"Perhaps you have heard tales about him.. but prepare for a tale never seen before. I wonder who you will be in this tale jumper...let us see"

It's a dangerous time after sun wukong's legendary journey to the west where he attained buddhahood but left the life above quietly to revel in the simple joys with his monkey's not knowing his actions only fueled the celestial court's mistrust. Take this..**2600** cp for you will need it jumper.

Origin:

Yaogui: a being of supernatural phenomenon but a low ranking one for now but even a low ranking one is still stronger than a human these days.(may choose your appearance as long as

it's not completely human examples include wolf, frog, fox for examples. May choose one power you have as a yaoguai)

Monk: a learned scholar(buddhist, seals and prayer, or taoist, Alchemy and martial arts, Are allowed or you can be both) with a impressive amount of skill in chi(mystic arts, magic, ki, chakra whatever you want to call it). You are part of a storied legacy for even sun wukong was trained by a wise master and then sun wukong traveled with Tripitaka on his journey. Perhaps one day you will become a wise master too in time.(appearance can be whatever you want from a gracefully aged man to a beautiful woman. You have a good amount of chi technique's and optional martial arts if you so desire.)

Drop-In: a new face are you? Perhaps a fallen celestial who found the rules annoying or perhaps someone who is destined or perhaps just a spirit that was just born due to one thing or another.(appearance can be changed although it's by default a monkey but it's truly up to you. Either way you have some power to you. Power can be from turning into smoke, Shape changing or more)

Celestial primate(-400 cp because of challenge's of might drawback): there were once four celestial primates, the intelligent stone monkey(sun wukong), the six eared Macaque, the long armed gibbon, the red butted baboon, three after sun wukong killed the Macaque. Now there are four again with you. As a celestial primate you are inherently powerful and extremely durable (as Macaque was able to match sun wukong despite lacking sun's immortality) to the point of being able to face even the entire celestial army and be able to win provided no one butts in. But you are not equal to sun wukong as the victorious fighting buddha at least not yet.(you may freely choose how you look but it must be a primate of some sort.)

General perks:

Merit leveling (free/100/200): you have access to the leveling system that goes up to 342. You get to keep the system for free and are level 1. **For 100:** your level is increased to 100 making you strong enough to match strong yaoguai kings and fairly skilled. **For 200:** your level is 200 making you strong enough you would give any god a tough battle and are impressively skilled.(note the stuff needed for further leveling will be put in setting for any other jump).

Immortality (free/200/300): you gain immortality at one level(most common) for free. you can pick what type of immortality it is. **For 200 cp:** you get two forms of immortality (very uncommon) your durability is increased. Pick two types of immortality. **For 300 cp:** you get three forms of immortality (only sun wukong has more) your durability is vastly increased almost to sun wukong's level. Pick three forms of immortality.

Beauty (free/100): you are physically improved to a better version of yourself for free. **For 100 cp:** you are physically very beautiful like the bull king's wife.(basically your a 20/10)

Sense of direction (free): you have a very keen sense of the direction of loot.

(Jumper's shrine):free/100: like the keeper of Black wind mountain you have your own humble shrine where you can improve, change yourself or make weapons and armor but you need materials and will(souls gathered or spirit's) to make the weapons and armor. **For 100 cp:** Your shrine is notably more elegant and has access to a shop and gives a weeks worth of materials and will that will replenish and add to the supply up to five week's worth (note the monkey king set will take five weeks for you to have enough).

Jumper's journey: your actions will be carried over from this jump and be a legendary story be it a novel,t.v shows, video games etc.(it will adapt to the local jump setting). But it will just spread your reputation quickly in this jump

Timeline:

Adventures of the monkey king:starts with sun wukong's birth and ends at the end of the journey to the west.(odds are you will take part in the journey with this)

The destined one's journey: after sun wukong was attacked by the celestial army and his remains (or so they say) lie within a stone egg where a monkey would start a journey to recover the six senses of the great sage.(odds are you will help the destined one in some way)

(What if timelines):

What if sun wukong and lady rakshasi(princess iron fan) were lovers: in this what if sun wukong and lady rakshasi were secretly lovers, unknown to the bull king, and red boy and his sister were sun wukong's children who he was loved by and he loved them in turn. Sun wukong hid them when the celestial court were about to attack mount huagou.(in this you will help sun wukong fight the army if not for his sake then for his loved ones)

What if Sun wukong succeeded in becoming the jade emperor: in this timeline when buddha challenged sun wukong to escape the palm of his hand sun wukong went past the pillars of the universe giving sun wukong equal power to the buddha and he took over the celestial realm and was actually a good ruler.(here you will have to make sure sun wukong's rule is stable)
