pictured above: Yoshi

Story

Yoshi's Island has no shortage of troubles. It begins when Kamek uses his crystal ball and sees the danger Mario and Luigi will pose to the Koopa King in the future. Kamek attacks the stork delivering the babies and kidnaps Luigi, but not before the Yoshi Clan finds Mario. The fate of the Mushroom Kingdom depends on what happens here, and there are many more adventures to be had!

Budget

Though a good story can sometimes sneak up on You when You're unprepared, this time You'll have the advantage of a little help. Whether You use this points to help define Your place in the world, gain new skills, or just make things a little easier is up to You.

Choice Points

Location

Yoshi's Island is home not only to the happy Yoshi Clan, but the nefarious Koopa Troop are well established and better fortified here as well. Where on the island do You begin?

Roll 1d8

or pay 100cp to choose

World 1

A place of grassy plains that seems locked in a period of perpetual springtime. It sometimes sees high winds, but this is great for the Yoshi Clan as it keeps away pesky Fly Guys and Toadies. Many Shy Guys and Fuzzies are found here. Both Burt the Bashful and Salvo the Slime make their homes here.

World 2

A mountainous zone with several pine woodlands. Two formidable forts are found among the forests: Bigger Boo's Fort and The Potted Ghost's Castle. This part of the island is littered with small caves in both the low and high areas. Lakitu and Koopa Paratroopa keep a close watch on the air here.

World 3

A place of thick jungles, deep murky pools of water, and steep falls. It has its share of caves as well. Mischievous monkeys are a problem here, as are the tribal Spear Guys. Those seeking shelter from the elements should avoid the Fort of the villainous Prince Froggy and Naval Piranha's Castle.

World 4

A section of the island with pleasant scenery that makes it resemble autumn throughout the year. The terrain here is a bit uneven with ravines that might seem difficult to navigate, but there are always robes and bridges somewhere that can lead You to other parts of the island. Marching Milde and Hookbill the Koopa have castles in the area.

World 5

The snowy peaks and beyond might seem cold at a glance, but on the whole the weather in the clouds remains quite comfortable. Sluggy the Unshaven and Raphael the Raven live here, guardian the peaks and cloud territories against intrusion by Yoshis. Skiing is a popular pastime in the area.

World 6

A barren landscape, with ash spewing from the nearby volcano keeping this part of the island cloaked in darkness. There are many dangerous obstacles here; things like lava, spikes, and rockslides can all appear at a moment's notice. The Spiky Tap-Taps live here, led by gigantic baddie Tap-Tap the Red Nose.

Free Choice

7

Should you make this lucky roll can begin anywhere you might want on Yoshi's Island. The choice is yours.

Bowser's Castle

8

Flight is the only way in or out of this monument to Baby Bowser's glory. The future king is a rather spoiled child, prone to throwing tantrums until his minions let him have his way. Even at this young age he's greedy and lacking in empathy. The path to his private rooms are perilous, with many deadly traps.

Race

Most of the race options below come with some history and familiarity with the world. These will give you a little bit of experience, but be aware that your personality and reactions to events may be altered by these memories and newfound instincts.

CHOOSE
ONE

pictured below: Yoshi weilding egg

Note: Not all Yoshi carry babies

Human

- No memories of the world or new experiences, only friends are the one that find you.
- No new instincts interfering with your thought process.

Humans are quite uncommon on the island, more often found in the nearby Mushroom Kingdom. A stork has mistakenly delivered you here, and being that this is a danger island and you're an infant... good luck.

Yoshi

- Very gluttonous [drawback] but thankfully you live on an island of plenty.
- Able to eat a massive variety of foods thanks to prehensile tongue and giant mouth.

Able to understand the languages of other races in the kingdom and fluent in the uncomplicated Yoshi language. Though your people live simple lives you can count on the clan to be helpful if you need it.

Toadie

- A stylish robe in a colour of your choice, complete with flight-enabling propeller.
- A strict boss, sometimes even mean, but are nonetheless loyal to the Troop. [drawback]

These koopas, not quite big or strong enough to work as foot soldiers of the Koopa Troop, instead make up for their smallness with quickness and opportunism. You answer directly to Magikoopa Kamek.

