rectum function like a vaginal canal, acting as a powerful erogenous zone that naturally lubricates when aroused. Their vagina provides pleasure far beyond anything a human or a sex toy can offer, feeling as if countless hands and tongues are caressing the partner at once. Even their womb is an erogenous zone, far more durable and flexible than a human's, where pressure brings intense pleasure instead of pain. The womb can be penetrated and serves as the succubus' true G-spot.

The succubus womb can also taste, allowing them to sense emotions and the quality of a partner's semen. Stronger emotions and higher-quality essence are especially delicious. Because succubi do not produce waste, their bladder and urethra function as sexual organs as well. The urethra acts as a narrow vaginal canal, while the bladder produces a clear fluid that acts as a powerful aphrodisiac instead of urine, which can squirt out during climax. In fact, all body fluids produced by a succubus carry a sweet scent and act as aphrodisiacs. The aphrodisiac effect of the succubus's own fluid doesn't affect them. Additionally, a succubus's sexual organs and orifice are also extremely tight and highly flexible, always returning to their original shape and firmness, no matter how much they are stretched or used.

Succubi drain a man's life force through his penis. When he ejaculates, both semen and life force are released together and absorbed by the succubus through her mouth, anus, or womb. This essence can be converted into nourishment or refined into mana to be given to others. It is unknown whether succubi can naturally become pregnant, but this perk allows you to do so if you choose. You may freely choose the color and appearance of your wings, tail, and crest.

False Innocence (-100 CP)

How is this possible? Despite being a succubus, you radiate a saintly aura filled with gentle warmth, like that of an angel. This creates an innocent and pure presence that conceals the temptress beneath the surface. This aura also gives you a subtle motherly quality. Those who long for maternal affection may instinctively feel comforted by you and may even call you "mom" if you act kindly toward them. Because of your innocent appearance, people are more inclined to protect you and far less likely to suspect you of wrongdoings.

Half-Beast (-200 CP)

You are the result of a union between a succubus and a magical beast, creating what is known as a Half Beast. Instead of the usual wings and tail, you possess a pair of horns and an animal tail of your choosing. While Half Beasts normally have weaker succubus traits, lacking a crest and absorbing essence less efficiently, you do not suffer from these drawbacks. Half Beasts also possess traits that standard succubi lack. They can drink blood to extract essence and use blood as a medium for magic and rituals. In addition, they are capable of consuming souls to grow stronger, though the increase gained this way is quite small.

Plant-Based Succubus (-200 CP)

Many succubi are born from plants and live outside the succubus society, and you are one of them. You have inherited the traits of a flower, making your breast capable of producing milk that tastes similar to nectar. Lactating in amounts similar to a pregnant human. You can freely adjust the size of your breasts, which directly increases how much milk you can produce.

Because plants are often associated with remedies, your body fluids can heal minor wounds and mild infections. In addition, you may choose to alter the spade tip of your tail into a flower-like form of your choosing. This flower can open to reveal an organ similar to a vagina, allowing you to feed on a man's essence through your tail rather than your body.

Dream Wanderer (-400 CP)

It is well known that succubi can enter and manipulate dreams, but this is usually a learned skill, and some succubi never master it. For you, dream manipulation comes naturally. You can enter the dreams of anyone, regardless of their power, as long as they are asleep or weaker than you, and you can pull them into a dreamscape you create yourself.

Within these dreams, you may drain life force through intercourse just as you would in reality, and any lewd actions you perform will have real effects on their physical body. You can also access any dream-related dimension, no matter how hidden or sealed it may be. The dreams you create follow your rules, and the only way for someone to escape is if you allow it or if they die within the dream. Death in the dream has no consequences for the body in the real world.

Charming Allure (-400 CP)

Succubi are often described as temptation made manifest. With this perk, it becomes literal. Your sex appeal increases to the point that you embody the ideal form of attraction for others. This allure transcends personal preferences, biases, gender, and even species. Any being capable of arousal or possessing sexual organs can be affected.

