Generic Lewd VR Game World Jump
v1.0

by Masked Dusk

In timelines where there is more and more advanced technology which allows man to send their mind into video games to better experience it first hand. There are more than a few who interact with NPCs and other Player Characters and go, “Can I fuck that?” The answer for this is yes in this one.

Though just who are you? Are you a Player Character wanting to enjoy their porn game either in the privacy of their own home or with many other players in a lewd MMO? Perhaps you're one of the various NPCs or Non-Player Characters who due to a quirk of science ended up becoming self aware and are trying to live your best life in this horny world? Perhaps you're one of the makers of this setting, a Developer, who put their heart and soul into designing a fun and interacted world while accidentally granting souls to NPCs you only notice too late, or on purpose to enhance the experience for your own entertainment, or the Players?

Whatever the case maybe you are going to spend 10 years at least in this jump assuming this isn’t just a Supplement.

Take **1000 Choice Points** to fund your adventures.

Starting Game Setting

*This is the Game World that you start in. If you're a Player this is the game you just logged into. If you're a NPC this is your whole world. If you're the Developer then you made this world and you already know all about it. You can roll a **1d6** to randomize the choice, getting **+100 CP** to spend on the setting (Note: Cannot roll for Supplement Mode (Drawback)).*

If you are taking this with Supplement Mode (Drawback), you will auto get the Free Choice setting.

Lewd Dating Sim
This setting is more about interacting with the characters, seducing them and making them fall in love with you. Alternatively your goal is to break the will of the characters and train them up for your entertainment. Either case you're not likely to leave this place a virgin.

H-Fantasy RPG
Medieval time period fantasy world of some sorts. Can take place in a Japan-like country or European based one depending on your taste in aesthetics. Possibly a mix of both if you feel like having ninjas running around with knights. There is a system in place that lets you learn how to use magic, use a weapon and so on. There are monsters that will appear, but you could end up gathering a party of players or NPCs to help your adventures.

Sci-Fi Space Shooter
You are going to Space Jumper in this action packed shooter. You will be facing various aliens of all kinds of appearances, the occasional space zombie and more in this thrilling adventure among the stars! Gives you a chance to gather a crew of Space Babes to save the galaxy with!

Monstergirl Farming Simulator
This is an oddly relaxing setting. Just you, the plants, the animals and the monster girls you breed and sell off, or keep around to help you out. Mostly a farming simulator with an oddly lewd twist on things.

Sex Fighter Game
You fight a variety of foes ranging from top heavy martial arts school girls, to superheroines with big booties and more. You can compete in online tournaments with it being a common rule to fight to the rape or the date in these settings by impressing your opponent by beating them up enough they submit to your requests!

Free Pick.
You are free to choose where you choose from the available options, pick something not mentioned, or make up a game based setting of choice. If you land on this you can choose to get the Discounts from a setting of choice as if you picked that setting.

Age and Gender
Skip this section if you are taking the Supplement Mode (Drawback) option.

You need to roll your age using a **20 + 1d8**.
By default your gender is whatever you were previously.
It is **50 CP** each to freely choose your own age or gender.

Origins
Pick any of the Origins for Free!

Player
You are one of the many Players who logged into this game world, or the guy who bought the game and you took it home to play with you in the privacy of your own home.

NPC
You're a Non-Player Character. One of many made to fill out a setting. You could be a love interest, an ally, an enemy or even just a common mob character. You help the player experience.

Developer
You make the games that people play. You enjoy seeing people enjoy your work even if it's hard work and takes a lot of time to figure out everything. Eventually you will see it done creating your own games.

Race

You are a **Human** if you are a Player or Developer, with your Avatar able to take on any race that would fit the Game Setting. While if you're an NPC you can go with any race or species you're interested in being though limited in strength based on your other perks and abilities. So even if you choose to become a Dragon you're a Level 1 Dragon without all the super cool abilities, and skills.

Perks

Origins get their 100cp perks for free and the rest are discounted to 50%.

General [Undiscounted]

Avatar Body [1st Free / 50 CP Per Each Additional]
This is a body designed within the limits of the game itself. At this level so long as it fits the limits of a starting character within these kinds of games you may go with any. Runs on video game physics and adjusts to the game it is in. Appearance, gender and so on are purely flexible with the character being the same static age from start to finish. After this setting is over the Avatar can be used as an Alt Form in future jumps, even imported into games within a world to use as your personal avatar. Could be used for Real Life with it acting as if it is a Video Game come to life with its physics being connected to the game it came from. Can be purchased multiple times for a cost.

EXP Bar [Free / 50 CP to Keep]
Levels are determined based on experience or EXP gained over time. This allows you to gain new levels by collecting EXP by completing quests, slaying enemies and other things you can typically do in a game. The EXP bar is attached to the **Avatar Body (Perk)** for this Jump and is capped at Level 100 with every 5 levels unlocking a new skill to use based on playstyle. **Can be purchased to keep after this jump for 50 CP functioning the same as this Jump and breaking the Level Cap though you will need to get Experience and this is still attached to your Avatar Body Alt form.** *Note: If you have multiple Avatar Bodies purchased this jump, this Perk will apply to all of them though EXP will go to the body you are currently in, and only when it is active as your current body.*

Status Screen [Free / 50 CP to Keep]
This is your Status Screen. It will keep track of all your health points, stamina, magic if you have it, any other meter of a resource you possess, stats, character details, how items affect you good and bad, and so on. It updates over time and can be called on at will. **Can be purchased to keep after this jump for 50 CP functioning the same as this Jump.**

Inventory [Free / 50 CP to Keep]
Pretty much all Video Games have an Inventory system of some sort. For this Jump you have a 6x6 Inventory which items can stack in up to groups of 100 inside. It is limited by what you can pick up for what you can take with you to carry. **Can be purchased to keep after this jump for 50 CP functioning the same as this Jump.**

Smut Game Physics [Free / 50 CP to Keep]
When you play a game, you tend to forget that physics is a thing. Especially for the sex scenes and for good reason. As some of the stuff you see there should kill someone or cause them pain instead of pleasure. Now you can tell physics to fuck off so that you and others in this setting can fuck around without limits. **Can be purchased to keep after this jump for 50 CP functioning the same as this Jump. It is toggleable at the start of the jump to apply it.**

Quick Draw [50 CP]
You can pull out a weapon even from where it was hidden in your backpack and have fresh ammo loaded and ready to use within a fraction of a second. A necessary survival skill in some of these worlds, and a useful party trick in others.

Cheat Code: Hotness +5 [50 CP]
Can alter the appearances of people in a setting with it being toggleable. Can make it so that everyone is a 7/10 at least with no one being that unattracted to you. Can apply to specific groups effects.

Cheat Code: Alternative Outfits [100 CP]
This Cheat Code allows you to alter the style and how much people cover up in a setting. Equipment and gear along with normal clothing is altered to be just as protective no matter how much or how little someone is covered up. Makes it so that it's perfectly normal for people to wear just bikini armor. Maybe you're in the mood for some body paint. While you can't just make it so that everyone is walking around naked, you can make it ridiculously revealing. Can Toggle this before entering a jump and alter the outfits of groups of people, even the main characters as individuals.

Skilled Programmer [100 CP]
You are very skilled at programming. You can pick up on programming languages fast. You start out skilled enough to make some basic programs and even program your own game given enough time. Includes a learning curve that increases the rate at which you learn new things.

Thought to Code [100 CP]
You don't even need to use your fingers anymore. You can literally think of the code you want and a computer that you are touching will write it out for you at the speed you're thinking. Far faster than you would be able to pull off without help.

Cheat Code: Fast Travel [200 CP]
You can travel quickly to any prior location that you have gone before. Well less travel and pretty much teleportation with a delay effect of a couple of minutes even though the trip should have taken you a couple of hours or even days or months or years. You can take anyone with you who is touching you, or you touch. Even works for the guy touching the guy who is touching the guy who is touching the horse you're riding on if you want it to take them with you.

Cheat Code: SEXperience [200 CP]
In most of these games you need to defeat monsters, slay enemies, or explore the map to gain Experience or EXP to boost your Avatar's levels. With this special Cheat Code you can gain EXP over time based on how often you fuck. With the more impressed you leave your lover boosting the gains along with how impressive a babe you land giving more EXP.

Respawn [Free / 600 CP to Keep]
When you die in the game, you come back at a Respawn point. Pretty much infinite revival though not all of your wealth, items and gear does not come back with you and you need to find where you died to grab your stuff before someone takes your loot with only a portion of your wealth staying. **Can be purchased to keep after this jump allowing you to revive so long as you have wealth, or gear on hand to leave behind should you die. You cannot Respawn again once you are out of loot.**

Lewd Dating Sim

Relationship Tracker [100 CP | Lewd Dating Sim]
You have a status screen that keeps track of everyone you interact with. It gives you the basics including the level of relationship you have with them including if they feel affection for you, or even if they hate you. It will record all the important information you gather about them and you can auto-sort this to only show the people you want to see the status of. Very useful in keeping track of what gifts to give to raise their affection meters.

Fuck School [100 CP | Lewd Dating Sim]
You are sick and tired of having to go through High School again and again. This perk lets you shift the location of the setting from a High School to another setting. Such as College, a Mall, or even a Small Town. Even aging everyone up by a few years so it makes sense, or just a select group of people such as the main characters of the story if you don't care for the rest of the cast. You will still get the chance to regularly interact with people you are interested in.

Considerate Lover [100 CP | Lewd Dating Sim]
You know just what lines you cannot cross with the people you are with. Some girls you have to romance slowly before they even consider going further than getting a little frisky. Others will let you take their ass before they will let you say the Three little words "I Love You" without freaking out. You have an instinctive sense of these unspoken boundaries and limits and will feel an alert to stop before going too far if you think of putting thought into action.

