

Black Lilith: Magical Girl Special Hour

By saiman010

Introduction:

Welcome, Jumper, to the multiverse of Black Lilith, a universe created by the infamous Black Lilith Company. In this world, magical girls take center stage, their stories filled with action, drama, and, undeniably, a heavy dose of NSFW content. As you may know, Black Lilith is renowned for its Taimanin series, so it's no surprise that dark, mature themes are commonplace in this multiverse.

Here, magical girls battle for justice against insurmountable odds, yet the line between heroism and corruption is often blurred. Whether clad in skin-tight suits or scantily designed outfits, their appearance is as striking as their battles are intense. The harsh reality is that nine times out of ten, these magical girls find themselves captured, thrust into compromising positions where their courage and spirit are tested beyond limits.

Despite the darker aspects, this universe still holds the allure of adventure, heroism, and resilience. As a Jumper, you'll embark on a journey where magical girls fight not only for justice but for survival, their strength shining through even in the darkest of times. With 1,000 CP at your disposal, the path ahead is yours to shape. Will you stand as a beacon of hope, or will you navigate the shadows that entwine this world?

Prepare for an unforgettable 10-year journey into a universe where beauty meets brutality, and courage battles corruption. Here, the stakes are high, and the fates of magical girls rest in your hands. Choose wisely, Jumper, for your adventure has just begun.

Universe Lewdness:

In this section, you will choose how lewd the universe you enter will be. In the Black Lilith multiverse, it is canon that every universe has both an NSFW version and an SFW version. The choice is yours—will you immerse yourself in the darker, more explicit side of the magical girl's journey, or explore a world that emphasizes lore and heroism?

NSFW Universe:

You have entered a universe where the fate of magical girls is far more perilous and compromising. Much like the original hentai games from which these characters originate, magical girls here face overwhelming odds, often finding themselves captured or placed in compromising positions far more frequently. Their battles are intense, but victory is fleeting, and danger is ever-present.

You'll notice that the uniforms worn by both magical girls and their enemies carry more risqué details, including designs that are clearly meant to highlight their vulnerability. The aesthetics of the world are overtly sensual, and the stakes for the magical girls are not just physical but emotional, as they constantly struggle to maintain their dignity and resolve in a world determined to break them.

SFW Universe:

You have chosen to venture into a world where the focus is less on compromising situations and more on lore, world-building, and the epic battles between good and evil. Here, the story is rich with intrigue, character development, and deep narrative arcs. The magical girls are more competent, better trained, and far less likely to fall into the clutches of their enemies.

The designs of their uniforms are still sleek and stylish, but they offer more modest coverage—enough to maintain the signature aesthetic without crossing into hentai territory. The stakes remain high, but the focus shifts to the resilience of the magical girls, their unbreakable bonds, and their determination to protect the world from the forces of darkness.

Starting World

In this section, you will determine which world or universe you will begin your journey in. Each world is drawn from the Taimanin RPGX continuity and features unique challenges, heroes, and enemies. Roll a 1d7 to see where fate takes you! Or pay 50CP to choose freely.

1. Your Demon Name is Lina Witch

You find yourself in a parallel world similar to Earth. However, this world faces an existential threat from monstrous creatures known as Eaters, which have created forbidden zones, endangering humanity. Fortunately, powerful female warriors called Witches stand as humanity's protectors. However, Witches rely heavily on their partners, who play a critical role in replenishing their mana. How? Through basic physical contact, of course. It's a symbiotic relationship where intimacy becomes a necessary tool for survival.

2. Magical Girl Isuka & Subaru

Welcome to Fiorusica Azil, a magical realm where the Demon Lord was defeated and his soul shattered into thousands of Maseki Stones. These stones, now scattered across the land, are sought by demons who wish to resurrect their fallen master. To counter this threat, Maseki Stones have been embedded into artificial humans called Witches, granting them immense power to fight and defeat the demonic forces. Will you join them in their quest to protect the world from the revival of the Demon Lord?

3. Supporting the Righteous Transforming Heroine, Me and the Evil Female Executive

This world follows the story of Souma Koichi, a man caught in a romantic tug-of-war between two powerful women. On one side, there's Melissa, one of the four demon generals, seducing him to join her cause. On the other, Saint Fairy, the righteous heroine, navigates the tender beginnings of love with him. As you enter this universe, you'll find yourself embroiled in a delicate balance between temptation, duty, and the innocence of first love.

4. Magical Girl Lucifer Ouka

In this parallel Earth, humanity is plagued by creatures called Nightmares, whose sole purpose is to fulfill their primal desires by preying on humans. Thankfully, a fairy mascot named AI possesses the knowledge to craft Artifacts, anti-Nightmare weapons based on advanced science rather than magic. You'll join the fight alongside magical girls who wield these artifacts, standing as humanity's last line of defense.

5. Magical Girl Kanata TS

This world blends magic and science seamlessly, treating magic as a formal branch of scientific study. Only licensed wizards are allowed to practice it, and among them are magical girls tasked with combating magical crimes. You will step into a parallel Earth where the line between magic and technology is blurred, and your duty is to uphold the law against rogue magic users.

6. Magical Girl Fairy Knights

Enter one of the most beloved worlds in the Taimanin canon. This classic universe revolves around two heroic figures, the Fairy Knights, who battle a new "enemy of the week" in a fashion reminiscent of early Sunday morning cartoons. The villains are quirky yet dangerous, offering a blend of light-hearted adventure and serious stakes.

