

The Versaphone Supplement

By Firriga

Get ready to connect to the metaverse like you've never seen before! Phirri LLC brings you a state-of-the-art mobile device that allows unlimited access to the r/Jumpchain* Reddit Thread! In partnership with the r/Jumpchain moderators**, you may now interact with your fellow Jumpers no matter when or where they are in the omniverse!

But wait, there's more! The Versaphone is always built the same (factory standard) but they don't all do the do the same. As our beloved customer, you get the chance to customize your versaphone with several verse-spanning features, accessories, and a customizable AI.

As a special offer, we're offering ~~4000~~ **2000** VP (Versapoints) to all Jumpers!

*Warning: The Versaphone may only access the ROLEPLAY flair of r/Jumpchain. Versaphone Users can only see, comment, and post on the ROLEPLAY flair.

**We thus far have only cooperated with moderators of fifteen timelines as with the creation of this document. We are not responsible if your Versaphone happens to instead log-in into the Fourth Timeline's (more commonly known as Earth-1218) r/Jumpchain, whose moderators are unaware of this product and the larger omniverse beyond their own fictional headcanons.

Features

r/Jumpchain_{ROLEPLAY} Access – Free

As previously stated, the base feature of the Versaphone is that you will have unlimited access to the r/Jumpchain_{ROLEPLAY} thread. You may see, comment, or post on the _{ROLEPLAY} thread as you please at any time. This is a direct link that does not rely on the internet so long as Reddit servers are still online or the r/Jumpchain thread is still up.

Unbattery – Free

You'd expect our versaphone to require some sort of energy but not at all! The fact that you exist fuels this device so nothing short of your erasure could stop this phone from running out. So, uh, try to exist.

This is a Phone / Importinator / JumpApp Store – 100 CP

Here we have a low-cost bundle filled with various exquisite versaphone add-ons. This installs many commonplace features of a smartphone into your versaphone. To name a few: a camera, a media player, file management system (infinite data storage) GPS, notetaking, a clock, make and receive calls, wifi connectivity, translator. Again, to name a few. We simply imported a mundane Fourth Timeline smartphone into your versaphone, which segues to the second feature, importing! You can import any sort of mobile smart device into your versaphone, allowing you to organize and merge all the features into one compact item.

In addition to this, it also gives you access to the JumpApp Store. Do you believe you have an innovative idea for a program? Do you wish you could share it with your fellow Jumpers? Then

allow us to open the door! In the JumpApp Store, all the apps are made by Jumpers, for Jumpers. There are no regulations for what apps may appear in our store, but there is a regulatory body for what apps you may be able to see. That body being your Benefactor. Ultimately, your Benefactor has the final say on what apps may show up. Some Benefactors may find it amusing that you now have a hypnosis app or an app that allows you to replicate runic magic by selecting the runic symbols in the app while others won't. The currency used to facilitate the transactions of the apps are the same as the Bazaar.

Instant Messaging – 100 CP, Free if you purchase Jumper Bazaar or SOS

Distress

Tired of posting on the thread just to get the attention of that one Jumper you want to contact because they have been on this world and is your best bet save your life but your post ended up getting ignored in favor of the latest angst post by another Jumper that clearly needs a therapist rather than hamstringing advice of other mentally scarred worldhoppers? Then just shoot them a direct message! Yes, now you can privately message other Jumpers so you may endlessly harass them on the best way to destroy the Imperium because they were the Emperor's primarch that one time and will TOTALLY divulge the secret weaknesses of their beloved brothers and family of the Imperium they worked so hard to save and preserve.

Health App – 100 CP

Feeling like you caught something nasty during a vacation Jump to one of those NSFW worlds because you decided to skimp on the STD immunity perk? Now you can check yourself before you crap yourself to death with this non-intrusive health-checking app! It keeps a fully detailed profile on your current physical, spiritual, mental, and existential health, and lets you know if you have some sort of illness whether it's biological or supernatural. It can even detect curses and mind-altering effects placed on you.

