Issue 2

Copyright © 2010 Mind Control Comics

An accomplished woman, who can find? / Her worth is far beyond rubies.

At some point around 2010, a company by the name of Quine is discreetly developing an accessory that supposedly has a number of health benefits - giving the wearer more energy in their day-to-day, improving their complexion, and so on. Little does anyone outside of the project know, but these little ruby accessories are actually devices capable of altering a wearer's body and mind to a ridiculous degree. The intended use is to distribute them to the wives and lovers of influential men, as well as women of influence, in order to recreate society so women serve men unquestioningly and Quine holds the reins.

This world isn't too far off from the one you came from, save for the aforementioned technology and people being strangely accepting of the ridiculous proportions that result from its use.

You begin around the time that one of Quine's employees steals some prototype Rubies and uses them to *simplify* his personal life by making his mistress more compliant so she doesn't wreck his life by telling his wife about his dalliances. Here's **+1000cp** to furnish yourself for your decade in this world.

-

Location

While the plot all takes place in some major metropolitan area in North America, presumably somewhere in the United States, you can insert into any reasonably accessible location on Earth.

-

Origin

You may choose your demographics and local history within reason, including dropping in without a local history.

Perks

You receive discounts on 2 perks of each price tier.
Discounted 100cp perks are free.

Porno Life [Free]: Even in the early stages, Rubies provide a notable bonus to a woman's libido and stamina, making them capable of having - and very willing to have - sex often and for extended periods of time. Most men may have issues keeping up, but you don't.

You find that your sexual stamina and endurance are always enough to keep up with any partner. This includes a complementary removal of your refractory period, allowing you to easily keep going after getting off. Also, unwanted pregnancies and STDs simply never come up as a concern.

-

Hot Commodity [-100cp]: The proportions a Ruby can give a woman can get rather ridiculous. Breasts large enough to touch their knees while standing, enough incredibly voluminous hair to match the weight of their body, and more. A lot of changes that would push these proportions well beyond what most people would actually find attractive.

No matter how ridiculous your proportions are, they never get in the way of peoples' attraction to you. In fact, they can make you even more enticing to those you'd find attractive if you want.

Practical Skills [-100cp]: Just because women are turning into bimbos and there's an ongoing effort to dominate the world doesn't mean that people don't have regular jobs. The machine still churns, after all.

You may purchase this perk multiple times. Each time, you receive a set of skills appropriate to a particular position or career - even being a housewife is on the table.

Sleight of Hand [-100cp]: In the end, the only thing that ended the Quine conspiracy was quite a bit of clever sleight of hand. And vagina.

You would make a great magician with the way you are able to lead the eye and misdirect while under close surveillance. Even when forced to strip completely while being closely watched, you could hide all manner of small items on your person without your captor realizing that anything is amiss.

Totally Traditional [-100cp]: Even with the conspiracy failing in the end, Rubies were still introduced to the world and ended up changing things quite a bit. In particular, non-monogamous relationships and marriages became a normal thing.

Even past this world, group marriages and relationships that involve you are always considered legal and socially acceptable. This also eliminates any issues you may have with bringing more partners into the fold - those already in your harem don't mind more piling in, and those you'd like to pull in won't mind everyone else involved. Hell, sometimes those in your harem will end up pulling in more people on their own initiative, although these additions are always fitting to your tastes.

-

Costume Party [-200cp]: For as ridiculous as the proportions of women affected by the Rubies get, they are able to be out in public without causing major incidents wherever they go.

This carries forward wherever you go. People seem to be more or less fine with others walking around with obscene bodily proportions. They'll notice, for sure, but nobody will raise a fuss or think too hard about it unless they'd have a reason to know that something is going on. This also applies to any other unusual features that may crop up.

Making Connections [-200cp]: Key to both the Quine conspiracy and what brought it down was finding the right people in the right places - gaining control over key figures either directly or through their libidos, and keeping them secured.

You have a good sense for people and their personal relationships, as well as how you can exploit them. This makes it a cinch for you to both directly and indirectly ensnare people in your schemes, as well as protect those you love from potential threats in their social lives. Or to find a good master and entice him to take you for himself.