7. Taimanin RPGX

You've been summoned to the perilous world of Taimanin RPGX. Depending on the level of lewdness you've selected, this universe could range from dangerous to downright treacherous. Here, dark forces threaten to consume everything, and only the most skilled and determined can hope to survive. The magical girls and taimanin here face constant challenges, and alliances may be your key to navigating this brutal realm.

As a magical girl centered universe, you now possess a stunning transformation scene where radiant light envelops you, accompanied by a captivating theme song playing in the background. During this transformation, your clothes and hair undergo a dramatic change, allowing you to choose any style and accessories you desire. Rest assured, no matter how elaborate or impractical your chosen attire may be, it will never impede your ability to engage in battle, ensuring both style and functionality as you harness your magical powers.

In this world, the attire of magical girls often aligns with what would be typical in a hentai-inspired setting. You may choose to wear a super-tight skin suit that showcases your entire figure or an outfit with minimal coverage that just barely conceals sensitive and private areas.

In addition to the aesthetic transformation, your body undergoes significant enhancements, achieving peak human levels of strength, agility, and speed. You've also gained an identity-jamming ability, which helps protect your secret identity while transformed. This ability scrambles any attempts to identify you while you're in your magical form, ensuring that your true identity remains concealed from prying eyes.

Mana [Free]

As a magical girl, your power originates from your own internal mana pool, setting you apart from those who rely on external sources or artifacts. This intrinsic connection to your mana aligns you more closely with witches and magicians, granting you a unique edge in combat. Your offensive magical abilities are significantly amplified, allowing your spells to hit harder, burn brighter, and devastate more thoroughly than those of your peers.

Hentai Armour [Free/100CP]:

In this world, skimpy armor is not only fashionable but also practical and fully functional. Regardless of the exposure, your armor provides complete protection depending on its type. Plate armor offers maximum defense against physical damage, while wizard armor provides significant elemental resistance. This perk comes free of charge during your stay in this world. Common Sense [100 CP]

Unlike many magical girls in this universe, you possess the rare gift of common sense. You can think rationally, make logical decisions, and avoid the reckless emotional outbursts that often plague others. This makes you far less likely to fall into traps, be fooled by obvious deceptions, or make rash decisions in the heat of battle. Your clear-headedness is an invaluable asset, allowing you to maintain control even in chaotic situations. You are the calm in the storm, the voice of reason, and the strategist others look to for guidance.

Clean Body [100 CP]

This efficiency means you are always operating at peak performance, with a body optimized for endurance, power, and recovery.

Mana Absorption [400 CP]

You possess the ability to absorb mana directly from others, provided they are willing participants. If both parties experience a sense of intimacy during the exchange, the mana you absorb is doubled, enhancing your magical reserves significantly. This ability allows you to replenish your mana rapidly, making you a powerful force on the battlefield. It also opens the door to unique relationships, where trust and cooperation become essential for mutual empowerment.

With age comes wisdom, and you are now a true master of your craft, feared by enemies and respected by allies.

Always Captured [600 CP]

Whether in an SFW or NSFW setting, you are someone the enemy is always eager to capture. In an SFW context, this may tie into plot-driven events where your capture serves a greater narrative purpose. In an NSFW universe, the implications are more obvious, and your capture will often lead to compromising situations. Despite this, you possess an indomitable spirit—no matter the torture or suffering you endure, you will never break. Any wounds inflicted will heal completely without scarring. Within a month of capture, you will always find a way to escape, using your cunning, resilience, and determination to reclaim your freedom.

Your voice can lift the morale of entire towns, bringing peace to civilians caught in conflict.

This power goes beyond simple healing—it rejuvenates the weary and uplifts the hopeless. Your songs can remove exhaustion, clear mental fatigue, and restore vitality. Song of Purification [400 CP]

You have mastered a repertoire of hymns designed to cleanse and purify. When you sing these sacred songs, they purify monstrous creatures, dispelling their malevolent influence and returning them to their original forms. Your voice can also cleanse tainted souls, removing curses, corruption, or any dark influences afflicting allies.

This ability makes you a beacon of hope in the darkest of battles. No matter how far someone has fallen into darkness, your Song of Purification offers a chance at redemption. The power of your voice can reach even the most twisted souls, purifying them with its divine resonance and offering peace to the restless.

Beat of Battle [600 CP]