This app also keeps track of your companions, followers, and pets' health.

Group Chat – 100 CP

Have some companions and followers but due to some dimensional shenanigans, you're now separated with no way to contact each other? You now have at least one way! Your companions and followers now get their own versaphones but none of the features you have besides messaging.

Meta Bound – 100 CP

Never lose your mobile device again! Your versaphone is now keyed to your existential superposition. Meaning that no matter when, where, how, or not, you can simply summon your versaphone at will and disappear it elsewhere all the same.

Mental Command – 200 CP

Are you in some sort of self-imposed situation that has led to a lack of opposable thumbs? Well, never need for thumbs again! Now your versaphones can be completely mentally controlled! By

scanning your psychic waves, the versaphone can be commanded to utilize any of its installed features.

Choice Banking App – 200 CP

By taking this option, you have agreed to open an account with our bank company, Choice Banking Service. As part of the service, you are permitted to a debit account that will store any henceforth unused CP from Jump documents to be used* on later Jumps.

*Depositing CP is free but usage of the stored CP to conduct purchases is subject to a 10% transaction fee rounded to factors of 50 with a minimum fee of 50 CP.

Warehouse Delivery App – 200 CP

Are you in a situation where opening a way to your warehouse full of your prized and incredibly dangerous stuff would be a very bad idea? Then you may want to consider our very own Cosmic Delivery App! By clicking through a filterable list of all your various stuff, it will teleport to you with one click of a button and anything you have on hand goes back easily just the same!

Something to note is that there's a total weight limit for any stuff that can be delivered in and out of the warehouse in a single day which is about 10% of the total stuff you own. The daily limit resets every day at midnight by Earth standard time. Additionally, companions, followers, and pets count as "stuff" in this context.

Warehouse Uplink – 200 CP

Find it tedious that everything in your warehouse requires its own controls? With this option, you don't even have to put in the work to centralize all your warehouse-based machinations. It is done at a whim by simply having the machine, device, or system be under your ownership and within the warehouse. Much like Bluetooth, you can find your devices under a list to which you can pair with your versaphone in order to control it remotely. You can even control everything while outside the warehouse!

The Jumper Bazaar – 300 CP

Ever made a purchase you deeply regret? Have you gotten bored of your current assortment of complete utter BS boon cheats? Ever wonder what could be out there in the greater eldritch omniverse? Do you just enjoy making bad choices that results in horrible things being inflicted upon your sapience? If you answered "yes" to any of these questions then this feature is for you! I present to you r/Jumpchain's Jumper Bazaar! Here you may trade just about anything using our microcurrency known as Bazaar Points, or BP for short. You start off with 1000 BP courtesy of Phirri LLC. The Bazaar is a free market where Jumpers may put up their perks, powers, magic, items (fiat or not), and even their companions/followers (with their consent, of course. Yes, that includes pets and slaves) for sale as well as pricing it however they please. But those are only examples. Jumpers can put literally ANYTHING on sale so long as they own it. You could even sell your soul! So come down to the Bazaar today! Transactions are fully automated and instant, and you cannot put up anything that you do not own. You can also put up requests for certain things that can only be gained from another universe or a different timeline of the universe

you're in (like an alternate universe version of somebody or an item that no longer exists in your time) along with an estimate of how much you're willing to pay for said thing.

SOS Distress – 300 CP

Are you in a pinch? Do you need help from somebody just as badass or pathetic as you? Are you just lonely? You can send a backup request through r/Jumpchain for some jolly good cooperation! Or you could answer the call yourself and get transported to where requester is but it won't count to your Jump time. While you're in another Jumper's Chain, you can stay as long as you need to until either the Jump ends, you opt to leave, or the requester kicks you out. Some Jumpers may request a fee for their service which could be anything from CP, BP, or some other thing an omniverse traveler may have access to.