Shy Guys doing shy things

Shy Guy

- You live up to your races' reputation, easily startled and extremely shy. [drawback]
- The most common resident of the island, you'll find others wherever you go!

A crafty people, Shy Guys are one of the few groups that use tools or make new things on the island. Most varieties try to keep to themselves and run at strangers, but others still find a place working with Kamek.

Dirty Kidnappers

Age

Humans are 2 Year-old. Others arrive in this world as a 7-18 Year-old member of their chosen race, more than enough time for Yoshi, Shy Guys, and Toadies to act maturely. You may spend 50CP to begin at any realistic human age.

Gender

Gender has no bearing on whether or not a Yoshi can lay eggs and save the day. If you really want to change it though, you may do so for 50CP.

Drawbacks

Yoshi, Toadies, and Shy Guys all have their own racial drawbacks to overcome. By paying 50CP you can negate the affect of the drawback and enter the world without its influence.

Items

Equipment is hard to come by on the island, whenever something exciting and new shows up it's likely to be snatched away by the Toadies. Most of the best toys are all under heavy guard and kept by Baby Bowser. If you really want something, this will be your best chance to be sure you can have it.

MAX TWO

Excluding race drawbacks

Gluttonous

You just love to eat. Fruit, cookies, enemies, it doesn't matter (except for peppers and certain inedible foes). You'll strongly desire to eat everything You can fit in Your mouth. This won't make You eat friends, but You'll have trouble saving any stored food for later.

Yoshi extra 100CP

Minion

You're part of the Koopa Troop, taking orders from Kamek and Baby Bowser. You feel a sense of belonging and loyalty to the group, though this could change if You are to suffer enough abuse.

Toadie extra 100CP

Shy

You can't bear to let anyone see Your face, and feel the need to dress like others in Your area so that no one will pay attention to You. Being put in situations where attention is on You or You need to speak will make You deeply uneasy.

Shy Guy extra 100CP

Fruity

The Yoshi Clan is celebrating Your arrival on the island, because You're their favourite food. Every Yoshi You meet will have the singular goal of eating You, because You taste just that great to them. It's recommended You don't take Yoshi allies along with this complication.

200CP

Boss Bass

Choosing this creates a round fish large enough to swallow You whole. It cannot be harmed. Whenever You approach large bodies of water it will be there and attempt to eat You. It can spray water to knock You out of the air and jump very effectively. Should it swallow You, You will die.

200CP

Topsy Turvy

You have trouble keeping Your balance, in no small part due to the sudden shifts in gravity You experience. The peculiar fluxes seem to only affect You personally. You should take care to ensure there is always something above You, lest the world decide to make You fall upwards.

200CP

Babysitter

Due to a paperwork mix up with the storks, You've been tasked with taking care of a baby for 10 years. You'll want to do Your best to care for it, and it will be the regular target for kidnapping. When separated from You, it cries in a horrible way. Losing the baby for a week counts as death.

300CP

Nemesis

Just as Yoshi has an enemy in Kamek and Mario has animosity with Bowser, You too will find Yourself making a bitter enemy in this world. They won't necessarily have the same abilities as You, but what they do have will put them on equal footing and they will oppose Your goals.

300CP

Only Tears Now

You can't speak, write, purposefully use body language, or any other means to communicate Your desires to others. The only way You can show people that You want something is by crying. They'll need to figure out the rest.

300CP

The End

You need not leave if you truly want to stay. There are three final options in this world. You maintain gathered perks and items even if you want to move on.

Go Home

Has this world brought back old memories? If You're ready to end the journey You can travel back home. The only thing that has changed since You left is You.

Yoshi

This island is Your new home. You can stay forever, and there are endless adventures to expect in the coming years, both on the island and across the Mushroom Kingdom.

Next World

If You're not ready to stop travelling the multiverse choose this option. There are more worlds to visit, but You may never be able to visit this place again. Time remains stopped back home.

The Babysitter drawback gives You a baby version of a canon character from Mario. Once You complete the jump they may join You as a companion and begin to grow up normally.