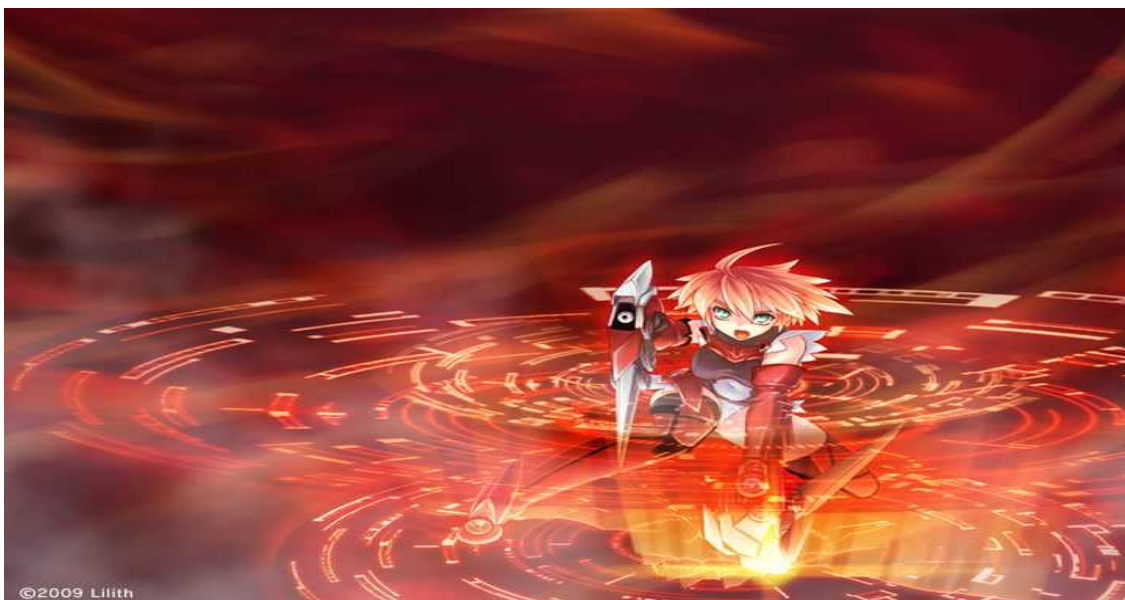

Your dance has transcended mere performance, becoming a masterful combat style. Every fighting technique you've learned in the past can now be seamlessly integrated into your movements, making your combat an elegant and deadly dance. To an outsider, it appears as though you are performing a beautifully choreographed routine, but in reality, every step and gesture is a lethal strike or perfect defense.

Furthermore, any ability requiring a dance to activate is now executed with effortless grace. You require less time and effort to perform complex maneuvers, allowing you to focus on overwhelming your enemies with fluid, precise attacks. Your mastery elevates you to a near-untouchable level in combat.

Any ability that relies on singing is significantly enhanced, making your voice a weapon of unparalleled power. Your songs can break enemy morale, rally the weary, and unleash destructive magical forces, all while maintaining the beauty and elegance of a true performer.

Artificial Witch

Mana Core [Free for Artificial Witch | 200 CP for Others]

An artificial mana core is embedded deep within your body, serving as an endless reservoir of magical energy. This core triples your mana capacity, ensuring that you can cast spells far longer and more frequently than a typical magical girl. Unlike natural magic users, your core provides a stable, controlled flow of energy, optimizing every spell you cast. This efficiency not only enhances your combat effectiveness but also reduces the strain of powerful magic, allowing you to fight longer without exhausting your reserves.

Moreover, your core fine-tunes the synchronization between your mana and your magical girl form, making your spells more potent and cost-effective. This means that even complex or high-cost abilities can be cast with minimal drain. Whether in battle or during intense magical rituals, your artificial mana core ensures you remain a constant, overwhelming force on the battlefield.

Demon Sense [100 CP]

As an artificial life form, one of your senses has been augmented to the level of a demon's. Choose between sight, hearing, smell, taste, or touch, and experience supernatural precision and clarity. For example, if you enhance your sight, you can see in complete darkness and perceive magical auras. Enhancing your hearing would allow you to detect the faintest whispers across vast distances or hear the heartbeat of a hidden foe.

This enhancement can be taken multiple times, allowing you to hone multiple senses to demonic levels. Each enhanced sense provides a tactical advantage, giving you the ability to detect danger, locate enemies, or track magical disturbances with unparalleled accuracy. In combat, your sharpened senses ensure that nothing escapes your notice, making you an exceptional hunter and fighter.

Condensed Muscle Mass [100 CP]

Though you appear petite and delicate, your body hides incredible strength. Your muscles have been artificially condensed and enhanced, giving you four times the strength of a normal human. Every motion, whether a punch or a simple lift, carries immense power. You can break through solid walls, lift heavy objects effortlessly, and overpower enemies with brute force alone. Despite your appearance, you are a war machine designed for combat.

This dense muscle mass does not hinder your agility or flexibility. Instead, it grants you unparalleled durability and resilience. You can withstand powerful blows that would incapacitate others and recover swiftly from physical damage. Your deceptively small frame makes you an unpredictable and formidable opponent, catching enemies off guard with your overwhelming strength.

To Find a Friend [200 CP]

Despite being a weapon of war, you possess a heart that longs for companionship. Once a month, you will encounter individuals who are willing to accept your quirks and artificial nature. These friends see beyond your artificial origins, embracing the person you are inside. They may become lifelong allies, companions in battle, or simply someone to share a quiet moment with.

Daemon Hunter [200 CP]

Programmed with the knowledge of demon physiology and tactics, you are a highly efficient hunter of daemons. Your senses are fine-tuned to detect demonic presences, allowing you to track them even through magical disguises or distant locations. You know their weaknesses, behaviors, and combat patterns, giving you a distinct advantage in any encounter.

This programming includes advanced combat techniques designed specifically to counter daemons. Whether it's exploiting their weaknesses, using specific anti-demon spells, or employing traps and strategies, you are a relentless pursuer. Daemons are your prey, and they know it, making you a fearsome figure in their eyes.

Anti-Witch Hunter [400 CP]

You have become the hunter of those who prey on magical girls. Trained to counteract the tactics used by daemon witch hunters, you move, attack, and strategize outside the standard fighting styles. This unpredictability makes you a nightmare for those who specialize in hunting magical girls. Furthermore, your abilities cannot be negated by anti-magical girl techniques, and you can effortlessly escape from bindings and traps designed to capture you.

Your combat skills are sharp and unconventional, blending guerrilla warfare tactics with magical prowess. Enemies expecting a traditional magical girl encounter are left bewildered by your adaptive and relentless combat style. You embody the perfect countermeasure to those who would try to capture or harm you.

Mana Burst [400 CP]

Once per day, you can activate Mana Burst Mode, unleashing your entire mana reserves in one explosive surge. During this five-minute period, all your abilities, spells, and physical attacks are enhanced exponentially. Your power increases by an order of magnitude, making every strike devastating and every spell overwhelming. You become a walking force of destruction, capable of turning the tide of battle single-handedly. However, this immense power comes at a cost. Once the burst ends, you experience a temporary state of exhaustion, leaving you vulnerable for a short time.