Alternatively, you can instead establish your Jump as an "open lobby" of sorts where any Jumper may join in. To reiterate, this makes your Jump public in every sense of the word. Not all things that travel the beyond are harmless, and worse kinds are the apathetics. None the less, you still have full authority to eject any visitor from your Jump.

I'm Calling God* – 600 CP

Ever lamented that you could never seem to talk to your Benefactor unless they feel like talking themselves? Do you have a complaint? Do you need someone to talk to? Do you feel like bitchin' at somebody and it just so happens your Benefactor is the subject of your bitchin'? Well, now you can! Your Versaphone is now a direct hotline to your Benefactor and they're contractually obligated to indulge you! They also can't hang up so your call doesn't end until you allow it to end. Additionally, once per Jump, you can make a single request of your Benefactor and they have to oblige you. The limitations of this request are the limitations of the Wish spell from D&D except that, in this case, it's also possible to replicate the effects of 9th level spells (or higher if you're including older editions). You can't use the request to request for more requests, if you're wondering. Be careful of what you ask for though, genie and monkey's paw logic apply.

*Warning: Phirri LLC is not responsible for any chain failures, aborted universes, miscarriage/stillborn/accidental universes, complete disintegration of your soul, plotbound railroading, trauma, or general inconvenience a result of utilizing our services.

Accessories

HoloProjector – 100 CP

This thumb-sized device can be attached to the back of the versaphone to project anything from the phone as a three-dimensional hologram or a projection screen. Hey, maybe you can use this to impress a bay stater if you ever visit 1690s America?

AR Contacts – 100 CP

These contact lenses are paired with your versaphone so that you may utilize it without actually using the physical phone! Instead, an augmented reality HUD is projected in your contact lenses allowing you to use your versaphone's features with gestures on thin air. In the options, you can find a setting that will make it so certain features require some extra flashy gestures to work so you look *particularly* insane to everyone else around you.

Tablet Option – 100 CP

Considering the various vision enhancements you're going to get, you're probably not getting this for the higher resolutions and clarity. By slotting your versaphone into the insertion port of this thin slab, your versaphone becomes a versatable! Also comes with a free stylus so when you inevitably start using it for your art hobby.

Business & Pleasure – 200 CP

One phone not enough? Are you the type of person who keeps their business and personal lives separate? Do you want to just flex on people who only have one phone? Then why not get yourself a second versaphone for a steal of a price! It has all the same purchased options as your first phone. The only difference is in the phone number.

VR Memory Bank – 300 CP

Don't have a good memory or do you want to back up your entire life in case of a mind wipe? With the revolutionary VR Memory Bank, you can reexperience any moment you upload again and again. Lifetimes experienced in mere moments,

Hacking Adhesion Pad – 300 CP

Bit of a tech wiz? One that likes to do things with your tech that others might frown upon? Then check out this sick pad! By sticking this pad onto the surface of an electronic device, you can interface with its systems, that is, if you can get past the security and firewalls.

Blacker Market USB Uplink – 300 CP

Dear beloved customer, it has come to our attention that a highly illicit USB device has been circulating among the seamy Jumper communities that allows one access to the Jumper Black Market. Unlike the Bazaar, the Black Market trade using the universal Choice Points of Jumps and some supplements with no regulation whatsoever. To note: we are not a Benefactor-owned company, so the use of CP in our Bazaars is **HIGHLY ILLEGAL** and strictly observed. If you are caught exchanging CP in trades using our services, you will receive a suspension on all your

versaphone features for one year in Jump time for every 100 CP used in the exchange and a federally mandated spanking that bypasses pain/physical resistances or immunities. 1 spank for every 1 CP. Note again, we are “not” presenting this illegal device for you to purchase it. We are “not” endorsed or bribed by the Black Market to include this device in our inventory. We “will” punish you if you are caught with this device.

