

Star Wars: Republic Commando (Gauntlet)

Jumpchain CYOA

By reddit user Mypetdalek

Version 4

This jump is an alternative to the Clone Wars jump in which you play a clone soldier.

This jump lasts for the entirety of the Clone Wars, from the Battle of Geonosis to Order 66.

You start with Ocp and growth acceleration, meaning your clone body will age twice as fast.

Timeline

You can choose either the Legends or Canon timeline. The differences between the two are unlikely to have much of an impact on your own story.

Training

The following training applies to you and the other three members of your squad. (There is no drop-in option).

Clone Trooper [0cp]: You are one of a four-man squad of ordinary clone troopers.

Clone Commando [100cp]: You are one of a four-man squad of clone commandos.

ARC Trooper [150cp]: You are one of a four-man squad of ARC troopers.

Squad

Your squadmates automatically receive all the equipment and weapons that come free with their training, plus 150cp for free. See the perks and drawbacks section details which perks and drawbacks are available to them. Your squadmates do not gain CP from missions.

Equipment

Clone Trooper Armour (Free: Clone Trooper, ARC Trooper)

Katarn-Class Commando Armour (Free: Clone Commando): Comes with a free knuckle-plate vibroblade, a one-handed weapon that **does** count towards your carrying limits. Also includes an interactive heads-up display, a survival pack and a tactical spot-lamp.

Commando Recon Droid [50cp] (Discount: ARC Trooper): Hovering sphere that generates a holographic image of the surrounding area.

Jetpack [300cp] (Discount: ARC Trooper): Take to the skies like Jango Fett.

Weapons

You may carry up to 2 two-handed weapons, plus 2 one-handed weapons. One handed weapons are marked with a . Any weapons you own that you can't carry can either be given to squadmates or stored in the warehouse.

Republic Weapons

These weapons are accessible from the start of the jump.

 **Garottes [25cp]:** A length of thin cord used for strangling non-droid enemies. Although they require both hands to use, a supply of 20 garottes count as a one-handed weapon for the purposes of carrying limits.

(A) DC-15s side-arm blaster [50cp] (Discount: Clone Commander): Fitted with energy-trickle technology to conserve ammunition.

(A) Bayonet [50cp]: A knife that can be attached to the end of any other ranged weapon.

DC-15S Blaster Carbine [50cp]: A shorter, less powerful version of the DC-15A.

(A) DC-17 hand blaster [50cp] (Discount: ARC Trooper): Standard-issue Republic blaster pistol. Very effective when dual-wielded.

DC-15A Blaster Rifle (Free): The standard-issue rifle of the Grand Army of the Republic.

DC-17m Interchangeable Weapon System [250cp] (Discount: Clone Commander): This weapon has three settings: blaster, anti-armour and sniper.

Reciprocating quad blaster [400cp] (Discount: ARC Trooper): A four-barrelled heavy weapon.

Z-6 Rotary Blaster Cannon [250cp]: A powerful chaingun used by clones trained in heavy weapons.

Geonosian Weapons

These weapons are accessible after completing one Battle of Geonosis mission.

(A) Force Pike [25cp]: An upgraded version of the Geonosian spear.

(A) Sonic Blaster Pistol [50cp]: Less powerful than a regular blaster pistol, but cannot be blocked by lightsabers.

Sonic Blaster [100cp]: Less powerful than a regular blaster, but cannot be blocked by lightsabers.

Elite Beam Weapon [250cp]: Fires highly destructive beams of energy.

Trandoshan Weapons

Unlocked during and after any mission with Trandoshan enemies.

(S) **Slaver Blade [50cp]**: A Trandoshan dagger.

ACP Array Gun [150cp]: A Trandoshan shotgun.

ACP Repeater Gun [150cp]: A Trandoshan SMG.

LJ-50 Concussion Rifle [200cp]: A Trandoshan heavy weapon.