Dimension Door [600 CP]

You possess the ability to travel freely between different worlds within the Lilith universe and alternate dimensions of the same series. This allows you to escape from perilous situations, explore new realms, and gather unique resources or allies from other worlds. You can move between dimensions at will, with little effort, making you a versatile traveler and strategist.

Your mastery of dimensional travel also grants you immunity to dimensional traps or banishments. You can return to your original dimension at any time, and your ability to move through worlds makes you an elusive target, nearly impossible to trap or contain.

Strongest Witch [600 CP]

You have ascended to the peak of magical prowess, rivaling the most powerful artificial magical girl, Isuka. Your destructive capabilities have been enhanced to an unimaginable degree, making even the most formidable opponents tremble in your presence. Each spell you cast now carries an overwhelming force, capable of leveling entire battlefields, obliterating enemies, or reshaping the terrain itself. Your raw power makes you an unstoppable force in any confrontation, with every attack striking with devastating precision and magnitude.

But sheer destruction is not your only strength. You now possess the ability to combine two elemental affinities, both from your current world and any future worlds you encounter, creating entirely new and devastating elements. For example, merging Dark and Fire to forge Hellfire, an infernal flame that consumes both body and soul, or blending Water and Lightning to create Storm Surge, a raging torrent of electrified water. These unique elements are entirely your own, allowing you to surprise and overwhelm foes who are unprepared for such unparalleled magical creativity.

Your mana pool has also been enhanced exponentially. It is now so vast that it dwarfs ordinary magical reserves, and your recovery rate has increased to an extraordinary level. You can fully replenish your mana within one hour, allowing you to unleash powerful spells continuously without fear of exhaustion. This rapid recovery occurs independently of any other mana-regeneration abilities you possess, making your mana reserves nearly inexhaustible. With this immense power and efficiency, you stand as the Strongest Witch, a being of legend feared by enemies and revered by allies.

Saint

Holy Fortitude [Free for Saint / 200 CP for Others]

Your awakened saintly bloodline imbues you with unmatched physical and spiritual resilience. Your defensive capabilities are now greatly enhanced, allowing you to withstand attacks that would incapacitate or kill a normal human. Whether it's a crushing blow, a storm of magical energy, or environmental hazards, your body remains steadfast. You are also immune to all diseases, from mundane illnesses to supernatural plagues, making you a paragon of health and vitality.

Additionally, your mana is uniquely attuned to healing magic, enabling you to channel it with incredible efficiency. Healing spells now require less mana, act faster, and provide more potent effects. Whether you are closing wounds, purging toxins, or revitalizing allies, your healing abilities are unmatched in their precision and power.

Hand-to-Hand Combat [100 CP]

As a saint, you excel in the art of unarmed combat, preferring to use your own body as a weapon. You have trained rigorously, mastering punches, kicks, and grapples that are both elegant and devastating. Your strikes carry the force of divine energy, allowing you to bypass magical barriers or harm enemies immune to ordinary attacks.

This proficiency also extends to defensive techniques, enabling you to block, parry, or evade incoming blows with grace and precision. Your skill in close combat makes you a formidable opponent even without weapons, embodying the saintly balance of body and spirit in battle.

Red Thread of Fate [100 CP]

Whether it's planning a memorable date or simply being there during tough times, you know exactly how to make your partner feel valued and cherished.

Ki [200 CP]

Your body now brims with Ki, a life force energy distinct from mana that fuels powerful martial arts techniques and enhances your physical prowess. You gain a vast Ki pool, enabling you to perform high-energy techniques such as energy blasts, speed boosts, or defensive barriers. Unlike magic, Ki-based abilities are unaffected by anti-magic fields, making them invaluable in battles against magic-resistant foes.

You also have heightened control over Ki, allowing for precise energy manipulation. With practice, you can amplify your physical attacks, enhance your stamina, and even sense the Ki signatures of others. This newfound mastery makes you a formidable warrior, equally adept at physical and spiritual combat.

Yin & Yang [400 CP]

Your unique connection to the dual forces of Yin and Yang allows you to merge multiple energy types—mana, Ki, divine energy, and more—into a single, harmonious pool. Instead of conflicting or canceling each other out, these energies synergize, enhancing your magical and physical abilities far beyond their individual sums.

This fusion grants you immense versatility, enabling you to adapt to any situation. Whether you're using this unified energy to empower devastating attacks or intricate support spells, you wield a force that is greater than the sum of its parts, embodying balance and unity.

Sage [400 CP]

You are now capable of performing legendary healing magic with unprecedented potency. Your spells can regenerate lost limbs, heal critical injuries, and even cure illnesses that were previously thought incurable. Your mastery extends to ailments of both the body and soul, making you a beacon of hope for those in despair.

As a Sage, you also gain a profound understanding of the intricacies of life energy and healing. You can craft healing talismans, create areas of restorative energy, and even reverse the effects of curses and poisons. Your mere presence is a comfort to allies and a deterrent to malevolent forces.

Reincarnation [600 CP]

Your soul carries the essence of a legendary hero or figure from history or myth, granting you unparalleled access to their skills, abilities, and knowledge. By choosing a specific figure—whether it's Morgan le Fay, King Arthur, or Sun Wukong—you gain an extraordinary affinity for mastering their abilities in record time. If you select Morgan le Fay, for instance, you will become a virtuoso of enchantments, curses, and the mystical arts of Avalon. Similarly, choosing Sun Wukong would grant you incredible martial prowess, shapeshifting, and mastery over cosmic forces. This reincarnated essence allows you to build upon their expertise, enabling you to unlock abilities that would take others lifetimes to comprehend.