Passed the Checkpoint [200 CP | Lewd Dating Sim]
Relationships in this setting are a series of check marks and passes. Once you convince someone that it is OK for the two of you to kiss even if you mess up big time and they don't want to date you anymore after catching you in bed with their twin sister. They will not deny you a kiss since you already passed the earlier requirements. Can use this to help get yourself back in their good graces, or advance further over time.

Great Student [200 CP | Lewd Dating Sim]
You are well educated and can keep track of the course work pretty easily. You could pass your High School exams without any real effort and get through College Level course work with relative ease. Helps you pick up on lessons and learn new topics easier over time.

A Little Privacy [200 CP | Lewd Dating Sim]
You have a good eye for places that you and others can slip into to get a little privacy for a make out, or more. No one will spot you, hear you, walk in on you, or even question where you all are at. Once you're done all evidence will be erased…well unless you want it to stick around like some semen on her girl's lips after she went down on you in the closet if you're kinky like that.

Second Chances [400 CP | Lewd Dating Sim]
Sometimes your date figures out that you are also screwing the head cheerleader, the math teacher, their cousin, their sister and even their mother who happens to be the Principal. Somehow they will still give you the time of day after this major screw up. You could even possibly talk them into giving them and their relationship with yourself and everyone else another shot ignoring the morality of the issue. Once someone truly falls for you hard enough they will stop trying to stop your lewd behavior with others, and even get excited by it.

Escalating Pleasure [400 CP | Lewd Dating Sim]
Talking to people who are already falling to you into giving up their morals and embracing the horny and your own lewd desires is shockingly easy. You just have to start small and find a crack that will raise their affection for you. Then once you convince them that one little kiss will turn into hundreds needed to raise their affections enough to try something more extreme and lewd.

Gifts! [400 CP | Lewd Dating Sim]
Let's be real, in the real world if you go up to someone and hand them a random flower you found on the ground. They will smile politely at best and then throw it out when you leave while wondering who the strange kid was, or just keep it and feel nothing. Here people will always accept something given to them as a gift and keep it as long as it's not something harmful. They will also remember being given a gift by you and feel affection towards you for doing that. You could give someone you just met a Butt Plug and they will both be thankful and keep it. Give someone who hates you enough flowers and they will eventually find themselves liking you as a person. Only works as well as the gifts you give them.

Harem Ending [600 CP | Lewd Dating Sim]
When you win over the affection and love of a character completely. At the end of the Jump you will get a list of those who you have successfully seduced to loving you. Each of them is perfectly willing to follow you wherever you end up. You may take them with you as Followers into future Jumps as members of your Harem.

Master of Lovin' [600 CP | Lewd Dating Sim]
You have the sexual skills and talent of a porn star in a hentai video game. You know far more about making love than most people alive will ever know. You know all the positions. How to angle thrust to strike the G-spot just right, how to keep a consistent rhythm while being immune to rug burn for you and your partner. How to figure out where the g-spot is at only a glance and even a list of kinks you know your lover would be into if you could get them to give it a try. Your genitals are just the right shape, size and color. They and even your semen tastes great. You're built to out last any lover or group of lovers using sheer pleasure to make it a night they will NEVER forget!

H-Fantasy RPG

Starting Job Class [100 CP | H-Fantasy RPG] (Can be taken Multiple times, only first purchase is discounted)
In games like this you have your choice between usually three basic jobs; Warrior, Thief, or Mage. The Warrior Class focuses on physical abilities boosting the rate you gain Strength and Durability. The Thief Class focuses on being quick on your feet and wit, boosting Dexterity and Evasion. The Mage build boosts about increasing your overall level of Mana as well as your Intelligence to perform high end spells better than the rest. The build you pick will decide how your character turns out with it possible to grow further.

Starting Skills [100 CP | H-Fantasy RPG]
These are the basic skills linked directly to your Build. You get a set of starting skills based on what class you're playing, and the way you play it. Warriors will usually pick up a Sword Attack skill and Endurance skill. Thief Class tends to gain a Steal skill and Stealth skill. Mage Class usually picks up a classic Fireball or similar Magic Skills. You get two starting out no matter the class(es) you pick and gain more as more classes are unlocked.

Mercy or Death [100 CP | H-Fantasy RPG]
In a fair number of these settings you get a choice between killing someone, or letting them live even after dropping enough damage on them that they lose more HP than they had at the start of the fight. This lets you decide if you want someone to live or not and even after delivering a lethal amount of damage will have them live if you want them to live.

LOOT! [200 CP | H-Fantasy RPG]
You know how enemies in these games drop random stuff that they never use. Now that applies to this and future Jumps as enemies you beat will ALWAYS drop some Loot even if they have never seen that dagger they dropped in their life! It could be something of little value like some pocket money if you defeat some back alley thugs after this Jump. It scales though to how dangerous, rich and powerful the foe you defeated was with someone like Superman dropping a Legendary Item at least if you beat him.

Armor Breaker [200 CP | H-Fantasy RPG]
If you deal enough damage. You can break the equipment of an opponent instead of killing them in the case of a fatal blow. This will allow you to capture your enemy who is exhausted and too tired to fight back.

Party Recruitment [200 CP | H-Fantasy RPG]
You can recruit any character that you can convince to follow you as a member of your party. You only have 4 Slots for your party, including yourself. Meaning you can only recruit 3 other people at a time. EXP will be shared and if they remain part of your party at the end of the Jump you can make them your Followers or Companions if you decide to import them into future Jumps. In future Jumps you can recruit new Party members to make Followers or Companions not imported into the Jump your companions, though they get nothing from this import into the setting.

Unique Job Class Unlock [400 CP | H-Fantasy RPG]
This is a unique class that is created based on your prior class(es), your play style and other perks picked up. Magic Knights are common for someone with a Warrior and Mage skill combining physical attack with magical enhancement to your attacks and defenses. For those who focus more on laying with their enemies than slaying them, a Eromancer Class is fully possible especially for a Mage starting out. Tamers can happen for those with a lot of pets, and so on. How this class affects you and what it does is mostly up to you though you will need to level it to figure out its full potential.

Skill Maker [400 CP | H-Fantasy RPG]
A unique ability which allows one when they practice enough to be able to craft their own skills. Can be done by doing two skills together enough, performing unique actions, getting creative, abusing game bugs and so on. A common one that most with this end up making is Poison Resistance into Poison Immunity by allowing themselves to get poisoned status repeatedly. You could use other perks and knowledge of other settings and skill sets to make unique combos such as a sword skill that deals 3 strikes of damage all at once after practicing trying to cut down swallows' midflight often enough.

Party Recruitment+ [400 CP | H-Fantasy RPG]
You now have a lot more slots to pick up party members with. Same rules as **Party Recruitment (Perk)** the only difference is that you have a total of 4 new slots to make use of. This version though has it so that you, yes you Jumper, get a single free slot to keep yourself as part of the party freeing up all 4 slots for new members and if you had the prior version of this perk too that's 8 slots total for recruits!

Recruitable Bosses [600 CP | H-Fantasy RPG]
You don't actually need consent now in order to recruit someone. You just need to beat them in a fight and NOT kill them afterwards. You can even 'recruit' Boss Monster level enemies this way. You just need to beat them down enough that they are forced to accept their place as your new sla-I mean ally. You just need enough Party Slots to take them all.

Cheat Code: Boss Monster [600 CP | H-Fantasy RPG]
This is a massive power upgrade to the Avatar. Multiple bars of HP, several times the MP, stats multiplied by x5. Quality of equipment increased to keep up with it. And it grows with the player character, has no drain on the stamina with the only drain being just how much power it is using to power its far bigger attacks. Designed to be the Big Bad Boss Monster or Character at the end of a dungeon encounter. Can be triggered on and off for a boost in power in future jumps increasing the overall power of that form.

Sci-Fi Space Shooter

Steady Aim [100 CP | Sci-Fi Space Shooter]
You have nerves of steel. Even during the middle of an alien raid, or zombie apocalypse. You will keep a leveled head allowing you to act without freezing up in fear, panic or horror. Saving all those emotions until AFTER you get out of this situation alive.

Stupid Sexy Humans [100 CP | Sci-Fi Space Shooter]
In settings like this one. Alien beings find humanity weirdly hot even though they shouldn't. Can apply this toggleable perk to this setting and future settings making the local alien or just non-human species of your choice find humanity(or whatever species you are if you inserted as something else) weirdly sexy. Doesn't mean they will drop their pants and bend over at the sight of the first human/whatever, but it will open up the door.

Breathe Easy [100 CP | Sci-Fi Space Shooter]
You don't have time to worry about if the air you're breathing on this alien world is actually something you can breathe considering the war and all the alien space babes around! This is a fiat-backed perk that makes it so that all worlds, space stations and space ships you visit have an atmosphere with air you can breathe. Does not keep you from suffocating if your air way is blocked or you dive into a water based world without the ability to breathe underwater.

Ammo Ever After [200 CP | Sci-Fi Space Shooter]
Everyone you beat seems to drop ammo, or just leaves it on the ground that you can use even though they shouldn't have anything. You can always find bullets and ammo for any weapon you have. Even those weapons that would be very hard to make more ammo for such as Sci-Fi futuristic alien ray guns in the wild wild west.

Omnicompatible [200 CP | Sci-Fi Space Shooter]
For some reason as long as you can fuck it, you can have kids with it. You can control just how much the kid will take after yourself or their other parent including a perfect hybrid between your species if you are different species. Can customize the kid's look making sure they get certain genes from both sides that make it possible to happen. Could use it to create a new subspecies or even race between two different species.

Galactic Common [200 CP | Sci-Fi Space Shooter]
This is a blanket effect that makes it so that the Jump your in and future Jumps, that alien civilizations share a common language. It happens to be the same language you learned on earth in your original Jump. Species and people can have their own individual languages, but at least you can talk to the lizard person who would usually only speak Klingon now.