You constantly radiate charm and seduction, and even your unconscious movements appear alluring and pleasing to the eye. A single glance at you can stir desire, even in those who dislike your gender or species. Your presence alone can provoke sexual interest, regardless of what you are wearing or doing.

If you are naked, observers will not react with fear or disgust, but with desire, though whether they act on it remains their choice. You can freely toggle the arousal effect of this perk and set limits on how strongly others are affected, allowing you to prevent unwanted behavior.

High Succubus (-600 CP)

Within the succubus society, there is a clear hierarchy. Some are born into noble lineages, while others must earn it. Normally, a succubus becomes a High Succubus by experiencing a new form of pleasure and consuming high-quality essence. Upon ascension, they gain a Mark of Ascendance, developing either wings or a tail they did not previously possess, along with a far greater reserve of magical energy and the ability to cast two spells at the same time.

This perk evolves you directly to a High Succubus without needing to meet those demanding conditions, while also granting additional benefits. By consuming a man's essence, you can gradually increase your mana pool, and you gain exceptional sexual skill. Once intimacy begins, you instinctively know how your partner's body responds and how to stimulate them for maximum pleasure.

In addition, once every ten years or upon entering a new jump, you may form a contract with another being that causes them to share your lifespan. As a succubus, your lifespan is endless, meaning the contracted individual will cease aging and return to their physical prime if they have already passed it.

Succubus Magic (-600 CP)

Although many succubi may appear small and harmless, their true advantage over humans is magic. Through magic, a succubus can restrain humans, disguise their appearance by altering features such as hair and eye color, and conceal or dismiss their inhuman traits entirely.

They can create shadow portals, manipulate shadows and give them physical substance, alter the memories of those weaker than themselves, and cast revitalizing spells that restore stamina and male vitality. Their magic also allows them to change clothing instantly, prevent ejaculation, grow a penis, and use stored essence to simulate ejaculation. Most importantly, to fly freely. With this perk, you gain access to all of the spells mentioned above.

Succubus magic has even greater potential beyond this, which you may uncover through practice and experience. You also gain a decent-sized mana pool to reliably cast these spells.

Items

You get one discount for each price tier of items.
Items are discounted 50% for their respective Origin, with the 100 CP Items being freebies.
Similar items can be imported without extra cost.

Succubus Fashion (Free)

Succubus fashion is highly distinctive, designed to be erotic and revealing, often showing large amounts of skin and sometimes barely covering the body at all. One of the most popular styles consists only of open-toed stockings with open heels and long mesh gloves.

You receive a personal closet containing every outfit worn by succubi in the works of Tamano Kedama, including all matching accessories and footwear. Any clothing placed inside this closet is automatically cleaned, repaired, and perfectly adjusted to fit your body. The closet itself is nearly impossible to destroy.

Works of Kedama (Free)

You receive a large bookshelf containing every work Tamano Kedama will ever create, fully uncensored and translated into the language you find most comfortable to read. The pages are extremely durable, nearly impossible to tear or stain, so you never have to worry about damaging the books. If you wish, your own sexual experiences can also be turned into a book illustrated by Tamano Kedama and added to this collection.

Succubus Wings (-100 CP)

A pair of hair ties adorned with small bat-like wings. When worn, they cannot be removed unless you choose to do so and will keep your hairstyle perfectly intact, even during intense activity or harsh conditions. The wings subtly react to your emotions, fluttering when you are happy and lying flat when you are sad. The hair ties themselves are indestructible.

Matching Phone (-100 CP)

A smartphone from Earth in 2018 with a small plush accessory attached. The phone itself is nothing special. Its true value lies in a special app installed on it. This app allows you to find sugar daddies or sugar mommies willing to financially support your lifestyle. The people using the app are from the local setting and can be very generous. Canon characters may also appear, as long as they would reasonably use such an app. If the phone is ever broken, you may choose to have the app automatically installed on any other device you own.