Beyond skills, you inherit their experience and heroic spirit, giving you not only the tools to succeed but also the mindset to lead, inspire, and overcome. This heroic essence imbues you with unparalleled determination, charisma, and courage, elevating you to a position of leadership among your allies. Enemies will sense the presence of your legendary soul, often underestimating you to their peril. Whether in battle or negotiation, you channel the strength and wisdom of your past life, making you a force to be reckoned with in any situation.

The Four Guardian Spirits [600 CP]

Your soul is guarded by one of the Four Guardian Spirits, mystical entities of ancient power that lend you their strength and abilities while protecting you from harm. These spirits, each tied to a specific aspect of nature and mythology, serve as both protectors and mentors, guiding you through life and intervening in dire circumstances. You must choose one of the following:

- Shiryu (Eastern Dragon): With Shiryu as your companion, you gain control over weather manipulation, allowing you to summon powerful storms, call down lightning, and alter the skies. Your magical reserves are greatly enhanced, letting you wield spells of immense scale without exhausting your energy. Shiryu also grants wisdom and foresight, helping you navigate complex challenges.
- Genbu (Turtle): Genbu bestows unparalleled defensive strength, turning your body into a fortress. You can endure devastating blows, resist magical assaults, and recover from injuries far faster than normal. Genbu also offers healing abilities, allowing you to restore your strength or mend allies in times of need, making you an unyielding bastion of protection.
- Suzaku (Phoenix): Suzaku embodies the spirit of rebirth and fire, granting you a once-per-day ability to resurrect yourself from death in a blaze of purifying flames. You also gain mastery over flame magic, unleashing devastating fire-based attacks that scorch your foes and renew your allies. Suzaku's presence ensures that you rise stronger after every fall.

Forcefield [Free]

The magical girl's outfit, though elegant and often ornate, may lack direct defensive features, leaving them seemingly vulnerable. However, this is countered by an invisible yet impenetrable forcefield that surrounds their body. This barrier is a constant, subconscious shield that absorbs or mitigates incoming damage, from physical strikes to magical assaults. The forcefield grows stronger with the girl's focus and emotional intensity, sometimes shimmering with their chosen colors or symbols when struck. As long as they remain transformed, the forcefield is active, ensuring they can engage in battle with confidence and resilience.

Bind [Free]

The ability to cast binding spells gives the magical girl an edge in controlling and subduing foes. These spells manifest in various forms, from glowing chains of energy to enchanted ribbons that wrap around enemies, immobilizing them. The magic is versatile, allowing for precision targeting of specific limbs or creating wide nets to ensnare multiple adversaries. Beyond simple restraint, bindings can disrupt magical conduits, preventing enemies from casting spells or channeling power, rendering them helpless in the heat of battle.

Magic Missile [Free]

Channeling pure mystical energy, the magical girl can unleash destructive magic missiles at her enemies. These projectiles are highly adaptable, varying in size, shape, and power depending on the user's intent. They can home in on their targets with unerring accuracy, weave through obstacles, or split into multiple smaller blasts to strike multiple foes. The color and energy signature of the missiles reflect the magical girl's theme, creating a visual spectacle as they rain devastation upon their enemies.

Doppelganger

This power allows the magical girl to conjure a weakened clone of herself, possessing roughly half of her power. The doppelganger is an invaluable ally, acting as a distraction in combat, assisting with tasks, or filling in for the magical girl in her civilian life. While not as powerful as the original, the doppelganger shares her agility, knowledge, and basic abilities, creating a seamless extension of her presence. This ability allows for strategic misdirection, doubling the magical girl's effectiveness in both combat and day-to-day responsibilities.

Energy Absorption

This rare and versatile ability allows the magical girl to absorb energy from incoming attacks, turning the enemy's strength into her own. Whether it's absorbing magical blasts, redirecting kinetic force, or draining the ambient power of the environment, this ability grants her unparalleled resilience. The absorbed energy can be stored, redirected as a counterattack, or used to heal herself, turning the tide of battle by using her enemies' power against them.

Dream Manipulation

The magical girl can enter and manipulate dreams, stepping into the subconscious of others. Within this dream realm, she can plant ideas, inspire courage, or unravel the fears of her allies. For enemies, she can sow confusion or create nightmarish landscapes, weakening their resolve. This power is as much a tool of psychological warfare as it is a method of providing comfort and guidance, making the magical girl a guardian of both waking and sleeping worlds.

Gravity Manipulation

With the power to alter gravitational forces, the magical girl can make herself or her allies float effortlessly, crush foes with intensified gravity, or create zones where movement becomes sluggish and burdensome. This ability can also be used creatively, such as lifting heavy objects, forming protective shields of debris, or accelerating projectiles for devastating attacks. Her mastery of gravity makes her an unpredictable and formidable force on the battlefield.

Blood Manipulation

Harnessing the mystical properties of blood, the magical girl can manipulate her own or others' for various effects. This power can heal wounds by accelerating clotting and regeneration or create weapons and shields from hardened blood. In combat, she can control the flow of blood within enemies, weakening or incapacitating them. While a dark and sometimes unsettling power, its versatility and potency are undeniable.

Near Death

When pushed to the brink of destruction, the magical girl's abilities surge to unparalleled levels. As her health wanes, every aspect of her power amplifies, turning her into a near-unstoppable force. Whether it's summoning devastating spells, achieving miraculous feats of strength, or transcending the limits of her forcefield, this ability ensures that her greatest strength is revealed in her darkest hour.