Salesman [-200cp]: Before the changes wrought by the Rubies started getting out of hand, they were spread from woman-to-woman with the selling point that they provided health benefits. This behavior was compelled by the Rubies, but it worked nonetheless.

You are a skilled salesman, able to drive home the benefits of whatever you are trying to pawn off on someone, even if those benefits aren't all that's going on. You also find that people are more willing to trust you and take you at your word, likely giving you the advantage you need to get your hooks in them.

Rolling Stone [-200cp]: People in this world seem rather vulnerable to corruption, even without a Ruby influencing their behavior. It doesn't seem to take much to get someone to wear one, and it's all downhill from there.

By having sex with someone, you are able to accelerate any corruption or transformations they are going through. The better the sex, the further you can push things, and this can have some rather explosive results if you can finagle a particularly powerful orgasm or something.

-

High Society [-400cp]: The backbone of the Quine conspiracy was controlling society via its elites - either directly controlling the women or appealing to the libidos of the men.

Whatever the case, you find that you have access to high society wherever you go. You also have an innate sense of how to act with them, and you just have an easier time schmoozing with the movers and shakers of society.

Made Servant [-400cp]: Beyond massively enhancing a woman's appearance and proportions, Rubies also seem to grant them an instinct for how to make use of that enhanced beauty. Often without interfering with their non-sexual duties.

You know how to be sexy, both how to set things up and how to perform in the moment. On the first point, you are a master of makeup, hairstyling, fashion, and other aspects of making yourself look as good as possible. On the latter, you know how to make your every movement tug at the libido of those who witness you, how to squeeze as much pleasure as possible out of sex for both yourself and your partner(s), and how to best present yourself for the camera.

Beyond being able to perform all of that without getting in the way of your regular life and duties, you also find that your movements are never hampered by whatever ridiculous proportions or fashion you end up with.

No Hard Feelings [-400cp]: After being freed from the control of Quine executive who'd been using her, the wife of the man who'd originally stolen the prototype Rubies and gotten her to wear one was begging for her husband's forgiveness for having sex with the executive in spite of him having used the Rubies to cheat on her.

When those whose minds you have controlled break free, provided they had feelings for you prior or developed genuine feelings for you on their own without mind control, they'll retain those feelings and not hold you controlling them against you. And if you made improvements to them, they might even approve of your control. Additionally, positive interactions with those under your control can improve your actual relations with them, so treating your mind controlled slaves well may have them decide to willingly serve you if they ever break free.

Systems Engineer [-400cp]: For as magical as the Rubies seem, they are still just technology in the end - code running on machines. Nothing that can't be hacked or reverse engineered.

You are incredibly skilled when it comes to electronics, whether building the hardware or coding the software. This particularly covers cybersecurity, allowing you to easily bypass most digital security that you encounter and keep your own technology secure. You also have a knack for picking up new technology - provided you've got the time and materials to study it, you can understand the principles of any technology you get your hands on and learn to reproduce it.

-

Carmin Conspiracy [-600cp]: The Quine conspiracy was more than just an effort by a handful of power hungry men to control the world, but also to change it to fit their own fetishes and preferences. They technically succeeded as well, at least in altering society according to their vision of bimbos everywhere.

When you have the desire to remake the world according to your libido, paths open up to make it a reality. You are not only able to find who and what you need to make it possible, but circumstances also align to let you make the absolute most of your resources. It takes time to arrange everything, but before long you will be able to change society and the world according to what gets you off.

Counter Conspiracy [-600cp]: The fact that the Quine conspiracy failed was a matter of both incredibly poor luck and hubris. Things simply aligned so that the mastermind fell to their own methods, even if they largely still succeeded in altering society. And all they had to do was not fuck over one of their own.

Whenever you would find yourself the victim of a conspiracy that would go against your interests, paths open up to either destroy or subvert it. The people and things needed to wrest control of the conspiracy or stop it in its tracks fall into your lap, and you find plentiful opportunities to make use of your resources even against the most prepared and paranoid of foes, although you may be up against a wall by the time things work out.