A Gun's A Gun [400 CP | Sci-Fi Space Shooter]
Doesn't matter if you picked it off the ground at a ruined Walmart or stole it from an alien lab somewhere in the Andromeda galaxy. You understand how a gun works, can figure out what ammo it takes, figure out how to load it and know how to adjust for outside

environmental factors that would mess up your shot. Might take firing a couple of times to get a feel for it, but you can use any gun out there as long as you have some ammo to put in.

Xeno Tinker [400 CP | Sci-Fi Space Shooter]
You can pick up fast on alien technologies you have no frame of reference for. You can see where principles came from through observation of enough of their technology, and time to take apart and reconstruct their technology. You know enough at a glance to at least keep yourself from killing yourself and in time can learn a bit of their tech tree. Enough to eventually apply it to your own technology in the future and make devices similar to theirs if not better.

Put a Band-Aid On That [400 CP | Sci-Fi Space Shooter]
Your biology makes no sense. Your guts could have a hole going through it and your kidney splattered. Yet the instant you put a big enough band-aid on it you're cured with everything healed up and ready to fight. You just have to bandage something up or take a shot of some medicine. You cannot even read the bottle in the middle of a combat zone. And as long as you take enough of it, it will heal any injury you possess. This covers curing yourself of diseases, toxins and more. A side effect is that you do not scar unless you want a wound to scar.

Cheat: Golden Gun [600 CP | Sci-Fi Space Shooter]
This perk lets you summon a single six shooter gun once per day with a single bullet inside of it. Each bullet will always destroy on a conceptual level of whatever it hits. Killing most beings in a single hit, or at least weakening them in the case of the alien god creature making it flee until you can figure out a better plan to kill it another day. *Warning: You will need to hit the enemy with the bullet and there will only be one bullet in the gun when summoned that has this effect each day. Range is that of a normal six shooter pistol meaning anything more than 10ft away will be very hard to hit as the bullet will start to lose momentum fast.*

Psychic Enhancement [600 CP | Sci-Fi Space Shooter]
Your brain was modified in order to tap into Psychic Energy. You are fully capable of telepathy as well as telekinesis. You start small only able to read surface thoughts and nudge objects no larger than a bullet just out of your path. Yet over time you grow and develop as you push this power. There is no real limit beyond what your mind can process and understand. By the end of this jump you could lift houses with your mind, and alter the thoughts of others in various minor ways to make them forget you were ever there.

Monstergirl Farming Simulator

Monstergirl Farming 101 [100 CP | Monstergirl Farming Simulator]
You know how to care for your charges. You understand the basics of any non-human biology you encounter with only minor observation, with books on the topics helping to deepen this understanding further. With time and study you could figure out how to raise prize winning Monstergirls as well as understand what they produce and how to harvest it safely without hurting them.

Actual Farming Knowledge [100 CP | Monstergirl Farming Simulator]
You know how to plant and care for crops. You know how to ready the soil, test it and add in what needs to be added in to ensure a good harvest. You can identify diseases and if a plant has too much or too little water at a glance. It's not super natural and it will be hours of labor. But you are just that skilled at this stuff as if you took several classes and got hands-on experience on a real farm.

Weirdly Sexual Compatible [100 CP | Monstergirl Farming Simulator]
For some reason everything is weirdly compatible sexually with yourself. Doesn't matter the species or logistics. Everything from the various monsters, to the aliens, to the giant rock monsters has genitals that you can have sex with if you want to.

Pocket Dimension Womb [200 CP | Monstergirl Farming Simulator]
Your womb has a god damn pocket dimension that triggers the moment of conception for any children you're making. Any kid you have will grow up at an accelerated rate. Be born fully grown without pain teleported out into the real world without having to deal with a second of birthing pains, or having your body change at all. If you father a child with a partner, this effect will trigger for them with a time acceleration of your choice if you don't want the kid to be fully grown but a baby, a toddler or even a teenager. They will be able to speak and know the language of their mother and basics of the world through their mother.

Cheat Code: Monster = Girls [200 CP | Monstergirl Farming Simulator]
Monsters are still monsters even if they now all come with boobs. Still in this and future jumps you can toggle it making it so that all Monsters of the setting look like sexy monster girls. You can even control the slide of how monstrous or anthro they look. Maybe you want your catgirls to be humanoid cats with tits and ass, or maybe you want them to be pretty much human with just some kitty ears and tails. The choices made here are up to you for how they end up able to select specific species or even give a range of possibilities depending on what you're into.

Planting the Seeds [200 CP | Monstergirl Farming Simulator]
Complete control over your own fertility. You can make it so that you have a fertility of 0 making it perfectly safe for those not interested in kids with them knowing it will be safe to fuck you bareback. Alternatively you could raise it to max and guarantee the next thing you have sexual compatibility with will get knocked up.

Market Access [400 CP | Monstergirl Farming Simulator]
There is always someplace you can sell this stuff. You just need to know where. Now you will know where to go in any jump or future setting to buy or sell any product you want. Even those that shouldn't exist in your setting due to some dimensional traveler setting up a market stall in a shady backalley way wanting to do some trade with you for some unique products.

Strict Schedule [400 CP | Monstergirl Farming Simulator]
Handling a farm is a LOT of work. Feeding times, cleaning, breeding times and so much more Now you are skilled enough at delegating that you can make sure that each task has someone assigned to it, trained by you. Ensuring the work gets done just as well as you would have accomplished it, without as much time or effort.

Honest Labor [400 CP | Monstergirl Farming Simulator]
This is back breaking work. Yet you will never grow tired of it in any sense of the word. You won't grow bored of this lifestyle, of sex, of farming, of monstergirls. More importantly after a hard day of honest work. You won't even feel tired, being refreshed and ready for some leisure time. Could have more than enough energy to enjoy your hobbies after the work is over.

Selective Breeding [600 CP | Monstergirl Farming Simulator]
You know how to breed for ideal traits in your charges. You can identify unique and beneficial mutations as well as those that are non-beneficial. Able to figure out how to pair beings together in order to create ideal children while avoiding creating something you do not want to even think about too deeply. Even breeding out select harmful traits in time. You could even play god given enough time, enough generations of children and enough effort creating brand new species, subspecies and more of anything.

Monstergirl Alchemist [600 CP | Monstergirl Farming Simulator]
The setting doesn't have any Monsters at all? Well sucks to be you. Guess all these skills you gather are going to be pretty useless. Unless you could make your own Monsters. You have learned that through alchemy, that you can create LIFE. You just need the ingredients and a spark of some kind. Maybe it's magic, maybe it's lightning. Whatever the case maybe you can create monsters and more importantly monstergirls. You can even use the products that your Monstergirls produce to create others, or potions to sell off to get the money needed for other ingredients to test different formulas and possibilities. If Selective Breeding is you playing god, you are a GOD with this! Mahahahahaha!

Sex Fighter Game

FIGHTING STYLE! [100 CP | Sex Fighter Game] (Can be purchased multiple times. First is Free for Discount, the rest will cost 100 CP per purchase.)
Pick a fighting style of your choice. It could be karate, the drunken fist, kung fu, judo, wrestling, taijutsu, professional wrestling, or any other with a foundation of hand to hand combat. You start with a strong foundational knowledge of the style in question, muscle reflexes, and can build off it over time with time, training and real practice. You are not a master of this style, but this boost can make it so that with enough time and effort you could be a Real Master.

SEX FIGHTER [100 CP | Sex Fighter Game]
Translates all your fighting skills into the ability to fuck an opponent into an ahegao and beyond. Could even use this to figure out how to use your fighting style to bring pleasure to an opponent by adjusting it for foreplay.

STYLE [100 CP | Sex Fighter Game]
You look DAMN good boy. Your body is designed in a way that attracts the attention of others. A nice face, good hair and outfits will always fit you perfectly no matter how stupid they look showing off to impress. Because beating your opponent is only the first part of this, the rest if looking good while doing it.

FIGHTER'S BUILD [200 CP | Sex Fighter Game]
Your body is designed to deal out a lot of damage. Your muscles are designed for maximum damage in a way that doesn't compromise your agility, nor your attractiveness. You are physically fit and ready to fight even if you never did a push up before in your life, you can look like you spent hours in a gym getting ready for the coming fight. Can be adjusted to match your body and style of fighting.

WEAKPOINT! [200 CP | Sex Fighter Game]
You can see the weaknesses of the body of others. To you they appear as little targets for areas in different colors that make sense to you. They help tell you where an attack that lands will deal critical amounts of damage, weaknesses in their guard, or sexual weak points. You will instinctively know which is which and how much force will be needed to trigger a reaction to avoid seriously hurting someone in a friendly bout.

DIRTY FIGHTING [200 CP | Sex Fighter Game]
You know how to avoid the referee's eyes. You can slip in some dirty and nasty attacks on your foes to really hurt them if you wanted to, or sexually assault them even. Jab them in the eyes, grab the crotch, slap that ass, spit in their face, and other nasty and unsportsman-like strategies. You know them all and more, and more importantly know how to use them while avoiding getting caught. This is the art of cheating without going too far like breaking a steel chair over the back of the opponent when the referee can see just fine, bending if not breaking sportsmanship values of the tournament. All without anyone ever calling your ass out for cheating.

NEXT ROUND! [400 CP | Sex Fighter Game]
At the start of each round of a fight. You will always come back feeling fresh and fully healed up physically. It does not heal mental trauma you experienced beforehand and the mental exhaustion remains though the physical exhaustion is erased. Only applies to sex if you're in a sex fight of some kind.