Healing Spiral

Your unparalleled mastery of restorative magic allows you to mend both the physical and spiritual ailments of your allies with extraordinary finesse. When you channel your Healing Spiral, radiant waves of light emerge, enveloping your team in a soothing embrace that heals injuries, clears status effects, and revitalizes magical energies. This ability is particularly adept at curing curses, dispelling debilitating magical conditions, and even restoring damaged or corrupted soul gems, bringing weary allies back to full strength. As the spiral continues, its effects intensify, granting lingering vitality boosts and increased resilience, ensuring your comrades remain steadfast in battle.

Wind Rush

Harnessing the boundless power of the wind, you command the skies with an unmatched ferocity. Your magic conjures fierce, tornado-like currents capable of sweeping enemies off their feet, scattering their formations, and redirecting attacks with gale-force precision. In its defensive form, Wind Rush creates a vortex barrier that deflects incoming projectiles and slows advancing foes, granting you and your allies valuable breathing room. When you focus your power offensively, the tempest you generate can tear through even the sturdiest defenses, rendering your enemies helpless in the face of your wind's unrelenting might.

Silence Mist

Your battlefield prowess is exemplified by your mastery of Silence Mist, an ability that weaves ethereal fog into a weapon of unparalleled stealth and deception. When you invoke this power, an opaque mist blankets the area, muffling sound and obscuring vision for your foes. Within this veil, you and your allies move unseen, striking with precision and retreating before enemies can react. You can manipulate the mist to further disorient opponents, causing illusions, distorting spatial awareness, and creating false sounds or movements that lead foes astray. Silence Mist turns the battlefield into a realm of confusion, with you always one step ahead.

Nirvana

A power of unparalleled rarity and potency, Nirvana grants the user the ability to permanently vanquish even the most resilient of foes, including those gifted with immortality or regeneration. When activated, the magical girl channels an immense surge of energy into her attack, delivering a blow so precise and devastating that it annihilates both body and soul. Nirvana's presence on the battlefield is a game-changer, as it ensures that even the most fearsome of adversaries can be laid to rest, providing the ultimate resolution in combat.

Luck Manipulation

With this extraordinary ability, the tides of fortune shift at the magical girl's will, altering probabilities and outcomes to suit your desires. By subtly influencing chance, she ensures events unfold in her favor, from minor victories like a precise strike to major turns of fate, such as averting catastrophic disasters. Conversely, she can impose terrible misfortune upon her enemies, causing their attacks to miss, their plans to unravel, or their own powers to backfire. This ability, though subtle, is immensely powerful, as it bends the very fabric of destiny, making the impossible achievable and the inevitable uncertain.

Precognition

The gift of foresight allows the magical girl to peer into the future, glimpsing the outcomes of actions and the unfolding of events before they occur. This ability manifests as flashes of insight, detailed visions, or an intuitive understanding of the best course of action in a given situation. In combat, it grants her unparalleled awareness, enabling her to predict enemy movements, anticipate attacks, and devise strategies that ensure victory. Beyond battle, precognition aids in decision-making, offering clarity and guidance in moments of uncertainty. With this power, the magical girl becomes an infallible strategist, always one step ahead of her adversaries.

Astral Projection

With Astral Projection, the magical girl gains the extraordinary ability to separate her consciousness from her physical form, allowing her spirit to travel across great distances, explore other realms, or investigate unseen locations. In this state, her astral form is intangible and undetectable to most, making it ideal for reconnaissance or stealth operations. While her body remains vulnerable during projection, the insights and knowledge she gathers can turn the tide in battle or solve critical mysteries. Advanced mastery allows her to interact with spiritual entities, guide allies through treacherous terrain, or even manipulate certain magical forces while in her astral state.

Aura Reading

This power attunes the magical girl to the unseen energies that surround every living being, granting her the ability to perceive and interpret the auras of others. Through Aura Reading, she can sense emotions, intentions, and even the health or magical power levels of her allies and enemies. This skill proves invaluable in combat, allowing her to identify hidden threats, detect lies, or locate injured comrades in need of aid. With greater experience, she can uncover deeper truths, such as the nature of an opponent's powers or their weaknesses, ensuring her team always holds the upper hand.

Animal Shape-Shifting

The power of Animal Shape-Shifting allows the magical girl to transform into a chosen animal, embracing its abilities and instincts. Whether she morphs into a swift falcon to scout from above, a ferocious tiger to dominate the battlefield, or a cunning fox to outwit her foes, this power provides immense versatility. While transformed, she retains her intelligence and magical abilities, blending her animalistic traits with her combat prowess. Advanced users can take on hybrid forms, combining the strength of their animal forms with the dexterity and adaptability of their human bodies, making them formidable opponents in any scenario.

Transmutation

With Transmutation, the magical girl gains the remarkable ability to alter the properties of matter at will. She can transform one substance into another, such as turning stone into metal, reshaping weapons, or even creating entirely new tools from the environment around her. This power offers both offensive and defensive versatility; she can disarm enemies by altering their weapons or fortify her team's defenses by creating barriers out of raw materials. Mastery of this ability allows her to manipulate matter on a molecular level, crafting intricate structures or triggering alchemical reactions that amplify her magic.

Time Reversal

This rare and coveted ability grants the magical girl the power to turn back the clock, altering the flow of time for short durations. She can undo mistakes, avoid devastating attacks, or even revive fallen allies by reversing the moments leading to their defeat. However, the ability is not without limitations—it can only rewind up to 10 minutes each day, and the strain of tampering with time takes a toll on her physical and magical energy. Despite its restrictions, Time Reversal is a game-changing power that allows her to outmaneuver even the most formidable foes and rewrite fate itself.

