

Future Detective: The House Confinement Incident
jump.

Hello, jumper. Looks like you entered Earth again. Yes, it is a relatively mundane one, no magic, no monster, in fact if were to pinpoint its nature, I would say this world is very permissible to young detective and elaborate plot stories, like detective Conan come to life, save for one notable individual, young detective Sakio Saguru, the “Future Detective”, and his adopted sister Marie, Take these **1000 Choice Points**.

Origin

ALL Origins can be taken as a drop-in; age and gender are up to you. You may become one of the main characters or a different one with similar origins.

“Big” Brother

You may not necessarily be a brother, but you certainly are both the more mature and more responsible one, even if your stature is not often as grand; now if only your “sister” wasn’t so devious.

“Little” Sister

You may not be actually blood-related, or even adopted, but you certainly are the more whimsical and devilish of the two; even if your rapidly growing body says otherwise, you are still “little” after all.

Time and Location

If Japan, specifically the “Plaster Manor” of Ishinai Takumi, right before a series of unfortunate murders were to happen, if you want to know, it was the maid. There, now you will likely survive, and the police are right there.

Perks

Origins get their 100CP perks for free, and the rest are discounted 50%. All Perks are toggleable.

General [Undiscounted]

Hentai security [Free]

The essential: a tight pussy/big dick, immunity to STDs, never chaffing, and all inconvenience before, during, or after sex are gone, and control over your own fertility, and decide how your children will look and behave as well as what they will inherit.

Kakuzatou Tastes [Free]

If there is one thing you can't criticize, it is their taste; the characters are Thicc and eye-popping gorgeous, you now can incorporate that style or improve the world's general beauty. If bent toward that type of figure, you can even do both. As for behavior, well, plots that are similar to the original doujins they draw can also be made far more likely and acceptable, and make the world lewd; I leave it to you to decide what and how this perk is incorporated.

“Big” Brother

Too cute for words [100 CP]

Regardless of how you look, you can now emit an aura of cuteness and harmlessness, making you appear both cute but irrelevant, perfect if you want to be overlooked or underestimated; this does not work perfectly on those who know you or are extremely observant.

Bad Boy [200 CP]

With this perk, you will never have to fear for your attractiveness; regardless of how you look, you will always be taken seriously when you want, but also never be considered less of a man due to looks or stature/size, making your competence attractive and making you always seem like a viable man. In fact, the cuter you look, the bigger your partners are, the more manly or attractive you are to them, and the more satisfied they are; this also makes you irresistible to women who are generously endowed, regardless of any familial connection.

Detective Prodigy [400 CP]

You are a detective after all; this not only boosts your talents and intuition when it comes to detective work, but it also grants you comprehensive knowledge of detective work, investigation, observation, interrogation, analysis, judicial processes, and logical deduction, along with increased body language detection and whatever tool an expert detective might know.

Foresight [600 CP]

You can now be rightfully called the “future detective” with this power. You have gained the psychic power called foresight, the ability to see the future. It works in two ways and can be switched whenever you wish, even combined:

The first way is the rapid way, letting you see phantom images of future events happening superimposed where you see in the short future, about 24 hours; this one is useful in that it is immediate; you can see the trajectory and see what actions you can take to change it and their outcomes to a more beneficial end.

The second is a full immersion version where the user has an entire full sensory experience of the next week; it freezes the user for 10 seconds in real time but does not allow for immediate modification; this merely allows you to see what happens if you commit to the action and nothing more.

The exact length of future visions is not fixed and can be trained; they can also be used both voluntarily or programmed to be used instinctively or as unconscious reflexes, based on the small intuition this power whispers to your subconscious. And about the exact mechanics, you can decide at any time if the future you see is the absolute future or the most likely, but regardless, the only way for it to change is through your own decision, and those who are immune to fate or singularities of time (people who quantumly only exist in the present)

“Little” Sister

Soft and Heavy [100 CP]

You may have the mass of a fertility goddess; you are as soft as velvet and duvet and never seem to crush your partner, regardless of how much you slam against them; unless desired otherwise, this also peaks your genetics to be both large and wide, and very endowed too.