Onsen Ryokan (-200 CP)

You now own a traditional Japanese inn with hot springs. The inn can accommodate up to twenty guests and provides the same number of yukata for those staying inside. One of the hot springs has special properties, relieving back pain and fatigue while also increasing the sex drive of anyone who bathes in it. When the inn is empty, both the building and the hot springs clean themselves automatically. The inn has unlimited utilities and will slowly repair itself if damaged.

High-Rise Condo (-200 CP)

You own a twelve-story high-rise condominium with a luxurious interior, a spacious bathroom, and top-tier furniture available on Earth in 2018. You may freely choose the interior design and furniture style. All utilities are fully paid for. The building conceals any supernatural presence within its walls, causing all residents to appear completely ordinary to outsiders. If the structure is damaged, it will slowly repair itself over time.

Political Contacts (-400 CP)

You receive a black notebook containing a list of contacts. The notebook itself is unremarkable, but the people listed are among the most influential and powerful figures in the current setting. They can provide money and fulfill requests such as arranging a high-rise condo, creating fake identities, or granting other luxuries that ordinary people could never obtain. As long as the request does not negatively affect them, they are willing to help. In return, they ask for sexual favors. This does not need to go all the way, as even oral sex is sufficient.

Forest Tower of Sol (-400 CP)

You receive a tall medieval stone tower designed to seal the physical and supernatural powers of those confined within it. Any entity sealed inside is reduced to the abilities of an ordinary human. The tower is fully furnished with items appropriate to the medieval era. Its windows and entrance are secured with iron bars, which only you may raise or remove at will.

The structure cannot be broken from the inside and will slowly repair any damage inflicted from the outside. While the tower is theoretically capable of sealing any being, the target must be inside it and either willing or unable to resist the sealing process. Once sealed, only you and your descendants possess the authority to release them and restore their powers.

Mana Bank (-600 CP)

You receive a large magical device capable of converting body fluids into supernatural energy and converting energy back into fluids. Its storage capacity for both is effectively limitless. It is especially useful for feeding young succubi who have not yet learned how to extract essence on their own. The converted energy can be used to restore your personal reserves or to power other devices, functioning like a universal power source. The conversion efficiency improves based on the quality of the fluid or energy supplied. The device requires no maintenance and is nearly indestructible.

Dream Realm (-600 CP)

You gain ownership of a separate dream-based dimension roughly the size of a country. You may freely decide its environment, whether it is a sunlit paradise, a land of eternal night, a heaven-like realm, or something else entirely. This dimension is extremely well hidden and difficult to access, even for succubi. It can only be discovered by someone who is deliberately searching for it and is vastly more powerful than you.

In addition to being concealed, you can enter or exit this dimension from any location that does not restrict teleportation or dimensional travel. As long as you know the destination, even if only by name, you may exit there directly. You may bring others into this dimension as well, provided they are willing or unable to resist. Those brought inside cannot leave unless they possess their own means of dimensional travel or you allow them to exit.

Companions

Import Companion (-50 CP)

You can spend 50 CP to import an existing companion or create a brand-new original companion. The companion can choose any origin, get all the discounts related to that origin, and the freebies that origin provides. The companion gets +600 CP to spend on perks and items.
This option can be purchased multiple times.

Canon Companion (-50 CP)

By paying 50 CP, if you can convince a character in this jump to join your journey before this jump ends, you may recruit them as a companion. This option will make it so that you'll have several chances to meet the character you chose in a favorable condition.
This option can be purchased multiple times.

Tiffany Lilithstella (-50 CP)

Tiffany is a short blonde girl with long hair, red eyes, and the typical traits of a succubus from the Lilith lineage. Despite her noble birth, she struggles to control her mana and can short-circuit when converting semen into mana. Even with her poor mana control, Tiffany knows a wide variety of spells. She is extremely sociable and possesses enough charisma to charm almost anyone. Although she acts somewhat bratty, she has a caring personality and treats her subordinates well, which earns her admiration from other succubi. She is highly skilled in sex, especially oral, yet she has never had vaginal sex before. She met you during one of her feeding periods, and after spending a night with you, she became enamored and decided to claim you as her servant, living with you. Deep in her heart, however, she sees you as a partner she can spend eternity with and would follow you on your journey without hesitation.