Heavy ACP Repeater [250cp]: An impractically large Trandoshan heavy weapon.

Wookiee Weapons

Unlocked during and after any mission on Kashyyyk.

Kashyyyk Long-Gun [50cp]: A scopeless rifle used by some Wookiees instead of a bowcaster.

(S) **Wookiee Side-Arm [50cp]**: Essentially a standard blaster pistol.

(S) **Wookiee Slug-Thrower [25cp]**: Old-fashioned Wookiee sidearm.

Bowcaster [200cp]: An energy crossbow that fires multiple quarrels of explosive green energy.

Wookiee Guided Rocket Launcher [250cp]: A giant rocket launcher, sized for Wookiees.

Perks and Drawbacks

Perks and drawbacks marked with an **(S)** have effects that apply to the whole squad and thus may **not** be taken by your squadmates.

Perks

(S) **Squad Leader [25cp]**: You are the leader of your four-man squad. You are skilled in leadership and always keep calm under pressure.

Brawler [25cp]: You can deal a considerable amount of damage with your fists alone.

Demolitions Expert [50cp]: You love to blow things up and always have explosives on hand.

Sniper [50cp]: You are a crack shot with a rifle.

Slicer [50cp]: You are an expert hacker. There's no lock too intricate or firewall too thick to keep you out forever.

Ambusher [50cp]: You specialise in ambushes. Those clankers won't know what hit them.

[S] Not a Jango Clone [100cp] (Discount: Spaarti Clone Drawback): You and your squad are clones of someone other than Jango Fett. You must be human and cannot be Force-sensitive, but you can be of any human appearance, race and gender.

[S] Sergeant [200cp] (Discount: ARC Trooper): You gain the rank of sergeant. You command your four-man squad, plus five Clone Trooper privates. These privates are each equipped with Clone Trooper armour and a DC-15A Blaster Rifle. They cannot take perks or drawbacks and do not gain CP.

Wookiee Grip [200cp]: Dual Wield any two weapons, including two-handed weapons such as rifles. (Cannot be taken with the Ewok Grip drawback).

[S] Companion Import [50cp] (Requires: Not a Jango Clone): Replace one of your squad members with a clone of one of your companions. They cannot keep any of their equipment, but they keep all of their non-supernatural abilities and receive equipment and CP as normal. You may take this perk up to three times, once for each other member of your squad.

Drawbacks

No Growth Acceleration [+100cp]: Your clone body ages at the normal rate, making you 10 years old at the start of the Clone Wars. For some reason they still let you do commando missions.

Bloodthirsty [+100cp]: Your aggression makes you a fearsome opponent, but hinders your rational thinking and tactical ability.

Stormtrooper Marksmanship [+100cp]: You miss on 90% of your ranged attacks, or 50% if the "sniper" perk is also taken.

[S] Redshirt [+100]: Enemies will always target you over the other members of your squad when given the choice. They will be 50% more accurate than usual when doing so. A good tactician might be able to turn this situation into an advantage, however.

[S] Spaarti Clone [+100cp]: You and your squad were grown extra-rapidly and flash-trained with false memories. As a result you are all insane and likely to fire on your allies in a beserk rage. You are likely to die from your accelerated ageing shortly after Order 66.

[S] Droid Commandos [+50cp]: B1 Battle Droids are replaced with much more competent models.

[S] Geonosian Reinforcements [+50cp]: Geonosian Elites attack you on every mission you take.

Ewok Grip [+50cp]: Can only carry 1 two-handed weapon and 1 one-handed weapon. (Cannot be taken with the Wookiee Grip perk).

Missions

You must pick at least one mission from each category: Battle of Geonosis, Early Clone Wars, Late Clone Wars and Order 66. Rewards are not gained immediately, but rather at the end of the jump.

Battle of Geonosis Missions

"Around the survivors a perimeter create!" [+50cp]: You are one of the soldiers sent to rescue the Jedi from the Geonosian arena. This involves fighting off hordes of battle droids fresh from the factory, but you'll have the might of the entire Grand Army behind you.

