

Out of Context: Saiyan Supplement

V1.01 By DeverosSphere

This document can be used as a supplement in any Jump that would not otherwise have Saiyans within its continuity.

You may also use this document as an isolated Jump in order to go to a setting of your choice even if that setting does not have a Jumps.

By taking this Supplement you have chosen to be a Saiyan and you will enter into that jump as a drop-in by crash landing in your Saiyan Pod damage both your Scouter and the Pod leaving you clothed and a power level of at least 50 though this may increase depending on the Perks you take.

Saiyans are outwardly very similar to Humans, with the exception of their monkey-like tails.

+0 CP

You do not get a stipend in this supplement as such you will need to import CP from the Jump document in order to gain anything that isn't Free.

Origin:

The Saiyan Army employs various ranks based on power levels with these positions in society being chosen at birth by estimating what their adult power level would be though these estimations are not always correct.

As such is your social standing in the Saiyan class structure?

Low-Class:

Saiyans whose estimated adult power level at birth was below 1,500 are ranked as Low-Class. Almost all Saiyans are Low-Class warriors with most of them acting as soldiers, grunts and cooks.

Mid-Class:

Saiyans whose estimated adult power level at birth was between 1,500 to 5,000 are ranked as Mid-Class Saiyan Warriors.

A minority of Saiyans are Mid-Class warriors, they tend to take positions of authority within the Saiyan military.

Elite:

Saiyans whose estimated adult power level at birth was over 5,000 are ranked as Elite Saiyan Warriors.

Very few Saiyans are able to become Elite Warriors with nearly all Elite Saiyans being members of Nobility or the Royal Family.

Perks:

Appetite - Free

As a Saiyans you gain an insatiable appetite. This lets you eat enough to fill your great ape forms stomach while you are in your base form before you feel you have overeating and you can store and metabolise the fat from this food within your body without it being externally visible.

Lifespan - Free

Your Saiyans lifespan is about the same as an average Earthling however you will not age the same way as humans.

Saiyans have spurt growth phases that allow them to keep their peak health, performance and appearance much longer than humans with a Saiyan at the age of 80 being visibly unchanged from when they were young.

Strength - Free

Thanks to the high gravity of planet Vegeta, your strength is far greater than that of Earthlings, making you capable of lifting ten times their own weight even without using KI.

Durability - Free

Due to the conditions of planet Vegeta you are remarkably resilient both internally and externally allowing you to survive extreme temperatures and gravitational pressures making you far more capable of surviving dangerous environments than humans even without using KI.

Also without using KI you are capable of being hit by small calibre bullets, low yield explosives and sharpened blades with the only wounds caused by them to your body being bruises, slight burns and shallow cuts.

Agility - Free

You have much faster reflexes than an average Human allowing you without using KI to catch mundane arrows, flies and if you focus even low calibre bullets.

Tail - Free

As a Saiyan you were born with a monkey-like tail that is very prehensile and can be used to grasp things as if it were an extra hand.

This tail also allows you to transform into a Great Ape when you look at a full moon.

If your tail is squeezed, it causes you an extremely painful and unpleasant sensation that causes most Saiyans to lose their strength entirely, but this weakness can be removed by rigorous training of the tail to strengthen it and to tolerate being squeezed.

If a saiyan's tail is removed, it can grow back in stressful situations such as if the Saiyan is in danger unless the tail wound has been scared closed.

Hair - Free

As a pure-blooded Saiyan your hair does not change from the day you were born with the exceptions of beards and moustaches.

Senses - Free

You have a more powerful sense of touch and hearing than humans and gain a very keen sense of smell similar to that of a dog's.

Innate Ki - Free

As a Saiyan you have a natural affinity for controlling Ki energy, making you able to manipulate your Ki subconsciously however without practice or training this will only allow you to use it in basic ways.

Godly Ki -400 CP

You have gained a small amount of the exceptionally pure Ki used by divine beings this makes your Ki impossible to sense by beings in possession of only mortal Ki.

Eventually you may be able to unlock the Mythical Super Saiyan god form.

Legendary -600 CP

You have gained an enhanced form that changes your appearance as it visually enhances your muscle mass and height.

With this structural change it produces an enormous increase to your strength without impairing your speed or ability to move.

With practice and training you will eventually be able to reach the **Super Saiyan** form which will grant you a 50x Boost to your power and can be pushed even further, even when **Super Saiyan** is unlocked you will still be able to use the **Pseudo Super Saiyan** form.

Legendary Booster: Legendary Super Saiyan

You are now able to use both the regular and the **Legendary** variant of **Super Saiyan**.