Locked Profile [-600cp]: One of the hurdles the opposition to the Quine conspiracy had to get past was administrative privileges in the Ruby control systems. You seem to have such privileges over your own being.

When you would be subject to alterations to your mind or body, you'll know what they would be and have control over what alterations apply and to what degree. If you decide to lose yourself to an alteration, you can always pull yourself back before things get too out of hand.

Rubytch [-600cp]: The eponymous Rubies are rather miraculous in what they can achieve, especially considering their lack of need for power and the small package they come in. Just by wearing one, a woman can go from normal-looking to having breasts large enough to touch her knees when she's standing and enough hair to smother someone with.

You know how to design, create, maintain, and modify devices like said Rubies, which modify the body and mind without regard for physics - though any changes made by devices you create tend to be slow on their own. This includes systems for remotely monitoring and controlling said devices. You also have a knack for making your technological creations quite small, in particular packing all the functional parts into something that resembles a glowing jewel of one sort or another.

Items

You receive a discount on 1 item of each tier.

The discounted 100cp item is free.

Items purchased from this section repair, resupply, and respawn each week.

You may combine items purchased here with similar-enough items you bring from elsewhere.

You may insert properties into a location of your choice whenever you import them into a new setting.

Commissions [-100cp]: Each week, you receive a few pieces of art in a format and style contemporary to your circumstances. Whatever those may be, these pieces are always sensual in nature and fitting to your preferences.

Outfit [-100cp]: An outfit that would be fitting in a business casual environment. It's comfortable, self-cleaning, and it always fits you well - no matter how absurd your proportions may become.

Toybox [-100cp]: A small chest that always contains the sorts of mundane sex toys and consumables you're looking for. Dildos, rope, condoms, lube, vibrators - it's all there, and there's always enough to go around.

-

Home [-200cp]: A comfortable single family home under your ownership, furnished and structured according to your desires. It doesn't cost anything to keep, and the neighbors are quite friendly and don't notice anything odd about anything that goes on here.

Tracker [-200cp]: A neat little device that's able to detect the presence of MacGuffins and point you in their direction. It takes some fiddling to attune it to whatever plot devices you are looking for, and you need to actually know what you're looking for in the first place.

Transport [-200cp]: A mundane modern vehicle of some civilian variety. It doesn't need fuel, and it's great for stake outs due to how unassuming it is.

Wardrobe [-200cp]: A wardrobe containing a collection of beauty products, accessories, and sexy lingerie and outfits. You can always find what you're looking for here, you can always pull out more, and you can always put things back to get rid of them. Everything you pull out of here is comfortable, self-cleaning, and always perfectly fits whoever wears them.

-

Bottomless Card [-400cp]: A card that's somehow both credit and debit, and which has a bottomless balance, allowing you to go on ridiculous shopping sprees and never have to worry about daily expenses again. The only limitation is that this card is really only good where cards are accepted - cash-only businesses, bribes, and excessively large purchases aren't on the table.

Business [-400cp]: A small business under your ownership, the kind of place that only has a single location if you aren't just running it out of your home and over the internet. As long as you put in the work and success is at all possible, this business is guaranteed to turn a good profit.

Harem Complex [-400cp]: A large apartment complex under your ownership, which somehow always has enough space to store your entire harem - even if that means space gets a bit wonky. Each apartment is quite spacious and comes furnished according to the desires and needs of the person assigned there. It doesn't cost anything to keep, has unlimited utilities, and nobody questions your choice of tenants.

-

Beyond Rubies [-600cp]: A case of the eponymous Rubies. They can come attached to a variety of accessories like necklaces and wristbands. Comes with a program for tracking and controlling all of the Rubies you decide to hand out, including viewing the end state of each wearer. All of these cannot be hacked or subverted without your express knowledge and consent, regardless of the method used, ensuring that your slaves cannot be so easily turned against you.

The case never runs out of Rubies, so you can keep expanding your slave harem as long as you can keep finding people to put them on. As you acquire supplies of similar items, like collars with special features, you may integrate those items into your Rubies - adding their special features. If you could build a feature into a Ruby, you may have said features be automatically included in the Rubies you get from this item.