Absolute Invulnerability

For a brief and precious 10 minutes each day, the magical girl becomes utterly impervious to all forms of harm. During this time, no physical, magical, or spiritual attack can penetrate her defenses, allowing her to act as an unstoppable force on the battlefield. Whether she uses this power to protect her allies, turn the tide of combat, or confront overwhelmingly powerful enemies, Absolute Invulnerability ensures her safety in even the most dire situations. However, its limited duration requires careful planning and precise timing, making it as much a strategic tool as it is a defensive measure.

Sewing

This whimsical yet surprisingly versatile power allows the magical girl to summon a magical needle and thread, with an infinite supply of enchanted strands at her disposal. Initially, she uses her threads to entangle and immobilize her foes, rendering them helpless. Over time, she learns to weave garments imbued with magic, granting wearers enhanced strength, agility, or other unique abilities. Her creations become increasingly complex, ranging from protective armor to enchanted cloaks that grant invisibility or flight. With enough skill, her threads can even mend broken magical constructs, sew together allies' wounds, or form barriers that deflect enemy attacks.

Demonic Disruption

This rare and potent ability allows the magical girl to disrupt and neutralize the magical abilities of her enemies. By creating zones of nullified magic, she can render an opponent's spells ineffective, leaving them vulnerable to physical attacks or forcing them into a purely defensive stance. The effects extend to magical items and constructs, temporarily deactivating enchantments or destroying summoned allies. With time and practice, Demonic Disruption can be refined to selectively target specific individuals or types of magic, minimizing collateral effects and allowing the magical girl to maintain control over the battlefield.

Wicked Dance

The magical girl channels her energy into a mesmerizing and dynamic dance that combines beauty with lethality. Each movement releases waves of magical energy that disorient and confuse enemies, making it difficult for them to focus or attack effectively. The effects of her dance vary depending on the rhythm and style, ranging from creating illusions to launching powerful energy blasts. Over time, she can incorporate her allies into the performance, coordinating their attacks and boosting their morale. Wicked Dance is as much a psychological weapon as it is a physical one, breaking the will of her foes while empowering her team.

Wave of Hope

This ability harnesses pure magical energy to neutralize harmful effects and purify corrupted entities. The magical girl summons waves of energy that sweep across the battlefield, cleansing curses, dispelling dark magic, and restoring the resolve of her allies. These waves also serve as a powerful offensive tool, disrupting enemy magic and overwhelming foes with their sheer force. As her proficiency with Wave of Hope grows, the magical girl can expand its reach and intensity, transforming it into a beacon of light that inspires hope and unity in even the darkest of battles.

Angelic Judgment

By summoning the divine power of holy magic, the magical girl becomes a radiant force of justice and protection. She can manifest large, glowing wings which serve both as symbols of her divine power and as weapons or shields. Angelic Judgment allows her to smite her enemies with beams of searing light, create barriers that deflect even the strongest attacks, or heal her allies with a touch. Advanced mastery enables her to summon holy constructs, such as swords or spears of light, to fight alongside her, turning the battlefield into a sanctuary of divine retribution.

Shadow Veil

This power allows the magical girl to manipulate shadows to obscure herself and her allies from sight. Shadow Veil can create zones of impenetrable darkness, disorienting enemies and giving her team the advantage in battle. She can also use the shadows as an extension of herself, forming tendrils to attack or bind foes. With mastery, Shadow Veil enables the magical girl to travel instantly between areas of darkness, making her movements unpredictable and nearly impossible to track. This ability is invaluable for both stealth operations and controlling the battlefield.

Crimson Bloom

The magical girl can summon magical blossoms that explode with fiery intensity, dealing significant area damage to enemies while creating stunning visuals that disorient them. Crimson Bloom's explosions are not only destructive but also leave behind embers that linger in the air, gradually wearing down opponents caught in their glow. Drawbacks:
You are limited to +1000 Cp from drawbacks.

Supplement [+0]:

Not exactly the most in-depth of places, so you can use this jump as a supplement for other jumps. The CP here can only be used in this jump, and vice versa; this includes extra CP from drawbacks.

Stripped A lot [+100CP]:

It seems like you'll find yourself getting stripped quite often, either due to your antics or perhaps because the universe has a peculiar sense of humor. To make matters more interesting (or embarrassing), you'll now exclusively wear the most flamboyant and outrageous underwear available. This ensures that whenever you do get stripped, your fashion choices—or lack thereof—are on full display for everyone to see.

Time Extender [+100CP]:

You have the option to extend your stay in this world. For every 100 CP you take from this option, you can add another 10 years to your stay. The maximum CP you can gain from this drawback is 800 CP.

Disliked by Dogs [+100CP]:

It seems that one animal of your choosing in the animal kingdom has taken a rather unfavorable stance against you. Whether it be mischievous squirrels that delight in disrobing you at every opportunity or overzealous dogs that pursue you relentlessly, leaving you drenched in their drool, you find yourself facing daily encounters with these vexing creatures. Despite your best efforts to avoid them, it appears that these animals have made it their mission to inconvenience you at every turn, adding an extra layer of challenge to your daily routine.

Side Character [+100CP]:

It seems you have a rather forgettable presence, as people tend to overlook you unless you're directly in front of them. This can make it challenging to make a lasting impression or to be noticed in social situations or interactions.

Hikineet [+200CP]:

Looks like you're a shut in. Going outside is a pain. You'd rather stay inside your room and play video games. Unfortunately you need to go outside, and some busybody will always try and get you to leave your room every day. You hate being outside your room and your complaints will be ignored. I hope you don't go stir-crazy...