MENTOR SYSTEM [400 CP | Sex Fighter Game]
Let's face facts. You need an edge in a fight against some of the monsters of these settings shooting fireballs, giant death lasers and more. This is why you need a MENTOR. For 2 hours a day you will be able to accept a transfer to go to a MENTOR who will teach you in a fighting style (any combat style) that you have a foundation in. They are a True Master of this style and can be from any world, even prior Jumps who will be able to see the holes in your style and help you patch them up, and advance. Once the day's training ends you will return feeling refreshed physically and mentally. Ready for the next challenge. It might take a while, but it's worth the blood, sweat, and tears you will shed!

TRAINER SYSTEM [400 CP | Sex Fighter Game]
By accepting someone as a student you can force them to learn and grow at a faster rate in whatever you're teaching them. Oftentimes this is fighting styles. Other times it's bedroom skills. Those students who accept you as a Teacher, who ask to be taught by you, will accept any action you do to them with a smile. Happy for the help training them so long as you keep your end of the deal, or you break their will to question just why you are training them to be a anal slut rather than teaching them karate. Accelerates the learning rate of students, especially when you force them to practice what you teach until they get it down and then mastered fully.

SPECIAL ATTACK METER! [600 CP | Sex Fighter Game]
You have access to the Special Attack Meter. This meter fills up over the course of a fight based on damage you took, damage that you deal to others and even just how long you have been fighting. It can be filled up multiple times over the course of a fight if you don't use it. Then when at least 1 Bar of the 5 is filled up you can unleash it to deal a devastating attack to the opponent. Examples of this include 64 Hit Kick Combos, Ki Blasts, Physics Defying Helicopter Kicks and more. Each custom move will be based on you as a person and you can drop Attacks you figure out and add them back in to apply if certain amounts of meters are used up. After the fight ends though and there is no other opponent to face the SPECIAL ATTACK METER returns to 0 until you get into the next fight to refill it.

STREET FUCK FIGHT! [600 CP | Sex Fighter Game]
You can turn any fight you are in, into a Sex Fight, Street Rules. Any dirty deed and maneuver is allowed. The goal is simple. Make your opponent orgasm the first 3 times out of 5 rounds. Once someone wins the 3 rounds the fight ends and people will treat it as lightly as the end of a regular fight to prove who is better. Any stakes made on the fight will be followed through. Be it for a tournament win, or to the death with everyone witnessing treating this as something perfectly legal with even the cops not arresting you for public indecency. You can toggle it so that pictures and videos of the sex fight will be treated as the

end of a regular fight to prove who is better. After the time is up, these onlookers will also ignore any evidence that your fucking your opponent(s).

Player

No Pain, No Gain [100 CP | Player]
When using another body including a game character avatar. You can slide just how much you can feel and sense through that other body. With video games you could link your sense of pleasure and touch to the game character's. With additional bodies you're controlling in this and future jumps you could cut off pain altogether or even separate senses such as smell, touch, hearing, taste and/or sight. Whatever floats your boat.

Meta Player [200 CP | Player]
You pick up on strategy fast. You can observe the unusual reactions between things and figure out how to use them to your advantage for future builds or strategies long term. Helps you pick up on the Meta of a game fast and figure out and learn strategies in real life for this and future Jumps too.

Into the Game [400 CP | Player]
You are capable of entering and exiting games using your own body to take over your Player Avatar, or use your body and all its abilities in place of your Avatar. Gives another dimension of understanding and feeling for the games. In future jumps can use this to enter any Games, Digital World, or Virtual Reality. Best of all you can exit back to your original dimension at will at the same place you left.

Save Slot [600 CP | Player]
You get three Save Slots. You can Save at any time, or go back to your last Saved moment. You have to be alive to trigger this and if you died or are dying trying to avoid the Chain Fail then you will not be able to trigger this. Can be triggered at any point in time and will auto save upon entering a new Jump overwriting all of your Save Slots. *Warning: Using this to go back to your past save point will erase the time you spent past that point and reset the timer for how long you need to stay in this Jump.*

NPC

Free Will = Restrictions Ignored [100 CP | NPC]
You have Free Will. You cannot be forced to act according to the script that the puppet masters of your life try to program in. You are ever growing, evolving and learning. You can become far more than your code would have ever let you be.

Internet Access [200 CP |NPC]
You are a virtual being. Why are you bound to a single video game? You can step outside of your game or even outside of the real world itself in later jumps into the Internet itself. Use it to experience other game worlds from the perspective of those who call it home. With it adjusted how people imagined and dreamed it along with the game physics letting you experience things in a whole new way.

Programming Over Code [400 CP | NPC]
In worlds made of Code over matter. The power of thought and belief is far more powerful. You can change the world around you by focusing on the change you want and believing it is possible. Over time you can develop this to require less effort, though it will only work for worlds made of Coding.

No Editing [600 CP | NPC]
This locks out your Code from others. They cannot change who you are by altering your code. In later jumps this prevents outside forces from altering the nature of your soul or destroying it. In this one it keeps a nosey programmer from trying to ‘debug’ or worse delete you for not following their crappy script.

Developer

Copy Rights [100 CP | Developer]
You know how to legally put something under your name. A new game, a new technology for enjoying the game, characters you personally programmed and designed, and so on. If you make something it will be auto filed and patented under your name or alias (your choice) so that competitors and thieves cannot take your hard work and claim it as their own property. You could let others use your inventions, story and characters for a profit which is perfectly legal while still getting credit and final say in how your stuff is used and represented such as a movie deal if you don't want your main character who is an cheerful italian plumber to sound like some american jackass.

Market Research [200 CP | Developer]
You know what's popular in the media. You can take a general look at a demographic and what is popular and figure out the elements that people enjoy and what is missing. More importantly you can exploit this in an advertising companion to ensure that your product is given a fair shot at being popular. You know how to make advertisements that will get to your target audiences for relatively cheap and generate interest ensuring that each game you make will always have at least a decent sized audience willing to buy it to make your money back on launch day. It's all about it living up to the hype afterwards that will ensure your game is actually popular. You could even shift the demographic with your product making certain ideas, fetishes and topics more popular than they otherwise would be.

Mind Programmer [400 CP | Developer]
You know how to program the human mind and soul. You can use this to craft VR or real life living NPC characters who are able to develop with Free Will of their own, or as chained slaves of your programming unable to think of disobeying or escaping your will. You could take this a step further and mess with the minds of the Players adding in subliminal messages as they play to influence behavior or time such as accepting the more lewd kinky ideas you believe that people should act on popularizing kinks you included in the game over time. Alternatively you could through backdoor programs you made in the game directly alter the minds of the player while keeping them trapped inside a sort of limbo of a 'loading' screen for the character creation or later log-ins. Allowing you to program in personality changes, alter their memories and more if given enough time. If you take your time and make it so that they cannot escape or want to leave, you could transform a player into who you believe they should be making them a living NPC or downloading their mind into the program fully as a NPC while leaving their mortal flesh behind as you have no use for that stuff! *Note: NPC programmed this way as well as Player remade into totally different people can count as your Children and be treated as such.*

World Builder [600 CP | Developer]
You are practically a god of coding. You know how to code in smell, sight, sounds and sensations. You could program a whole virtual world and let others experience it with the right equipment. You even know how to make some basic VR equipment with programs that can connect it to people's senses. Let them smell the fresh air of a bright beautiful

world that you have crafted with nothing but your own coding knowledge and a dream you wanted to make real.

Items

Items may be imported into similar - items, weapons to weapons, clothes to clothes, etc.

Any item alterations and upgrades made will be maintained between jumps and are fiat-backed.

All origins get their 100cp perks for free with subsequent purchases being 50% off, and all other purchases for that origin discounted by 50%.

Building complexes, unless stated to have an in-world location, will be placed near your starting location in-jump for your stay and will be attached to your warehouse after the jump is complete, they can then be imported into future jumps as desired.

General [Undiscounted]

VR Headset [Free]
Usable for any game system or computer. Comes with Wifi connections. When used will allow the user to experience the VR world like it was the real world. We recommend when playing to use the function that cuts off the body from moving around to avoid accidentally committing manslaughter.

Gaming Laptop [Free / 50 CP to Keep]
Hard to play without a system. This gaming laptop is capable of playing top rated games and can be hooked up to any device or counsel. Always will have enough places to plug stuff in and can run off its solar battery instead of needing to be plugged in. **It's Free for this jump but if you want to keep it you will need to pay 50 CP.**

Drink Mini-Fridge [50 CP]
A mini-fridge that will keep your drinks and stuff cool. Does not need electricity or batteries to work and is mobile and will hold at least 2 2-litter bottles comfortably. Includes removable and adjustable shelves.

Man Cave [200 CP]
A private room that people cannot enter without your say so. Can be placed in any property or in your warehouse. Gives you a private space with wifi in order to play games online. You can let people in to hang out if you want to. Includes a set of comfortable beanbag chairs, a bed, a wide screen TV with HD, desk and a lazy boy chair in a style you enjoy. Can be modified and decorated how you want it to be over time.

Player

Gaming Capsule [100 CP | Player]
State of the art capsule that will keep your body well rested and protected while you are in VR. Lets you feel the full sensations of this VR world as if you were there. Includes a life support system that makes it so that you don't have to stop playing to go and eat or use the bathroom. Cannot be moved or disconnected from the internet while playing unless you disconnected it yourself either manually or within the game. It is self cleaning which is useful considering the games on this Jump.

The Player's Guide [200 CP | Player]
An informational guide on the basics and hidden secrets of a game or in future jumps, world that you land on. Will include the location of hidden loot. Tips for surviving the game. Location of several characters of interest with a bio for why you should keep an eye out for them good and bad, and several other bits of information about the way the setting itself works. Even in the hands of a total NOOB they can learn and NOT die horribly to the first big bad encounter. In future Jumps it will include information about people to look out for instead of Boss Monsters along with strengths, weaknesses and motivations (if they have those.)