Rubies default to the changes shown in the comic - turn women into horny bimbos with massively exaggerated bodily proportions and hair - but you can choose a different preset when you acquire this item. You may also spend an extra **-100cp** if you want access to as many different presets to work with as you want, rather than just the one. You may use your 100cp discount on this upgrade.

Jumper Industries [-600cp]: A large business under your ownership which is capable of producing and distributing any devices that you know how to make. You can choose the demographics of the employees as you please at the start of each jump (within the scope of the setting), and nobody finds anything odd or objectionable about, say, everyone working there being attractive asian women. The business also runs itself and is guaranteed to make a notable profit as long as such a thing is possible, so you can kick back in your c-suite and enjoy your employees without impacting things.

The actions of your business also simply don't trip any alarms, whether from outside authorities or from employees putting two-and-two together. If you have any ongoing plots that involve your business, they aren't likely to be disrupted by happenstance.

Companions

You may take companions as followers, opting out of any stipends they'd receive for the benefit of not taking up companion slots until imported elsewhere.

Create/Import [-100cp]: You may purchase this option multiple times. Each purchase allows you to create and/or import up to 8 companions. Each companion receives the listed discounts and freebies, plus 600cp to spend on perks and items.

In addition to however many times you purchase this option, you may optionally create or import 1 companion for free, with the same benefits as though you'd paid to create or import them. You may leave this slot open if you want to give someone you Export a build on their way out.

Export [Free]: So long as they are alive at the end of your time here, you can bring anyone you've convinced along with you as a companion. This includes those you've coerced or mind controlled.

Drawbacks

You can take as many drawbacks as you like.

Horny [+100cp]: For the duration of your stay, your libido is set to 'yes'. You'll have basically no resistance to the seduction of anyone you find even a little attractive, which will have obvious problems if you are in a dedicated relationship since those temptations will come.

Long Stay [+100cp]: You'll be staying in this world for 20 years, rather than the regular 10.

No Sampling [+100cp]: For the duration of your stay, you won't get to enjoy any sexual encounters. Circumstances will always get in the way, ensuring a dry spell for the whole time in this world.

Virgin [+100cp]: Starting off your time here, your abilities with sex and seduction will be reduced to zero. You can still work your way back to your full potential, but it will take quite a bit of work.

-

Amnesia [+200cp]: For the duration of your stay here, you will not remember anything about your chain or previous adventures. If you have a history, it's as though you are from this world. If you drop in, you find yourself as an amnesiac.

Bimbofied [+200cp]: Even if you were never touched by a Ruby, you find yourself with the body of a woman who's been heavily altered by one - tits past your knees, hair longer than you are tall, and other aspects of your physical appearance enhanced to absurd degrees. At least you look sexy.

Brutus [+200cp]: For the duration of your stay here, your subordinates will actively scheme to betray you and undermine whatever efforts you put forward. Even those you have under what should be perfect mind control will occasionally find ways to free themselves and work against you.

Misogynist [+200cp]: For the duration of your stay, you'll have the mindset of an extreme misogynist. Even if you like a woman, she's still an object to you at the end of the day. Even as a woman, you'll tend to weird out most men.

-

Enslaved [+300cp]: Starting off the jump, you find yourself enslaved to someone - someone who's the last person you'd ever want to have anything to do with. Incredibly unattractive and grating, using you in ways that you can't tolerate, you'll need some luck to find a way to break their hold over you.

Jailbreak [+300cp]: Somehow, the people of this world will get their hands on things you bring into this world and reverse engineer them. This includes even perks and powers, as all sorts of

conspiracies and shenanigans will slowly emerge with particular perks and items you have at the center of each of them. Expect chaos, especially if you've had a long chain.

This doesn't necessarily mean stealing from you or capturing you, it is simply that aspects of your previous builds will emerge and serve as catalysts for all sorts of *fun*. If you also take Power Loss, your purchases from this jump are what leak out.