Amnesiac [+200CP]

You find yourself in a state of amnesia, devoid of memories from your past jumps. The experiences and knowledge you've accumulated are lost to you, leaving you in a state of uncertainty about your identity and purpose. As long as you remain in this jump, your past will remain shrouded in mystery, making it difficult to discern your true self and your place in the world

Scary Movies are Stupid [+200CP]:

It seems like you have a habit of watching scary movies every month, which has an interesting side effect: you gain a new phobia related to a place or type of creature each month. This means that every time you watch one of these movies, you're likely to develop a fear of something new. The upside is that you can typically overcome these phobias within a month, although it's a continuous cycle as new fears replace old ones over time. It definitely adds a unique element to your life, keeping things suspenseful and perhaps a bit nerve-wracking!

Low On Magical Energy . [+200CP]:

In a world where magic reigns supreme, you've been struck by an incurable ailment that compromises your capacity to use your supernatural abilities, reducing your spellcasting efficiency to just 70%. Despite your innate magical abilities, this affliction weighs heavily on you, forcing you to adapt and find alternative ways to navigate through the challenges that lie ahead

Tragic life [+200]:

You're destined to experience a cycle of hope and despair throughout your time in this world. Despite forming close bonds with those around you and considering them family, tragedy will inevitably strike, leading to their gruesome demise either at the hands of the gods or due to your own negligence. Each loss will plunge you deeper into despair, creating a profound sense of misery and guilt for your perceived failures. This cycle of hope shattered by tragedy will repeat itself year after year, casting a shadow over your entire experience in this world.

I Don't Need My Brains [+300CP]:

I will not mince words, you're an Idiot with a capital I. Using your head is impossible except for headbutting. Even simple math division and multiplication would be considered a college level skill for you and you are definitely too stupid for that.

Rival [+300 CP]:

Wow. You have a rival and that person is the exact opposite of you in several areas. Mostly in personality and ideology as a person but the most vexing part is that you will not be able to defeat him/her alone for the first 8 years of your stay here. They will also stand in the way of you and your goals as much as possible, which is to say nearly every damn time. I hope you have a strong group of friends to help you here because boy you need it.

You find yourself in a jump where outside powers and your warehouse are off-limits. You must rely solely on your own abilities and resources within this world, facing its challenges and trials without the aid of external assistance.

Playgirl [+300CP]:

It seems that you have a rather complicated situation on your hands. Despite not having any recollection of your actions, you frequently wake up beside different women, much to your dismay. What's worse is that these women claim to have been seduced by you and demand that you take responsibility for your actions. Many of them hold significant power and influence, making it possible for them to force you into marriage if they so desire. If you do find yourself forced into

marriage, your chain breaks. If you're still unmarried at the end of the Jump you can take all of the women with you for free.

You're In Debt [+400]:

Whether it was due to interference from magical girls' magic or accidentally damaging priceless artifacts, owing such a large sum can be daunting. Ten years might seem like a long time, but with determination and careful planning, you can gradually work towards paying it off. It might be challenging, but think of it as an opportunity to learn financial discipline and responsibility. Good luck tackling that debt! Because if you fail the jump will end.

The Cursed Clone [+400]:

You have been cursed with a clone. Sharing all your abilities within and beyond the jump, they are as formidable as you are. However, their intentions are malevolent—they seek to bring you endless misery by targeting your companions and undermining your interests with a malicious grin. With cunning and agility, they evade your strategies, always slipping away to fight another day. This torment will persist until the final year of your journey, a constant thorn in your side.

Your personal demon [+600 CP]:

It seems fate has dealt you a harsh hand, condemning you to a relentless cycle of defeat and suffering at the hands of everybody. No matter how valiantly you struggle, every attempt to triumph over them ends in bruises, pain, and tears. They thwart your plans, dismantle your schemes, and leave you broken time and again, pushing you to the brink of despair.

For eight long years, this pattern persists without respite. You endure humiliation, setbacks, and the bitter taste of defeat. It feels as though victory is an impossible dream, a distant glimmer that taunts you from afar. Yet, amidst the darkness, a flicker of hope emerges in the ninth year. By the ninth year, the possibility of defeating them and finally achieving your long-awaited revenge becomes tangible.

Targeted [+600CP]

seems you've caught the attention of a powerful faction in this world. You must choose one faction from the origins as the instigator of their aggression towards you. At the end of the 10-year period, the leader of the faction will personally confront you in battle, having ascended to near godhood. This final showdown promises to be the most challenging trial you've faced thus far, testing your strength, wit, and resolve like never before.

You can take this drawback multiple times, gaining the wrath of additional factions. The maximum CP you can gain from this drawback is 1200 CP. this ignores limit.

Everyone Want you [+1000CP]:

It seems you've found yourself in quite a precarious situation, becoming a prime target for every organization in the world due to your unique ability to produce pure energy while driven crazy by the antics of the world's citizens. This has made you an invaluable asset in their schemes for domination and power. Now, every corner of the globe is teeming with groups seeking to capture and imprison you, using all means at their disposal to exploit your abilities.

This constant threat means you must remain vigilant and always on the move to evade capture. Each Independent organization will deploy their resources — from spies and mercenaries to advanced technology and magic — in relentless pursuit of you. The consequences of capture are dire: imprisonment that last a year will end in jump breaking. If the targeted drawback is purchased, the factions affected will immediately deploy their most formidable units against you. These units will be exceptionally powerful and will not be killable until the final year of your jump. This means that you will face ongoing and intense opposition from these top-tier enemies throughout your time in the world.