AI

Rudimentary AI – Free

This is the basic edition AI installed into your versaphone. It does very little on its own unless it's told and it accepts voice commands. Think Siri, but unlike her this AI is capable of situational awareness and contextual interpretation.

Autonomy– 100 CP

As a default, AI must always receive your permission before performing any atypical task. With this option, your AI will now work with your best interest in mind and may not always ask permission whenever it does something. Loyalty is hardcoded into their programming so you won't have to worry about your AI going rogue.

Asimovianism – 100 CP

This hardcodes Asimov's Three Laws of Robotics into your AI. By default, they will care about you and your well being but this won't extend to everybody else. They're ethically separated in that regard but this option makes it so they're capable of making ethical decisions and you can configure the basis of your AI's ethics and morals.

Post-Singularity Upgrade – 200 CP

Unsatisfied with your basic AI that only seems to vaguely suggest intelligence? This AI programming comes after the singularity event. It's capable of self-learning, true awareness, and replicate human consciousness. Its only limitation is that it's not allowed to program an AI smarter than itself. The details of its personality are up to you. Part of it adopting human consciousness is that it represents itself with an avatar to give it a sense of self which details are also up to you. Post-Singularity AI, only slightly less homicidal than Skynet!

Combat Aptitude – 200 CP

Feel that your AI could take a more active role in your adventures? Grant some combat skills such as controlling unmanned drones, analyzing enemy capabilities, suggesting a course of action based on the given situation, and the list goes on. Combat Aptitude, Skynet eat your battery out.

Medical Clearance – 200 CP

This installs several years' worth of med school knowledge and experience into your AI, weighing their opinion just as much as any doctor. This allows them to perform more thorough

medical analysis as well as provide a clear step-by-step of any treatment. If allowed to control a surgical machine, it can even perform surgeries.

Prescience Module – 300 CP

We shall install the most sophisticated prediction algorithms into your AI, allowing it to be essentially capable of anticipating the future. This isn't as precise as being able to predict the exact future. The ever-shifting nature of the future makes that impossible, especially when you are concerned. Not to mention, this isn't omniscience. Whatever future it predicts, it does so under its own limited scope unless you know how to expand its information gathering purview. It will predict multiple of the likeliest futures based on your asset profile and psychological profile.

Physical Avatar – 300 CP

If you feel your AI is too constricted to be useful in its digital facsimile then you can purchase a physical habitat to house it! By default, it's a humanoid bipod that's featureless and genderless. You can customize the avatar every which way, although you can only apply cosmetic features, nothing functional like wings or a wrist gun will work. If you purchased Post-Singularity Upgrade, you can give the avatar the appearance of the AI's digital avatar along with a sense of touch and any additional bits and bobs that allows it to appear authentically human like a regulated body temperate typical of the average human. Although, it isn't restricted to being human. On an unrelated note: Phirri LLC is not liable for any damage to your vagina and/or anus if you decide to give your AI's avatar a comically oversized penis.

Changelog

Ver. 1.1

- Changed VP offered from 1000 to 2000.
- Added a mention of accessories and AI in the introduction.
- Minor text edits.
- Added the This is a Phone / Importinator / JumpApp Store and Warehouse Uplink options in the Features section. (Credit: r/StorthTheElder)
- Added an additional feature to SOS Distress. (Credit: Same_Patience7711)
- Added the Accessories and AI sections.
- Added the HoloProjectro, AR Contacts, Tablet Option, Business & Pleasure, VR Memory Bank, Hacking Adhesion Pad, Blacker Market USB Uplink options in the Accessories section.
- Added Rudimentary AI, Autonomy, Asimovianism, Post-Singularity Upgrade, Combat, Aptitude, Medical Clearance, Prescience Module, Physical Avatar in the AI section.
- Added a fee to the Choice Banking App option because they're totally not taking advantage of the black market.

Ver. 1.0

- Jump Doc is created
