

Welcome to the Suggsverse! Don't know what that is? Well, here's a rundown. 23 years ago Chris Raion Spades came into the world. You might be thinking he was born, or created, or use some other naïve term to suggest that his existence was anything besides some straight up magical bullshit. Well, you'd be wrong, 'cause one day he just appeared. You arrive 23 years later, at the beginning of the story of the Heir of the Stars. You have 1000 Cosmic Points to start.

Origins:

Drop In [0cp]: You, just like a certain Chris Raion Spades, just appear into the world. You don't know why you're here, or if you have a goal.

Heir to the Stars [100cp]: Congratulations. You're a potential Ace of Spades, and Heir to the Stars. You stand beyond the power of other beings, with the potential to transcend and become an Ace of Spades, a being of equal power to The Ace of Spades.

♠The Ace of Spades♠ [1000cp]: Straight to the good stuff, eh? You are the end all, be all of everything, the One Above All, the Author of this story and every other one. You are beyond the Universe, the Omniverse, THE ALL, the Manifold, and even the Rabbit Hole, for you reside in the Art Gallery, making all of creation.

Perks:

100cp perks free for origin, discounts on the rest.

Drop In

Quantum Jumping [100cp]: You have the power to jump from this world to another, jumping across countless worlds in a time span it could be said that you exist in both at once. Any world that exists is yours to travel to.

Enhanced Motion and Speed [200cp]: You're fast. Really fast. Sonic fast? Think faster. The Flash? Well, I'll stop you there, because the answer is yes. You can move at such speeds that you could kill a group of men in 0.005 attoseconds. For scaling purposes, a single attosecond is the time it takes for light itself to move the distance of about a single molecule. What's more, you have some insane reflexes, as in, you move in potential space. As in, you move before movement becomes a thing. Don't understand? Don't worry, you don't have to.

Absolute Immortality & Regeneration [400cp]: Some enemies don't play fair. Some of them decide to just wipe you from existence itself, removing you from ever having *been*. Well, that's not an issue anymore. Should it ever happen, you will regenerate perfectly, as if you had never been undone. It doesn't matter if you've been shot, stabbed, undone, or never made to begin with. You always come back. As a bonus, should you ever die in a jump, not only will you come back but it will no longer count as a loss for the purposes of Jumpchain either.

Events and the Story [600cp]: The ebb and flow of the Story of everything is yours to control. Before information can be processed you are capable of reconfiguring both Nothing and Possibility, allowing you to reverse everything to before Creation or even fold events on themselves, wiping them from existence. You can even tear through events themselves, allowing you to arrive at any event without particular knowledge, and should you need to you can even halt the EVENT itself.

Heir to the Stars

Automatic Barrier [100cp]: You are surrounded by a field of electromagnetism, gravity, hundreds of balls of plasma, and a vector displacement field, all of which are combined to protect you from just about anything, and can even be used to disperse an infinite universe.

Perfect Immortality [200cp]: You are beyond immortal. You are perfectly immortal. You cannot be killed, erased, or undone, and should all of reality be reverted from existence you will remain, standing perfectly fine.

Anti-Omni [400cp]: You exist in a state of reflection outside of everything. As such, you exist outside of everything and cannot be known or affected in any way, even by those who are omnipotent. Even if they be Omnipotent, Omniscient, and Omnipresent, they will be unable to affect you, know you, or be you.

Absolutely Radiant [600cp]: Not only can you control light, but you can control all light, from all realities, all universes, and even all omniverses. You can use it to attack your foes, or hold them in an infinite prison of light, and you can even gather all of the energy from the omniverse in order to attack your foes with a lion made from this energy, an attack that cannot be stopped and has the full force of literally everything behind it.

♠The Ace of Spades♠

♠The Ace of Spades♠ [Free and restricted for ♠The Ace of Spades♠]
You are ♠The Ace of Spades♠, the end all be all of the All, and everything below that and everything above. Most don't realize it, but beyond the universe is the Metaverse, which contains an infinite number of universes. Beyond that is the Teraverse, which contains an infinite number of Metaverses, and beyond that the Petaverse, and so on and so on, all the way up to the Art Gallery. Even that is merely a subset of the Einverse, which is a subset of the Zweiverse, and upwards up until the Heir's Pulse, the sum of everything. All of those perks mentioned before this? You are beyond all of them so completely that to mention them is to not have eyes, for you cannot see. There is nothing beyond you.

Undiscounted

One [1000cp]: Except for this. Above ♠The Ace of Spades♠ are the Voyagers, beings that are as far above ♠The Ace of Spades♠ as ♠The Ace of Spades♠ is above literal nothingness. And you are above even them. The Benefactor has come to reward you by fusing the two of you together, becoming a new, singular being with power transcending anything and everything, all while the Benefactor retcons its very own existence so that it had never been and never could be, barring your own excellency which transcends even that. If I haven't made myself clear enough, you are Omnipotent in the actual sense of the word and not the ways Lionel Suggs, the idiot author of this series, uses it. You are actually and truly Omnipotent. You also have your Spark.

Companions:

Canon Companions [+200cp]

With this you may select infinite people from this setting to become a companion. Honestly do you really want to do that?

Companion Import [200cp]

You may import infinite companions. All imported companions receive a free background and 1000cp to spend. In addition, all imported companions become absolutely loyal towards you.

Drawbacks:

It's all too Stupid for me [+0cp]: You may take your perks and leave this world immediately. In fact, just enter you next jump with the stuff you got here. Go, get out of here.

The Stupid [+∞Infinite∞]: The stupidity of this fictional series follows you, barring the purchase of ♠The Ace of Spades♠ or One. The CP gained here can be used in other jumps as well, and as an added bonus all purchases in future jumps are reduced to -∞, meaning you gain ∞ CP with each purchase as well as a bonus ∞ at the start of every jump.

The End of this jump is here. It is now your choice what to do with your future. Will you return to your original world, move on to the next one, or stay here? Scratch that. Don't stay. Just leave.