Chole Lilithstella (-50 CP)

Chole is a short girl with long white hair and red and yellow eyes. She is a Half Beast who struggles to extract essences from men because she cannot properly control her strength, often consuming their souls instead. Due to her nature as a Half-Beast, she was imprisoned by humans for a very long time, which led her to develop a deep hatred toward them. Under normal circumstances, Tiffany would have been the one to free Chole from her imprisonment. However, since you purchased this option, you became Chole's savior instead.

After being rescued, Chole became your familiar. The trauma of her imprisonment left her mentally unstable, causing her to develop an intense obsession with you, as you are now her emotional anchor. She will follow you wherever you go and obey your orders without hesitation. All she desires is to remain by your side, and she would join your journey across worlds without needing to be asked. While she lacks Tiffany's breadth of spell knowledge, she more than compensates for it with the sheer magnitude of her magical power.

Lulum / Noilum (-50 CP)

Lulum is a petite girl with long pink hair and violet eyes. Her full name is Hippeastrum Hybridum, though she prefers to be called Lulum. She is a succubus born from plants and is relatively young by succubus standards. Lulum has a very gentle, caring, and motherly personality, and she enjoys doting on others. She can lactate due to inheriting a flower's ability to secrete nectar, though her milk is extremely aphrodisiac. Despite her great talent for sexual activities, she had never engaged in sex before meeting you, having decided that you would be her first target to feed on.

Because of her age, she never joined the succubus society or interacted much with other succubi, leaving you as her entire world. To better support you, she taught herself how to buy groceries, clean the house, wash laundry, and cook human food, eventually making these skills her specialty. This behavior, however, is looked down on within succubus society. Lulum possesses a second personality called Noilum, which only emerges when she is starving.

Noilum represents Lulum's suppressed succubus instincts and behaves like a typical succubus, though far more perverted than Lulum herself. Despite being a second personality, Noilum has a different appearance, possessing tan skin and silver hair instead. Lulum only knows memory-related spells and is not particularly skilled with them. However, she is a prodigy at manipulating dreams, capable of recreating highly realistic environments. Within the dream realm, Lulum and Noilum exist as separate bodies.

Sutora Iga (-50 CP)

Sutora is a short girl with black hair, yellow eyes, and a beauty mark beneath her left eye. She was born from a small plant known as witchweed. Although she is physically weak, even by human standards, her unique magic, Mistletoe, allows her to invade human hearts and draw out their essence. Because she struggles to control her magical power, she often ends up unintentionally charming those around her. Unlike most succubi, she disguises herself as a student and even attends school.

While she is acquainted with a few succubi, she is not part of succubus society and has repeatedly declined their invitations to join.Sutora has a highly teasing personality. She enjoys flirting, loves to travel, and harbors a hidden masochistic side. Unlike other succubi, the tip of her tail functions as a sexual organ, which she uses to feed on essence. She first met you during the summer, where the two of you shared an intimate moment. Afterward, she left and relied on her student disguise to find sugar daddies through a matching app to sustain herself.

Deep down, she longed for a place she could truly call home. When she reunited with you after a long time, she realized that you were the home she had been searching for. She threw her phone away, deciding that as long as she had you, she no longer needed the matching app, and expressed her desire to travel and experience new sights together. If you were to ask her to journey across worlds with you, she would accept without hesitation.

Drawbacks

Supplement Toggle (+0 CP)

Despite being a supernatural world, the history of this setting mirrors that of Earth, as succubi are a minority compared to humans. Many human men will never encounter a succubus in their lifetime, and this is even more true for human women. To spice things up, this jump may be used as a supplement to another jump document, and vice versa. You may merge the settings of both jumps or carry over purchases between them. However, drawbacks from both documents will still apply, and the CP pools for each jump remain separate.