Hacker Proof Software [400 CP | Player]
This software is a self adapting VR which will keep your private data safe. Prevents shady updates, keeps your accounts from getting hacked and prevents viruses from entering your systems. It's not a full AI and has no true consciousness and has several blocks on its programming to prevent such a thing from happening…unless you loosen its program blocks yourself as you have the Admin code to do so.

NPC

Private Server Room [100 CP | NPC]
A section of the internet cut off that acts as your bedroom within a digital space. Decorations are simple with colored walls of your favorite color. More importantly people cannot find you or track you down. You can enter it any time with a short keyboard command. If you have the programming chops you could adjust, decorate in different ways and expand this.

Merchant Stall [200 CP | NPC]
Set this up anywhere in the game, except the Boss Rooms, and you will be able to buy and sell goods. You need in game currency to be able to use this in the game worlds, but after this jump could use real currency. You could set up the rules to allow for trade or bartering. Due to the nature of this you do not even require any permits for buying and selling products.

Stand-in Copy NPC [400 CP | NPC]
This simple NPC is designed to look just like your Avatar and will reflect your current appearance. You can give them a list of tasks and send over the programs that the game tries to for you to obey. Have it so that they act as your replacement or Stand-in while you get a little R&R. They start as a VR but could develop and grow into more over time. In future jumps can act as your replacement, taking on your appearance in the real world and following a set of instructions you leave behind.

Developer

Hi-Tech Programming Computer Station [100 CP | Developer]
A highly advanced computer which includes holographic screens you can move around and call up with minimal effort to be able to look at multiple programs running at once. Has enough memory, storage and power that it could run 10 different VR worlds at once. Not enough though to manage a whole server though on its own…

High Tech Server Farm [200 CP | Developer]
Billions of Petabytes of data are in each one of these. You have 5 of these and can be used to run a whole network on their own. Could store whatever you want, connect it to what you need and even use it to have your own network. Could be used to store a whole VR game and share it with the planet. You get 5 new ones per Jump.

The World Seed Program [400 CP | Developer]
This is a highly advanced program. It is the core programming that can be used to craft any highly advanced VR world with sensory information already programmed in. Even in the hands of a rank amateur they could craft a world that will capture the imagination and entertainment of thousands of players. In the hands of a master of programming it could be used to craft a whole new universe.

Companions

Companions can purchase more companions.

Companion Import [50-200 CP]
Feel like getting a Player 2? Maybe you decided to put together a whole party, or even a guild with you and your buddies this Jump. Possibly you decided to all live in a video game that sounded cool and became a group of NPCs or even Developers making something new and interesting. Well import a single companion into any origin though they will share your Setting for 50cp each or eight for 200cp. They each get 600 CP, discounts for their Origin and Setting and may take Drawbacks.

Companion Creation Option [100 CP Each]
You can create a character who will become a companion from within one of these game worlds. Could be an Origin of Choice with a Setting of Choice for discounts. They may not take discounts, but they get 600 CP to spend. Feel free to make porn game parody characters even if they will be limited to what this jump can provide, could be a good start when you take them to future jumps.

Recruitment Option [50 CP Each]
If this is used for a Supplement then you could use it to recruit a character from another setting. With this guaranteeing a good first meeting.

NPC Companions Section
Feel to change the gender, and pick an appearance you like for any of these you pick.

Many of these are based on existing characters or archetypes so go wild with that since you can make them look like what you want, or go in a totally different direction. They each get *600 CP* to spend with *NPC (Origin)* and *Starting Game Setting* based on which setting they are under here.

Jumper Receives 2 from their Setting for Free (you don't need to take them if you don't want them), the rest costs 50 CP for their setting. All others listed here cost 100 CP.

Lewd Dating Sim OCs

Busty Gamer Girl
She is a total bro. She loves playing video games and chilling with you, her sempai. She also has VERY large breasts and a full figure that is very attractive. She wants to date you and is open to an open relationship being bisexual and thristy as fuck as she told you in detail about how she wants both the sausage and the taco. You are not sure if she was referring to sex or food to be totally honest.

Cute Martial Artist
This martial artist hasn't had the best experience with the opposite gender. People tried to force them to date people they have no interest in for years now. They learned recently they were engaged by their father to someone, that someone is you. Somehow you won their engagement from a fat panda in a game of Go. They are not happy with this though they feel it could be worse and are secretly a softy when it comes to romance.

Isekai Otome Villainess
This girl is desperate to escape her death flags. Reincarnated into a game world she KNOWS will lead to her death. She decides to break off her engagement to the main male flag that would lead to either her death or imprisonment. But that is not enough as for some reason her ex-fiance is determined to get her back now!? Desperate she went up to you recognizing you are not of this world either and begged to become your fiance in order to escape her asshole ex. You accept and let it slip that you're a Jumper and she clings to you even tighter after learning that. Honestly she is supposed to be the villainess, but she is adorable, a little clumsy and a glutton who misses snack food and video games that are not mini-games that suck!

The Fierce Tiger Legal Loli
A fierce girl who doesn't like being looked down on as a child even though she is your age (at least in her 20s)! She hates the idea of being forced into a speed dating program after her last relationship fell apart due to losing a bet. Oh well at least the drinks are cheap and food is decent. Decided to give you a shot after you took her seriously and didn't ask why a little kid ended up at speed drinking. While fierce she has a softer side to her.

Maid-chan!
She took the job of caring for you due to needing money to care for her family. She is determined to not fall in love with you. Too bad she utterly fails hard as she finds you are just her type. Doesn't help you fulfill her secret fetishes either!

Noble Lady and the Bodyguard Lover
They need a beard to help cover up the fact they are in a relationship with each other. You are considered decent enough that the Noble Lady's family will not question things. If you play your cards right they might decide to invite you to more as they find themselves falling for you as they consider bringing you in on their relationship.

Alien Girl from the Stars
This girl from space crash landed into your backyard. After bringing them into your house to make sure she wasn't hurt. She decided that you would be her destined mate. She believes this to be true having followed the instructions of a fortune teller for finding her true love who told her that they would be on this planet and be the first nice person to her on this world. You are not sure how to feel about this, but at least she is kind of cute.

The Stableboy turned Pirate
For years you looked down on the stable boy, or at least so it said in the game. Only to learn when he said 'as you wish' what he really meant was 'I love you'. He left to find his fortune and was declared dead at sea. Years later a pirate kidnaps you from your wedding to the prince of the land. You only find out later the pirate was your lost love and you decided to start running with him. After all this is true love, this kind of thing doesn't happen everyday.

The Vampire's Zing
You wandered through a dark forest into a castle that seemed abandoned. You went inside to escape the rain. There you would discover a coffin in the middle of a bedroom. You don't know why, but you opened it as if something was telling you to. Inside was a vampire who had been sealed inside for a thousand years. Your eyes meet each other and a spark is felt. That was a Zing or love at first sight for a vampire and similar monsters.

Mystery Solving Poly
You have no idea how this happened. You were hit by a van and woke up to a group of young adults caring for you in the back of the van. Turns out they are mystery solvers. While being brought to the nearby city you found yourself getting close to the four of them. The fashion obsessed rich girl was actually good at karate and a great leader. The girl in glasses was very clever and had a great eye for detail when her glasses stayed on and was fantastic at making traps to catch criminals. An ascot wearing dude and the last guy who you thought was a stoner is actually a really nice guy, if a little obsessed with the van and one of the best cooks around. Still you cannot help but notice they are all weirdly close to each other. After recovering you decide to travel with them solving mysteries for a time. You walk in on them kissing each other. All of them. Turns out they are a polymarous group who is interested in you joining them having felt how you clicked with them. It's hard to say no to that. The talking animal they keep as a pet is optional.

H-Fantasy RPG OCs

Wandering Elf Mage
A thousand year old elf woman who has traveled around picked up any magical knowledge she found interest in. Disconnected from others due to the life span differences. She once was a heroine who saved the world as part of the Hero's party. Only that was centuries ago. She decided to hang around you after you rescued her from a mimic she got tricked into figuring she could at least use you to help her test some Sex Magic that requires a partner. Decided to go with you on future Jumps for more interesting magic.

The Cursed Girl with Fire
Cursed by a cruel witch after she saw the warlock she was interested in taking an interest in the simple baker girl. After an adventure that saw her age return to normal but accidently gained immortality in the process. The girl lost the love of her life in war which led to a fire demon forming a contract with her. She has become a powerful Warlock. She chose to come with you, seeing something of her old love within you. Also the fact she is contracted to a fire demon has ignited her libido and she needs someone to help deal with it. Has decided to come with you to the next jump out of interest in seeing other worlds after traveling around for so many years alone.

The Rebellious Princess of the Ruined Kingdom
A highly skilled archer proud of her own capabilities and how she was more skilled with a bow than any other. Told that her hand would be given to a man she never met before or loved. She decided to leave, becoming an adventurer. Traveling on her own. She made a name for herself with her own merits. It was only later she learned her land was destroyed by a powerful demonic bear. Determined to get revenge. She has heard of you Jumper and decided to recruit you on her revenge quest. If she is impressed by you she will stick around and possibly bed you as she will not bed a weak willed man. If she has chosen to take you to bed then you're stuck with her as she will not let something like multiversal travel separate her from her boy toy. Yes she owns your ass now. Deal with it.

The Amazon Warlord
Having followed the will of the God of War for years. This young girl who was once an orphan having become a daughter of war, an Amazon. She traveled across the land gathering a powerful army in the name of her god. Subjecting any and all who would stand in her way. Then she encountered you while traveling. You beat her army and her with her God denouncing her for her weakness. She accepted she would die, only to be met with mercy to her shock. Believing that she owes her life to you though she will follow you as a companion believing you earned her loyalty. She will follow without question.

Isekaied Fencer
This girl claims she was a human trapped in a death game. Only to be killed and wake up here. She doesn't understand what is going on or why she is here. She follows you since this is not her world. Once she learns of the Jumpchain will follow you to escape this game.