No Way! [200 CP]

I can't believe how much they can let you get away with; much like many youngest siblings, you can disarm, trick, and shift blame away like nobody's business. You never betray how smart and devious you are and always are a master actor, making you generally the last person suspected, especially if it's a friend or family member.

My plan [400 CP]

You definitely possess a seductive devilish charm; not only are you very much endowed, but the way you handle sex is masterclass, especially in the smothering way type. You can seduce practically anyone regardless of preferences or orientation and know exactly how to dominate and overwhelm your partners; you are especially adept at using your massive body and endowments to trap your partner in place and know exactly how to corrupt your target in a few weeks of teasing and fuck them dumb.

That was the Vision [600 CP]

The entire story happen because one girl really want to turn her “brother” into “father”, using his own powers against him, you are terrifyingly smart, in the crafty, cunning and devious way, making plan that were tailor made to take down and dominate an individual (sexually in general), and is especially good at making plan that take in account foreign senses like future sight, in fact the more your target rely on them the worse it is for them, if your target can hear surface thought, you would have them begging in a week or two, one who can read an entire life, barely a day, provided they remember, this does not work on those that cannot feel pleasure or can turn it off. This power is effective against family members, adopted or otherwise; your very own “path to sex/love”. This part is explicitly a superpower on the same level as foresight and can be activated/trained, save the intelligence.

Companion export [100 CP]

So, you want to bring others? Sure, just pay the price.

Your Little Sister/Big Brother [free]

This young girl was a victim of some crime until you rescued and adopted her, making her practically bound to you; while young and naïve, she does have her devilish side, particularly when she wants you to see her as more than your sibling, and yes, despite her generous body and mass, she is young and still growing. While she is quite aggressively hungry for you if ignored, she will happily be your enthusiastic sub/mommy should you wish it, happily taking whatever role pleases her hero.

Alternatively, you can have a Big brother: this child-looking man is a detective of some renown who rescued you during one of his cases, and despite not wanting to admit it, really cares about you, but stays mostly out of shame and embarrassment over how attractive you looked recently. Pass a few days stuck with him, and you'll have him practically begging for you. Despite both choices being intelligent and cunning, they are unfortunately very weak to sex with you.

Drawbacks

Take as many as you want

Rule 63 [+0 CP]

Yeah, not everyone swings that way, me either, pal, so let's switch things up: you can decide the genders and orientations of both Marie and Suguru; hell, go make them Yuri or something.

Supplement mode [+0 CP]

You can use this as a supplement for another jump; the points rest separate, though.

Extended Stay [+100 CP]

For each purchase of this, your time here is extended by 10 years. Only the first 6 give you points.

Not Worry [+200 CP]

You really are easy to distract: a pretty face, huge boobs and caress, and you might voluntarily drink the drug.

Understaffed [+400 CP]

There is no other explanation why the police are this passive; seriously, unless you catch the criminal, they will just stay useless.

Open The Door [+400 CP]

Well, look like someone's a player. See, there is something about you that really attracts thicc devious ladies who want to eat you in the best way possible, be it your "sister", your "nemesis", a spy, or whatnot. Good luck, cause if you aren't paying everyone their dues, they might just lock you up.

Lockdown [+600 CP]

You have no **Out of Context** items, powers, or warehouse.

A Wider World [+600 CP]

Take this and every original story published by the author happens during your stay. Why is this a drawback? Well, technology is getting wilder, considering things like memory removers are known to be used, and this jump doesn't really offer combat potential.

The Sequel? [+600 CP]

This is loosely inspired by a junior detective series, so why not explore deeper? Why the assassination? Who's truly behind this? Why do you have foresight? And any other question, this would make a nice manga in my opinion...