Earthly Pleasures (+100 CP)

Like a certain blonde succubus, you are easily corrupted by earthly pleasures, though not of the sexual kind. Even when you have no real need, you can quickly become addicted to fine cuisine, wine, video games, and other forms of entertainment. Your tastes gravitate toward extremes, as you desire either the very best or indulgent junk food that simply tastes good, with no middle ground between the two. Maintaining this lavish lifestyle over the long term will require a significant amount of money, so it would be wise to find a job quickly.

Flat is Justice (+100 CP)

It seems your preferences for an ideal partner have changed. Like most men in this world, you now seek someone who is short and petite. However, being seen with such a partner often invites misunderstanding, as others may mistake them for your child or younger sibling rather than a romantic partner. Those who do not fit this specific build fail to attract your interest at all, making it difficult to find a partner for intimacy, as you're unable to feel aroused otherwise.

Weak to Temptations (+200 CP)

In a world where succubi exist, being weak to temptation is the greatest flaw one can possess, and it is now a flaw you carry. You are easily swayed by the seduction of those you find attractive, readily agreeing to their requests or favors. If sexual attention is involved, you become little more than a doormat for those who appeal to you. If you wish to avoid willingly becoming their servant, it would be best to steer clear of succubi entirely.

Molester Bait (+200 CP)

It is no secret that men in this world are more perverted due to the long-standing influence succubi have had on history. As a result, you will attract molesters like moths to a flame. If you do not actively defend yourself, it is guaranteed that you will be sexually molested at least once while in public spaces. Perverts may take pictures of you and discuss you among themselves. Some may even attempt to kidnap and rape you, though they would release you afterward. If you wish to avoid dealing with this mess, staying at home is your safest option.

Laws of the Succubus (+400 CP)

Succubi are bound by a strict law that forbids physically harming or killing humans, and this law now applies to you as well. No matter how powerful you become, harming a human is no longer an option unless you wish to face the full wrath of the succubus society. That society is populated by powerful and ancient succubi who are nearly impossible to defeat with what is available in this document. Even if you are male, the succubi will prioritize punishing you first, regardless of any perks you possess. While they will not kill you, they will drag you back to their realm and imprison you there, forcing you to either manage their semen banks as a female or serve as a living food source as a male.

Succubus Stalker (+400 CP)

Careful now, as you have drawn the attention of a very powerful succubus named Miucha Mia Lilithstella. Miu is an extremely dominant and nymphomaniacal succubus who refuses to accept rejection. She is infamous for her cruelty, having destroyed the minds of humans who failed to satisfy her. Her interest in you twists into a dangerous obsession, bordering on yandere behavior, and she will eliminate anyone she perceives as a threat to gaining your affection.

Miu will constantly stalk you, relentlessly seeking your attention while freely abusing her overwhelming magical power to do so. This becomes far worse if you are male, as she will actively target your essence and continue draining it until you are left on the brink of death if she manages to catch you. After completing the jump, you may take Miu as a companion. If you do, her behavior will be significantly tempered, and she will begin to genuinely care about your well-being rather than viewing you solely as an object of obsession.

Power Lockdown (+600 CP)

All perks and items you acquired from previous jumps become inaccessible for the duration of this jump, except your body mods and warehouse. You cannot rely on any abilities or tools from prior jumps, forcing you to depend entirely on what is available within the current setting. This drawback may be taken even if this is your first jump.

Zen of Mind (+600 CP)

We all know why you came to this jump. You are here for the lewds. However, with this drawback, those desires are pushed far into the background of your mind. You no longer feel sexual pleasure, nor do you experience any desire to engage in intercourse. Instead, you enter a serene, zen-like state that even the Buddha would be proud of. No matter how tempting a succubus may be, you will not become aroused, and their seduction will have no effect on you.

You will not engage in any sexual activity while this drawback is active, and you are completely at peace with that fact. Form is emptiness, and emptiness is form, which best describes your current state of being.

The Story has concluded

What is your choice?

Sweet Dreams Continues

You'll be moving on from this place to the next world that awaits you.

Dreams of Depravity

You decided to permanently stay behind in this world; this will be your home from now on.

Waking Up from the Dream

You'll return to your original world, taking everything you've gained back with you.

Changelog