While in the **Legendary Super Saiyan** form your body will produce and build up a limitless amount of unstable Ki which you can explosively release for a powerful attack but should too much unstable Ki build up in your body it could cause internal explosions.

Spirit Absorption Booster: Spirit Bomb Super Saiyan

You have learned an alternate version of **Super Saiyan** form that is similar to the **Genki Dama**.

This form allows you to passively borrow energy from all life, increasing your power and producing a Ki aura powerful enough to inflict harm on those who touch it.

This means that you have no maximum limit on your power as you will never weaken through inaction or lack of training and that this method of growth never becomes ineffective.

Wrathful Saiyan -600 CP

No matter the damage you are always able to Forcefully regrow your tail, what's more you are able to transform into the **Great Ape** form without a moon while always remaining in control of it. With time and practice you will be able to enter the **Ikari** state and go into the stages beyond it.

Legendary Booster: Legendary Wrathful Saiyan

You have the ability to rapidly grow while in the midst of combat with a stronger opponent, you quickly eliminate the gap in power between the two of you and are able to push even further in order to surpass their strength.

What this means is that through instinctive adaptation you quickly improve your fighting skills and battle tactics, replicating and incorporating your enemy's techniques, methods and tactics, while growing in raw power at an accelerated rate.

Rage Boost Booster: Wrathful Boost

You have learned how to incorporate your rage into your **Ikari** transformation, evolving the form so that it can constantly pull out your untapped potential, heightening your body's strength, durability and Ki density.

Visibly this form extends your hair making it a dark grey colour and makes your irises red though this form can be pushed further to become a true **Beast**.

This perk allows you to force yourself to feel emotional/spiritual pain and stress which can cause your body to discover new powers and abilities.

Evil Saiyan -600 CP

This allows the user to gain the ability to internally utilise **Evil Aura**, although this is not a true transformation it will allow you to survive in the vacuum of space and increase your muscle mass a considerable degree, while likewise proportionally increasing your height to cause no reduction in your speed or agility.

With time and training you can learn the **Evil Saiyan** transformation causing an even more noticeable increase in height and muscle mass while giving you sterner and more defined eyes. It also gives you wilder hair that reaches down to your knees and a single forehead lock of hair.

Legendary Booster: Legendary Evil Saiyan

You can now generate a thicker Ki aura which can be manipulated in order to create solid limbs such as floating hands or a tail.

These limbs can act either independently from your body or replace any lost limbs allowing you to retain any of the original's supernatural functions.

Corrupting Force Booster: Corrupting Evil

Your Evil Aura is now able to possess and corrupt those without enough willpower to resist, forcefully transforming them into a Berserk state that internally utilises Evil Aura although they only act on instincts they will obediently follow your commands.

You may have any make and model of Scouter including the full visor and helmet variants.

Broken Saiyan Pod - Free

This Round Spaceship is used by Saiyans as vehicles purely for transportation purposes, as it contains a fuel-efficient faster-than-light drive, an interplanetary transport system and a suspended animation system that minimises the resources needed to keep the passengers alive.

It is used to send unconscious Saiyans to distant locations, with the intention that they conquer the planet.

Although these ships have exceptionally strong armour, which normally allows them to not be crushed or outright destroyed upon landing this Pod had a malfunction in the landing protocol causing it to be badly damaged in the landing.

You may have any make and model of Saiyan pod in a colour scheme of your choice and with any additional decals you wish.

Combined Forms:

Each of the Saiyan transformations can be used at the same time allowing the forms to work together.

Stacked Forms:

Stacking transformations is the easiest way to use multiple forms at once but is less powerful than merging forms.

These are the 3 stacked combinations of capstone forms and Super Saiyan with Super Saiyan God.

Super Saiyan + Wrathful Saiyan = Wrathful Super Saiyan

Super Saiyan + Evil Saiyan = Evil Super Saiyan

Wrathful Saiyan + Evil Saiyan = Evil Wrathful Saiyan

Super Saiyan God + Super Saiyan = Super Saiyan Blue

Merged Forms:

Merging transformations is a difficult but powerful way of combining transformations as they are able to be pushed further into additional forms and grades.

These are the 3 merged combinations of capstone forms, with the stage beyond that and Super Saiyan with Super Saiyan God.

Super Saiyan + Wrathful Saiyan = Golden Great Ape/Super Saiyan 4

Super Saiyan + Evil Saiyan = Supreme Saiyan/Infernal Saiyan

Wrathful Saiyan + Evil Saiyan = Goliath Great Ape/Primevil Saiyan

Super Saiyan God + Super Saiyan = Super Saiyan Rosé