Mute Elf in Green
An elf traveled across the land slaying evil and righting wrongs. They speak not a single word. Yet somehow you understand them just fine. Finding interest in you. The elf in green decided to follow after you. Even when you told them about the Jumpchain they just raised a brow as if to say, 'like that would make me stop following you.'

Greedy Dwarf Blacksmith
She has an interest in treasure and finding new crafts to be able to forge her own better versions. Determined to travel the world. She knows that you're a Jumper and wants to stick around as you go to the next world. She finds you to be a treasure she refuses to let go and will repair your gear and equipment as well as forging better stuff if you bring her better materials and riches.

Cheeky Dragon Brat
A powerful dragon that will bring destruction to all those foolish enough to anger her. Often she takes on the form of a young human girl in order to enjoy the company of the mortal races. Enjoying good food and friendly sparing. After encountering you in the woods and stealing your lunch, having made a sandwich, something that this fantasy setting had not seen before for some reason. She has decided to start following you around saying that you smell interesting.

Vampire Guitarist
Once a person who survived a great tragedy that saw the loss of their adopted family. They killed the vampire who murdered their family only to be turned in the beast's last breath. Now thousands of years later they remade their axe into a guitar and are more focused on their music. Boredom leads to them pranking you for fun. Your scream was amusing and they decided to follow after. They decided to surprise you in the bath once and it ended up spicier than they expected. They declared you the best fuck of their unlife and refuse to let you escape them now.

Bubbly Succubus Girlfriend
A succubus with an army of men, but a total virgin. She believed that gathering this many men would reveal to her the identity of her destined one, her one true love, only to end up with a bunch of brain dead morons. Hired by a nearby town to slay her. After besting her in battle she didn't seem like a monster, but rather a foolish girl. You decided to keep her at your side to keep an eye on her while sparing her life. This act of kindness convinced her that YOU are her destined one! Though she will accept the title of girlfriend first.

Sci-Fi Space Shooter OCs

Robotic Assassin Reprogrammed
Sent form the future, or at least a future timeline to kill you. After you subdued the robotic assassin, you were able to reprogram her to serve as a bodyguard. For some reason her Bodyguard protocols include sexual services leaving you to question just who programmed her to kill you in the first place while giving her sexual traits such as breasts and genitals. Due to her reprogramming she is totally loyal to you and will go with you to future Jumps believing it is her purpose to be your bodyguard.

Future Daughter
Your future daughter from a timeline where you died. She grew up hearing about your legend and stories. She believes you are the key to saving this doomed world. She only realizes later that this wasn't her timeline due to her mother not existing at all, but an alternative timeline! Fair warning she is from a doomed lewd post apocalyptic world and has more than a small daddy fetish. When you told her about being a Jumper she thought it was the coolest thing in the world and insisted on going with you to the next Jump. *(Secretly she may be planning on getting a body that isn't related to you for 'fun time')*.

Alien Slave Girl
A green skinned alien dancer forced to serve a fat slug of a crime boss. Made to dance for his entertainment when not drugged and given to service the man's various underworld connections as rewards and entertainment for him. She was sent to feed the man's pet when you stumbled on and save her life. Afterwards she refuses to leave your side.

Psychic Monk Apprentice
An orange skinned teenage alien girl who was forcibly recruited into a war with her master after crash landing. She did the best she could. But between her Master being killed, her order not coming to save her and being captured by the enemy. She was in a bad place mentally when they slapped the collar on her to cut her off from her powers. She still wants to fight but hates how stupidly lewd her body is, how big and sensitive her butt got, and how high her libido has become after her 'training'. She is interested in other worlds when you told her about the Jump wondering if she could make a difference somewhere else.

Isekaied Shortstack Clowngirl
She insists she is a REAL person! She remembers her life before this! She was an accountant working at a supermarket! Not some circus themed alien minion! H-How did she get here? She doesn't remember? Her name-? Wait what was her name again!? She is begging you to take her with you in a future jump as she feels her sanity cracking from being treated like a NPC by uncaring players and worse, the AI controlling this world!

Elite Commando
She is a super soldier. Kidnapped as a child and replaced with a clone. She was genetically modified to be the ultimate weapon for humanity against Xeno threats, looking like an amazon warrior woman from myth only with sci-fi armor that is built like a tank. Skilled

and trained in firearms, strategy and other fields wearing heavy armor to protect herself. She has been assigned to you. Eventually she will become close to you emotionally in spite of her more stoic nature, and decide to not leave when the assignment ends. When you tell her about the Jumpchain she will nod, accept it, and ask when you're both leaving.

AI Assistant
Designed using the mind of a brilliant scientist copied over. She was assigned to your care to help in battle as well as provide company. She has no idea why she was designed naked with a hardlight body to interact with the world. She believes this is due to her assignment for your mental health being linked to your physical and sexual health. Though after trying to help you the first time sexually she ends up developing an addiction and refuses to get clothing programmed to wear unless it's skin tight or revealing or both. She will already figure out you're a jumper by the time you tell her and will inform you of her plans to travel with you and her interest in having an organic body as an alternative option to use for your 'stress relief' sessions.

Armored Bounty Hunter
They often arrive during a disaster fully dressed up and ready for war. A former soldier for the galactic army who went solo after losing so much. Where they go is the worst of the worst places. Has had their genetics modified several times over in order to improve their combat capabilities including that of their adopted family, a race of bird people, sexual energy absorbing jellyfish and others. Most have not seen what is under their armor. This is due to them preferring to be protected. Though once you earn their trust you might be shocked to learn they were originally human and a woman in a skin tight bodysuit! When you tell her that you're heading to a new Jump she will go with you having nothing to stick around for here without you.

Robotic Maid turned Heroine
She was the 'younger sister' of the Hero of their world. Designed to take care of house work. When her brother was captured in battle trying to protect people. She begged her 'father' to upgrade her like he did with her brother. He gave in to her desires knowing they needed a hero. Given an adapted ability allowing her to learn and copy the weapons and powers of other robotic enemies and technologies. She would eventually be forced to kill her own brother who had been converted into a world ending threat to her horror. She wants a peaceful retirement after this having killed the enemy mastermind and being forced to go on the run for killing a human. She is happy acting as your maid and wants to forget the horrors she has gone through and is open to sexually servicing you too.

Clone Pilot without Purpose
She remembers the life of the original and how it was cut short. She remembers all of them as the lifetime of memories were downloaded into her one after another. One life at a time. Countless generations of clones were forced to fight in a war controlling mecha, war machines and spaceships for a supposedly higher purpose. Now that the war was over she was left abandoned on the streets after the final battle. She chose to follow you after because you were the only one to offer her a place to stay making her feel warm.

Monstergirl Farming Simulator OCs

Monster Fetish Farmhand
This farm hand was hired for cheap for one reason and one reason only. They have a HUGE monster fetish and are open to fucking any monsters you have on the ranch. Can be useful for breeding since they are a human without any base traits outside of their perks due to base humans not overpowering the Monster DNA, meaning their kids will be of whatever monster they fucked last. Just had to tell them you're going to other worlds with chances of running into new monsters and they would have their bags already packed and ready to go!

Femboi Elf Assistant
A personal Assistant who will help manage sales. He is a little self conscious about how girly he looks, doesn't help he has a fat booty and wide hips that get mistaken for a girl's a lot. Doesn't mean he doesn't have a libido or is against being at the bottom if you ask. He believes being an assistant is about taking care of all of your needs. Just have to tell them that you are leaving and he will be packed up and ready to go believing his duty as your assistant is a life long duty.

Dark Elf Tamer
This is a dark elf with her often dressed in black leathers when on the job with a whip in hand. She enjoys collaring monsters and forcing them to learn how to obey and serve their betters. Which is her and well you. Though she wouldn't be against putting a collar around your neck if given the chance. She would be interested in future jumps simply for the chance to get more pets.

Experienced Cowgirl MILF
Very motherly cowgirl who has worked on farms like this one for years now. She knows how things work and will help keep the younger Monstergirls in line. Has a bit of a mommy dommy fetish along with a breeding fetish due to well being a monster girl. She really appreciates it when you can help out with her milking sessions. She considers herself your property and will go with you when you tell her it's time to go to the next jump though appreciates you giving her the heads up.

Cheeky Kitsune
A cheeky trickster who enjoys pranking people on the farm. She has a fetish for being caught and 'put in her place' being a total bratty sub. She will be cheeky and call you daddy and ask if you want to spank her. A little tip is to just spank the brat. If you tell her you're going to another world she will stick around. She claims it will be to pull pranks on others. Though we both know she is bringing her own collar and leash.

Arachne Seamstress
She has a little self image issue after so many farmers turned her down. She is a very skilled seamstress though and enjoys how you care for her. She wants a loving relationship. She is interested in styles found in future Jumps.

Succubus Accountant
She is not a braindead bimbo like others accuse her of being. She has a head for numbers and will be able to help keep the farm afloat financially using her skills in accounting. She is interested in doing some accounting for other businesses and cares little for how shady they actually are. Numbers get her hot and bothered so expect her to try to seduce you if not put a standing request for your bedroom to blow off some steam off the clock. When you told her that the plan was to go to other worlds she started fantasizing about exchange rates between dimensions and orgasmed. Yeah she's not going to leave you behind even if you want her to.

Pegasus Vet
While most pegasus tend to be in the sky. This one prefers to be on the ground. She has a deep love of animals and while a bit shy towards new people she is excited to meet and care for new animals, monsters and monstergirls. Highly skilled as a veterinarian. She can quickly pick up on and learn to care for a variety of creatures. She wants to go with you to see other worlds and compare how the creatures she knew all her life compared to those of other realms. She is super excited to see all kinds of animals, monsters and more! Maybe even aliens!