Reward: 1 Geonosian Nantex-class Starfighter. A fast one-man fighter designed exclusively for Geonosian aces. It's armament is one amethyst laser cannon.

Assassinate Sun Fac [+100cp]: You are sent in place of Delta Squad to assassinate the Geonosian Prime Minister. You will face some of Geonosis' most formidable infantry along the way, such as Super Battle Droids, Geonosian Elites and Advanced Dwarf Spider Droids.

Reward: 1 Low-Altitude Assault Transport (LAAT). The standard dropship of the Grand Army of the Republic, capable of carrying up to thirty clones and four speeder bikes into battle. Alternatively, the "carrier" version can carry one AT-TE.

Early Clone Wars Missions:

Remote Outpost [+0cp]: A deathly boring posting beyond the Outer Rim where you can wait out most of the Clone Wars in safety.

Reward: 1 pet Gizka. These bipedal reptiles are considered vermin across the galaxy. Some people think they're cute though.

The Battle of Teth [+75cp]: You are sent to assist in the rescue of Rotta the Huttlet. You will have to fight your way up a vertical cliff face, before rescuing the Huttlet and escaping the clutches of Assaj Ventress.

Reward: 1 All Terrain Tactical Enforcer (AT-TE). This heavily-armed hexapod walker is a true all-terrain vehicle, capable of operating even in space or on sheer vertical cliff-faces. It's armament is 1 mass-driver cannon and 6 anti-personnel lasers.

Investigate the RAS Prosecutor [+100cp]: You are sent in place of Delta Squad to investigate the wreck of the Prosecutor and fight off Trandoshan scavengers and mercenaries. Unlocks Trandoshan Weapons.

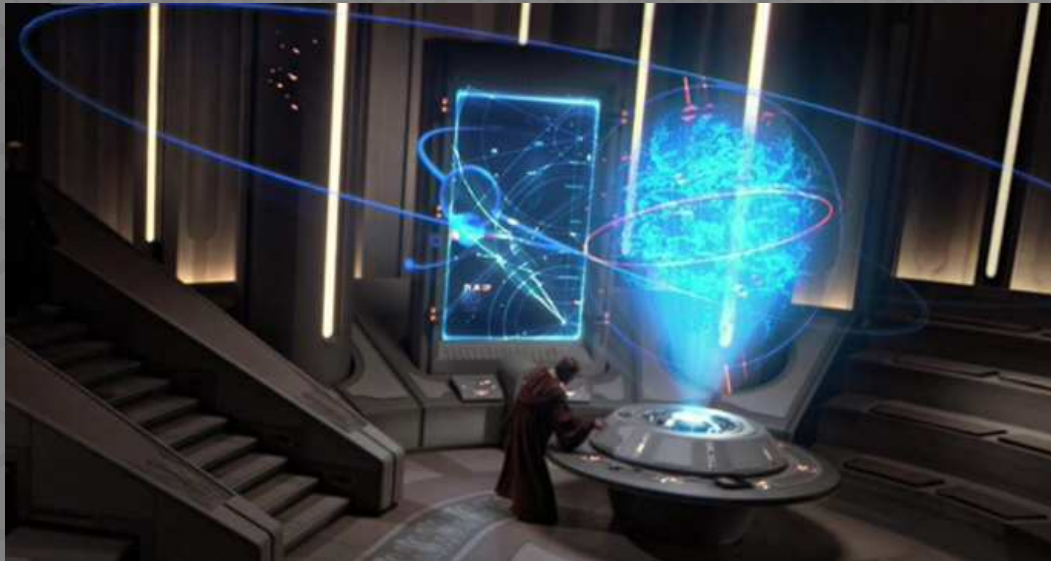

Reward: 1 Nu-class shuttle. A long-range alternative to the LAAT, with a class 1 hyperdrive, but without the capacity to carry vehicles.