NTR [+300cp]: Starting off this jump, one or more of your loved ones are under the control of someone else. It will take time to find them, and longer to break the control, all the while your loved one will be getting violated.

Power Loss [+300cp]: For the duration of your stay here, you will not have access to any perks or items from previous jumps, nor to any companions that you didn't pay to import. The only exception is what you get from your Body Mod or equivalent supplement.

Reprisal [+300cp]: For the duration of your stay, anyone that breaks free from your control will turn on you and oppose you with everything they have, killing you if they can and otherwise hindering you to the best of their abilities. This doesn't apply to any companions or followers, but beyond that even those who technically submit to your control of their own free will won't be happy if they ever get free.

The End

Stay Here / Return Home / Continue Chain

All drawbacks are revoked.

Notes

Fanwank responsibly.

You may opt out of options, including selectively opting out of the benefits of options you decide to take, but you cannot opt out of limits and drawbacks relevant to the benefits that you decide to take.

Beyond Rubies;

Overall, Rubies are capable of altering the wearer's body and mind in ways both lewd and practical. Nothing too far outside the realm of reality and porn, and only enhancing what's already there - at least without the aid of other perks and items.

Applying changes beyond your selected preset(s) or altering those preset(s) will require technical skills like **Rubytech** or **Systems Engineer**.

The default bimbo transformation hypersexualizes the female figure, including growing hair, expanding breasts and buttocks, shrinking the waist, and a number of other alterations that make the victim generally more attractive like reducing signs of aging and improving complexion. Less obvious effects include a notable improvement to stamina and endurance, a faster metabolism, and a stronger immune system. Other adjustments include a hypercharged libido and a large increase to sexual sensitivity.

Early on, the victim may experience blackouts or forget moments when the Ruby dictates their actions, but later on they are fully aware of how they're acting and have no issues with it - though they may feel different if the Ruby is removed. All of this happens while the wearer is conditioned to better serve her master, husband, lover, or whoever. The Ruby also adjusts the victim's orientation and romantic preferences, making them accepting of polygynous relations and relationships.

The process happens slowly over time, but sexual pleasure can hasten the effect and the changes accelerate more the more the victim has been affected. When multiple Ruby wearers have sex with or near each other, the Rubies can synchronize - massively accelerating the rate of change and allowing the wearers to experience each other's pleasure. This can have explosive effects on growth.

Beyond the automatic changes, the control system can be used to completely reprogram a victim's mind - altering memories, making them feel and think particular things, making them follow specific commands, and so on. Even going as far as completely removing their personality, leaving them a blank sex slave.

Also, when a Ruby is overloaded, it may burn out the wearer, leaving them as a blank sex slave. Finally, Rubies cannot be taken off by their wearer unless explicitly allowed, and they don't need to be taken off for bathing.

The Rubies you get from this item default to looking like the Rubies from the comic, though you can alter their appearance given the right skills - like **Rubytech**.

Rubies can affect men, and even change the wearer's sex.

Locked Profile: Your "true self" is what pulls you back, so you won't get stuck because you've been too mindbroken.

Rubytech: Without the aid of other perks and items, the devices you can create and modify with this perk cannot go too far outside the realm of reality and porn, and can only enhance what's already there.

Changelog

2025-07-15:

- Initial release.
- Renamed Peer Pressure to Salesman.
- Added to description of Making Connections, indicating that it can also be used for finding and securing a good master.
- Added notes for Beyond Rubies item to indicate that men can be affected and that Rubies can alter a wearer's sex.
- If you want to read the story, look at the center of the second line in the Notes section.
- Clarified what happens when you take Jailbreak and Power Loss.
- Fixed notes for Beyond Rubies and Rubytech.

2025-07-16:

- Reduced price of Home and Harem Complex by 1 tier.
- Added option to create or import 1 companion for free.
- Adjusted Beyond Rubies item notes to make it clear that Rubytech and Systems Engineer are useful for adjusting presets, not for bypassing the regular limits of what Rubies can do.
- Added clause to Create/Import to let people know they can leave the free slot open.

2025-07-17:

- Added line to Reprisal to indicate that only followers and companions are unaffected.