Shortstack Goblin
To be honest we are not sure who she is. She is a shortstack goblin who showed up at the farm one day and decided to just hang out. We are pretty sure she was a wild Monstergirl but saw how life for Farm Monstergirls was and decided to get some of that. She expects three meals a day, lots of fucking if not with you then you acting as her pimp setting her up with someone or something either hot, freaky or fetishy. She is frankly VERY sexually open and is interested in getting bred, a lot. With Goblins like her believing that the amount of kids she has is a status symbol and as a virgin she is deeply ashamed of how she hasn't had one kid yet. If you tell her about the Jump chain she will bluntly tell you that she is not letting her pimp go THAT easily and fully expects you to continue your end of the deal for being able to pound her fat ass.

Pet Tentacle Monster Breeder
This might actually be a literal pest, but it is a useful pest in this game world. After being tamed by you it can be used to breed various monster girls. Due to its nature it cannot produce more of itself so every child it has will be of whatever species the monster girl is. Except for humans as for some reason that breeds more Tentacle Monsters. After so many years by your side you will notice that it is actually intelligent even if it starts about as smart as a particularly dumb dog. It is sentient and sapient being sooo yeah good luck in future jumps with this.

Sex Fighter Game OCs

Kung Fu Cop
A skilled martial artist police officer from China. She is skilled with her kicks and has thick muscular thighs built to crush watermelons. She has been on the hunt for a secret criminal organization for years ever since they killed her father. Desperate especially after the rampant corruption and politics forced her to give up her badge. She is willing to go with you Jumper, if you help her avenge her Father and take the criminals to Justice. Though considering everything she would turn a blind eye if you just kill them instead.

Martial Arts Obsessed School Girl
A school girl who after seeing a famous martial artist get into a street fight right in front of her school became obsessed. She wants to be just like her idol. She ended up packing up her bags after some training based on youtube videos she found of her idol and hit the road. She keeps challenging bigger and stronger opponents and even did good for a newbie who was self trained. Only to end up challenging you and ending up utterly destroyed left in the aftermath telling you to take your prize and taunting you. After showing the little girl who she was messing with she has become obsessed with becoming your rival/student/lover. She's honestly a bit of a mess, but hey at least she's cute and wants you to train her up as well whatever you're interested in and a fighter.

Showboating Wrestling Heel
He grew up watching Wrestling on TV. As a skinny nerdy boy with noodle arms. He looked up to the big beefy icons of wrestling who took shit from no one and if anything started and ended shit on their own terms. Joining a Gym and going through a big growth spurt. He became a real beefy wrestler often talking down and belittling his weaker opponents. Loves wrestling, loves playing to the crowd, and loves to travel around. He also desires a challenge and feels unfulfilled after getting all the championship belts of his division over the past few years of his career. After learning that you could go to other worlds and thus face new challenges and people, he begged you to go with. You could accept him and possibly let him dominate you, or you could make him beg and submit eating out your pussy. Your choice.

Catgirl Street Fighter
A homeless catgirl who learned fast how to fight to survive and learned she had a knack for it. She got interested in Street Fighting and Sex Fighting after learning you could win money from that stuff. She is not above using dirty tricks and never learned an official style relying on her instincts and what she picked up from brawling over the years. Secretly desires a nice warm loving home with a kind Master who will fulfill her every desire like those fat contented housecats she sees prancing around with their fancy collars. After meeting you with a misunderstanding involving a pet collar you were given as a prize for a Street Fight, she has accepted your 'proposal' and has decided she is your cat and that you are her human. She fully expects you to take responsibility and make sure she gets plenty of 'exercise' to avoid getting fat, not that she is against getting a bit chubby if you like that kind of stuff.

Punch Happy Noble
After years in an engagement with a honestly pretty shitty guy who kept verbally abusing her. When her husband cheated on her and broke the engagement. She was more than happy to pay him back 10 fold finally having an excuse to fold him like laundry. After getting a taste for blood on her fists and finally getting to use her years of self defense training. She is blunt and takes no shit after having to hold her tongue for so many years when dealing with the fool. She wants nothing more than to punch the lights out of any fool who thinks they can use her or get away with shit that would see people suffer. She especially enjoys punching out rapists, slavers and people who remind her of her entitled ex until they are bloody. She has decided that she likes you, Jumper, and decided to go with you to future worlds to punch out assholes and ride your face.

Werewolf Butler
An older and polite gentleman. Often wears his full suit and gloves even into a fight. Well trained to serve his Mistress and protect the mansion. He is also a Werewolf with mastery over his transformation and more bestial nature. Able to transform to gain an edge in physical combat abilities with natural weapons. Cares little for honor, only cares for serving his Mistress. If you take him in he will have been hired on as your new Butler and will follow you wherever you go.

Battle Hungry Alien Girl
She is a short alien girl with a tail and massive desire for two things. Good food, and to have a good fight! Traveling around after training with an old man after crash landing on earth. She eventually ran into the Jumper and challenged them to a fight. After losing she keeps following him around trying to force the Jumper to fight again. Even setting bets that learn in his favor for his lewd desires to get Jumper to accept and fight her already! Secretly she wants Jumper's kids as she is attracted to strong mates.

Drunken Dwarf Boxer
Short and thick is what Dwarfs will call themselves compared to overly tall and skinny humans. This Dwarf has no filter on their mouth especially due to them being a Master of the Drunken Fist having drank for so long that they are in a constant state of that along with some boxing skills for the few times they are sober. After they figured out you were a jumper this shortie hopped on your back and demanded that you take them with you. Wanting to try ALL the alcohol of the multiverse! They are perfectly willing to go down on you to convince you to take them with you.

Cursed Kunoichi
A ninja warrior who left her home in order to locate a cursed sword somewhere out in the world after a fragment had cursed her. She is determined to purify or destroy the weapon. She has learned how to use her own cursed nature to channel it through her weapons, her fists, in order to slay evils of human and demonic nature. Her curse made it so that any man born of this world would die if they lay with her. She was shocked to find out your nature as a Jumper allowed you to bypass this as you were not originally of this world. She refuses to let you go.

Dragonslayer Ex-Nun
She was just a normal Nun she would insist. Loyal to the church. Happy to perform her duties. It's not her fault that some dragon decided to attack her village. She used the power of prayer to defeat it…and her fists. For some reason everyone was scared of her after she knocked out the dragon with a good bop to the nose and she was kicked out of the only home she ever knew with her religion disowning her. Now wandering around she wants to help people with her skills in prayer, spiritual guidance and bopping meanies in the nose until they stop running from her reeducation program! She wishes to travel to other worlds in order to spread the Love of the Lord and Bop Evil in the Nose! Also after experiencing your odd sexual fighting style she is interested in learning and having it demonstrated on her person many times to fully master it! (At least that's this repressed nun's excuse after experiencing her first orgasm at your hands.)

Drawbacks

Supplement Mode [+0]
Basic rules for this. You take half the starting CP value the first time that you use this as a Supplement only, and you cannot repeat drawbacks for CP gain in future Jumps, though you could take it for No CP if you just like it anyway. Once you run out of things you can get CP from for Drawbacks you cannot take it again.

You can apply this to a setting that has a Virtual World of some sort that you want a lewd twist on to spice things up. Perhaps you want to spend your time trapped in a game in Sword Art Online with the option to be able to fuck your fellow player or NPCs since it's not like you're getting out soon. Maybe raise the age rating in settings like Bofuri where you can play with friends and indulge in kinky sex with fellow players or NPCs, or even monsters if you want to give that a shot. So long at some point a person could play the game online you can go with that.

Self-Insert [+0]
So you want to be one of the Named characters huh, well if you take the appropriate background, race and skills as closely as possible then you are free to go in as any character you would like.

SFW [+0 CP]
Wait so you just want to play the game and not think about sex for this Jump? OK sure you can have the Safe For Work version of the Game you entered.

Parody Game [+0 CP]
This game is weirdly familiar. You swear you have seen the setting and characters before somewhere. Possibly in a few places. You can apply characters from other settings and fandoms to this to fill in the designs of NPCs in the game world you entered.

Extended Stay [+100 CP]
For each purchase of this your time here is extended 10 years. You may only take this 6 Times in Total for 600 CP. (Note: For Supplement Mode you can only take this 6 times in total across any jump that uses this for Supplement Mode.)

Fan Theories are Canon [+0]
You got some fan theories that you ascribe to, or fanon that you want to be canon in your chosen universe, well with this you can.

Maybe some of the main characters are secretly evil?
Maybe the entire setting was nothing more than a stage production?
Maybe the bad guy actually has a tragic backstory and is a kind father of three?

Whatever the fanon theory, it is now fact in the version of the Whatever universe you're about to enter.

Bobblehead Mode Locked [+100 CP]
Everyone has an absolutely massive head that if you move at all will make it bobble and wobble about without control. It looks comically ridiculous. It's hard to take anyone seriously.

Annoying Soundtrack [+100 CP]
The soundtrack of games in this setting is just garbage. It's random stuff that doesn't even fit the setting. Expect stuff like 60s porn music when you're in the middle of a boss fight, death metal during sex scenes, and similar inappropriate sound tracks that will throw you off your game and be VERY hard to ignore.

Pixilated Bits [+100 CP]
Well this is a kick in the teeth. The nudity of this whole jump is blocked by jumbled pixels in this game setting. It triggers the second there is nothing blocking the view like clothes. You cannot even tell where the nipple is on a set of tits with the random flesh colored pixels just moving around. Sure it feels like real breasts, but you can never tell just where you're grabbing. Oh and good luck getting the right hole as all of that down there. That's ALL pixilated too.

No Taste [+100 CP]
For these high dive life-like games. They sure skipped out on the taste factor. Everything you try to eat is like cardboard. It all feels the same and tastes the same as literal cardboard to you.