The Battle of Muunlist [+125cp]: You are sent in place of the Muunlist 10 to sabotage enemy emplacements and capture the leaders of the Intergalactic Banking Clan whilst fighting off the near-immortal bounty hunter Durge.

Reward: 1 Self-Propelled Heavy Artillery Turbolaser (SPHA-T). A giant walking cannon that fires powerful turbolasers.

Late Clone Wars Missions:

The Outer Rim Sieges [+50cp]: Siege a droid fortress on an outer-rim world.

Reward: 1 Alpha-3 Nimbus-class V-wing starfighter and Q7-series astromech droid. A small starfighter equipped with two laser cannons and a detachable hyperdrive booster ring. Comes with a spherical Q7 astromech droid designed for use with the V-wing.

Rescue Tarfful [+100cp]: You are sent in place of Delta Squad to rescue Tarfful the Wookiee from Trandoshan slavers on Kashyyyk. You will face many types of battle droids, Trandoshan slavers and even Grievous' Magnaguards on the way. Unlocks Wookiee and Trandoshan Weapons.

Reward: 1 ARC-170 starfighter and 1 R4-series astromech droid. This large starfighter has a crew consisting of one pilot, a copilot, a gunner and an astromech droid. It has both forward and rear-mounted laser cannons and a proton torpedo launcher.

Assassinate General Grievous [+200cp]: Your squad has one chance to end the Clone War once and for all. This mission is exceedingly difficult, especially as Grievous has hundreds of droids surrounding him, but it might be achievable if you can tempt him into a duel.

Reward: 1 set of Mandalorian Armour. Mandalorian *beskar'gam* is regarded by many as the finest armour the galaxy has to offer.

Rescue the Chancellor [+300cp]: You are sent in place of Obi-Wan Kenobi and Anakin Skywalker to rescue Chancellor Palpatine from the Invisible Hand. Hacking skills will be essential here if you want even the faintest hope of getting past Count Dooku and General Grievous.

Reward: 1 Venator-class Star Destroyer OR 1 Acclamator-class Assault Ship. These monolithic capital ships come with their full complement of crew.

Order 66 Missions:

Younglings [+50cp]: Eliminate a small team of 5-10 sabre-wielding children on Coruscant.

Reward: 1 DC0052 "Intergalactic" speeder. A small, fast airspeeder with a cockpit like that of a starfighter.

Padawan [+50cp]: Assassinate one teenaged Jedi on Tatooine.

Reward: 1 Jawa Sandcrawler. The iconic vehicle of the Jawas of Tatooine.

Knight [+100cp]: Assassinate one fully-fledged Jedi on Nar Shaddaa.

Reward: 1 All-Terrain Recon Transport (AT-RT). A fast scout walker armed with a repeating blaster cannon and mortar launcher.

Master [+150cp]: Eliminate one Jedi Master and their Wookiee allies on Kashyyyk. Unlocks Wookiee Weapons.

Reward: 1 All-Terrain Assault Transport (AT-AT)

Grand Master Yoda [+400cp]: Your squad has unfortunately been selected for the task of assassinating Jedi Master Yoda and his Wookiee allies. It's a suicide mission. Unlocks Wookiee Weapons.

Reward: Force-Sensitivity and 1 Trade Federation Lucrehulk-class battleship, with 5 million tons of cargo capacity.

Insubordination [+0cp]: You won't be rewarded for it, but it's the most ethical choice. Depending on which version of canon you follow, you may need to remove a brain chip in order to take this option. This mission may not be taken if you have the "Bloodthirsty" drawback.

Reward: None.

After the Clone Wars...

You can choose to stay in the Star Wars galaxy, possibly to serve the Empire as an Imperial Commando, or move on to the next jump in the chain.

You get to keep all your weapons and equipment and you may keep your three squadmates as your followers.