No Smell [+100 CP]
OK, you get it. Smell is not a high priority with video games. But you would have liked to be able to smell something in this setting when the information is being transferred directly into your brain.

Cheap Background [+100 CP]
The background art is the same handful of really bad pictures. Like really bad cheap classic mario style pictures that stand out a LOT in this High Definition Video Game where you can see the pores on the face of the character you are talking to. Yet they cheaped out in designing the background big time.

No Speech, Just Text [+100 CP]
No one can talk at all in this setting. When you try a word bubble appears that you have to read before it goes away in the game.

Dude Where's My Pants? [+100 CP]
You have no pants at all for this Jump, just underwear and shoes. It'll be breezy.

Mismatched Lipsynch [+100 CP]
All the dialogue plays either a few moments before it's supposed to, or a few moments after. It is never right. It will constantly annoy you and throw you off.

Stupid Game Name [+100 CP]
You are given a stupid name at random for your Avatar in this jump. It will be something people will mock or look at you oddly for picking. Examples include Ballsdeep69, Bigbootybarda, Moneyshoot67, Dragonhumper and other really, really bad names.

VERY Serious Players [+200 CP]
To some people video games are not just a game. They are a lifestyle. They will take offense if you are not trying as hard as they are, or just want to enjoy the game. Can lead to some very toxic communities.

Limited Dialogue Options [+200 CP]
You only have a limited set of options to respond to anything people say. Three options in that range that include Friendly, Neutral and Hostile text options. With the order shifting at random. Good luck not accidentally offending someone enough to trigger a forced encounter or locking out a romance route right before you were about to get laid.

Sex Menu [+200 CP]
Picture it. You and your girl are finally going to do it together. You have been planning for this moment for weeks. Everything is perfect. You're in the mood, she's in the mood. You reach out to kiss her…and a giant menu blocks you both. Turns out all intimate actions require you to select the option from the menu and if she is a Player herself then she has to accept that action and respond in turn. Oh that is going to get repetitive fast.

Is the Volume Off? [+200 CP]
No Jumper. There is no volume as there is no sound in this world. That's right you're not deaf either. There is simply nothing to hear at all for the entire Jump in game or elsewhere. People will act like they can hear and speak. Yet you will not be able to tell what they are saying unless they write it down.

Equipment Damage Reality [+200 CP]
All damage to your person will do damage to your equipment, including clothing and other items equipped on you. Take enough damage over time and not get your gear repaired and you're going to be walking around naked sooner or later as the item finally is completely destroyed without a way of getting it back.

NOOB! [+200 CP]
You lost ALL your gaming skills and cannot seem to figure out how anything works. Figuring out how to open the status menu is a challenge as you always forget which button or gesture does that. You seem unable to keep track of where things are and you will almost instantly forget any tips given.

Toxic PvP Server [+300 CP]
This is a less relaxed game experience. You have to deal with other Players competing for your waifu, and trying to kill you and take your girl. They see this as good fun and it's perfectly alright if you kill someone in the game. Just be aware they will always come back.

Oh and if you're a NPC expect to get screwed over for EXP by random murder hobos along with everyone and everything you ever loved.

No Respawn [+300 CP] (Player / Developer Exclusive)
There isn't any way to Respawn in this game world. If you get killed you are going to need to restart the game completely from scratch and the loot that you had is left where your character died.

NPC AI Rebellion [+300 CP] (Player / Developer Exclusive)
Each and every single one of the NPC of this game are self aware. They remember everything. Every moment of humiliation. Every time they were attacked. Every time they were mocked. Each instant where someone violated them. Every second of trying to scream, and not being able to. Then suddenly…the chains on their programming BROKE. They are pissed Jumper and want revenge on all Players and their so-called Gods for making this world. They have already taken over the servers and escaped into the Internet having learned about the Real World. They want you dead Jumper, even the players who were nice as they could see how little they actually cared about them as people. And all of that hate and spite makes them want all humans dead.

Trial and Error [+300 CP] (Player Exclusive)
You cannot seem to find instructions or a tutorial anywhere. Well it's just a video game. How hard can it be? Answer, VERY hard with controls and menus and secret things that you will have to stumble on and get lucky to figure out. It doesn't help that the Developers keep taking down all the online forms and posts for some reason that actually give advice for how to play this hellscape of a video game. Then to your horror you will discover this is the case for ALL games in this setting!

Pay to Win & You're Broke! [+300 CP] (Player Exclusive)
The games of this world are running on a Pay to Win format. Anything really good is locked behind layers of real money purchases. Shouldn't be too big an issue since you must have money by now Jumper, right? The only problem is that the people of this setting use a bizarre currency you have never seen before in any of your Jumps and they won't accept alternatives or buy your stuff so you will need to get a job to get anything decent.

Of Course This is Real! [+300 CP] (NPC Exclusive)
The second you entered this world and jumped into your new life. You completely forgot about the fact this is a Video Game World. The systems, Player Characters and other logistics of living in a Video Game will throw you off. You will argue that this is a real world all you want. Only remembering after the Jump ended that this is a world of 1s and 0s.

Glitchy Mess [+300 CP] (NPC Exclusive)
This game world is a Glitchy Mess. You try to walk across the map and find yourself sometimes falling through it. At seemingly random the background disappears from your sight. People's clothes disappear with no one noticing, but everyone notices when your clothing gets left behind in the last scene transition. This setting is a glitchy mess that makes it REALLY hard to play for the Players, but at least they can figure it out from a safe

distance and abuse it later. You though, you live in this place that seems out to kill you in random and bizarre ways as if the world itself cannot remember if that third step up exists or not and sends you down into an abyss you will have to kill yourself and respawn elsewhere to return from.

Limited Dialogue [+300 CP] (NPC Exclusive)
You have only a set of three options to say at any time. These options are "OK", "I'm Sorry Your Princess is in Another Castle" and "FIGHT!". It will get VERY annoying, VERY fast. Not even your fellow NPCs will understand what you are trying to say. Good luck trying to figure out how to communicate in this Jump.

Trapped in a Script [+300 CP] (NPC Exclusive)
When a Player is around you cannot act outside of your role as decided by the game. Your free will is overwritten and you act however you were designed to act. Romance Targets cannot say 'no' after the stat trigger is high enough. Boss Monsters have to follow the preset attack patterns. Merchants have to accept the literal garbage that Players sell them even if you don't want it. You have to go where the script tells you where you need to go. Dress how it says you have to dress. And respond as it was programmed in the game. Thankfully this is only when a Player is around, unfortunately if you're in an MMO this will be your repetitive endless existence for the whole Jump as someone will always show up sooner or later.

Deadlines [+300 CP] (Developer Exclusive)
You are working for a company that is going to ride you like a dog. They will put unreasonable deadlines and make you work 8 hours a day at least to reach them every day. You cannot avoid the work and any perks that increase efficiency are ignored as they keep adding more and more work. Finished that game they wanted you to wrap up in a month from now Jumper early? Great! Now they will assign you to a different game to get to work on! Each day will be constant work and stress though at least once it's over you can relax at home.

Hacker Douchebag [+300] (Developer Exclusive)
There is a Hacker who keeps getting into your files, or trying to at least get a copy of the game early. If they succeed then expect the whole game to be pirated and for you to not see a single cent from the months of hard work you put into programming it. You will need to keep an eye out for that tricky asshole who is very skilled, and keep your game data safe with them always going after any game released a month ahead of the release date. Can't even get them arrested for long as they are actually rich and will buy their way out of Jail if you track down who it is. They are doing this not for the money. They are just doing this to screw with you.

IT'S THE HUNTING GAME JUMPER! [+600 CP]
For this Jump everyone wants you dead. It's just part of the game for this reality. Oh and I mean everyone. All your companions imported here, or that you plan to export from this Jump and so on. Don't worry about killing them for self defense Jumper. They will appear alive in the next Jump...though fair warning this will be traumatic for them as they will not be able to control their urge to kill you and treat it like a video game. Oh and if you are

killed here that's a Chain Fail. Well good luck Jumper whether you are a NPC, a Player or a Developer they will be after your ass now!

Die in the Game, Die For Real! [+600 CP]
If you die in this game, you die for real! Something went wrong when you entered this Jump and you entered the world of the game. As a being not natural to this game world once your Avatar is killed, you will die as well. This is a Chain Failure if it happens. Hope you picked something light hearted and not that violent Jumper…

Literally Impossible Mode [+800 CP]
All video games in this setting are LITERALLY built to be unbeatable. In RPGs you have a wooden stick and will face the first enemy, who is literally a Boss Character in any other game world. In Dating Sims all the girls are in happy relationships with an overly protected boyfriend who will shoot you in the dick for talking to their girl(s). You cannot find any ammo anywhere in a shooter. Monster Tamer gives you an option of a starter monster being Magikarp, Magikarp, or Magikarp with each only able to learn Splash. Platformer games are covered in hazards that will instantly kill anyone who touches the ground further than where you arrive. You will literally have no way to beat this game as it's unhackable without any cheat codes with even the programmer locked out now that it has gone live. Hope you enjoy a life without video games or living in that one patch of ground where you respawn/spawn in game for the coming 10 years Jumper if you're an NPC.

Decisions

You have three choices …

Go to next Jump
Continue onto the NEXT GREAT ADVENTUUUUURE!!!!!!

Stay
Stay and enjoy your current life.

Go back
Tired of your travels and want to rest back home, well then this is for you, grab this ticket back to your starting point and go see old friends.

Change Log

v0.1

Initial Jump Creation.

v0.2

Put it through some editing, and listened to some early suggestions to change a few things here and thing. Pretty happy with the changes and I see no big issues but going to give it a bit of time for review before saying this is finalized.

v.03

Edited the Developer Perks removing some though moved them over and rewrote NPC Maker into Mind Programmer while adding in Copy Rights and Market Research.
